Regulating Labour through Foreign Punishment? Codification and Sanction at Work in New Kingdom Egypt

Alexandre A. Loktionov 

Christ's College, University of Cambridge, Cambridge, United Kingdom; National Research University Higher School of Economics, Moscow, Russia, e-mail: al621@cam.ac.uk

Abstract

This paper investigates two New Kingdom Egyptian texts pertaining to labour regulation: the Karnak Decree of Horemheb and the Nauri Decree of Seti I. They focus on combating the unauthorized diverting of manpower and represent the oldest Egyptian texts (fourteenth–thirteenth century BCE) explicitly concerned with the legal dimension of managing the workforce. After a brief historical overview, the paper outlines each text's key content and stylistic features. It shows that while some of these are likely native to Egypt, others may have been imported from Mesopotamia. More specifically, it appears that the sentence structure is native Egyptian, but the sanctions deployed are likely of foreign origin, aligning more closely to the contemporary punitive tradition of Mesopotamia. This is probably no coincidence, given the close contact between Egypt and the broader Near East at that time. This uptake of foreign ideas may have achieved more efficient labour regulation by enforcing stricter rules for non-compliance while simultaneously maintaining a veneer of Egyptian authenticity in line with official state ideology.

Introduction

This paper looks at two texts of the Egyptian New Kingdom (c.1550–1069 BCE, [Figure 1](#)),¹ both concerned with questions of good government and, more specifically, labour regulation, including combating the unauthorized diverting of manpower and resources from state-sanctioned projects. These texts are two royal decree stelae: the Karnak Decree of Horemheb (c.1323–1295 BCE)² and the Nauri Decree of Seti I

¹Throughout this paper, dates follow the chronology in Ian Shaw (ed.), *The Oxford History of Ancient Egypt* (Oxford, 2000), pp. 479–483.

²For the original edition and commentary in French, see Jean-Marie Kruchten, *Le Décret d'Horemheb. Traduction, commentaire épigraphique, philologique et institutionnel* (Brussels, 1981). For a more recent English translation, see William J. Murnane, *Texts from the Amarna Period in Egypt* (Atlanta, GA, 1995), pp. 235–240. Note that the inscribed date of the text has not survived, so it could have been written at any time in Horemheb's reign, although a relatively early promulgation coinciding with a new accession seems likely.

(c.1290 BCE),³ which together represent the oldest Egyptian texts explicitly concerned with the legal dimension of managing the workforce. After providing a summary of the historical context, this paper will outline each text’s key content and stylistic features before investigating their possible origins. As will be demonstrated, the predominant sentence structure in each text has Egyptian precursors of

³For the original edition, with photographs, transcription, and a drawing of the stela, see Francis Llewellyn Griffith, “The Abydos Decree of Seti I at Nauri”, *Journal of Egyptian Archaeology*, 13 (1927), pp. 193–208. A more recent hieroglyphic transcription is available in Kenneth A. Kitchen, *Ramesside Inscriptions: Historical and Biographical* (Oxford, 1975), I, pp. 45–58, with accompanying translation in Kenneth A. Kitchen, *Ramesside Inscriptions Translated and Annotated* (Wallasey, 2017), I, pp. 29–37. For an alternative translation and legal commentary, see William F. Edgerton, “The Nauri Decree of Seti I: A Translation and Analysis of the Legal Portion”, *Journal of Near Eastern Studies*, 6 (1947), pp. 219–230. The text has an inscribed date in year four of Seti I, which would place it in 1290 BCE according to the chronology in Shaw, *Oxford History of Ancient Egypt*.

significantly greater age. The same cannot be said of the sanctions specified in the content. Instead, these align more closely with the contemporary punitive tradition of Mesopotamia, and such an alignment is unlikely to be coincidental given the close contact between Egypt and the broader Near East at that time. Hence, it will be shown that the texts imbue a native Egyptian structure – reflecting a broader underlying intellectual tradition – with meanings and regulations imported from elsewhere. In turn, this was likely central to their purpose of achieving more efficient labour regulation by enforcing stricter rules for non-compliance while simultaneously maintaining a veneer of Egyptian authenticity in line with official state ideology.

Historical Context: Socio-Political Turbulence Against a Backdrop of Imperial Expansion

The four decades preceding the reigns of Horemheb and his successor, Seti I, were characterized by political, religious, and dynastic tumult. The upheavals began with Egypt witnessing the abolition of its traditional pantheon under the rule of Akhenaten (r. 1352–1336 BCE), who introduced an exclusive focus on worshipping the sun disc instead and also saw the royal court relocated to a new capital city built at vast expense on a previously uninhabited desert site.⁴ This new religion and capital both promptly collapsed during the subsequent reign of Tutankhamun (r. 1336–1327 BCE), who was throughout his reign a child king suffering from severe ill health and physical deformities, and whose pharaonic power was almost certainly wielded by others on his behalf.⁵ Furthermore, he died childless, with the throne passing to an elderly royal advisor, Ay (r. 1327–1323 BCE). Ay himself was unable to secure the succession for his designated heir, Nakhtmin, and was instead succeeded by another leading courtier, Horemheb (r. 1323–1295 BCE), with whom Ay had endured a fractious relationship.⁶ Under Horemheb's rule, the Egyptian government again altered its course, with Akhenaten, Tutankhamun, and Ay denounced as heretical for not breaking with the past in sufficiently radical fashion. To complicate matters further, all this political instability appears to have been exacerbated by malaria and plague outbreaks,⁷

⁴The literature on Akhenaten and his reign is extensive. See for instance Nicholas Reeves, *Akhenaten: Egypt's False Prophet* (London, 2001); Dimitri Laboury, *Akhénaton* (Paris, 2010); Barry J. Kemp, *The City of Akhenaten and Nefertiti* (London, 2012).

⁵For more on the restoration of Egypt's traditional religion, see David P. Silverman, Jennifer H. Wegner, and Josef W. Wegner, *Akhenaten and Tutankhamun: Revolution and Restoration* (Philadelphia, PA, 2006); Aidan Dodson, *Amarna Sunset: Nefertiti, Tutankhamun, Ay, Horemheb and the Egyptian Counter-Reformation* (Cairo, 2018). For a recent detailed study of key events and policies under Tutankhamun, see Marianne Eaton-Krauss, *The Unknown Tutankhamun* (London, 2015).

⁶For a study of the struggle between Ay and Horemheb, see Nozomu Kawai, "Ay versus Horemheb: The Political Situation in the Late Eighteenth Dynasty Revisited", *Journal of Egyptian History*, 3 (2010), pp. 261–292.

⁷For more on diseases at this time, see Eva Panagiotakopulu, "Pharaonic Egypt and the Origins of Plague", *Journal of Biogeography*, 31 (2004), pp. 269–275; Lisa Sabbahy, "Did Akhenaten's Founding of Akhetaten Cause a Malaria Epidemic?", *Journal of the American Research Center in Egypt*, 56 (2021), pp. 175–179.

as well as famine.⁸ All of this would almost certainly have negatively impacted the prestige of successive Egyptian kings, who faced an acute crisis of legitimacy.

At the same time, while individual kings struggled to assert themselves, Egypt as a polity was arguably “wealthier and more powerful than it had ever been before”.⁹ Despite the internal chaos, the country was nearing its maximum territorial extent, comprising both a military and trading empire stretching from various vassal states in the Levant to south Sudan.¹⁰ This presented rulers with both a challenge and an opportunity: on the one hand, internecine strife had made the monarchy weak; on the other hand, a king who could successfully restore stability and royal power had the prospect of ruling over what was at the time one of the world’s largest and wealthiest states, while also complying with Egypt’s long-standing ideological trope of a new monarch restoring order.¹¹ Effective regulation of labour and control of the workforce would inevitably have to be part of this.

Karnak Decree of Horemheb

The Karnak Decree of Horemheb is the older of the two texts addressed here and was found carved on a large stela at the Karnak temple complex in Thebes, Upper Egypt. After the upheavals described above, the reign of Horemheb represented a return to relative political and religious stability.¹² Thus, it is likely that – especially given his lack of royal descent and difficult relationship with the previous pharaoh, Ay – one of Horemheb’s most pressing priorities upon acceding to the throne was to reassert the primacy of his royal authority. The Karnak decree was, therefore, most probably designed to shore up the legitimacy of both the royal office as an institution and of Horemheb specifically as its rightful holder.¹³

The decree text provides a symbolic affirmation of the pharaoh’s commitment to maintaining order in Egypt while also laying down practical rules for how this was to be done. It begins with a relatively short preamble describing how Horemheb possesses divine favour, and how he will use his royal status to establish justice in the land. This is followed by the main decree, consisting of provisions condemning

⁸For more on poor nutrition during this period, see for instance Jerome C. Rose and Melissa Zabecki, “The Commoners of Tell el-Amarna”, in Salima Ikram and Aidan Dodson (eds), *Beyond the Horizon: Studies in Egyptian Art, Archaeology and History in Honour of Barry Kemp* (Cairo, 2010), pp. 408–422; Gretchen R. Dabbs, Jerome C. Rose, and Melissa Zabecki, “The Bioarchaeology of Akhetaten: Unexpected Results from a Capital City”, in Salima Ikram, Jessica Kaiser, and Roxie Walker (eds), *Egyptian Bioarchaeology: Humans, Animals and the Environment* (Leiden, 2015), pp. 31–40.

⁹Jacobus van Dijk, “The Amarna Period and the Later New Kingdom”, in Shaw, *Oxford History of Ancient Egypt*, pp. 272–313.

¹⁰For more on the extensive territorial claims of imperial Egypt at this time, see most recently Ellen Morris, *Ancient Egyptian Imperialism* (Hoboken, NJ, 2018), pp. 117–252.

¹¹Texts praising kings for establishing order by various means, including defeating enemies, launching building works, and resolving disputes, are prevalent across all phases of Egyptian history. For a representative range of New Kingdom examples and further references, see Miriam Lichtheim, *Ancient Egyptian Literature, Volume II: The New Kingdom* (Berkeley, CA, 2006), pp. 41–86.

¹²For a biography of Horemheb, see Charlotte Booth, *Horemheb: The Forgotten Pharaoh* (Stroud, 2009).

¹³For more detailed discussion of the nature and purpose of the decree, see Andrea Gnirs, “Haremhab. Ein Staatsreformer? Neue Betrachtungen zum Haremhab-Dekret”, *Studien zur Altägyptischen Kultur*, 16 (1989), pp. 83–110.

a range of illegal practices perpetrated by royal officials abusing their power. Offences include seizing boats and wood belonging to private individuals (i.e. non-state property), seizing labourers working on private projects, seizing animal skins from the rural population, demanding unjustifiably high tax payments, and taking grain, fruit, vegetables, and linen from private estates. A key concern of the text is thus the protection of private wealth and property, and one form of such wealth is privately owned labour. The following passage illustrates the nature of the labour concerns raised in the decree:¹⁴

n3 n sdm.(w)-^cš it p3 hm t3 hm.t n nmhy mtw n3 n sdm.(w)-^cš h3b.w m wp.wt r t3 kt hr hrw-6 hrw-7 iw bw rh.tw šm.t m-di=sn m wstn r-nty hn pw n h3w p3y m rdī ir.tw m-mit.t grw

The attendants¹⁵ grab the male and female servant(s) of the private party, and the attendants send them on assignments (*wp.wt*)¹⁶ to gather saffron for six days or seven days, without them having permission to go freely. Thus, this is a matter of excess. Do not allow such action anymore.

Judging from content earlier in the decree, it is apparent that the “attendants” in question are state officials who have – at least in Horemheb’s eyes – become overmighty and are threatening to strip the non-state sector of the Egyptian economy of its labour capacity. The provision of the decree, therefore, effectively amounts to a regulation of conscription. To counter the apparent threat of non-state actors carrying out such conscription for labour projects, the text decrees that these offenders should be dealt with as follows:¹⁷

ir sdm.(w) nb n ^ct hntk pr-^cz ^cnh.(w) wd3.(w) snb.(w) nty iw.tw r sdm r-dd st hr kfc r t3 kt grw hnc nty ky it r smi r-dd it.(w) p3y=i hm t3y=i hm.t in=f ir.tw hp r=f m sw3 fnd=f di.w r T3rw hnc šd.(t) p3 b3k n p3 hm t3 hm.t m hrw nb irr=f m-di=f

As for every attendant of the chamber of offerings of Pharaoh (l. p. h.)¹⁸ about whom one will hear that they are requisitioning (people) to gather saffron, moreover with somebody coming to report: “my male servant and/or my female servant have been seized by him”, the *hp-law*¹⁹ will be enforced against him in

¹⁴Kruchten, *Le Décret d’Horemheb*, p. 58 (ll. 21–22), p. 60 (E–H). This and all subsequent translations into English are mine.

¹⁵This refers to *sdm.(w)-^cš* – officials in state service, as opposed to private parties (*nmhy*). The accusation seems to be of abuse of (originally legitimate) power.

¹⁶For the full range of meanings associated with this term, see Adolf Erman and Hermann Grapow, *Wörterbuch der Ägyptischen Sprache* (Berlin, 1926), I, pp. 302–304. Based on context, a generic translation of “assignment” seems most appropriate here.

¹⁷Kruchten, *Le Décret d’Horemheb*, p. 58 (ll. 22–23), pp. 60–61.

¹⁸Conventional blessing formula after mention of the pharaoh: “may he live, prosper, and be healthy”.

¹⁹In contexts such as these, *hp-law* appears to denote legal provision of a tightly codified nature. For the most recent discussion of the topic, see Alexandre A. Loktionov, “The First ‘Lawyers’? Judicial Offices, Administration and Legal Pluralism in Ancient Egypt, c.2500–1800BCE”, in Edward Cavanagh (ed.),

severing his nose, deporting him to Tjaru,²⁰ and confiscating the (fruits of) the work done by the male servant and/or female servant on every day that he worked for him.

The decree also deals with a series of related offences that are not strictly concerned with regulating the provision of manpower but do directly address the abuse of state-sanctioned authority and the misappropriation of resources associated with the labour regime. For instance, in the section on the extortion of animal skins, the following provision is made:²¹

*ir^c nḥ nb n mš^c ntw iw.tw r sḏm r-dd sw ḥr šm.t ḥr nḥm dḥr.w grw šz^c m p3 hrw
ir.tw ḥp r=f m ḥw.(t)=f m sh-100 wbn.w-sd-5 ḥn^c šd.(t) p3 dḥr ḥt.n=f m-di=f
m-t3.w*

As for any soldier about whom one will hear that he is still coming to seize animal skins up to this day, the *hp*-law will be enforced against him in striking him with 100 stick blows and five open wounds, and confiscating the animal skin which he seized for himself through theft.

The final part of the text is a self-laudatory royal narrative reinforcing the themes set out in the introduction, wherein Horemheb recapitulates how he established justice in Egypt, appointed fair officials to judge cases, mercilessly crushed corruption, and ultimately caused the land to flourish. The king pledges to maintain good order and rule in accordance with the established custom in the future and sets out various ceremonial and administrative duties, which he intends to assign to his subordinates. The text ends with an affirmation of the king's divinity, likening his radiance to that of the sun and stressing the importance of his instructions being followed. The individual judicial provisions of the decree are therefore shown to effectively be a case study demonstrating the wide-ranging justice dispensed by the king – and labour regulation is part of that precept.

Nauri Decree of Seti I

Seti I promulgated his decree, carved into a monumental cliff-top stela at the site of Nauri in Egyptian-occupied Nubia (Figure 2), perhaps only two decades after the Horemheb decree and almost certainly at a time when the release of the earlier text was still in living memory. The circumstances of his accession were also not dissimilar: while, unlike Horemheb, Seti I was the son of a king, his father,

Empire and Legal Thought: Ideas and Institutions from Antiquity to Modernity (Leiden and Boston, MA, 2020), pp. 36–68, 50–53. Specific periodic contexts of *hp*-law are also discussed in depth in Charles F. Nims, “The Term *hp*, ‘Law, Right’ in Demotic”, *Journal of Near Eastern Studies*, 7 (1948), pp. 243–260; Adeline Bats, “La loi-*hp* dans la pensée et la société du Moyen Empire”, *Nehet*, 1 (2014), pp. 95–113.

²⁰A fortress on Egypt's north-eastern border in the Levant, representing banishment to the very edge of the country. For the latest research on this site, see El Aguizy, “The *Khetem* of Tjaru: New Evidence”, *Nehet*, 6 (2018), pp. 1–7.

²¹Kruchten, *Le Décret d'Horemheb*, p. 80 (l. 27), p. 83 (O–P).

Figure 2. Upper register of the Nauri decree stela, depicting Seti I offering to the gods an effigy symbolizing justice.

Ramesses I, had enjoyed an exceptionally brief reign of only one year and was not of royal blood. Therefore, Horemheb’s concerns about royal legitimacy probably applied, to some extent, to Seti I’s motives, too, even if he was inheriting a country after a period of rather more stable government compared to the environment that Horemheb had faced. Even so, given its overall temporal proximity to the Horemheb text, it is perhaps unsurprising that the Nauri decree is generally similar in content to the Horemheb decree, with the difference that it relates specifically to actions in and around the king’s temple foundation (termed “Menmaatre, heart content in Abydos”). Like the Horemheb text, the Nauri decree begins with a preamble – this time of somewhat greater length – emphasizing the credentials of the king as the defender of the realm and pious servant of the gods. In particular, it stresses how these good qualities are brought out through the king’s devotion to the temple he has constructed at Abydos. The text then moves to the main body of the decree, condemning a wide variety of practices, including the seizing of labourers working on the royal temple estate for unrelated purposes, the arbitrary detaining of boats, tampering with fields of the royal temple estate, seizing cattle and other animals belonging to the estate, and unspecified wrongful conduct against hunters, fishermen, and tenants of the estate.

Its concerns about people – or, more specifically, workers with duties on the estate – being unfairly forced into unrelated labour are phrased in a similar way to the Horemheb decree. For instance, among the stated aims of the decree is:²²

*r tm rdi.t it3.tw rmt nb n pr pn m kf.w m w n w m bryt m bhw n sk3 m bhw n
 c w3y in s3-nsw nb hry-pd.t nb h3.ty-c nb rwd.w nb rmt nb h3b.w m wp.t r K3š*

²²Kitchen, *Ramesside Inscriptions*, p. 51 (ll. 5–8).

To prevent any person of this estate being taken as a captive from district to district, by obligatory service (*bryt*)²³ or by forced labour (*bḥw*)²⁴ of ploughing, or by forced labour (*bḥw*) of reaping by any King's Son (i.e. viceroy), any troop-commander, any count, any agent or any person sent on an assignment (*wp.t*) to Kush.

When describing specific offences and punishments relating to illegal appropriation of labour, the Nauri decree goes into more detail than the Horemheb decree. The main block of text about this is as follows, characterized by lengthy clauses and a high degree of specificity in setting out the punishments due:²⁵

ir^{SIC} *s3-nsw n K3š nb ḥry-pd.t nb ḥ3.ty-^c nb rwd.w nb rmt nb nty iw=f r it3 rmt nb n t3 ḥw.t Mn-M3^c.t-R^c ib hr.w m 3bd̄t m kf.w m w n w m bryt m bḥw n sk3 m bḥw n ^cw3y m m-mit.t p3 nty iw=f r it3 s.(t)-ḥm.t nb n rmt nb n t3 ḥw.t Mn-M3^c.t-R^c ib hr.w m 3bd̄t m-mit.t n3y=sn ḥm.w m kf.w r ir.t wp.t nb nty m t3 r dr=f m-mit.t kd̄n nb ḥry-ih.w nb rmt nb n pr-nsw h3b.(w) m wp.t nb n pr-^c3 ^cnḥ.(w) wd3.(w) snb.(w) nty iw=f r it3 rmt nb n t3 ḥw.t Mn-M3^c.t-R^c ib hr.w m 3bd̄t m w n w m bryt m bḥw n sk3 m bḥw n ^cw3y m-mit.t r ir.t wp.t nb ir.tw hp r=f m ḥw.t=f m šḫ-200 wbn.w-sd-5 ḥn^c šd.(t) b3k.w n p3 rmt n t3 ḥw.t Mn-M3^c.t-R^c ib hr.w m 3bd̄t m-^c=f m hrw nb nty iw=f r ir.(t)=f m-^c=f dd.(w) r t3 ḥw.t Mn-M3^c.t-R^c ib hr.w m 3bd̄t*

As for any King's Son (i.e. viceroy), any troop-commander, any count, any agent or any person who will take any person of the Foundation²⁶ as a captive from district to district by obligatory service (*bryt*) or by forced labour (*bḥw*) of ploughing, or by forced labour (*bḥw*) of reaping, likewise the one who will take any wife of any person of the Foundation, and likewise their dependents, as captives to do any assignment (*wp.t*) which is in the entire land, and likewise any charioteer, any overseer of herds, or any person of the royal estate sent on any assignment (*wp.t*) of Pharaoh (l. p. h) who will take any person of the Foundation from district to district by obligatory service (*bryt*) or by forced labour (*bḥw*) of ploughing, or by forced labour (*bḥw*) of reaping, and likewise to do any assignment (*wp.t*), the *hp*-law shall be done (i.e. enforced) against him by beating him with 200 blows and five inflicted wounds, together with confiscating the (fruits of) the work of the people of the Foundation, from him with regards to every day which he will spend with him, it being given to the Foundation.

²³For this word, see Erman and Grapow, *Wörterbuch der Ägyptischen Sprache*, p. 30. It is very rare and appears to denote obligatory service of some form, but attestations are too few to provide a more specific definition.

²⁴For this word, see Erman and Grapow, *Wörterbuch der Ägyptischen Sprache*, p. 468. Much like *bryt*, its rarity means that, beyond a general connection to forced labour, a specific definition is impossible. It is near certain that *bḥw* and *bryt* differed, but it is unclear how.

²⁵Kitchen, *Rameside Inscriptions*, pp. 52 (l. 13)–53 (1.10).

²⁶In the original text, the name of the foundation is invariably written in full: “Menmaatre, heart content in Abydos”.

Other punishments prescribed in the decree include severing the ears and nose, impalement, and compulsory labour for both convicts and their families.²⁷ While not all of these are strictly related to violations related to the provision of human labour, all are in some way associated with resource management or the logistics thereof, and are thus directly related to the work environment. At the end of the decree, just as with the Horemheb text, there is a short epilogue stressing that the royal instructions provided earlier reflect the divine will and that they, therefore, evince the responsible nature of the king's rule.

Overall, the Horemheb and Nauri decrees are very similar, both in style and content. Stylistically, both have a tripartite structure, with the main body of the text – the decree proper, including the discussion of labour regulation – illustrating the justice, wisdom, and divine favour of the monarch, which is extolled explicitly in the prologue and re-emphasized by the ring composition achieved through these same themes being highlighted once more at the end. In terms of content, they share both a common set of behaviours, which they seek to curtail, namely, abuses in and around labour misappropriation, and similar sets of punishments marked by a violent, highly physical nature – although the later decree is more detailed and seemingly more brutal in its provisions.

Differences can also be observed with regard to the type of labour being regulated: in the Horemheb text, emphasis is placed on curbing abuse of authority by royal officials appropriating private labour and the fruits thereof, while the Nauri text protects labour that is itself tied to a royal foundation, although the offenders are still royal officials. Given the slightly later date of the Nauri text, one might speculate that the shift in focus towards specifically protecting royal labour is linked to the crown having, by that point, accrued additional estates and resources that previously did not need protecting because they were not there. Horemheb inherited a crown weakened by decades of political chaos, and it would have been logical for him to rely on private labour as part of his rebuilding mission. Seti I may not have had to rely on the private sector as much, as he would have benefited from the relative stability of what had come before him. Nonetheless, such a hypothesis must not be overstated: first, the comparison is imperfect since neither text is perfectly preserved, with the Horemheb decree, in particular, missing many fragments, and second, the existing labour management differences might be down to the specific functions of the individual decrees rather than any broader socio-economic phenomenon: the function of the Nauri text was to protect a particular royal foundation and its workers, whereas the Horemheb text was more concerned with remedying labour management ills at large. The fact that these texts had different goals might suggest a change in the situation, but it cannot prove it. On the other hand, the similarities between the texts, as revealed by their common structure, the offences targeted, and the punishments deployed, cannot be subjected to similar doubt. Nor can the promulgation of such decrees so close to one another chronologically be convincingly attributed to coincidence, especially bearing in mind that no comparable text of labour regulation had ever been produced before.

²⁷Edgerton, "The Nauri Decree of Seti I", pp. 221–227.

Precursors: How Did These Forms of Labour Management Come About?

The Horemheb and Nauri decrees can be considered among the oldest records of tightly defined legislation relating to labour management in ancient Egypt. However, while they are certainly innovative – and, indeed, unique – in this regard, they contain numerous traits that are also evident in earlier documents. Of great significance here is the grammatical structure employed in setting out the legal provisions in the decrees: it is the protasis-apodosis conditional sentence, wherein the execution of the punishment laid out in the second clause (the apodosis) is dependent on the offence specified in the first clause (the protasis) on both a broader conceptual and a narrower syntactic level. Thus, the two texts are related not only in law but also in grammar.

The roots of the protasis-apodosis formulation can be traced to as early as the Old Kingdom, over an entire millennium earlier. We already see something stylistically and conceptually similar in a decree on a stela of King Neferirkare (r. 2475–2455 BCE), although – as will be discussed – the level of detail and legal sophistication provided is not quite comparable. The text, which is unfortunately not fully preserved, gives instructions about how certain classes of delinquent are to be treated, and its shorter clauses make the individual provisions easy to break down into their constituent protasis-apodosis components:²⁸

ir s nb n š.t it.ty=fy hm.w-ntr nb nty.w hr 3h.t ntri w^cb.t=sn hr=s m š.t tw r r3-^c.wy hn^c k3.t nb.t n.t š.t m3^c=k sw r hw.t-wr.t di r k3.t... m3t sk3 it bd.t

As for any man of the district who will take any *hm-ntr*-priests who are upon the sacred land upon which religious service is conducted in this district for corvée labour (*r3-^c.wy*) together with any work of the district,

Protasis:
offenders/offences
committed

you shall lead him to the great enclosure (*hw.t-wr.t*) and put (him) to work [...] granite and harvesting barley and emmer.

Apodosis:
envisaged sanction

ir s nb n š.t it.ty=fy mr.t nt.t hr 3h.t ntri n.t š.t r r3-^c.wy hn^c k3.t nb.t n.t š.t m3^c=k sw r hw.t-wr.t di r k3.t...m3t sk3 it bd.t

As for any man of the district who will take *mr.t*-people [tenants?] who are upon the sacred land of the district for corvée labour (*r3-^c.wy*) together with any work of the district,

Protasis:
offenders/offences

²⁸Hratch Papazian, *Domain of Pharaoh: The Structure and Components of the Economy of Old Kingdom Egypt* (Hildesheim, 2012), p. 130. Modifications highlighting the protasis-apodosis clauses have been added by the present writer. For a study of the full decree, see Hans Goedicke, *Königliche Dokumente aus dem Alten Reich* (Wiesbaden, 1967), pp. 22–36, while a convenient English translation is available in Nigel C. Strudwick, *Texts from the Pyramid Age* (Atlanta, GA, 2005), pp. 98–101. A transcription can be found in Kurt Sethe, *Urkunden des Alten Reichs* (Leipzig, 1933), I, pp. 170–172.

you shall lead him to the great enclosure
(*ḥw.t-wr.t*) and put [him] to work [...]
granite and harvesting barley and emmer.

} Apodosis:
envisaged sanction

The Neferirkare text, while perhaps the most explicitly connected to labour management, appears to have been part of a broader tradition of Old Kingdom rulers issuing decrees of this sort, intending to set out punitive consequences for various offenders operating on royal estates. Other examples, all dating to the twenty-third and twenty-second centuries BCE, include the Edicts of Pepi II (Coptos B), Neferkauhor (Coptos I), and Demedjibtawy (Coptos R).²⁹ However, in these much older attestations, the legal framework associated with the New Kingdom stelae has yet to develop. Instead of alluding to a concrete concept of *ḥp*-law as justification for punishment, the Neferirkare text and other decrees in its tradition make far more generic claims, such as that seizing parts of the workforce has consequences for the perpetrator, who is himself reduced to unfree labour. Instead of being framed as legislation – a set of provisions governed by law – these Old Kingdom clauses are royal instructions, probably not part of any wider corpus and designed for ad hoc use but nonetheless serving as important reminders of the significance of labour regulation even at this early time. It is, however, noteworthy that the New Kingdom decrees prescribe harsh corporal punishments alongside forced labour – providing a level of detail comprehensive enough to count individual blows and wounds – whereas the Old Kingdom text makes no mention of corporal punishments whatsoever and may indicate a more flexible approach to determining sanctions, which would be in keeping with an ad hoc style. On the other hand, the structure characteristic of the New Kingdom decrees is already fully formed, with clauses beginning with the same conditional construction (beginning with the introductory *ir*).

It should also be emphasized that while the Old Kingdom decrees are comparatively rare examples of early protasis-apodosis texts that discuss labour regulation in some form, more generally, the protasis-apodosis style of formulation was common across multiple avenues of Egyptian thought. Prominent examples of its use are found in threats to potential tomb desecrators, as illustrated, for instance, in the tomb of the prominent local governor Ankhtifi at El-Mo’alla, dating to the First Intermediate Period (c.2100 BCE):³⁰

*ir ḥk3 nb ḥk3.t(y)=f(y) m Ḥf3t ir.t(y)=fy^c ḏw bīn r dī tn r mn.w nb.w n.w pr pn
sh.t ḥpš=f n Ḥmn*

As for any ruler who will rule in Mo’alla and who will carry out a bad and evil

act against this coffin and any monument of this tomb, his arm will be cut off for Hemen.

It is profoundly unclear whether the wrongdoer was actually expected to be punished by physical severance of the arm, as opposed to the sanction being an allusion to a divine curse.³¹ Still, this is another illustration of cause and consequence being framed in protasis-apodosis terms as early as the third millennium BCE, and numerous curses of a similar structure persisted throughout the second millennium BCE.³² These did not have to prescribe violent punishments. For instance, a famous example is the exhortation made by Middle Kingdom ruler Senusret III (r. 1870–1831 BCE) to his children on his Second Semna Stela demarcating the Egyptian border with Nubia, where unsatisfactory children face the threat of being disowned:³³

*ir gr.t s3=i nb srwd.t(y)=fy t3š pn ir.n Hm=i s3=i pw ms.tw=f n Hm=i tw.t s3
nd.ty it=f ir gr.t fh.t(y)=fy sw tm.ty=fy c h3 hr=f n s3=i is n ms.tw=f is n=i*

Now, as for any son of mine who will strengthen this border which my Majesty made, he is my son; he was born to my Majesty. It is proper for a son to be an avenger of his father. Now, as for him who will lose it and will not fight over it, he is not my son; he was not born to me.

Curses of the protasis-apodosis variety also extended into the explicitly religious literature concerned with the afterlife, where even supernatural beings could be threatened. A representative example can be found in Coffin Text Spell 277 (c.2100 BCE), which offers protection to the deceased by singling out various potential wrongdoers for punishment:³⁴

*ir ntr nb ir ntr.t nb.(t) ir 3h nb ir mt nb mt.t nb.(t)
ns.wt r3=f hft=i hr=f n sc.t hk3 imy n ht=i*

As for any god, as for any goddess, as for any spirit, as for any dead man or any

³¹For this alternative view, see Harco Willems, “Crime, Cult and Capital Punishment (Mo’alla Inscription 8)”, *Journal of Egyptian Archaeology*, 76 (1990), pp. 27–54, 46–47. For more on the possibility of “supra-practical” punishments in ancient Egypt, where mutilation referred to a divine curse, see also Alexandre A. Loktionov, “May My Nose and Ears Be Cut Off: Practical and ‘Supra-Practical’ Aspects of Mutilation in the Egyptian New Kingdom”, *Journal of the Economic and Social History of the Orient*, 60 (2017), pp. 263–291.

³³Kurt Sethe, *Aegyptische Inschriften aus den Königlichen Museen zu Berlin* (Leipzig, 1913), I, p. 258 (ll. 17–20). For a more recent discussion of the stela and its significance, see Stephan J. Seidlmayer, “Zu Fundort und Aufstellungskontext der großen Semna-Stele Sesostris’ III”, *Studien zur Altägyptischen Kultur*, 28 (2000), pp. 233–242.

³⁴Adriaan de Buck, *The Egyptian Coffin Texts IV: Texts of Spells 268–354* (Chicago, 1951), p. 19. For additional context and further relevant examples, see Robert K. Ritner, *The Mechanics of Ancient Egyptian Magical Practice* (Chicago, 1993), p. 98.

dead woman, who will lick off his spell against me today, he shall fall to the execution blocks and the magic that is in my belly.

On the other hand, the same structural formula, albeit translated a little differently in English, could also be deployed just as effectively in healing contexts as those of punishment. It is standard in medical texts, as illustrated by this example from Papyrus Ebers (c.1550 BCE):³⁵

*ir gm=k ḏb^c s3ḥ r-pw mr=sn pḥr mw ḥ3=sn ḏw sty=sn km3=sn s3 ḏḏ.ḥr=k r=s
mr ḥry=i*

If you find [lit. as for your finding] a finger or a toe and they are painful, and fluid circulates around them, and they smell bad and emit a worm, you should say: “a disease I must treat”.

The protasis-apodosis structure also entered the realm of Egyptian magical practice, enabling scribes to write down what the consequences caused by certain spells might be. A basic example is:³⁶

ir šnw.t r3 pn r ḥfty nb n... ḥpr ḏw im=f r hrw-7

If this conjuration of the mouth [is deployed] against any enemy of [name of whoever was being protected], badness will come to pass concerning him for seven days.

Thus, one can trace the protasis-apodosis structure across all manner of contexts. Such varied examples indicate that the stylistic aspect of regulating labour in the Horemheb and Nauri decrees of the New Kingdom is by no means novel: on the contrary, it is highly conventional, and fits into the broader Egyptian intellectual tradition of forming conditional clauses in settings ranging from justice and law enforcement to chthonic curses, protective magic, and medicine. Nevertheless, alongside the new concept of *hp-law*, there is one other highly significant modification: the deployment of harsh corporal punishment, the origin of which warrants additional investigation.

Corporal Punishment in the Horemheb and Nauri Decrees: Influence from Mesopotamia?

For the period before the Horemheb and Nauri decrees, there is no firm evidence of Egyptian labour being regulated by the threat of legally mandated corporal punishment. Indeed, while beatings were a common method of the ad hoc disciplining of

³⁵Alan H. Gardiner, *Egyptian Grammar* (Oxford, [1927] 1957), p. 349. For many more examples, see for instance Gonzalo M. Sanchez and Edmund S. Meltzer, *The Edwin Smith Papyrus: Updated Translation of the Trauma Treatise and Modern Medical Commentaries* (Atlanta, GA, 2012).

subordinates by superiors as early as the Old Kingdom,³⁷ corporal punishment as a legal sanction is not even conclusively attested in any Egyptian context before the New Kingdom.³⁸ While such absence of evidence cannot be deemed conclusive evidence of absence, it is nonetheless striking given that there is no shortage whatsoever of evidence for corporal punishment in the period immediately following. Corporal punishment, in various forms, appears to have become prominent after the Hyksos occupation of the Egyptian delta (c.1650–1550 BCE), which is unlikely to be coincidental. Based on an analysis of personal names, it seems highly likely that the Hyksos were a Semitic-speaking people.³⁹ This is consistent with material culture finds that suggest an origin in the southern Levant.⁴⁰ If so, it is logical to postulate that their legal tradition was not dissimilar to that of other Semitic-speaking peoples, most notably that of Akkadian speakers. While it is important to note that the geographic distance between the original Hyksos heartland and the core of the Akkadian world, Mesopotamia, was considerable, it is widely accepted that the Akkadian influence on the scribal traditions, schools, and intellectual culture of territories to the west of Mesopotamia was significant.⁴¹ In the Akkadian legal tradition, we find many instances of corporal punishment strikingly similar to those in the Nauri and Horemheb decrees. For example, in arguably the most famous Akkadian legal text, the Laws of Hammurabi (c.1810–1750 BCE), one may find the following clause (§282) providing a legal mandate for facial mutilation:⁴²

šumma wardum ana bēlišu ul bēlī atta iqtabi kīma warassu ukânšuma bēlišu uzunšu inakkis

If a slave has said to his lord: “you are not my lord”, when he has substantiated that he is his slave, his lord will sever his ear.

This is highly representative of the Hammurabi legal corpus as a whole, with other clauses granting similar legal justification for putting out eyes (§193, §196), breaking

³⁷For examples, generally in the form of beating scenes on tomb walls, see e.g. Dows Dunham and William Kelly Simpson, *The Mastaba of Queen Mersyankh III* (Boston, MA, 1974), fig. 9; Ann Macy Roth, *A Cemetery of Palace Attendants* (Boston, MA, 1995), fig. 185. ⁴¹For the most recent discussion on this, including plentiful further references, see Juan Pablo Vita, “Akkadian as a *Lingua Franca*”, in Rebecca Hasselbach-Andee (ed.), *A Companion to Ancient Near Eastern Languages* (Hoboken, NJ, 2020), pp. 357–372, 360–362. More specifically on the comparative legal history of ancient Egypt and Mesopotamia in this period, see Raymond Westbrook (ed.), *A History of Ancient Near Eastern Law* (Leiden, 2003).

⁴²Normalization based on Martha T. Roth, *Law Collections from Mesopotamia and Asia Minor* (Atlanta, GA, 1995), p. 132 (§282).

bones (§197), severing tongues (§192), breasts (§194), and hands (§195, §218, §226, §253), knocking out teeth (§200), whipping (§202), and impaling (§153).⁴³ This mutilatory tradition displayed considerable staying power, as Assyrian kings set out similar punitive provisions seven centuries later. For example, in Middle Assyrian Laws Tablet A (c.1100 BCE), the following provision is made:⁴⁴

A §4 šumma lu urdu lu amtu ina qāt aššat a'ile mimma imtaḥru ša urde u amte appēšunu uznēšunu unakkusu šurqa umallū a'ilu ša aššiti[šu] uznēša unakkas u šumma aššassu uššer [uz]nēša la unakkis ša urde u amte la unakkusuma šurqa la umallū

If either a male or female slave has received anything from the wife of a man, they will sever the nose and ears of the male or female slave. They will restore the stolen goods. The man [whose] wife it is shall sever her ears, and if he spares his wife (and) does not sever her [e]ars, they will not sever those of the male or female slave, (and) they will not restore the stolen goods.

There are many other examples of this sort in the text, including severing ears (§5, §24, §40, §44, §59), noses (§5, §15), fingers (§8, §9), genitalia (§15) and possibly breasts (§8), as well as various forms of beating (§57, §59), whipping (§44) and impalement (§53).⁴⁵ These sanctions are predominantly associated with theft and matters of domestic insubordination, and – both in the Assyrian examples above and in earlier legal documents from the Old Babylonian and Ur-III periods – it is striking that corporal punishment is generally reserved for slaves and other classes of unfree labourer.⁴⁶ Clearly, the topic of the Egyptian Horemheb and Nauri decrees is overall rather different, with these texts often being concerned with regulating and, if necessary, punishing relatively or even very senior officials. Still, the punishments themselves are nonetheless markedly similar and, in many cases, identical to their Mesopotamian counterparts. Bearing in mind that these decrees were published after the Hyksos period, when elements of Semitic law could conceivably have been imported into Egypt, a case can be made for influence from the Semitic legal tradition being directly present in the Egyptian decrees. This influence was clearly not a wholesale uptake, as the offenders targeted were a different social group. Instead, it appears that the Egyptians sought to mix and match, bringing in punishments from abroad to help regulate labour in line with the demands of their own socio-economic reality.

The case for such influence is strengthened further by the appearance of a substantial number of Semitic loanwords related to judicial administration, crime, and punishment in the Egyptian language, all of which date to the period after the Hyksos ascendancy. While many of these words occur only rarely or are only firmly

| <i>gʕnysʕ</i> (n) | root <i>ngs</i> (by metathesis) | 349–350 (n. 512) | violence; injustice |
| <i>ṭwpʕyr</i> (n) | root <i>spr/špr</i> | 364 (n. 540) | scribe |
| <i>ṭʕhyr</i> (v) | Aramaic <i>sahira</i> | 370–371 (n. 553) | to be offensive |

attested after the New Kingdom, the number of items is nonetheless too large to ignore. Thus, this is, at the very least, explicit evidence of the uptake of judicial terminology, which – while it does not constitute categorical proof of an accompanying shift in legal practice – does make it appear highly likely. A summary of the key terms in question is given above (Table 1).

This table cannot be deemed satisfactory proof of post-Hyksos Egyptian justice evolving along Semitic lines, and even less that the administration of labour was evolving under an imported influence. However, what it does show is that – at least to a certain extent – the language of penal administration was becoming permeated with a Semitic lexicon, which may point to a degree of intellectual closeness which, in turn, manifests itself in the growing tendency towards corporal punishment as a judicial sanction. As has been shown, the latter is of considerable importance to Egyptian labour management specifically.

It should also be noted that such emerging intellectual proximity between Semitic and Egyptian traditions of the later second millennium BCE already has known parallels in other fields of written culture. For instance, in the domain of divination, it has been illustrated that lecanomancy – a highly technical mantic practice originating in the Mesopotamian Old Babylonian Period (2000–1600 BCE), which generated omens by observing oil patterns on water – was adopted by the Egyptians in the New Kingdom.⁴⁸ Similarly, the typically Mesopotamian genre of disputation literature – stories involving verbal superiority contests between various living things or inanimate objects, attested there from the third millennium BCE – appears in Egypt for the first time and in multiple attestations during the New Kingdom.⁴⁹ Meanwhile, Semitic religious traditions from the Levant also percolated into Egypt, with quintessentially Levantine deities such as Anat, Ba'al, Qudshu, Astarte, and Reshep all appearing in the Egyptian written record at a time roughly contemporaneous to the Nauri and Horemheb decrees.⁵⁰ The evidence for such a wide range of influences from the Semitic world is further enhanced by archaeological findings of cuneiform Akkadian texts at New Kingdom sites, most notably the famous Tell el-Amarna cuneiform archive, which contains documents ranging from royal letters to mythological compositions.⁵¹ In such a context, a degree of Semitic influence –

⁴⁸For more on Mesopotamian oil divination, see most recently Alexandre A. Loktionov and Christoph Schmidhuber, “Luminous Oils and Waters of Wisdom: Shedding New Light on Oil Divination”, in Katrien De Graef and Anne Goddeeris (eds), *Law and (Dis)Order in the Ancient Near East: Proceedings of the Rencontre Assyriologique Internationale Held at Ghent, Belgium, 15–19 July 2013* (University Park, PA, 2021), pp. 169–176. For more on the tradition appearing in Egypt, see Sara Demichelis, “La divination par l’huile à l’époque ramesside”, in Yvan Koenig (ed.), *La magie en Égypte. À la recherche d’une définition* (Paris, 2002).

⁴⁹For a summary of the examples and further references, see Enrique Jiménez, *The Babylonian Disputation Poems: With Editions of the Series of the Poplar, Palm and Vine, the Series of the Spider, and the Story of the poor, forlorn Wren* (Leiden and Boston, MA, 2017), pp. 128–130.

⁵⁰See for instance Adhémar Massart, *The Leiden Magical Papyrus; I 342 + I 345* (Leiden, 1954) for a papyrus of this period mentioning all these Semitic gods. For a comprehensive listing of deities from the Levant in New Kingdom Egyptian texts, see Keiko Tazawa, *Syro-Palestinian Deities in New Kingdom Egypt: The Hermeneutics of their Existence* (Oxford, 2009).

⁵¹For accessible English translations of key Amarna documents, see William L. Moran, *The Amarna Letters* (Baltimore, MD, 1992). For a comprehensive (albeit dated) edition, see Jörgen A. Knudtzon, *Die*

emanating from Mesopotamia and its surrounding polities – seems entirely logical in the field of punitive and labour administration within New Kingdom Egypt. Indeed, it would be somewhat strange for such an influence to be absent, given its prominence in so many other textual genres of the period.

Conclusion

Labour regulation in the Nauri and Horemheb decrees relies on a mixture of native Egyptian and imported Semitic features, most likely associated with the Hyksos presence in Egypt and the continued links with Levantine and Mesopotamian intellectual culture thereafter. The phrasing of the decrees is characteristically Egyptian, and there is precedent for pharaohs issuing decrees in this style going back to the Old Kingdom an entire millennium earlier. However, the allusions to a broader concept of law (*hp*) – as opposed to just ad hoc provisions – and the provision of tough corporal punishments are new, both for Egyptian justice in general and for Egyptian labour regulation more specifically. While the new conceptualization of law (*hp*) might conceivably be an Egyptian innovation, the new punishments almost certainly point to some degree of foreign influence, especially given the extent of contact with the linguistic, religious, and broader intellectual traditions of Mesopotamia and the Levant at the time. However, it is interesting to note that the way these punishments are deployed is distinctly Egyptian. Unlike the Mesopotamian setting, they are not limited to slaves and other unfree labourers but can instead target high officials.

The underlying reasons for these changes most likely cannot be limited solely to an organic phenomenon of cultural assimilation based on the historical reality of contact between Egypt and the Semitic world. While such an unplanned diffusion of concepts may have played a part, with the fluid transmission of intellectual culture contributing to the hybrid nature of the legal changes, it is nonetheless probable that the uptake of foreign ideas into the sphere of Egyptian law and labour regulation was largely a deliberate decision. Such a choice would have been linked to efforts to further cement royal power at a crucial time: on the one hand, this was a phase when New Kingdom Egypt was nearing its greatest territorial extent, and a period when the crown of Egypt as an institution was arguably politically and militarily stronger than at any other point in its entire ancient history; on the other hand, this time also saw dynastic weakness and legitimacy crises, which could cast doubt on any given holder of the crown. By regulating labour through *hp* – imposed top-down from the pharaonic government – agency in interpreting vague regulations (and hence potential for abuse of power) was being stripped away from provincial officials (whom the royal decrees see as their main adversaries). The crown was saying *exactly* what had to be done, thereby transferring agency to itself, and it now had a specific term for it. Brutal penalties, borrowed from a foreign tradition that had assimilated into Egyptian legal culture, reinforced the point even further, presumably in the hope of attaining higher productivity as a result, and possibly with the additional aim of

El-Amarna-Tafeln, mit Einleitung und Erläuterungen (Leipzig, 1915). For a key text of cuneiform mythology from Amarna, see Shlomo Izre'el, *Adapa and the South Wind: Language Has the Power of Life and Death* (Winona Lake, IN, 2001).

scaring other would-be offenders, including relatively high-ranking ones, into compliance. Given the vast infrastructural outputs of the New Kingdom, as evidenced by the many flamboyant and vastly labour-intensive pharaonic building projects emblematic of the period, it appears that, at least for several centuries, this strategy was not without success. In turn, these infrastructural outputs allowed the crown to materialize its power further, presenting itself as a force capable of dominating the land through monumentalism. Thus, the pharaoh could take physical action to shape both his country and the bodies of those who worked in it – or, rather, those who did not work to a required standard and therefore deserved mutilation or beating.
