British Society of Animal Science

The British Society of Animal Science aims to provide the opportunity for those with an interest in animals and animal production to exchange views, ideas and information. It is an energetic and active society with about 1300 members from over 30 countries throughout the world. Today, as ever, the Society is the natural meeting point for all of those with an interest in animal science. Its membership is drawn from research, education, advisory work, commerce and the practical livestock industry.

The Society's Journal is Animal Science which publishes fundamental and applied research and is a major scientific title of international repute. Papers reporting findings from basic and applied research relevant to all aspects of animal science can be found in it.

The Society organises a major scientific meeting once a year and occasional specialist meetings on key issues facing animal production. If you would like to join or receive further information about the Society contact:

Published by
British Society of Animal Science

The Proceedings of the British Society of Animal Science constitute summaries of papers presented at the Society's Annual Meeting in Scarborough in March 1997.

The summaries have not been edited and the Society can accept no responsibility for their accuracy. Views expressed in all contributions are those of the authors and not those of the British Society of Animal Science.

PROGRAMME

PAGE

RUMINANT NUTRITION

- The effect of diet asynchrony on portal-drained viscera metabolism 1
*N D Scollan, E J Kim, M S Dhanoa, J M Gooden, M A Neville, R T Evans,
J M Dawson & P J Buttery*
- Effects of synchronising the rate of energy and nitrogen supply to the rumen in diets with two rates of carbohydrate release on growth and metabolism of male lambs 2
M W Witt, L A Sinclair, R G Wilkinson & P J Buttery
- The effects of supplying additional metabolisable energy as either silage or concentrates on the performance of, and energy retention by lambs 3
R W J Steen & S D Johnston
- The use of regression techniques on calorimetric data to estimate the metabolisable energy requirements of lactating dairy cows 4
T Yan, F J Gordon, R E Agnew, M G Porter & D C Patterson
- Nitrogen balance of lactating cows fed grass silage and concentrates containing two levels of dietary protein at three levels of degradability 5
H C Kirby, J H T Barbi, J D Sutton & D E Beever

MILK PRODUCTION

- Prediction of the food intake of dairy cows. Variation between cows on the same food 6
G C Emmans, N C Friggens & R F Veerkamp
- Food intake by dairy cows on total mixed rations of fixed composition 7
N C Friggens, G C Emmans, J D Oldham, I Kyriazakis, R F Veerkamp & J S Chalmers
- Effect of various treatments of urea-treated whole crop wheat on forage intake and milk production by dairy cows 8
J D Sutton, R H Phipps & D J Humphries
- An examination of the effect of concentrate energy source and changes in eRDP:DUP ratio on milk production of dairy cows offered grass silages differing in digestibility and intake characteristics 9
T W J Keady, C S Mayne & M Marsden
- The addition of lactose to the diets of dairy cows fed protected fats 10
R D Allison & P C Garnsworthy

PIG NUTRITION

- The effect of offering low crude protein diets to pigs on slurry characteristics and the consequent emission of ammonia from pig buildings 11
R M Kay & P A Lee
- Short and long term effects of protein nutrition on reproduction in gilts 12
M Crisol, S A Edwards & P R English
- The effect of protein restriction on reproductive parameters in sows of different parities 13
V L Glasgow, S A Edwards, M Slessor & H Fraser
- A comparison of choice, phase and single feeding systems in pigs from weaning to slaughter 14
J A Dalby, M A Varley, J M Forbes & S Jagger

ANIMAL BEHAVIOUR

- The reactions of farmed red deer to transport: effects of road type and journey time 15
P N Grigor, P J Goddard, C A Littlewood & A J Macdonald
- The behavioural responses of farmed red deer to other farmed species within a simulated abattoir environment 16
P J Goddard & S M Abeyesinghe

The behavioural priorities of mink (<i>Mustela vison</i>) in a closed economy <i>J J Cooper & G J Mason</i>	17
Effect of ewe genotype on the behaviour of their lambs in two breeds of sheep <i>C M Dwyer & A B Lawrence</i>	18
FAT SUPPLEMENTATION	
Rumen biohydrogenation of fatty acids from different sources of fat <i>N J Choi, E J Kim, W J Maeng, M A Neville, M Enser, J D Wood & N D Scollan</i>	19
Manipulating the fatty acid composition of muscle in beef cattle <i>N D Scollan, W J Fisher, D W R Davies, A V Fisher, M Enser & J D Wood</i>	20
Effects of abomasal fat infusion on dry matter intake, milk production and splanchnic metabolism in dairy cows at two stages of lactations <i>J A Benson, C K Reynolds, D J Humphries, D E Beever & S M Rutter</i>	21
The effect of feeding fish oil on the fatty acid composition of bovine milk <i>R J Mansbridge & J S Blake</i>	22
DAIRY COW GENETICS	
Genetic diversity in European cattle breeds <i>S C Blott, J L Williams & C S Haley</i>	23
Genetic and phenotypic parameter estimates of common health disorders and fertility traits in Scottish Holstein Friesian dairy cattle <i>J E Pryce, G Simm, R F Veerkamp, R Thompson & W G Hill</i>	24
Association between somatic cell count progeny tests in the United States of America (USA), The Netherlands and the United Kingdom (UK) <i>R A Mrode & G J T Swanson</i>	25
The use of pedigree estimates of genetic merit to predict progeny performance of Holstein Friesian bulls tested in the UK <i>B J McGuirk, J Smith & R Mrode</i>	26
Maximising response with a predefined rate of inbreeding for overlapping generation structure <i>B Grundy, B Villanueva & J A Woolliams</i>	27
PIG GENETICS	
Evaluation of performance traits in European Meishan pig crosses with varying Oestrogen Receptor (ESR) genotypes <i>O I Southwood & H A M van der Steen</i>	28
Genotype with nutrition interaction for performance test traits in pigs selected for lean growth rate <i>N D Cameron & M G Macleod</i>	29
Variation in age at puberty in pigs with divergent selection for components of efficient lean growth rate <i>J C Kerr & N D Cameron</i>	30
Genetic parameter estimates for feeding pattern and production traits in pigs <i>A D Hall, W G Hill, P R Bampton & A J Webb</i>	31
Muscle fibre characteristics of pigs selected for components of efficient lean growth rate <i>N D Cameron, N Okshjerg, P Henckel</i>	32
REPRODUCTION	
Effect of gonadotrophin releasing hormone on pregnancy rate in sows <i>A R Peters, J D Mackinnon & R Pitt</i>	33

Calving outcome following transfer of <i>in vivo</i> or <i>in vitro</i> produced bovine embryos <i>K L Goodhand, D F Dolman, R G Watt, L C Higgins, M E Staines & P J Broadbent</i>	34
The effect of pre- and post-insemination plane of nutrition on early embryo survival in cattle <i>L D Dunne, M G Diskin, M P Boland, K J O'Farrell & J M Sreenan</i>	35
Will treatment with progesterone, either alone or with oestradiol result in behavioural oestrus and a normal length luteal phase in post partum beef suckler cows induced to ovulate by calf isolation and once-a-day suckling? <i>D R Mackey, M G Diskin, J M Sreenan & J F Roche</i>	36
The effect of restricted suckling on lactation, feed reproduction intake and calf development <i>J K Margerison, C J C Phillips & T R Preston</i>	37
High Genetic Merit Cows	
Genotype by diet interactions for liveweight and condition score during lactation in heifers <i>E P C Koenen & R F Veerkamp</i>	38
Genotype by diet and lactation interactions for yield, dry matter intake, condition score and liveweight in dairy cows <i>J S Chalmers, R F Veerkamp, H Parkinson, R McGinn, G Simm & J D Oldham</i>	39
The responses of high genetic merit dairy cows to changes in silage quality and level of supplementary concentrate <i>C P Ferris, F J Gordon, D C Patterson, C S Mayne and M McCoy</i>	40
A comparison of offering a high level of concentrates through an out-of-parlour feeder or within a complete diet using high merit cows <i>D C Patterson, T Yan & F J Gordon</i>	41
PIG BEHAVIOUR	
Influence of rearing environment on behavioural characteristics of growing pigs <i>V E Beattie & N Walker</i>	42
A comparison of methods of specifying stocking density for welfare and performance of finishing pigs on different floor types <i>H A M Spooler, S Corning & S A Edwards</i>	43
Factors influencing the risk of piglets being crushed during sow posture changes in a group farrowing system <i>J N Marchant, S Corning & D M Broom</i>	44
The effect of high fibre diet and the provision of straw as a foraging substrate on the development of stereotypic behaviour in group housed sows <i>X Whittaker, H A M Spooler, S A Edwards, S Corning & A B Lawrence</i>	45
BEEF PRODUCTION	
The effect of forage: concentrate ratio in the diet of beef cattle on the ratio of omega-6 to omega-3 series fatty acids in beef <i>R W J Steen & M G Porter</i>	46
Supranutritional vitamin E supplementation of grass-finished and concentrate-finished Hereford-cross steers and its effect on meat quality <i>L Vega, M Enser, G R Nute, R I Richardson, R C Ball, J D Wood & G M Weber</i>	47
Effect of dietary linseed and fish oil on the composition of phospholipid fatty acids, eating quality and cooked flavour volatiles of beef <i>Longissimus Lumborum</i> muscle <i>M Enser, E Kurt, G R Nute, J D Wood, D S Mottram, S Elmore & N D Scollan</i>	48
The oxidative stability of minced beef from steers fed supplements of n-3 polyunsaturated fatty acids and vitamin E <i>R I Richardson, M Enser & L Vatansever</i>	49

Changes of hindquarter metabolite uptake when turning from maintenance to fattening in Belgian Blue bulls double muscled type	50
<i>J L Hornick, C Van Eenaeme, P Baldwin, A Ledent & L Istasse</i>	
Tissue specific differences in insulin receptor characteristics in the mature bovine animal	51
<i>P D McGrattan, A R G Wylie, R W J Steen & J Nelson</i>	
Age-related changes of growth hormone secretion and somatotroph function in Japanese Black Steers	52
<i>M Matsuzaki, E Tsuneishi, R Takada, Y Kaji, N Shiba, S Hara, K Ozutsumi & T Yamaguchi</i>	
Effects of concentrates on performance of finishing heifers at pasture in autumn	53
<i>M J Drennan, A P Moloney, E G O'Riordan & M McGee</i>	
Annual energy intake and early <i>post-partum</i> performance of beef cows differing in body size and milk potential	54
<i>S Yildiz, K D Sinclair, G Quintans, F E Gebbie, J S M Hutchinson & P J Broadbent</i>	

PIG NUTRITION

Effect of fishmeal on sow reproductive performance	55
<i>S A Edwards & I Pike</i>	
Response to dietary protein during lactation of Meishan synthetic and European White sows fed to attain two levels of backfat at farrowing	56
<i>A G Sinclair, M C Cia, S A Edwards & S Hoste</i>	
Effect of milk deprivation during the lactation period on performance and digestive enzyme activities of the piglets following weaning	57
<i>W Wattanakul, J A Rooke, A H Stewart, S A Edwards & P R English</i>	
Effect of <i>ad libitum</i> access to milk replacer to piglets on performance of piglets, slaughter pigs and sows	58
<i>J E Lindberg, M Neil & M-A Cidh</i>	
Relation between <i>in vivo</i> and <i>in vitro</i> fermentation of oligosaccharides in weaner pigs	59
<i>J G M Houdijk, B A Williams, S Tamminga & M W A Verstegen</i>	
Maternal influences on post-weaning piglet growth and anti-soya bean meal antibodies	60
<i>J A Rooke, H Fraser & M Shanks</i>	
The effects of extrusion on the nutritive value of rape seed meal for pigs	61
<i>U Keady & J V O'Doherty</i>	
Relationships between blood lipids and backfat thickness in growing pigs	62
<i>T-C Loh, I J Lean & P F Dodds</i>	
Adhesion of K88ac-positive <i>E coli</i> to porcine brush borders in the presence of various feed additives	63
<i>P H Jones, B G Miller & J Gibson</i>	
A comparison in growth performance of young pigs fed six different cultivars of wheat	64
<i>A N Pearce, S P Rose, P S Kettlewell & H Schulze</i>	
Influence of dietary fatty acids and α -Tocopherol on lipid peroxidation in subcellular fractions of muscle from pigs fed full-fat rapeseed	65
<i>G E Onibi, J R Scaife & I Murray</i>	
An evaluation of wheat specific weight as a determinant of nutritive value for pigs and poultry	66
<i>A H Stewart, T Acamovic, A G Taylor & H Fraser</i>	
The effect of the source of dietary supplemental zinc on tissue copper concentrations in the rat	67
<i>J A Lowe & J Wiseman</i>	
Comparison of different digesta collection methods and indigestible markers to determine the apparent ileal nutrient digestibility	68
<i>Y-L Yin, J McEvoy, W-B Souffrant & K J McCracken</i>	

FORAGES

- Effect of a blend of propionic and formic acid salts on DM loss during ensiling, fermentation characteristics, nutritive value and aerobic stability of maize silage 69
S Harrison, R H Phipps, E Owen & I Nursey
- Proanthocyanidin (PA) content of *Calliandra leaves* and the effect of polyethylene glycol (PEG) and pH on complexes formed between *Calliandra* tannins and Bovine serum albumin (BSA) 70
M B Salawu, T Acamovic, C S Stewart & F D DeB Hovell
- A comparison of the effect of tannins of formaldehyde or a mixture of tannins/formic acid or formaldehyde/formic acid on silage composition 71
M B Salawu & T Acamovic
- Chemical composition and *in vitro* degradability of different parts of *Calliandra calothyrsus* from Kenya 72
M B Salawu, T Acamovic, C S Stewart, F D DeB Hovell & R L Roothaert
- Effect of freezing on nutritive value of untreated or enzyme-treated maize stover silages 73
U R Altaf, E Owen & R H Phipps
- Effects of variety, fertilizer nitrogen and sowing date on *in vitro* digestibility and botanical fractions of oat straw 74
M R Islam, E Owen, D I Givens & A R Moss
- Effect of amount offered on total intake of oat straw and on intake of straw botanical-fractions by sheep 75
M R Islam, E Owen, D I Givens & A R Moss
- Upgrading wheat straw with urea at a tropical temperature: effects of urea concentration and amount of solution on *in vitro* digestibility and pH 76
I U Haq & E Owen
- Effects of variety, fertiliser nitrogen and sowing date on the rumen degradation of oat straw 77
A R Moss, D I Givens, M R Islam & E Owen

PIG PHYSIOLOGY & GENETICS

- Effect of duration of hormone supplementation on nuclear maturation of porcine oocytes incubated *in vitro* in a serum-free environment 78
R Long, M E Staines, S A Edwards, P R English & T G McEvoy
- Development of porcine embryos cultured individually *in vitro* using NCSU-23 and modified Whitten's media 79
T G McEvoy, M E Staines, G D Coull, M E King, M Slessor, H Fraser & S A Edwards
- The effect on ovarian activity of stimulating precocious puberty in gilts of different ages with exogenous gonadotrophins 80
V L Glasgow, S A Edwards, A H Stewart, M Slessor & H Fraser
- The effect of mating sows in the early oestrus period on duration and timing of ovulation 81
A Dawson, R L Pitt, S J Ward, M J Warren, N D Cameron & A R Peters
- Gene expression of glucose transporter in sow mammary gland is correlated to milk yield 82
H M Miller, W T Dixon, G R Foxcroft & F X Aherne

MILK PRODUCTION

- Examining the metabolisable protein system at ideal protein: energy ratios in dairy cows 83
J A Metcalf, R J Mansbridge, J S Blake, J R Newbold & J D Oldham
- The responses of lactating dairy cows to diets based on grass silage of high or low DM and supplemented with fast and slowly fermentable energy sources 84
D L Romney, V Blunn & J D Leaver
- Effect of offering three amounts of maize stover to dairy cows on intake and selection 85
J N Methu, E Owen, A Abate, M Scarr & J Tanner

The effects of concentrate energy source on energy utilisation by lactating dairy cows offered a range of grass silages <i>T W J Keady & C S Mayne</i>	86
The effects of offering sucrose and fishmeal to dairy cows receiving different levels of concentrates on food intake and animal performance <i>T W J Keady & J J Murphy</i>	87
Effect of concentrate supplementation on lactation performance of pregnant and non-pregnant Holstein-Friesian dairy cows <i>M W Hobley, W J Fisher & R J Dewhurst</i>	88
Effect of concentrate type on forage intake and milk production of dairy cows offered mixed forage diets based on maize and grass silage <i>R H Phipps, A K Jones, S Harrison & S Marsden</i>	89
The response by high genetic merit dairy cows to source and concentration of protein in the concentrate <i>I M Carrick, D C Patterson & F J Gordon</i>	90
Supplementation of grass silage-based diets for dairy cows with concentrates containing high levels of cereal starch <i>R J Dewhurst, W J Fisher, D W R Davies & M Marsden</i>	91
Effects of under feeding during the second gestation of Holstein-Friesian heifers. 1. Direct effect on lactation performance over the final 5 months of lactation <i>R J Dewhurst, J M Moorby, D W R Davies & W J Fisher</i>	92
Effects of under feeding during the second gestation of Holstein-Friesian heifers. 2. Residual effects on second lactation performance <i>J M Moorby, R J Dewhurst, W J Fisher & D W R Davies</i>	93
Changes in nitrogen balance of dairy cows during the dry period and early lactation following different dry period diets <i>J M Moorby, S Miles, R T Evans, W J Fisher & D W R Davies</i>	94
Effect of ammonia infusions on milk production by the dairy cow <i>J M Moorby & V J Theobald</i>	95
Comparison of high starch and high fibre diets and the development of subclinical laminitis syndrome in dairy heifers <i>C T Livesey, J A Metcalf, C Marsh, A M Johnston & S A May</i>	96
The effects of nonstructural carbohydrate and dietary protein on feed intake, ruminal fermentation and cows performance <i>K Sommart, M Wannapat, P Rowlinson & D S Parker</i>	97
Cassava chip as an energy source for lactating dairy cows fed rice straw <i>K Sommart, M Wannapat, D S Parker & P Rowlinson</i>	98
Post-feeding behaviour in dairy cows given a choice between high and low-DUP concentrates <i>C L Herdan, E J Davison, R E Lawson & J M Forbes</i>	99

PIG MEAT QUALITY

The effect of increasing slaughter weight on growth performance of pigs and on meat quality <i>R N Weatherup, V E Beattie, B W Moss & N Walker</i>	100
Influence of content nutritionally essential fatty acids on keeping quality of fresh pork <i>F Darling, J Wiseman & A J Taylor</i>	101
Fatty acid profile and α -Tocopherol content of porcine muscle during oxidative changes <i>G E Onibi, J R Scaife & I Murray</i>	102
Effects of travel sickness on stress hormones and meat quality in pigs <i>R H Bradshaw, J M Randall, M A Stiles, S N Brown, M L Forsling, R Rodway, J A Goode, P D Warriss & D M Broom</i>	103

The effect of varying the degrees of β receptor stimulation on the activity of the calpain - calpastatin system at slaughter in porcine longissimus dorsi <i>P L Sensky, T Parr, R G Bardsley & P J Buttery</i>	104
Sensory measurement of the response to 'boar taint' in pork and in a model lipid system containing androstenone, skatole and indole <i>I E Annor-Frempong, G R Nute, F W Whittington & J D Wood</i>	105
Relationships between taste panel assessment and meat quality in pigs <i>P R Bampton</i>	106

PIG BEHAVIOUR

Reproductive performance and aggression between sows re-mixed into small stable groups at different stages during the embryo implantation period following initial mixing at weaning <i>A Burfoot, R M Kay & S Corning</i>	107
Time course for the formation of a stable social hierarchy in group-housed sows <i>D S Arey, W G Jamieson</i>	108
Oestrus and mating behaviour in group housed sows and the effect of social dominance <i>V C Pritchard, S A Edwards & P R English</i>	109
Effect of familiarity with the environment on the behaviour and performance response of sows and piglets grouped during lactation <i>W Wattanakul, A H Stewart, S A Edwards & P R English</i>	110
The effects on neonatal piglet behaviour and tissue composition of feeding sows a diet containing a high level of docosahexaenoic acid (DHA) in late gestation and lactation <i>I M Bland, J A Rooke, P English, S A Edwards & R C Noble</i>	111
The behaviour of high and low performing pigs and location preferences in large groups of pigs housed on deep bedded straw <i>PC Penny, A H Stewart & P R English</i>	112
Effects of the sow-piglet relationship on the weaning and post-weaning behaviour of piglets <i>S D Webster & F Allen</i>	113
The behavioural and heart rate response of slaughter weight pigs to handling, weighing and slap-marking <i>S D Webster & A R Jones</i>	114
A delayed aversion to atmospheric ammonia in pigs <i>J B Jones, A J F Webster & C M Wathes</i>	115

NUTRITION OF RUMINANTS

The establishment of a UK database for the Cornell Net Carbohydrate and Protein System <i>R J Mansbridge, J S Blake, A R Moss & I Bending</i>	116
The fasting metabolism by non-pregnant dry dairy cows offered forage diets <i>ad libitum</i> prior to starvation <i>T Yan, F J Gordon, C P Ferris, R E Agnew, M G Porter & D C Patterson</i>	117
Estimation of maintenance energy requirements of beef cattle and lambs <i>R W J Steen, L E R Dawson, N Lavery, D E Kirkpatrick & S D Johnston</i>	118
Dependence of k_p and maintenance estimates on the choice of regression model: Effect of measurement errors in metabolisable energy intake <i>M S Dhanoa, R Sanderson & J France</i>	119
The degradation of organic matter and crude protein of four botanically diverse feedstuffs in the foregut of ponies, as measured by the mobile bag technique <i>M Moore-Colyer, J J Hyslop, A C Longland & D Cuddeford</i>	120
Comparative protein and fibre degradation measured <i>in situ</i> in the caecum of ponies and in the rumen of steers <i>J J Hyslop, N S Jessop, G J Stefansdottir & D Cuddeford</i>	121

Effect of pressure toasting on the in situ degradability of broken lupins, peas, faba beans and a mixture of these feedstuffs	122
<i>J O Goelema, M Spreuwenberg, G Hof, A F B van der Poel & S Tamminga</i>	
Ruminal degradability of soya bean meal treated with different doses of tannic acid	123
<i>E Serrano, M S Safigueroa, J Giraldez & A R Mantecon</i>	
Relationship between dry matter and fibre degradation characteristics of silage and silage intake in steers	124
<i>L E R Dawson & R W J Steen</i>	
Comparison of methods for the measurement of microbial protein supply in sheep	125
<i>M A Samaniego, X B Chen, F DeB Hovell, J C MacRae & R W Mayes</i>	
Yield of microbial protein in sheep fed diets differing in protein degradability	126
<i>A J F Webster, S Kaya, M E Kitcherside & E F Glen</i>	
Role of the omasum in the control of digesta flow from the reticulo-rumen	127
<i>A Afzalzadeh, F DeB Hovell & D J Kyle</i>	
Rumen fermentation and plasma metabolite concentrations in steers offered grass silage and different amounts of supplements based on starch or sugar	128
<i>A P Moloney</i>	
Rumen hydrogenation of long-chain fatty acids from fish meal	129
<i>M D Carro, E L Miller & O C Fabb</i>	
Sensitivity of mammary secretory cell turnover to protein restriction and re-alimentation during early lactation	130
<i>M G Goodwill, N S Jessop & J D Oldham</i>	
The effect of inclusion of whole crop wheat on the apparent digestibility, duodenal flow and small intestinal availability of different phosphorous fractions	131
<i>M Abbas, D E Beever & J D Sutton</i>	
Digestibility, nitrogen retention and plasma metabolite concentrations in steers offered whole crop wheat silage-based rations	132
<i>A P Moloney & P O'Kiely</i>	
The <i>in vivo</i> digestibility of ruminant feed ingredients measured using sheep	133
<i>E J Cronin, F P O'Mara, M Rath, J Callan, B Flynn & P J Caffrey</i>	
Nutritional evaluation of poultry litter treated with acids incorporated in sheep diet	134
<i>AA Osman, I Ap Dewi, F Z Swiden & H M Omed</i>	
A study of the effect of housing system and milk yield level on the performance and behaviour of dairy cattle	135
<i>J A Fregonesi & J D Leaver</i>	
Behavioural strategies of dairy cows grazing swards of different surface heights	136
<i>M J Gibb, C A Huckle, R Nuthall & A J Rook</i>	
The use of n-alkanes for prediction of intake in dairy cows	137
<i>Y Unal, P C Garnsworthy & P Gorton</i>	
NUTRITION OF RUMINANTS	
Effect of reduced nitrogen fertilizer in pasture on milk quality: results of 4 years	138
<i>P Raskin, I Dufrasne, V Minet, A P Mayombo & L Istasse</i>	
Effect of level of supplementation, milking and restricted suckling patterns on milk yield, milk composition and cow and calf performance in Zebu cross cattle	139
<i>C A Sandoval-Castro, S Anderson & J D Leaver</i>	
Adrenergic and cholinergic modulation of insulin secretion in non-lactating cows exposed to heat	140
<i>F Itoh, Y Obara, M T Rose, H Hashimoto & M Akema</i>	

CATTLE BREEDING

- Trait selection and its importance in the genetic improvement of fertility in dairy cattle 141
J A Woolliams
- The effect of gestation stage on daily milk and components yield of dairy cattle 142
V E Olori, S Brotherstone, B McGuirk & W G Hill
- Effects of genotype and lactation number on health and reproductive problems in dairy cows 143
B L Nielsen, R F Veerkamp, J E Pryce, G Simm & J D Oldham
- Genetic parameters for yield, intake, liveweight and condition score in Holstein heifers 144
R F Veerkamp, S Brotherstone, W G Hill & G Simm
- Changes in dam characteristics of Holstein Friesian (HF) cows selected for embryo transfer in the United Kingdom 145
M S Winters & M P Coffey
- Usage of crossbred cattle for the progeny testing of Japanese black cattle (Wagyu) 146
Y Nagamine, K Nirasawa & H Takahashi

MINERALS

- The detection and avoidance of heavy metals in feeds by chickens 147
S T Strojan & C J C Phillips,
- The detection and avoidance of lead contaminated pasture by cattle 148
S T Strojan & C J C Phillips,
- Cadmium pollution of feed consumed by sheep and its amelioration with zinc supplements 149
C J C Phillips, P C Chiy, H Omed, M Saatci
- Effect of repeated applications of sewage sludge to grassland on accumulation of potentially toxic elements in body tissues of grazing lambs 150
J M Wilkinson & J Hill
- Effect of season and method of application of sewage sludge to grassland on the voluntary intake, digestibility of herbage and growth of weaned lambs 151
J Hill & J M Wilkinson
- A preliminary survey of the trace element status of Llamas (*Lama glama*) in the UK 152
D V Illingworth, D Jackson, A M Mackenzie & S B Telfer
- The effect of a zinc, cobalt and selenium soluble glass bolus on immune function in lambs 153
N R Kendall, A M Mackenzie & S B Telfer
- A sustained-release multi-trace element/vitamin rumen bolus for ewes 154
N S Ritchie, R G Hemingway & J J Parkins
- Dietary availability of magnesium hydroxide powder in sheep and *in vivo* and *in vitro* assessments of granular calcined magnesites of different origin 155
R G Hemingway, E R Parker & N S Ritchie
- Effect of dietary Molybdenum content and floor type on the liver copper concentration at slaughter and lamb growth rate of early weaned lambs 156
M O'Hara, J V O'Doherty, P J Quinn, J J Callan & T F Crosby
- Effect of long-term supplementation on animal performance of grazing ewes 157
C M Brusa, F J Giraldez, O F Buratovich & A R Mantecon
- Responses to supplementary feed blocks at mating with May lambing ewes 158
J E Vipond & S P Marsh
- The effects of supplementary sodium on the magnesium status and behaviour of dairy cows fed silage and concentrates 159
D R Arney, C J C Phillips & O Kaert
- Phosphorous, magnesium and copper inadequacies in grazed herbage for lactating cows 160
R G Hemingway & N S Ritchie

Ruminal vitamin A and E disappearance of several vitamin supplements <i>F Masoero, M Moschini, T Bertuzzi, F Rossi & G Piva</i>	161
Effect of Cosecure® on the fertility and trace element status of dairy cattle <i>M M Moeini, A M Mackenzie & S B Telfer</i>	162

GOATS & CAMELIDS

The effects of calf management and milking strategy on camel milk production in Kenya <i>S P Simpkin, P Rowlinson & T Tullu</i>	163
Diet composition of guanacos (<i>Lama guanicoe</i>) and sheep grazing an upland grassland community <i>M D Fraser & D H Baker</i>	164
Comparative voluntary intake and <i>in vivo</i> digestibility in guanacos (<i>Lama guanicoe</i>) and sheep <i>M D Fraser & D H Baker</i>	165
Plasma biochemical values in the guanaco (<i>Lama guanicoe</i> compared with the sheep) <i>M D Fraser, J M Moorby, D H Baker & J K S Tweed</i>	166
Effect of protected methionine supplementation of the diet on the partitioning of dietary nitrogen in the Angora goat <i>M Souri, H Galbraith & J R Scaife</i>	167
Effect of Methionine supplementation of the diet on growth of hoof horn and mohair in Angora goats <i>M A Mengal, H Galbraith, M Souri & J R Scaife</i>	168
The role of biotin in the pre-ruminant and immediately post-ruminant goat <i>A M Tahmasbi, H Galbraith & J R Scaife</i>	169
The effect of IGF-I stimulates the growth of secondary hair follicles of the Cashmere goat <i>in vitro</i> <i>H Galbraith, D Sims & D Hazlerigg</i>	170
Effect of manipulation of prolactin and thyroid hormone profiles on hair follicle activity in cashmere goats <i>D Villar, S M Rhind, P Dicks & S McMillen</i>	171
Effect of sward height and its clover vertical distribution on the performance of cashmere goats grazing perennial ryegrass/white clover swards during the autumn <i>M del Pozo & K Osoro</i>	172
Animal output in different management strategies of cashmere goats with sheep grazing summer dry perennial ryegrass/white clover swards <i>M del Pozo & K Osoro</i>	173

SHEEP

Estimating genetic progress in a Suffolk sheep group breeding scheme <i>M Araghi, G E Pollott & M K Curran</i>	174
Evidence of the relationship of vigour and growth of newborn lambs with thyroid hormone concentrations <i>P Johnston, J Roden, B Merrell, W A Murray & W Haresign</i>	175
Variance components due to direct and maternal effects for weight of Welsh Mountain lambs based on embryo transfer data <i>M Saatci, I Ap Dewi & Z Ulutas</i>	176
Estimation of direct and maternal genetic parameters for 12 week weight for Welsh Mountain sheep <i>A A Aslaminejad & J A Roden</i>	177
Effect of the proportion of Texel or Rouge de l'Ouest genes in lowland ewes on prolificacy, lamb viability and weaned lamb output <i>L O W McClinton & A F Carson</i>	178

The effect of litter size, age of ewe and Booroola gene (Fec ^B) on the birth and placental characteristics of Texel ewes <i>J M L Anderson, J S Boyd, M J Harvey & A Waterhouse</i>	179
A comparison of hay and silage with concentrates for twin bearing ewes <i>J D Carty, P J Quinn, J V O'Doherty, J J Callan, B Flynn, M M Muwalla & T F Crosby</i>	180
Effect of partial replacement of barley with molassed sugar beet feed in concentrate given and winter shearing on the performance of pregnant ewes and survival of new-born lambs <i>E O Egan, A B Notman & J Hill</i>	181
The identification and treatment of aberrant luteal activity during anoestrus in Suffolk ewes submitted for artificial insemination <i>W A C McKelvey, J J Robinson, F E Gebbie, E Lindsay & W S Dingwall</i>	182
Age at lambing in the autumn affects subsequent ovulation rate and duration of ovarian cyclicity in crossbred ewes <i>M E King, L M Mitchell, M J Ranilla, F E Gebbie & J J Robinson</i>	183
Variations in the maternal behaviour of primiparous, single-bearing ewes of a hill and a lowland breed of sheep <i>C M Dwyer & A B Lawrence</i>	184
Pregnancy-associated glycoprotein (PAG) in postpartum ewes <i>M J Ranilla, F E Gebbie, L M Mitchell, M E King, J G Skinner, J F Beckers & J J Robinson</i>	185
A comparison between tris and milk diluents for liquid storage of ram semen in Iran <i>Y J Ahangari</i>	186
Effects of lasalocid and protein levels on feed intake and growth rate of Awassi lambs <i>M M Muwalla, M Y Harb & T F Crosby</i>	187
The feed intake and growth rate of Iranian Baloochi lambs fed urea-treated wheat straw <i>M Danesh Mesgaran</i>	188
Examination of the fatty acid composition and lipogenic enzymes of perirenal adipose tissue in growing lambs <i>S E Richards, A M Salter & P J Buttery</i>	189
Effects of different cortisol profiles on immune function in sheep <i>S M Rhind, H W Reid & S R McMillen</i>	190
Effect of growth hormone on non insulin mediated glucose uptake in sheep <i>M T Rose, Y Obara, F Itoh, H Hashimoto, Y Takahashi & K Hodate</i>	191

IN VITRO TECHNIQUES

The effects of inoculum concentration and method of inoculation on the gas production profile of high temperature dried grass <i>J A Huntington & D I Givens</i>	192
A comparison of different types of apparatus used for measuring gas production <i>in vitro</i> <i>C Rymer & D I Givens</i>	193
Methane production from a range of feedstuffs as determined <i>in vitro</i> using the cumulative gas production technique and compared with that measured <i>in vivo</i> <i>A R Moss & D I Givens</i>	194
Determination of rumen fermentation characteristics of concentrate ingredients with the gas production technique <i>J W Cone, A H Van Gelder, P G B De Lange</i>	195
Comparison of four <i>in vitro</i> gas production methods to study rumen fermentation kinetics of starch rich feeds <i>S Fakhri, A R Moss, D I Givens & E Owen</i>	196
Effect of particle size on <i>in vitro</i> fermentation of silages differing in dry matter content <i>R Sanderson, S J Lister, A Sargeant & M S Dhanoa</i>	197

Effects of <i>Yucca shidigera</i> extract on ammonium, pH and short chain fatty acids during the <i>in vitro</i> anaerobic fermentation of hay by ruminal fluid obtained from sheep <i>J P Ryan, T Quinn & B F Leek</i>	198
The prediction of <i>in vivo</i> digestibility by laboratory techniques <i>C McEntee, F P O'Mara, P J Caffrey, P Reilly, D Cunningham & M Rath</i>	199
<i>In vitro</i> digestibility characteristics of soya and maize endosperm cell walls <i>H van Laar, S Tamminga & B A Williams</i>	200
Predicting the nutritive value of tree fodder: consistency and complementarity between assessments made by Nepalese, smallholder farmers and by laboratory techniques <i>P J Thorne, D H Walker, D B Subba, C D Wood, F L Sinclair and B L Thapa</i>	201
The interactive effects of monensin treatment and diet composition on <i>in vitro</i> semi continuous rumen fermentation using Rusitec <i>E D Mackintosh, R H Phipps, J D Sutton & J Wilkinson</i>	202
Effects of dietary asynchrony on rumen function studied using rumen simulation continuous culture <i>H J Lee, E J Kim, W J Maeng, J E Cockburn & N D Scollan</i>	203
Prediction of the metabolisable energy content of whole crop wheat from chemical composition <i>in vitro</i> digestibility and near infrared reflectance spectroscopy <i>A T Adesogan, D I Givens & E Owen</i>	204
The potential of near infrared reflectance spectroscopy (NIRS) to evaluate digestibility and degradability parameters of undried silage <i>R S Park, R E Agnew, F J Gordon & R W J Steen</i>	205
Quantification of nitrogen fractions in milk using near infrared (NIR) spectroscopy <i>S J Lister, R J Dewhurst & M S Dhanoa</i>	206
Diurnal variation in the composition of duodenal digesta <i>S J Lister, R Sanderson & A Sargeant</i>	207
A comparison of four solvents for determining the proportion of soluble dry matter in fresh grass and grass silage <i>E R Deaville, D Komwihangilo & D I Givens</i>	208
