

(Contents continued from back cover)

- 575 Estimating the overlap between dependent computations for automatic parallelization
PAUL BONE, ZOLTAN SOMOGYI AND PETER SCHACHTE
- 593 (Co-)Inductive semantics for constraint handling rules
RÉMY HAEMMERLÉ
- 611 A structured alternative to prolog with simple compositional semantics
ANTÓNIO PORTO
- 629 Transition systems for model generators—A unifying approach
YULIYA LIERLER AND MIROSLAW TRUSZCZYNSKI
- 647 Actual causation in CP-logic
JOOST VENNEKENS
- 663 The magic of logical inference in probabilistic programming
BERND GUTMANN, INGO THON, ANGELIKA KIMMIG, MAURICE BRUYNOOGHE AND LUC DE RAEDT
- 681 On combining linear-based strategies for tabled evaluation of logic programs
MIGUEL AREIAS AND RICARDO ROCHA
- 697 Efficient instance retrieval of subgoals for subsumptive tabled evaluation of logic programs
FLÁVIO CRUZ AND RICARDO ROCHA
- 713 On the correctness of pull-tabling
SERGIO ANTOY
- 731 Optimal placement of valves in a water distribution network with CLP(FD)
MASSIMILIANO CATTAFI, MARCO GAVANELLI, MADDALENA NONATO, STEFANO ALVISI AND MARCO FRANCHINI
- 749 Automatic network reconstruction using ASP
MARKUS DURZINSKY AND WOLFGANG MARWAN
- 767 Constraint-based deadlock checking of high-level specifications
STEFAN HALLERSTEDE AND MICHAEL LEUSCHEL
- 783 Normative design using inductive learning
DOMENICO CORAPI, ALESSANDRA RUSSO, MARINA DE VOS, JULIAN PADGET AND KEN SATOH
- 801 Splitting and updating hybrid knowledge bases
MARTIN SLOTA, JOÃO LEITE AND TERRANCE SWIFT
- 821 Complex optimization in answer set programming
MARTIN GEBSER, ROLAND KAMINSKI AND TORSTEN SCHAUB

CAMBRIDGE

Fantastic New Titles in Logic Programming!

Models and Games

Jouko Väänänen

*Cambridge Studies in
Advanced Mathematics*

Contents: Preface; 1. Introduction; 2. Preliminaries and notation; 3. Games; 4. Graphs; 5. Models; 6. First order logic; 7. Infinitary logic; 8. Model theory of infinitary logic; 9. Stronger infinitary logics; 10. Generalized quantifiers; References; Index.

\$65.00: Hb: 978-0-521-51812-3: 380 pp.

Real Analysis through Modern Infinitesimals

Nader Vakil

Encyclopedia of Mathematics and its Applications

\$115.00: Hb: 978-1-107-00202-9: 586 pp.

Deep Beauty

*Understanding the Quantum World through
Mathematical Innovation*

Edited by Hans Halvorson

\$99.00: Hb: 978-1-107-00570-9: 438 pp.

Finite and Algorithmic Model Theory

*Edited by Javier Esparza, Christian Michaux,
and Charles Steinhorn*

London Mathematical Society Lecture Note Series

\$65.00: Pb: 978-0-521-71820-2: 356 pp.

Independence-Friendly Logic

A Game-Theoretic Approach

Allen L. Mann,
Gabriel Sandu,
and Merlijn Sevenster

*London Mathematical Society
Lecture Note Series*

Contents: Preface; 1. Introduction; 2. Game theory; 3. First-order logic; 4. Independence-friendly (IF) logic; 5. Properties of IF logic; 6. Expressive power of IF logic; 7. Probabilistic IF logic; 8. Further topics; References; Index.

\$69.00: Pb: 978-0-521-14934-1: 216 pp.

Software Modeling and Design

UML, Use Cases, Patterns, and Software Architectures

Hassan Gomaa

\$75.00: Hb: 978-0-521-76414-8: 592 pp.

Forcing with Random Variables and Proof Complexity

Jan Krajčec

London Mathematical Society Lecture Note Series

\$65.00: Pb: 978-0-521-15433-8: 264 pp.

Kurt Gödel and the Foundations of Mathematics

Horizons of Truth

*Edited by Matthias Baaz,
Christos H. Papadimitriou,
Hilary Putnam, Dana S. Scott,
and Charles L. Harper*

This volume commemorates the life, work, and foundational views of Kurt Gödel by exploring the impact of his work on current research and its future implications not only in the foundations of mathematics and logic, but also in the fields of computer science, artificial intelligence, physics, cosmology, philosophy, theology, and the history of science.

\$99.00: Hb: 978-0-521-76144-4: 544 pp.

Lectures in Game Theory for Computer Scientists

*Edited by Krzysztof R. Apt
and Erich Grädel*

\$72.00: Hb: 978-0-521-19866-0: 308 pp.

Infinity

New Research Frontiers

*Edited by Michael Heller
and W. Hugh Woodin*

\$99.00: Hb: 978-1-107-00387-3: 326 pp.

Prices subject to change.

UNIVERSITY PRESS

Robotica

Editor-in-Chief

G. S. Chirikjian, *Johns Hopkins University, USA*

An Official Journal of the
International Federation of Robotics

Robotica provides an international forum for the multidisciplinary subject of robotics and encourages developments in this important field of automation with regard to industry, education and research. It covers the many aspects of robotics, including sensory perception, software, kinematics and dynamics involved in robot design, robot task planning and description, intelligibility of skilled motion, applications of robots in the service industries, world model representation, artificial intelligence, development of relevant educational courses, training methods, economic and cost problems and other items of theoretical and practical interest.

JOURNALS

Mathematical Structures in Computer Science

Editor-in-Chief

G. Longo, *CNRS and Ecole Normale Supérieure, Paris, France*

Mathematical Structures in Computer Science is a journal of theoretical computer science which focuses on the application of ideas from the structural side of mathematics and mathematical logic to computer science. The journal aims to bridge the gap between theoretical contributions and software design, publishing original papers of a high standard and broad surveys with original perspectives in all areas of computing, provided that ideas or results from logic, algebra, geometry, category theory or other areas of logic and mathematics form a basis for the work.

SUBSCRIPTIONS

Theory and Practice of Logic Programming (ISSN 1471-0684), is published bi-monthly in January, March, May, July, September and November by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, N.Y. 10013–2473. The subscription price (excluding VAT) of Volume 11, 2011 is £345 net (USA, Canada and Mexico US\$575), for institutions print and electronic or £300 net, (USA, Canada and Mexico US\$475) electronic only, single parts cost £60, \$100 plus postage. Discounted individual rates (print only) are £75, \$125. There is a preferential rate for members of The Association of Logic Programming and The Association of Computing Machinery – please enquire. Six parts form a volume. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Orders, which must be accompanied by payment, may be sent to any bookseller, subscription agent or to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge, CB2 8RU, or in the USA, Canada and Mexico to Cambridge University Press Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, New York 10994–2133. Prices include delivery by air where appropriate. Periodicals postage paid at New York, NY and at additional mailing offices. Japanese prices are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo, 156, Japan. Postmaster: send address changes in USA, Canada and Mexico to Journal of Theory and Practice of Logic Programming, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994–2133. Claims for missing issues should be made immediately on receipt of the subsequent issues.

INSTRUCTIONS TO AUTHORS

Aims and scope

Theory and Practice of Logic Programming is an international journal that publishes refereed papers covering both the theory and the practice of logic programming. Among the topics covered are AI applications that use logic programming, logic programming methodologies, specification, analysis and verification of systems, inductive logic programming, multi-relational data mining, natural language processing, knowledge representation, nonmonotonic reasoning, semantic web reasoning, databases, implementations and architectures and constraint logic programming.

TPLP is the sole official journal of the Association for Logic Programming (<http://logicprogramming.org/>) and is offered to its members at a preferential rate. It is also endorsed by SPARC, the Scholarly Publishing & Academic Resources Coalition (URL: www.arl.org/sparc).

Submission of manuscripts

Electronic submissions: The preferred form of submission is to send two email messages, the first one with the information containing the title, the author(s), and the abstract of the submission, and the second one with a Postscript file. Both emails should be sent to the appropriate Area Editor with a copy to the Editor-in-Chief. If in doubt about the most appropriate area, contact the Editor-in-Chief.

Paper submissions: These are also acceptable, but their handling may be delayed (four copies to the appropriate Area Editor and one copy to the Editor-in-Chief).

The submitted manuscripts should not be published or simultaneously submitted to another journal or to a conference. Full versions of important conference papers are welcome. Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to Cambridge University Press.

Book Reviews

Books for review, or suggestions for reviews, should be sent to the book reviews editor.

Technical notes

Technical notes should not exceed 5000 words in length, excluding tables, figures, and the bibliography. They are given quick turnaround and should be submitted, preferably electronically, to the Technical Notes editor. Submissions should include an abstract and a reasonable accurate word count for the paper (excluding tables and figures, and the bibliography).

Electronic manuscripts

The publisher encourages the submission of final manuscripts written in LaTeX which can be used for direct typesetting. Authors can download style files from the CUP anonymous ftp site in a packed or unpacked form. The packed form is available from: <ftp://ftp.cambridge.org/pub/texarchive/journals/latex/tp-cls> and the unpacked files are in a directory / unpacked.

Layout

Manuscripts should begin with an abstract of not more than 300 words at the end of which are 4 or 5 keywords. Avoid footnotes whenever possible. Papers should conform to a good standard of English prose; please consult a style guide such as 'The Elements of Style' by Strunk and White, Macmillan, New York. Presenting Programs in one of the following two styles is encouraged: either with identifiers in italic and keywords in bold or entirely in a fixed-width teletype font. Do not begin a sentence with a symbol or identifier name.

Illustrations

Supply these as eps files as the publisher cannot use original TeX files of illustrations. A hardcopy printout needs to be supplied of each illustration.

References

The Harvard system of references should be used. See style files.

Proofreading

Be sure to submit papers in their final form. Typographical and factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for extensive changes to their paper. No page charge is made. The spelling policy of the journal is to follow author's American or British spelling as long as it is consistent within the paper.

Offprints

A free pdf of the published article will be supplied to each first named author. Papers offprints may be purchased upon request.

Please contact the editors for additional information or clarification of anything above.

COPYING

The journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA, 01923, USA. Organisations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 1471-0684/11 \$16.00. Organisations authorised by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorised to supply single copies of separate articles for private use only. For all other use, permission should be sought from Cambridge UK or the American Branch of Cambridge University Press.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Theory and Practice of Logic Programming

VOLUME 11 PARTS 4–5 JULY 2011

Contents

Regular papers

- 429 Introduction to the 27th International Conference on Logic Programming Special Issue
JOHN GALLAGHER AND MICHAEL GELFOND
- 433 The PITA system: Tabling and answer subsumption for reasoning under uncertainty
FABRIZIO RIGUZZI AND TERRANCE SWIFT
- 451 ALPprolog – A new logic programming method for dynamic domains
CONRAD DRESCHER AND MICHAEL THIELSCHER
- 469 Observational equivalences for linear logic concurrent constraint languages
RÉMY HAEMMERLÉ
- 487 Abstract diagnosis for timed concurrent constraint programs
MARCO COMINI, LAURA TITOLO AND ALICIA VILLANUEVA
- 503 SAT-based termination analysis using monotonicity constraints over the integers
MICHAEL CODISH, IGOR GONOPOLSKIY, AMIR M. BEN-AMRAM,
CARSTEN FUHS AND JÜRGEN GIESL
- 521 Non-termination analysis of logic programs with integer arithmetics
DEAN VOETS AND DANNY DE SCHREYE
- 537 RedAlert: Determinacy inference for prolog
JAEL KRIENER AND ANDY KING
- 555 Parallel backtracking with answer memoing for independent and-parallelism
PABLO CHICO DE GUZMÁN, AMADEO CASAS, MANUEL CARRO
AND MANUEL V. HERMENEGILDO
