WEED SCIENCE

Published six times a year by the Weed Science Society of America

William K. Vencill, *Editor*

The Weed Science Society of America publishes original research and scholarship in the form of peer-reviewed articles in three international journals. *Weed Science* is focused on understanding “why” phenomena occur in agricultural crops. As such, it focuses on fundamental research directly related to all aspects of weed science in agricultural systems. *Weed Technology* focuses on understanding “how” weeds are managed. As such, it is focused on more applied aspects concerning the management of weeds in agricultural systems. *Invasive Plant Science and Management* is a broad-based journal that focuses not only on fundamental and applied research on invasive plant biology, ecology, management, and restoration of invaded non-crop areas, but also on the many other aspects relevant to invasive species, including educational activities, policy issues, and case study reports. Topics for *Weed Science* include the biology and ecology of weeds in agricultural, forestry, aquatic, turf, recreational, rights-of-ways, and other settings; genetics of weeds and herbicide resistance; chemistry, biochemistry, physiology and molecular action of herbicides and plant growth regulators used to manage undesirable vegetation, and herbicide resistance; ecology of cropping and non-cropping systems as it relates to weed management; biological and ecological aspects of weed control tools including biological agents, herbicide resistant crops, etc.; effects of weed management on soil, air, and water. Symposia papers and reviews are accepted. Consult the editor for additional information.

Associate Editors (Assignment Year)

Muthukumar V Bagavathiannan, Texas A&M, College Station, TX 77843 (2015)

Nathan Boyd, University of Florida, Wimauma, FL 33598 (2021)

Caio Brunharo, Department of Plant Science, Penn State University, University Park, PA 16801 (2022)

Ian Burke, Washington State University, Pullman, WA 99164 (2019)

Carlene Chase, Horticultural Sciences Department, University of Florida, Gainesville, FL 32611 (2016)

Bhagirath Singh Chauhan, Queensland Alliance for Agriculture and Food Innovation (QAAFI), The University of Queensland, Queensland, Australia (2014)

Sharon Clay, South Dakota State University Plant Science Department, Brookings, SD 57007 (2002)

Jose L. Gonzalez-Andujar, CSIC: Consejo Superior de Investigaciones Científicas, Cordoba, Spain 14004 (2024)

Greta Gramig, North Dakota State University, Fargo, ND 58108 (2024)

Timothy Grey, Department of Crop and Soil Science, University of Georgia, Tifton, GA 31793 (2009)

Prashant Jha, Iowa State University, Ames, IA 50011 (2017)

Mithila Jugulam, Kansas State University, Manhattan, KS 66506 (2019)

Vipin Kumar, Kansas State University, Hays, KS 67601 (2020)

Gulshan Mahajan, Punjab Agricultural University, Ludhiana, India 141004 (2022)

Sara Martin, Ag Canada, Ottawa, Canada (2018)

Chris Preston, Australian Weed Management, University of Adelaide, PMB1, Glen Osmond, SA 5064, Australia (2003)

Dean Riechers, Department of Crop Sciences, University of Illinois, Urbana, IL 61801 (2011)

Hilary Sandler, University of Massachusetts–Amherst Cranberry Station, East Wareham, MA 02538 (2008)

Debalin Sarangi, University of Wyoming, Powell, WY 82435 (2020)

Shaun Michael Sharpe, AAFC, Saskatoon, Saskatchewan, Canada SK S7N 0X2 (2024)

Lovreet Singh Shergill, Colorado State University, Ft. Collins, CO 80523 (2024)

Patrick J. Tranel, Department of Crop Sciences, University of Illinois, 360 ERML, Urbana, IL 61801 (2002)

Te-Ming Paul Tseng, Mississippi State University, Mississippi State, MS 39762 (2019)

John M. Wallace, Penn State University, University Park, PA 16802 (2024)

Martin M. Williams II, USDA-ARS Global Change and Photosynthesis Research, Urbana, IL 61801 (2008)

Tracy Candelaria, *Managing Editor*

Officers of the Weed Science Society of America

Weed Science (ISSN 0043-1745) is an official publication of the Weed Science Society of America, 12011 Tejon Street, Suite 700, Westminster, CO 80234 (720-977-7940). It contains refereed papers describing the results of research that elucidates the nature of phenomena relating to all aspects of weeds and their control. It is published bimonthly, one volume per year, six issues per year beginning in January.

Membership includes online access to *Weed Science*, *Weed Technology*, *Invasive Plant Science and Management*, and the online *WSSA Newsletter*. Dues should be sent to WSSA, 12011 Tejon Street, Suite 700, Westminster, CO 80234 no later than December 1 of each year. Membership in the society is on a calendar-year basis only.

New subscriptions and renewals begin with the first issue of the current volume. Please visit the *Weed Science* subscription page at <https://www.cambridge.org/core/journals/weed-science/subscribe>; Email: subscriptions_newyork@cambridge.org in USA, journals@cambridge.org outside USA.

Weed Science publishes six times a year in January, March, May, July, September, and November. Annual institutional electronic subscription rates: US \$440.00; UK £306.00.

Please use Editorial Manager to access manuscript submissions (<http://www.editorialmanager.com/ws>). Authors are asked to pay \$65 per page as a portion of the cost of publication, plus an additional processing charge of \$55 per manuscript if none of the authors are WSSA members. The Editor can make exceptions in advance when justified.

The Weed Science Society of America fully subscribes to the belief that progress in science depends upon the sharing of ideas, information, and materials among qualified investigators. Authors of papers published in *Weed Science* are therefore encouraged, whenever practicable and when state and federal laws permit, to share genotypically unique, propagative materials they might possess with other workers in the area who request such materials for the purpose of scientific research.

On the Cover:

Waterhemp is the most problematic weed in corn, soybean, and sugar beet production in Minnesota, USA. Accessions resistant to six herbicide sites of action and seven different herbicides were confirmed. (Photo by: Debalin Sarangi and Navjot Singh; 3-D molecules from molview.org)

WEED SCIENCE

Journal of the Weed Science Society of America

Volume 72 Number 6 November 2024

RAPID COMMUNICATION

- Deep learning–based detection and quantification of weed seed mixtures. *Shahbaz Ahmed, Samuel R. Revolinski, P. Weston Maughan, Marija Savic, Jessica Kalin and Ian C. Burke* 655

RESEARCH ARTICLES

- Emergence of multiple resistance to EPSPS and ALS herbicides in smooth pigweed (*Amaranthus hybridus*): a growing concern in Brazil. *Claudia de Oliveira, Sandra M. Mathioni, Ana Paula Werkhausen Witter, Daniel Nalin, Lúcio N. Lemes, Eduardo G. Ozorio, Fernando Storniolo Adegas and Rubem Silvério de Oliveira Jr* 664
- Profile and extent of herbicide-resistant waterhemp (*Amaranthus tuberculatus*) in Minnesota. *Navjot Singh, Thomas J. Peters, Ryan P. Miller, Seth L. Naeve and Debalin Sarangi* 673
- A Trp-574-Leu mutation in acetolactate synthase confers imazamox resistance in barnyardgrass (*Echinochloa crus-galli*) from China. *Yu Liu, Kerong Shi, Haitao Gao, Shaojing Yin, Liyao Dong and Zhike Feng* 683
- Detection of two common ACCase mutations associated with high levels of fenoxaprop-*P*-ethyl resistance in shortawn foxtail (*Alopecurus aequalis*) using loop-mediated isothermal amplification. *Fan Yin, Mali Wang, Min Liao, Haiqun Cao and Ning Zhao* 693
- Auxin herbicides, halosulfuron, sulfentrazone, and topramezone disparately affect morphology and ultraviolet features of weedy flowers and associated pollinator foraging. *Navdeep Godara and Shawn D. Askew* 703
- Primary metabolic profiling of four broomrapes belonging to *Orobanche* and *Phelipanche* species. *Evgenia Dor, Aviv Guy, Rachel Amir and Yael Hacham* 714
- Isolation, pathogenicity, and safety evaluation of a pathogen from buffalobur (*Solanum rostratum*) in China. *Wenfeng Yan, Wanting Zheng and Yanan Zheng* 723
- Optimizing Palmer amaranth (*Amaranthus palmeri*) genetic testing of seeds using real-time (quantitative) PCR. *Sara Bratsch, Denise Thiede, Diandra Viner, Debalin Sarangi, Michael Merriman, Shane Blair and Anthony Cortilet* 732
- Effects of Carolina geranium (*Geranium carolinianum*) competition on strawberry growth and yield. *Ana C. Buzanini and Nathan S. Boyd* 740
- Effects of goosegrass (*Eleusine indica*) competition on strawberry growth and yield. *Ana C. Buzanini and Nathan S. Boyd* 748
- Effect of environmental factors on seed germination and seedling emergence of weedy rice (*Oryza sativa* f. *spontanea*) in China. *Zichang Zhang, Jing Xue, Tao Gu, Hongchun Wang and Bhagirath Singh Chauhan* 754
- Mature tubers of purple nutsedge (*Cyperus rotundus*) confer flooding tolerance by adopting a low-oxygen quiescence strategy that may contribute to its emergence in rice fields. *Shan-Chi Yi, Chen-Yang Wei, Yao Tong, Lin Xu, Dan-Li Fan, Shi-Xian Yu, Shu-Yu Liu, Ren-Hai Wu, Xiao-Liang Liu and Wen-Wei Tang* 761
- Integrating mechanical and cultural methods for weed control in organic chickpea. *Zachariah J. Miller and Kyrstan Hubbel* 774
- Effects of vegetative ground cover on seedling establishment of the invasive liana old man's beard (*Clematis vitalba*). *Brenda Jarvis-Lowry, Kerry C. Harrington, Hossein Ghanizadeh and Alastair W. Robertson* 782
- Using a seed impact mill to limit waterhemp (*Amaranthus tuberculatus*) seed inputs in Iowa soybean. *Alexis L. Meadows and Ramawatar Yadav* 790
- Herbicide residue detection in cotton as influenced by time, drift rate, and sampling method. *Hannah E. Wright-Smith, A. Stanley Culpepper, Carrie R. Crabtree, Timothy L. Grey, Taylor M. Randell-Singleton and Jenna C. Vance* 798

Knowledge distillation and student–teacher learning for weed detection in turf. <i>Danlan Zhai, Teng Liu, Feiyu He, Jinxu Wang, Xiaojun Jin and Jialin Yu</i>	804
Agricultural spray drone deposition, Part 1: methods for high-throughput spray pattern analysis. <i>Daewon Koo, Caleb A. Henderson and Shawn D. Askew</i>	816
Agricultural spray drone deposition, Part 2: operational height and nozzle influence pattern uniformity, drift, and weed control. <i>Daewon Koo, Clebson G. Gonçalves and Shawn D. Askew</i>	824
