The *European Journal of International Security* (EJIS) publishes theoretical, methodological and empirical papers at the cutting-edge of security research. Welcoming high quality research from around the world, *EJIS* covers all areas of international security and is particularly concerned to make connections and build bridges, both between different disciplinary and theoretical perspectives, but also across regional boundaries.

EJIS publishes rigorous, peer-reviewed papers that significantly advance scholarship through original analysis of a salient policy issue, the exploitation of new data, and/or the innovative development and application of theory.

EJIS is a journal of the British International Studies Association.
