

## GENERAL INFORMATION

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

The CMS publishes two research journals: the Canadian Journal of Mathematics (CJM) for longer papers, and the Canadian Mathematical Bulletin (CMB) for shorter papers. To be submitted to CJM, papers should be at least 18 pages long. Shorter papers should be submitted to the CMB. All submitted papers are considered subject to the understanding that they have not been published and that they are not being considered for publication elsewhere. To be accepted, papers must treat new mathematical research, be well written, and be of interest to a significant segment of the mathematical community. Papers may be written in English or French. Manuscripts must be prepared in accordance with the instructions for authors provided at

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information/information-for-author>

## SUBSCRIPTION INFORMATION

Subscription rates can be found at

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/subscribe>

Members of the CMS are entitled to a reduced subscription rate. For more information, please contact the CMS at [memberships@cms.math.ca](mailto:memberships@cms.math.ca).

### CANADA POSTMASTER

Canadian Mathematical Bulletin  
Publications Mail Registration:

40005057

Send address changes to:

Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006

### CANADIAN MATHEMATICAL BULLETIN

(USPS # 007527) is published 4 times per year, quarterly (March, June, September, December). Published by Cambridge University Press, One Liberty Plaza, New York, NY 10006 on behalf of the Canadian Mathematical Society. US Mailing Agent: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Periodicals postage paid at New York, NY and at additional mailing offices.

US POSTMASTER: Send address changes to Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

## RENSEIGNEMENTS GÉNÉRAUX

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information>

La SMC publie deux revues de recherche : le Journal canadien de mathématiques (JCM) qui présente des articles longs et le Bulletin canadien de mathématiques (BCM) des articles plus courts. Les articles destinés au JCM doivent compter au moins 18 pages. Les articles plus courts doivent être acheminés au BCM. Il est entendu que les articles présentés pour publication sont inédits et qu'ils ne sont pas à l'étude pour publication dans d'autres revues. Un article accepté porte sur des recherches récentes, est bien rédigé et s'avère susceptible d'intéresser bon nombre de mathématiciens. Nous acceptons les articles rédigés en langues anglaise ou française. Les articles doivent répondre aux conventions énoncés pour les auteurs au

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/information/information-for-author>

## ABONNEMENTS

Les tarifs d'abonnements sont disponibles en ligne au

<https://www.cambridge.org/core/journals/canadian-mathematical-bulletin/subscribe>

Les membres de la SMC ont droit à un taux d'abonnements réduits. Pour plus amples renseignements, veuillez contacter la SMC à [adhesions@smc.math.ca](mailto:adhesions@smc.math.ca).

### POSTES CANADIENNES

Bulletin canadien de mathématiques

No. d'enregistrement du courrier publications:  
40005057

Envoyer les changements d'adresses aux :

Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006

### BULLETIN CANADIEN DE MATHÉMATIQUES

(USPS # 007527) est publié 4 fois par an, tous les trimestres (mars, juin, septembre, décembre). Publié par Cambridge University Press, One Liberty Plaza, New York, NY 10006 au nom de la Société mathématique du Canada. Agent de poste US: Sheridan Press, 450 Fame Ave., Hanover, PA 17331 USA.

Postes payé à New York, et autres bureaux de diffusion supplémentaires.

POSTES AMÉRICAINES: Envoyer les changements d'adresses aux Journals Fulfillment Department, Cambridge University Press, One Liberty Plaza, New York, NY 10006.

1	A Non-abelian, Non-Sidon, Completely Bounded $\Lambda(p)$ Set	<i>Kathryn E. Hare and Parasar Mohanty</i>
8	Every Separable Complex Fréchet Space with a Continuous Norm is Isomorphic to a Space of Holomorphic Functions	<i>José Bonet</i>
13	On Single-Distance Graphs on the Rational Points in Euclidean Spaces	<i>Sheng Bau, Peter Johnson, and Matt Noble</i>
25	On a Lie Algebraic Approach to Abelian Extensions of Associative Algebras	<i>Youjun Tan and Senrong Xu</i>
39	The Modularity of Special Cycles on Orthogonal Shimura Varieties over Totally Real Fields under the Beilinson–Bloch Conjecture	<i>Yota Maeda</i>
54	The Distance from a Rank $n-1$ Projection to the Nilpotent Operators on $\mathbb{C}^n$	<i>Zachary Cramer</i>
75	On Trudinger-type Inequalities in Orlicz–Morrey Spaces of an Integral Form	<i>Ritva Hurri-Syrjänen, Takao Ohno, and Tetsu Shimomura</i>
91	Gelfand Pairs Involving the Wreath Product of Finite Abelian Groups with Symmetric Groups	<i>Omar Tout</i>
98	The Dual of the Compressed Shift	<i>M. C. Câmara and W. T. Ross</i>
112	A Note on the Vanishing Viscosity Limit in the Yudovich Class	<i>Christian Seis</i>
123	A Complete Classification of 3-dimensional Quadratic AS-regular Algebras of Type EC	<i>Masaki Matsuno</i>
142	Kirszbraun’s Theorem via an Explicit Formula	<i>Daniel Azagra, Erwan Le Gruyer, and Carlos Mudarra</i>
154	Semistable models of elliptic curves over residue characteristic 2	<i>Jeffrey Yelton</i>
163	A Note on Chirally Cosmetic Surgery on Cable Knots	<i>Tetsuya Ito</i>
174	Hyperbolic metric and membership of conformal maps in the Bergman space	<i>Dimitrios Betsakos, Christina Karafyllia, and Nikolaos Karamanlis</i>
182	Finsler Warped Product Metrics with Relatively Isotropic Landsberg Curvature	<i>Zhao Yang and Xiaoling Zhang</i>
192	Möbius Randomness Law for Frobenius Traces of Ordinary Curves	<i>Min Sha and Igor E. Shparlinski</i>
204	The Number of Non-cyclic Sylow Subgroups of the Multiplicative Group Modulo $n$	<i>Paul Pollack</i>
216	The Nef Cone of the Hilbert Scheme of Points on Rational Elliptic Surfaces and the Cone Conjecture	<i>John Kopper</i>
228	Euler characteristics and their congruences in the positive rank setting	<i>Anwesh Ray and R. Sujatha</i>
