Terrorism is likely to remain a dominant issue in the political life of the United States, and much of the world. Philip Jenkins provides a critical look at the images of terrorism that we are offered daily in the mass media. *Images of Terror* raises important questions about how we form our notions of the enemy to be confronted, and how, when we make statements about terrorism, we know what we think we know.

"Jenkins's latest book is a crucial guide for understanding terrorism: what it is, what it hopes to achieve, and how it can be combated."

This new and enlarged edition includes twenty-two original chapters written by leading scholars from the USA and Great Britain. Despite broad differences, all of the contributors to the new edition are working at the interfaces between the dominant *ideas, policies, and consequences* of the criminal justice system. Their papers raise major questions about historical continuities and changes in the system, among them how the US prison population reached the extraordinary level of two million people, and what if anything can be done to avoid such archaeologies of past failures.

From a review of the 1st edition:

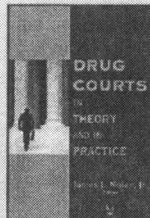

"A valuable and original set of essays that will be enjoyed by students and scholars alike."

Criminal Circumstance
A Dynamic Multicontextual
Criminal Opportunity Theory

This volume contributes to the further development of criminal opportunity theory by addressing focal areas involving theory, methodology, empirical research, and policy. The authors' starting point is the recognition that both individual and environmental factors across time affects criminal acts. Their basic premise, grounded in the importance of the individual-environmental-temporal nexus, is that criminal acts must be explained in terms of criminal opportunity contexts.

Drug Courts
In Theory and In Practice

In this interdisciplinary examination of the expanding drug court movement, a distinguished and broad panel of legal practitioners and academics offers theoretical assessments and on-site empirical analyses of the workings of various courts in the US, along with comparisons and contrasts with related developments in Britain.

"[A] fascinating collection that will leave readers wanting to learn more about drug courts."

—New York Law Journal

"This edited collection provides a good overview of issues related to the use of drug courts in the US and to a lesser extent Great Britain."

A COMMUNITY BUILT ON WORDS

The Constitution in History and Politics

H. Jefferson Powell

"H. Jefferson Powell is one of the few constitutional scholars who takes seriously the wealth of extrajudicial interpretation of the Constitution. In his most ambitious effort to date, Powell presents a coherent picture of the Constitution as a living and meaningful guide to the limits of governmental action. *A Community Built on Words* is a resourceful, learned, and surefooted book that is a joy to read."—David P. Currie, author of *The Constitution in Congress*

TOWARD A JUST WORLD

The Critical Years in the Search for International Justice

Dorothy V. Jones

"A vivid and compelling counter-narrative to the conventional account of twentieth-century power politics. Jones tells the story of the development of an idea: that reason can be brought to bear on the struggle for power and peace among nations. *Toward a Just World* introduces us to the previously neglected, unsung heroes of modern diplomacy. Read this book and meet the extraordinary men and women who responded to mass murder, genocide and political unrest to build new institutions—institutions designed to promote the peaceful resolution of conflict as well as the rights and dignity of every human person."—Joel H. Rosenthal, Carnegie Council on Ethics and International Affairs

REFUSING CARE

Forced Treatment and the Rights of the Mentally Ill

Elyn R. Saks

"In this very original book, Professor Saks makes the best case to date for a libertarian approach to the imposition of treatment on people with mental illness. The first two chapters' exegesis on mental illness as a legal construct is the most highly nuanced in the literature, and Saks's work on competency, which permeates the book, is pathbreaking. She takes on the most pressing issues in 'civil' mental health law and ethics, and will likely provoke a new round of debate about the appropriate scope of government and professional power over people with mental illness. *Refusing Care* is articulate, engaging, and long overdue."—Christopher Slogobin, Levin College of Law, University of Florida

THE CULTURE OF CONTROL

Crime and Social Order in Contemporary Society

David Garland

"This work serves as both a history of crime control policy debates as set in and shaped by the historical moments of the late twentieth century and a treatise on explanation and critique in socio-legal research; as such it should interest a wide array of scholars and command an important position in the field. . . . Goes far toward debunking more simplistic accounts for the rise of the sometimes bizarre new world of crime control that marks our time."—John Gilliom, *Law and Politics Book Review*
