

New Books in Gamebird Ecology

Ecology and Management of Gamebirds

Edited by Peter J. Hudson and Michael R. W. Rands

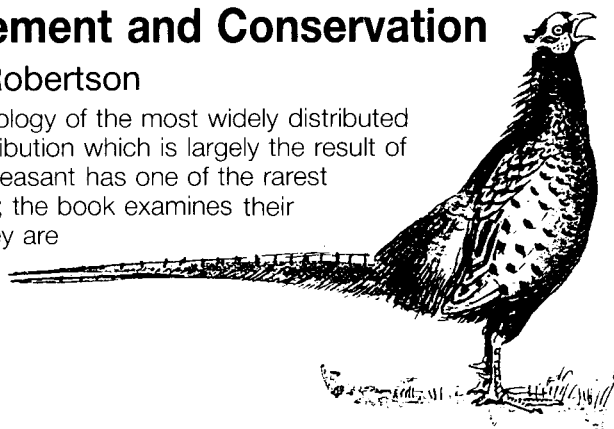

The application of ecological principles to the management of wildlife is an important aspect of conservation biology. The practical aspects of gamebird management, however, rarely consider scientific principles. This book by leading researchers presents, for the first time, an approach to the management of gamebirds based on an ecological framework.

256 pages, paperback **£14.95**

The Pheasant Ecology, Management and Conservation

David Hill and Peter Robertson

This book investigates the ecology of the most widely distributed gamebird in the world, a distribution which is largely the result of introductions by man. The pheasant has one of the rarest breeding systems of any bird; the book examines their unusual lifestyle, and how they are influenced by man through management.

256 pages, hardback **£17.95**
Available July 1988

The Partridge Pesticides, Predation and Conservation

G. R. Potts

'This superb monograph could not be more timely.'

Journal of the British Association of Nature Conservationists

'The book is skilfully written and provides a valuable compendium of facts about the partridge and the impact on it of changing agricultural practices on arable farms ... The author and the Game Conservancy are to be congratulated on this most productive study.'

BIRDS Magazine of the RSPB

288 pages, hardback **£19.95**

To order any of these books please send your cheque plus **£1.75** p+p to the address below.

Australian Journal of Ecology

Editors

H. Heatwole *University of New England, Armidale, New South Wales*

R.J. Whelan *Wollongong University, New South Wales*

A.J. Butler *University of Adelaide, South Australia*

This journal is published on behalf of the Ecological Society of Australia, whose aims are:

- To promote the scientific study of all organisms in relation to their environment
- To promote the application of ecological principles to the development, utilization and conservation of Australian natural resources
- To promote publication of the results of research in ecology
- To advise governmental and other agencies in matters where the application of ecological principles may be of assistance
- To foster the reservation of natural areas for scientific and recreational purposes and seek to ensure that such areas are soundly managed.

Australian Journal of Ecology is devoted to reports of ecological research and critical reviews of methodology based on work of Australasian origin. Much of the material has a strong theoretical base and is therefore of relevance to workers in other geographical areas. The increasing amount of work of a high scientific quality submitted to the journal has led to a considerable expansion in recent years.

Subscription Information

Australian Journal of Ecology is published quarterly. Subscription rates for 1988 are A\$145.00 (Australasia), US\$172.00 (USA & Canada), £102.00 (UK & overseas) post free.

Membership of the Ecological Society of Australia includes a subscription to *Australian Journal of Ecology* and the *Bulletin* house journal. For further information concerning membership of the Society please write to: The Honorary Secretary, Ecological Society of Australia, PO Box 1564, Canberra 2601 ACT, Australia.

Order Form

Please tick the appropriate box

- I would like to subscribe to *Australian Journal of Ecology* and I enclose my remittance for the current volume
- I would like a free specimen copy of *Australian Journal of Ecology*

Functional Ecology

Reduced rates
to BES
members

*A journal promoting
physiological, biophysical and evolutionary ecology,
successfully launched by the BES in 1987.*

ISSN: 0269-2183

Editors: Professor Peter Calow (*Sheffield*)
Dr John Grace (*Edinburgh*)

Functional Ecology publishes the following types of article:

- *Standard Papers* — reporting original research
- *Technical reports* — on methods, techniques and apparatus of general interest.
- *Essay reviews* — short reviews on topical subjects of general interest.

- *Forum papers* — short articles presenting new ideas, opinions or responses to published material — with a hope of stimulating lively debate.

Functional Ecology ensures your articles are:

- Expertly and rapidly refereed
- Printed and presented to a high standard
- Published with minimum delay

A selection of papers from Volume 1

Relationships between trophic niche breadth and reproductive capabilities in a population of *Proasellus coxalis* Dollfus (Crustacea: Isopoda) **A. Basset & L. Rossi**

Survival costs of reproduction in grasshoppers **P. De Souza Santos, Jr & M. Begon**

Basal metabolic rates in mammals: allometry, phylogeny and ecology **M.A. Elgar & P.H. Harvey**

Reproductive values and maximum yields **D. Grey & R. Law**

Thermal responses reflect protein turnover in *Mytilus edulis* **A.J.S. Hawkins, I.A. Wilson & B.L. Bayne**

Midday wilting in a tropical pioneer tree **N.R. Chiariello, C.B. Field & H.A. Mooney**

On optimal defence in plants **T. Fagerström, S. Larsson & O. Tenow**

Water costs and water revenues for established and rain-induced roots of *Agave deserti* **E.R. Hunt, Jr, N.J.D. Zakir & P.S. Nobel**

Significance of architecture and allometry in saplings **T. Kohyama**

In situ photosynthetic responses to light, temperature and carbon dioxide in herbaceous plants from low and high altitude **Ch. Körner & M. Diemer**

Subscription Information

Functional Ecology is published quarterly. Subscription rates for 1988 are £84.00 (UK), US\$171.00 (USA & Canada) and £101.00 (elsewhere). All overseas copies outside Europe will be despatched by accelerated surface post. Requests for free specimen copies and further subscription information should be sent to **Blackwell Scientific Publications, PO Box 88, Oxford, UK**. Members of the British Ecological Society should write to the Society at the following address for details of members' rates: **British Ecological Society, Burlington House, Piccadilly, London W1V 0LQ**.
