

FORMAL SYNTAX

Proceedings of the 1976 MSSB-UC Irvine Conference on the
Formal Syntax of Natural Language

Edited by PETER W. CULICOVER, THOMAS WASOW and
ADRIAN AKMAJIAN

This volume contains contributed papers from such distinguished theorists as Chomsky, Bresnan, Hale, and Jackendoff, as well as comments by Bach, Partee, and Anderson, among others. The papers fall into three categories: on constraining the form and function of transformations in linguistic theory; on the lexicon and base component; and on the interactions of distinct systems of rules within grammars. The topics dealt with cover boundedness of transformations, the "trace theory" of movement rules, autonomy of syntax, the X-bar convention, the structure of the lexicon, and language learnability.

1977, 530 pp., \$19.50/£13.85 ISBN: 0-12-199240-3

TOWARD A LINGUISTIC THEORY OF SPEECH ACTS

By JERROLD M. SADOCK

This book discusses both the motivations for, and the problems with, the performative hypothesis in generative semantics. It attempts to tighten the theory of generative semantics in order to make it empirically testable, and examines the results about speech acts in the tightened theory in two ways: first, it explores the range of illocutionary force which interrogative- and imperative-form sentences encode; and second, it compares the view of illocutionary force and perlocutionary effect in this linguistic theory with the thinking of analytic philosophers.

1975, 180 pp., \$14.00/£9.95 ISBN: 0-12-614350-1

CAMBRIDGE TEXTBOOKS IN LINGUISTICS

Semantic Theory

RUTH M. KEMPSON

Ruth Kempson hopes to narrow the traditional gap between philosophical and linguistic semantics by introducing the reader both to the central topics of linguistic semantics and—without assuming any knowledge of either philosophy or logic—to those problem areas in the philosophy of language that are relevant to linguistics.

Hard covers £8.50 net

Paperback £2.95 net

CAMBRIDGE TEXTBOOKS IN LINGUISTICS

Logic in Linguistics

JENS ALLWOOD, LARS-GUNNAR ANDERSSON and
ÖSTEN DAHL

An elementary introduction to formal logic which is intended to enable linguists and others interested in language to understand how logical concepts are used or could be used in linguistic theory, particularly in semantics.

Hard covers £8.50 net

Paperback £2.95 net

CAMBRIDGE TEXTBOOKS IN LINGUISTICS

Historical Linguistics

THEODORA BYNON

Dr Bynon's textbook attempts to describe the way in which languages change with the passage of time; how and why the pronunciation, vocabulary, and grammar of an individual, a social group, or a whole 'speech community' develop.

Hard covers £12.50 net

Paperback £3.95 net

CAMBRIDGE STUDIES IN LINGUISTICS

Italian Syntax

Transformational and Relational Grammar

A. RADFORD

An important contribution both to linguistic theory and the study of Italian. Dr Radford argues that the data of Italian syntax tell decisively against transformational grammar as a model for the syntax of natural languages.

CAMBRIDGE UNIVERSITY PRESS

Essentials in Grammar

A Volume in the Language, Thought and Culture Series
Domenico Parisi and Francesco Antinucci
translated by **Elizabeth Bates**

October 1976, 192pp., £7.10/\$19.95 0.12.544650.0

There is a pressing need for some model or conceptual framework in whose terms it is possible to represent everything that can be known about word meanings and sentence meanings and which can at the same time be integrated with a theory of the grammatical organization of sentences and the grammatical functions of words. One effort to provide such a model is the movement in modern linguistics that has come to be called generative semantics.

The book that Domenico Parisi and Francesco Antinucci have written identifies a version of the generative semantics model, developing it in its own terms and with no intellectual pre-requisites in either linguistics or formal logic. The authors have concentrated on making the notations intelligible, making the style of analysis familiar, and demonstrating the applicability of the model to a large number of semantic domains.

Language and Context The Acquisition of Pragmatics

A Volume in the Language, Thought and Culture Series
Elizabeth Bates

October 1976, 390pp., £14.15/\$19.95 0.12.081550.8

This volume establishes the connection between language and its natural context and integrates Piagetian cognitive development and language development, reaffirming the role of the semantic component of speech, the intent of the speaker, the speaker's knowledge of his listener, and social constraints in the development of languages. The author stresses the fact that all knowledge, including linguistic knowledge, is procedural in nature, also supporting throughout the book Piaget's claim that thought is essentially "internationalized action", all of which is ultimately derived from the infant's original efforts to do things in the world.

Syntax

Peter W. Culicover

Hardback: 1976, 336pp., £8.85/\$12.50 0.12.199250.0

Paperback: April 1977, 336pp., £4.60/\$6.50 0.12.199250.6

This book serves as an introductory text to syntactic analysis and syntactic theory. It treats a number of the "core" phenomena of English syntax and uses them to illustrate the relationship between description and theory. The approach taken is a strict syntactic one in that semantic considerations are ignored except insofar as they provide validation for an analysis arrived at on the basis of purely syntactic considerations. Particular emphasis is placed on the interrelationships between constraints on grammars and the learnability of languages.

English Quantifiers Logical Structure and Linguistic Variation

Guy Carden

Corrected Edition. October 1977, 120pp., £8.50/\$12.00 0.12.159350.9

From the Introduction: This book has two main objectives: 1. To present and defend an analysis of the underlying structure of quantifiers. 2. To develop a new method of proof based on linguistic variation. These two goals are inter-dependent, since the best arguments for the proposed quantifier analysis are based on linguistic variation, and the proposed methodology is exemplified and shown to be useful by application to the quantifier problem.

Grammar and Meaning

Papers on Syntactic and Semantic Topics

James D. McCawley

Corrected Edition. October 1977, 408pp., £17.75/\$25.00 0.12.482450.1

This volume contains almost the entire work written by the author on syntax and semantics up to December 1971. Rather than rewriting those papers which do not reflect his current thinking, he has confined himself to making stylistic improvements, making some changes of terminology, introducing a uniform method of bibliographical citation, and replacing certain examples. Copious annotations have been added, containing retractions, criticism of the arguments presented, additional facts of relevance, and references to subsequent work on the topic under discussion.

The Verb-Particle Combination in English

Bruce Fraser

Corrected Edition. October 1977, 130pp., £9.25/\$13.00 0.12.265850.7

CONTENTS

The Verb-Particle Combination: syntactic definition. Verb-particle relationships. Properties of verbs which combine with particles. Constraints on particle position. Derived verb-particle combinations. Particle modification. Verb-particle nominalizations. The relation of particle to prefixes.

Some Cases of Apparent Verb-Particle Combinations: The *live it up* cases. The *cut short* cases. The verb-noun-preposition cases. Reduction cases. The *turn off* cases. The *kiss back* cases. The *drive back* cases. The *babble on* cases. Ordering of apparent particles.

Historical Perspective. Appendices. Bibliography.

Topics in Phonological Theory

Michael Kenstowicz and Charles Kisseberth

June 1977, 242pp., £12.40/\$17.50 0.12.405150.2

This book explores the question of abstractness in underlying representations, providing up-to-date explanations of this and other current issues in phonological theory. Every problem is amply illustrated with concrete data from a variety of languages.

CONTENTS: The problem of the abstractness of underlying representations. The non-phonetic basis of phonology. Constraints on phonological representations. Natural rule interactions. The multiple application problem. The role of derivational history in phonology.

Bilingualism

Psychological, Social, and Educational

Implications

edited by Peter A. Hornby

August 1977, 180pp. £6.75/\$9.50 0.12.356350.X

This volume presents some of the historical developments, theoretical controversies, and major research findings and applications from the points of view of psychology, sociology, linguistics and education, as they relate to various aspects of bilingualism. The contributions to the book cover three distinct but overlapping focuses of concern: the consequences of bilingualism at the level of the individual; the effects of bilingualism on social interaction and society; and the significance of bilingualism at the national and international levels.

Oxford University Press**

New Orientations in the Teaching of English

Peter Strevens

Professor Strevens has gathered together a number of his papers written in the last ten years, and added several new ones to give coherence to the whole. The result is a much-needed survey of the present state of the English language teaching profession, both in Britain and America, how it is changing and where it is going. Besides being of importance for teachers, students of applied linguistics and educationalists, the book will help anyone who needs to know more about the differences and similarities between American and British methods.

Teaching Language as Communication

H. G. Widdowson

H. G. Widdowson has played an important and pioneering role in the development of 'communicative language teaching' theory. This book develops a rational approach to the teaching of language as communication based on a careful consideration of the nature of language and of the language user's activities. It provides a lucid guide through a subject which is often confused and misrepresented, while providing a stimulus to all language teachers to investigate the ideas that inform their own practices.

THE LINGUISTICS ASSOCIATION

THE LINGUISTICS ASSOCIATION

The Linguistics Association of Great Britain was founded in 1959 to promote the study of linguistics and to provide for its members both a forum for discussion and facilities for co-operation in furtherance of their interest in linguistics. The Association holds annual spring and autumn meetings, at which original papers are presented in plenary sessions and in section meetings devoted to special interests.

Persons interested in linguistics are eligible for election as members, subject to the approval of the Committee. Subscribing members may receive the *Journal of Linguistics* at the special rate of £7.00 per annum. Application forms for membership may be obtained from the membership Secretary, Dr. R. Hogg, Department of English Language and Medieval Literature, University of Lancaster, Lancaster LA1 4YT.

COMMITTEE MEMBERS

Chairman: Prof. E. Henderson, Dept. of Phonetics & Linguistics, School of Oriental & African Studies, Malet Street, London WC1E 7HP.

Hon. Secretary: Mr. A. R. Warner, Dept. of Language, University of York, Heslington, York YO1 5DD.

Membership Secretary: Dr. R. Hogg, Dept. of English Language & Medieval Literature, University of Lancaster, Bailrigg, Lancaster LA1 4YT.

Meetings Secretary: Dr. P. Werth, Dept. of Linguistics, University of Hull, Hull HU6 7RX.

Treasurer: Ms. C. Cullen, Dept. of Language, University of York, York YO1 5DD.

Assistant Secretary: Dr. G. Gazdar, School of Social Sciences, University of Sussex, Falmer, Brighton BN1 9QN.

Assistant Meetings Secretary: Dr. G. Pullum, Linguistics Section, University College London, Gower Street, London WC1E 6BT.

BRITISH NATIONAL COMMITTEE FOR LINGUISTICS

A British National Committee for Linguistics has been set up under the aegis of the British Academy, in the first instance for a period of three years. It is intended that it shall keep under review relations with international bodies in the field of linguistics, provide a channel of communication between such bodies and British linguists, and hold consultations on matters of common

interest and concern. The committee is composed of three representatives from the British Academy, and two each from the LAGB, the Philological Society and the British Association for Applied Linguistics. The chairman is Professor John Lyons of Sussex University, and the LAGB representatives are Professor R. B. Le Page of York University and Mr. C. Butler of Nottingham University.
