

The Structure and Confirmation of Evolutionary Theory

Elisabeth A. Lloyd

Traditionally a scientific theory is viewed as based on universal laws of nature that serve as axioms for logical deduction. In analyzing the logical structure of evolutionary biology, Elisabeth Lloyd argues that the semantic account is more appropriate and powerful. This book will be of interest to scientists and philosophers alike.

"An exemplar of philosophy of science at its best."—David L. Hull, *The Philosophical Review*

PHILOSOPHY FROM CAMBRIDGE

Physics and Chance

Philosophical Issues in
the Foundations of
Statistical Mechanics
Lawrence Sklar

Statistical mechanics is one of the crucial fundamental theories of physics, and in his new book Lawrence Sklar, one of the pre-eminent philosophers of physics, offers a comprehensive, nontechnical introduction to that theory and attempts to understand its foundational elements.

44055-6 Hardcover \$64.95

Ontology, Modality and the Fallacy of Reference

Michael Jubien

This is a book about the concept of a physical thing and about how the names of things relate to the things they name. It questions the prevalent view and presents a new theory of proper names, according to which names express certain special properties that the things they name exhibit.

43399-1 Hardcover \$44.95

Prometheus Bound

Science in a Dynamic
Steady State

J. M. Ziman

This book is a trenchant analysis of the profound changes that are taking place in the whole scientific enterprise throughout the world. The author does not assume the reader has any technical knowledge of the natural sciences, their history, or politics, and addresses his book to everybody who is concerned about the future of science and its place in society.

43430-0 Hardcover about \$24.95

Psychological Perspectives on Justice

Theory and Applications

*Barbara A. Mellers and
Jonathan Baron, Editors*

Justice, equity, and fairness are central concerns of everyday life. We frequently assess the fairness of individual acts, social programs, and institutional policies. This book explores how distributions of costs and benefits determine our intuitions about fairness. Some chapters examine the extent to which individual behavior deviates from normative theories of justice. This mixture of theoretical and applied perspectives provides a balanced look at the psychological underpinnings of justice.

43199-9 Hardcover \$54.95

Rationality and Co-ordination

Cristina Bicchieri

"... concerned with the issue of how beliefs are formed, of where 'common knowledge' comes from and how it is maintained. These issues are not only of fundamental theoretical importance in our understanding of the nature of rationality and of belief formation, but they are also of tremendous practical importance. I think that the manner in which Bicchieri merges philosophy and game theory is novel and exciting."

—*Daniel Hausman,
University of Wisconsin, Madison*

The Broken Dice, and Other Mathematical Tales of Chance

Ivar Ekeland

Translated by Carol Volk

"Ekeland's essays juggle history, poetry, philosophy, and mathematics so deftly that scientists and humanists can read them with equal profit. . . His mathematical dialogues and sketches of proofs unfold like suspense novels."

—*Lingua Franca*

Cloth \$19.95 192 pages illus.

Berkeley's Philosophy of Mathematics

Douglas M. Jesseph

Situating Berkeley's work within the historical and intellectual context of the Scientific Revolution, Jesseph assesses his ideas in relation to Locke, Barrow, Leibniz, and Newton. He examines Berkeley's treatments of geometry and arithmetic, as well as his famous critique of the calculus in *The Analyst*.

Paper \$25.95 384 pages

Science and Its Conceptual Foundations series

Discovery and Explanation in Biology and Medicine

Kenneth F. Schaffner

Schaffner compares the practice of biological research to medical research and shows how the life sciences can illuminate traditional topics in philosophy of science, such as the nature of discovery and of explanation.

Paper \$25.00 528 pages illus.

*Joint winner of the 1993
Lakatos Award*

Economics— Mathematical Politics or Science of Diminishing Returns?

Alexander Rosenberg

Rosenberg challenges the scientific status of economics, claiming that economics has not increased its predictive power in over two centuries. Rosenberg contends that economic theory fails the most basic requirement of any science—predictive improvability.

Cloth \$32.50 284 pages

Science and Its Conceptual Foundations series

Taking the Naturalistic Turn, or How Real Philosophy of Science is Done

**Organized and Moderated by
Werner Callebaut**

Twenty-four leading philosophers of science candidly and informally debate the consequences of pursuing philosophy as a science.

Paper \$29.95 576 pages

PHILOSOPHY OF SCIENCE

Typescript. Typescript, double-spaced, should be submitted (in triplicate) to Professor Merrilee Salmon, Department of History and Philosophy of Science, University of Pittsburgh, Pittsburgh, Pennsylvania 15260 U.S.A. Typescripts will not be returned unless return postage is prepaid by check, money order, International Postal Reply Coupons or U.S. stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, rather than by footnote, the reference list by citing author and year of publication, for example, Jones (1958) or (Smith 1974, 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes (consecutively numbered) should be kept to an *absolute* minimum. An abstract (also in triplicate) of approximately 100 words must accompany typescript. Typescript must not exceed 9,500 words, including abstract, footnotes and references. A word count must be submitted with each essay. Longer essays will be returned (at the author's expense) to be cut to the acceptable maximum. All figures must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{a_n}\right)}{\left(1 - \frac{1}{b_n}\right)} \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

Processing fee. There is a fifteen dollar per submission processing fee for individuals who are not members of the Philosophy of Science Association.

Copyright. Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

Reprints. Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galley, the order forms that they will find enclosed with their galley.

Reviews. Publications intended for review should be sent to Professor Merrilee Salmon, at the address given above.

Philosophy of Science is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, 503 South Kedzie Hall, Michigan State University, East Lansing, Michigan 48824-1032 U.S.A.

Membership and Subscriptions. Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are graduated based on income: income below \$40,000—\$40.00; \$40,000—\$49,999—\$50.00; \$50,000 or above—\$60.00 U.S.A. a year and include subscription to the journal. Subscription price for non-members is \$60.00 U.S.A. (\$65.00 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$15.00). Subscriptions at a reduced rate of \$20.00 a year are available to qualified students; inquire of the Executive Secretary.
