HISTRIONICS

Three Plays

Thomas Bernhard

Translated by Peter Jansen and Kenneth Northcott

Translated specifically for the stage, this selection makes three of Bernhard's most powerful plays available to English-speaking students and theater professionals. His dark, absurdist plays can be likened to those of Beckett and Pinter, but their cultural and political concerns are distinctly Bernhard's.

WITTGENSTEIN'S NEPHEW

A Friendship

Thomas Bernhard

Translated by David McLintock

Bernhard's memoir about Paul Wittgenstein is "a confession and a guilty homage to their friendship; it takes the place of the graveside speech he never delivered. In its obsessive, elegant rhythms and narrative eloquence, it resembles a tragic aria by Richard Strauss. . . . This is a *memento mori* that approaches genius."—Richard Locke, *Wall Street Journal*

CORRECTION

Thomas Bernhard

Translated by Sophie Wilkins

"*Correction* is something exceedingly rare among novels of recent years: a paradigm of consciousness and not simply a product. . . . Bernhard has said that 'the art we need is the art of bearing the unbearable,' and his novel joins that small group of literary works which nobly help us to do that."—Richard Gilman, *The Nation*

A FATHER'S WORDS

A Novel

Richard Stern

"Richard Stern's novels are robustly intelligent, very funny, and beguilingly humane. He knows as much as anyone writing American prose about family mischief, intellectual shenanigans, love blunders—and about writing American prose."—Philip Roth

THE TELEPHONE BOOK

Technology
Schizophrenia
Electric Speech

By Avital Ronell

"With *The Telephone Book*, the deconstruction of 'phonocentrism' takes an unheard-of turn: Heidegger and Derrida are joined by Alexander Graham ("Ma") Bell in a party line that leaves one's ears (and eyes) ringing." – Samuel Weber, International Operator. In many ways a meditation on the technologically constituted state, *The Telephone Book* opens a new field, becoming the first political

deconstruction of technology, state terrorism, and schizophrenia.

And it offers a fresh reading of the American and European addiction to technology in which the telephone emerges as the crucial figure of this age. \$35.00

THE ORIGINS OF WRITING

Edited by Wayne M. Senner

Long shrouded in myth and speculation, the origins of writing have only recently been freed from racial and national bias to become a subject of careful objective study. Historians, linguists, and archaeologists have accumulated abundant new information about the development and spread of writing systems, but until now no single book has attempted to survey and compare the evidence, theories, and conclusions emerging from the various specialties. In *The Origins of Writing* leading American scholars present the essential story of how and why the world's major writing systems in the Middle East, the Far East, Europe, and Central America came into existence. It will be welcomed by all readers who seek to understand civilization's debt to writing. \$35.00
