

BULLETIN

Volume 20 (1979)

of the Australian Mathematical Society

Number 3

"Please note a variation in the intended rate of production of the Bulletin. ONLY ONE volume (volume 20) will be published in 1979, although subscribers paid for two volumes (volumes 20 and 21). This change will be rectified in 1980 when volumes 21 and 22 will appear AND subscribers will be charged for VOLUME 22 ONLY in respect of that year.
We much regret any inconvenience caused to our customers by the above re-scheduling, and would like to emphasize that these changes have been made necessary by causes beyond our control".

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. Manuscripts must be in their final, publishable form when submitted, and no revision of manuscripts will be allowed. Each paper (which is not itself an abstract) must include an abstract of not more than 200 words.

Authors should submit THREE clean, high quality copies to

The Editor,
Bulletin of the Australian Mathematical Society,
Department of Pure Mathematics,
La Trobe University,
Bundoora, Victoria 3083, Australia.

Authors should retain the original typescript of their papers.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after being evaluated by the Editor and an Associate Editor or another expert. However some meritorious papers will have to be rejected because speed of publication involves space limitations. Papers are welcomed in which

- (i) the results are interesting and (except in the case of an expository paper) new,
- (ii) the exposition is clear and attractive, and
- (iii) the manuscript is in publishable form, without revision.

Responsibility for the correctness of results published in the BULLETIN remains with the author(s).

Details of editorial policy are listed on the inside back cover.
