

INFORMATION FOR AUTHORS

The Bulletin of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. The Editors receive more than three times as much material as can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Authors are asked to avoid, as far as possible the use of mathematical symbols in the title. Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere.

To ensure speedy publication, editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after a careful evaluation by the Editor and an Associate Editor or other expert in the field. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Authors should submit three clean, high quality copies to

The Editorial Office, Bulletin of the Australian Mathematical Society,
Department of Mathematics, The University of Queensland,
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification. Authors should include in their papers one or more classification numbers, following the 1991 Mathematics Subject Classification. Details of this scheme can be found in each Annual Index of Mathematical Reviews.

4. Abstracts of Ph.D. Theses. The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

5. Electronic Manuscripts. The Bulletin is produced using \LaTeX . Authors who are able to do so are invited to prepare their manuscripts using \TeX . (We accept Plain \TeX , \LaTeX or \LaTeX .) Hard copy only should be submitted for assessment, but if the paper is accepted the author will be asked to send the text on an IBM PC compatible diskette or via e-mail to ams@maths.uq.edu.au. [Typed manuscripts are, of course, still acceptable.]

Bulletin of the Australian Mathematical Society

Virtual surface bundle groups	
J.A. Hillman	353
On Lagrange interpolation with equally spaced nodes	
Michael Revers	357
Hölder continuity of solutions of some degenerate elliptic differential equations	
Ahmed Mohammed	369
A dual characterisation of the Radon-Nikodym property	
M. Bachir and A. Daniilidis	379
Measure of weak noncompactness and real interpolation of operators	
Andrzej Kryczka, Stanisław Prus and Mariusz Szczepanik	389
Analytic discs in the polynomial hull of a disc fibration over the sphere	
Miran Černe	403
Edwards-Walsh resolutions of complexes and Abelian groups	
Katsuya Yokoi	407
A perturbed algorithm for strongly nonlinear variational-like inclusions	
C.-H. Lee, Q.H. Ansari and J.-C. Yao	417
Nilpotent-like fitting formations of finite soluble groups	
A. Ballester-Bolínches, M.D. Pérez-Ramos and A. Martínez- Pastor	427
Asymptotic behaviour of small solutions of singularly perturbed problems	
Zongming Guo	435
Linearised Moser-Trudinger inequality	
Meelae Kim	445
Quadratic forms associated with planar endomorphisms	
G.E. Prince	459
An inequality for group presentations	
Avionam Mann	467
Syntactic semigroups and graph algebras	
A.V. Kelarev and O.V. Sokratova	471
Cauchy-Schwarz functionals	
Y.J. Cho, S.S. Dragomir, S.S. Kim and C.E.M. Pearce	479
Galois module structure of holomorphic differentials	
Martha Rzedowski-Calderón, Gabriel Villa-Salvador and Manohar L. Madan	493
Regular order-preserving transformation semigroups	
Yupaporn Kemprasit and Thawhat Changphas	511
A submatrix of the character table	
Gabriel Navarro	525
