

The Division of Infectious Diseases in the Department of Medicine at the University of Pennsylvania's School of Medicine seeks candidates for an Assistant Professor position in the non-tenure clinician-educator track. Applicants must have an M.D. degree and have demonstrated excellent qualifications in Education and Clinical Care. Board Certified / Board Eligible in Infectious Diseases.

The candidate will participate in Healthcare Epidemiology programs including efforts to prevent blood stream infection and MRSA in hospital, and preparedness programs for pandemic flu and bioterrorism attacks. We anticipate that 80% time will be spent doing hospital infection control and 20% clinical care and teaching. Scholarship in the form of publications focused on healthcare epidemiology is expected for reappointment and promotion in the clinician-educator track.

The candidate will be a member of the Hospital of the University Healthcare Epidemiology program under the direction of Dr. Neil Fishman. Healthcare Epidemiology is noted for its leadership in the areas of microbial and antibiotic stewardship.

The effective date of appointment will be 07/01/2008. The University of Pennsylvania is an equal opportunity, affirmative action employer. Women and minority candidates are strongly encouraged to apply. Please submit curriculum vitae, a cover letter, and 3 reference letters to:

Resistance

*The Human Struggle
against Infection*

Norbert Gualde

Translated by Steven Rendall

“*Resistance* provides a detailed and accurate analysis of the critical factors that determine the outcome of this continuous battle, with an emphasis on the evolutionary protection provided by our immune system.”

—Baruj Benacerraf, MD,
Nobel Laureate in Physiology or
Medicine, 1980

“*Resistance* sparkles with wit and intelligence, and is a treasure trove of historical facts. . . . It also serves as starting point for serious contemplation of present and future perils.”—James S. Goodwin, MD,
Director, Sealy Center on Aging

The Journal of Infectious Diseases

Official publication of the Infectious Diseases Society of America

For more than a century, *The Journal of Infectious Diseases (JID)* has been the premier publication in the Western Hemisphere for original research on:

- Pathogenesis, diagnosis, and treatment of infectious diseases
- Microbes that cause infectious diseases
- Disorders of host immune mechanisms

Major articles in *JID* include research results from microbiology, immunology, epidemiology, and related disciplines. Published twice a month, the Journal communicates rapidly changing research efforts and findings.
