

OBITUARY NOTES.

WE regret to notice the death of Mr. Emil Behnke, which occurred at Ostend on September 17th. He was born at Stettin in 1836, and came to England at the age of twenty-nine, where he since resided and followed the profession of voice trainer. For some years past he had been associated intimately with Mr. Lennox Browne, and together they produced a work entitled "Voice, Song, and Speech," which has gone through thirteen editions. Mr. Behnke's views are well known to readers of this Journal, all of whom will share regrets at his premature decease.

Dr. JULIUS BEREGSZASZY, of Vienna, died at Zandpoort, in Holland, on the 10th August last, aged forty-six years. He was spending his holiday at the Dutch watering-place, when one day he was observed to fall on the sands, and died immediately afterwards from the bursting of an aneurism of the aorta.

This sad intelligence will be received with mournful regret by his numerous friends. For many years Dr. Beregszaszy was a prominent figure in the Polylinik of Vienna as assistant to Prof. Schnitzler. He was well known to all throat specialists who studied at Vienna, all of whom will remember his genial and kindly disposition, his patience and painstaking with those who were acquiring the use of the laryngoscope, and the pleasure he took in helping those who showed proficiency or interest in their work.

For the last four years he conducted a private clinic of his own, which was largely attended by English and Americans. He spoke English well, and often delivered his lectures in that language. He was widely known and greatly respected in Vienna by his colleagues and others, and will long be remembered by the patients who flocked to his clinic as a kind friend. The Vienna medical school will lose in him one of their most amiable and accomplished representatives, and the medical world abroad, particularly in England and America, one who rendered valuable assistance to the younger members who visited Vienna.

NEW PREPARATIONS.

Ichthyol Tabloids. (Burroughs, Wellcome & Co.)

THESE tabloids contain $2\frac{1}{2}$ grains of the sodium ichthyolate, coated with sugar and readily soluble. Messrs. Burroughs and Wellcome have suc-

ceeded in presenting a nauseous drug in an elegant and satisfactory manner. Those who prescribe ichthyol will find these tabloids most convenient and desirable.

Tabloids of Bland's Pills. (Burroughs, Wellcome & Co.)

THIS favourite pill has been manufactured into tabloids, each containing four grains, in which manner they can be administered in a readily assimilable form and without damaging the teeth as all iron preparations do. Few patients will object to take these tabloids, even those who have suffered from the foregoing cause and decline iron in any form. They may be given without any fear of disturbing the digestion, and are a very useful addition to the pharmacopœia.

INDEX TO VOL. VI., 1892.

A.

Abscess—bronchiectatic, 169; cerebral, 31, 408, 468, 587; cerebellar after ear disease, 468, 587; extra-dural, 178; after otitis, 179; idiopathic of larynx, 207; laryngeal, 120; retro-pharyngeal, 257, 572

Actinomycosis—of larynx, 263; of lip, 298

Adenoid vegetations—in deaf and dumb, 16, 75, 76, 254, 529

Adenoma sebaceous, 73

Agents—altitude, 295; anæsthetics, 508; antidiphtheritic, 274; antipyrin, 35, 112; aniline colour, 361; aristol, 8, 142; atropine, 68; boracic acid, 551; brom-ethyl, 142, 246, 500; camphorated naphthol, 443; cantharidinic salts, 82; cantharidinum, 294, 518; carbolic acid, 275, 321; chloroform, 69; chromic water, 71; cocaine, 68, 69, 142, 512, 585; compressed air, 490; creosote, 262, 454; creosol iodide, 8; dermatol, 9; dog's serum, 9; ether, 283; eucrophen, 9, 453; guaiacol and iodoform, 9; iodide of potassium, 496, 501; iodine, 275, 295, 453, 456; liq. ferr. sesquichlorate, 251; massage, 238, 573; menthol, 128; mercury, 276, 589, 609; metallic mercury, 268; myrrh, 518; nitrate of silver, 295; potassium iodide, 92; potassium permanganate, 250; pyoktatin, 70; salicylic acid, 71; salol, 33, 112, 470; savin and tannin, 341; sedox, 94; sulphite of calcium, 392; sulphur and quinine, 294; tannate of mercury, 68; trichloroacetic acid, 8, 432; tuberculin, 9, 281; turpentine, 455

Airpassages—their diseases (Douglas), 13; surgery, 13, 170; after influenza, 176

Anatomy—middle ear, 235

Aneurism—aortic, 23; rupture into œsophagus, 80

Angina—lingual phlegmonous, 135; ulcerosa benigna (Sedziak), 335

Annotations—appointment, 161; a new nasal speculum, 518; cycling and

laryngitis, 157; programme of the British Laryngological and Rhinological Association meeting, 160; the Dublin Throat Hospital, 517; the mode of closure of the larynx, 158; the pneumatic speculum as a routine instrument, 6; the treatment of diphtheria, 158; the value of specialists, 7

Anosmia, 253

Antipyrin—local anæsthesia with, 35

Antiseptics—mouth, 77

Antrectomy, 310

Antrum—empyema of, 42; illumination of, 162; empyema resulting from erysipelas, 162, 297; abscess, 396, 397

Aphasia, 580

Aphonia—hysterical, 580

Aristol—in aural and nasal disease, 8

Association Meetings—

American Laryngological Association—A Case of Epithelioma of the Larynx (Asch), 92; A Case of Foreign Body in the Trachea (Glasgow), 90; A Case of Thyrotomy in a Child eighteen months old (Wagner), 90; A Study of a Case of Nasal Tuberculosis (Shurly), 91; Cysts of the Middle Turbinate Bone (Knight), 91; The Laryngo-Tracheal Neoplasm of Tuberculosis (Mackenzie), 92; The Radical Treatment of Nasal Myxomata (Casselberry), 92; The Symptoms and Pathological Changes in the Upper Air Passages in Influenza (Solis-Cohen), 92; The Tonsils in Health and Disease (Harrison Allen), 90; The Troublesome Symptoms caused by Enlargement of the Epiglottis, and the advisability of reducing the size of this Cartilage by Operative Measures (Rice), 90; The Various Forms of Ethmoid Disease (Bosworth), 91; A Case of Fibrous Epithelioma at the Root of the Tongue (Wright), 540; A Case of Suppurating Ethmoiditis (Bryan), 545; Adenoid Forceps (Farlow), 544; A Safe Nasal Douche (Grant), 433; A Safe Endo-Laryngeal Forceps (Grant), 433; Clergymen's Sore Throat (Browne), 437; Granular Pharyngitis: its Etiology and

Treatment (Hovell), 434; Intubation for Chronic Stenosis in a Boy (Knight) 542; New Method of Administering Iodide of Potassium, etc. (Delavan), 541; On the Influence of Certain Diathetic Conditions upon the Prognosis in Operations upon the Throat (Delavan), 538; Pharyngo-mycosis (Knight), 540; Presentation of Instruments, 541; Rare Forms of Laryngeal Growth (MacCoy), 542; Report of some Cases of Membranous Sore Throat (Robinson), 541; Some Pathological Conditions of the Upper Air Passages coincident with Attacks of la Grippe (Chapman), 339; The Importance of guarding against Injury to the Middle Ear when Treating the Nasal Passages and Nasopharynx (Barr), 437; The Correction of Deformity resulting from Abscess of the Nasal Septum (Roe), 544; The Value of Sprays in the Treatment of Catarrhal Affections of the Upper Air Passages (Rice), 543; The After Results of Nasal Cauterization (Blois), 544; Tumours of the Larynx (Swaine), 543.

American Medical Association—A Case of Abductor Paralysis of both Vocal Cords (Wright), 472; A Case of Papilloma of the Epiglottis, etc. (Thrasher), 492; A Case of Papilloma of the Larynx (Waxham), 477; A Case of so-called Bezold variety of Mastoiditis (Knapp), 472; A Case of Spastic Contraction of the Tensor Tympani Muscle (Richardson), 493; A Note on the Etiology of Laryngismus Stridulus (Roe), 595; Abstract of Observation of 25 Cases of Ear Disease occurring as Sequelæ to Epidemic Influenza in San Francisco between 1889-92 (Toole), 484; An Improved Galvano-Cautery Snare; its use in the Nose and Throat (Loeb), 481; Catarrhal Sore Throat in the Lake Region (Carter), 491; Compressed Air in Diseases of the Nose, Throat, and Ear (Scott), 490; Diseases of the Naso-Pharyngeal Portion of the Respiratory Tract, their Relations to, and Ulterior Effects upon the General Health (Jenson), 483; Hypertrophy of the Anterior Extremity of the Middle Turbinate Body of the Nose (Woolen), 491; Infectious Pseudo-membranous Follicular Tonsillitis and Pharyngitis (Casselberry), 479; Mastoid Trephining, with 32 cases operated on among 3400 new ear patients of 1889 to 1891 (Randall), 480; Mental Aberration attending Hypertrophic Rhinitis with Subacute Otitis Media (Carpenter), 478; Naso-Pharyngeal Lesions due to

Lateral Vaso-Motor Causes (Seiss), 473; Peroxide of Hydrogen and its use in Ear Diseases (Johnson) 487; Some Observations upon Excision of the Membrana Tympani and the Two Largest Auditory Ossicles (Burnett), 474; Spontaneous Cure of Multiple Papillomata of the Larynx after Tracheotomy (White), 486; Synopsis of article on Excision of the Membrana Tympani and the Two Larger Auditory Ossicles, etc. (Burnett), 475; The Medical Treatment of Acute Tonsillitis and Pharyngitis; a comparative study based on 169 cases (Newcomb), 470; The Operation for Excision of the Ossicula in Chronic Aural Catarrh with Instance of a Failure (Wurde mann), 489; The Physiology and Pathology of the Tonsils (North), 487; Tuberculosis of the Pharynx (Boylan), 471.

American Otological Society—A Case for Operation for Catarrhal Deafness (Randall), 533; Acute Suppuration of the Middle Ear (Ray), 48; Anatomy of the Elephant's Ear (Richards), 49; Antiseptic Solutions in Purulent Middle-Ear Disease (Theobald), 551; Basilar Meningitis occurring in a Case of Chronic Purulent Otitis Media (Knapp), 547; Craniometric Studies in Relation to Aural Anatomy (Randall), 548; Dislocation of the Malleus Handle (Theobald), 49; Excision of the Membrana Tympani and Necrotic Malleus for Chronic Purulent Otitis Media (Burnett), 48; Exostosis of the External Auditory Meatus (Roosa), 533; Free Opening of the Mastoid and Removal of all Diseased Tissue (Blake), 47; Mastoid Cases (Blake), 549; Mastoid Inflammation (Knapp), 47; Mastoid Operation (Sutphen), 550; Mastoid Disease following an Operation for the Removal of Adenoid Vegetations (Bacon), 550; Middle-Ear Operation (Blake), 552; Otitic Epilepsy, Trephining and Fatal Septic Meningitis (Randall), 48; Otitis Media and Optic Neuritis (Kipp), 549; Pyæmia following Acute Suppurative Otitis (Emerson), 549; Remarkable Improvement in Hearing following Removal of the Stapes (Jack), 551; Seven Cases of Mastoid Diseases exhibiting somewhat extensive Carious Processes (Pomeroy), 546; Tympanic Membrane (Theobald), 48; Use of the Leiter Coil in Mastoid Disease (Bacon), 48.

American Pediatric Association—Forms of Diphtheria which simulate simple Angina, 325.

Annual Meeting of Belgian Laryn-

gologists and Otologists, Liege—A Bone removed from the Larynx after Tracheotomy (Koch), 344; Abscess of the Trachea (Hicquet), 345; A Manubrium Mallei expelled from the Ear in a Clot of Blood (Rutten), 344; Circumscribed Dilatation of the Upper Portion of the Œsophagus (Schiffers), 342; Corradi's Tuning-Fork Test (Eeman), 344; Fenestrated Forceps for removing Spurs from the Septum (Rousseau), 344; Fibrous Polypus (Capart), 342; Gum Elastic Sounds made rigid by a Lateral Mandarin (Delstanche), 343; Mycotic Affection of the Throat (Capart), 342; Operation for Naso-pharyngeal Polypus (Bovet), 347; Papillomatous Vegetations of the Larynx (Schiffers), 341; Pemphigoid Bullous Eruption of the Larynx (Wagner), 343; Primary Epithelioma of the Larynx: Intubation, Tracheotomy, Laryngectomy, Artificial Larynx (Bayer), 343; Rhinoplastic Operation for an Enormously Hypertrophied Nose (Delie), 342; Specific Disease of the Larynx (Schiffers), 342; The Angina following Mercurial Treatment (Schuster), 344; The Employment of Liquid Vaseline in Affections of the Middle Ear (Delstanche), 343; The Mastoid Antrum in the Child (Laurent), 346; The Prodromal Affections of the Respiratory Apparatus in Typhoid Fever, Typical Pharyngeal Ulcerations (Bayer), 344; Two Cases of Mastoid Abscess with Perforation of the Median Wall (Bezold's) following Influenza: Recovery (Moll), 346; Whispered Voice as a measure of Hearing Power (Eeman), 345.

Berliner Medicinische Gesellschaft—Etiology of Diphtheria (Baginsky), 174.

British Laryngological and Rhinological Association—A Case of Deep Abscess of the Neck followed by Acute Laryngeal Symptoms: Tracheotomy (Ward Cousins), 208; A Case of Rodent Ulcer extending from the Face into the Superior Maxillary Bone (Macintyre), 362; Characteristics (Histological) of Laryngeal Epithelioma (Wyatt Wingrave), 215; Hypertrophic Rhinitis with old history of Lupus (Browne), 203; Lupus of the Nose, Pharynx, and Larynx (Browne), 204; Idiopathic Abscess of the Larynx (Milligan), 207; Œsophageal Obstruction by a Dental Plate, Extraction three and a half years subsequent to the accident (Browne), 365; The necessity for Systematic Voice Training in Public Speakers (Sandford), 215; On the Etiology of

Affections of the Upper Respiratory Tract (Macintyre), 369; Primary Nasal Syphilis—Second Attack of Syphilis (Milligan), 205; Some Points concerning the Lingual Tonsil bearing upon a Regional Nomenclature of the Tongue (Wyatt Wingrave), 213; Two Cases of Glosso-labio-laryngeal Paralysis (Sandford), 211; The Relations between the various forms of Nasal Stenosis and Deafness (Bendelack-Hewetson), 377.

British Medical Association (Laryngological Section)—Etiology, Pathology, and Treatment of Catarrh of the Nose and Throat (Macintyre), 418; The Dyspeptic Sore Throat (Williams), 432; The Etiology, Pathology, and Treatment of Nasal Neurosis (Stewart Browne), 416; Faults in Voice Production which lead to Throat Disease (Browne), 428; Nervous Disease of the Throat (Schrötter), 417; On Loss of the Singing Voice (Hunt), 430; On Trichloroacetic Acid in the Treatment of Ozæna (Bronner), 432; On the Importance of a Systematic Course of Physical Voice-Training, at School and College, with regard to its influence on prevalent Throat Troubles in Public Speakers and others (Sandford), 423; Practical Points in the Diagnosis and Treatment of "Fish Bones in the Throat" (Dundas Grant), 432; A Safe Nasal Douche (Grant), 433; A Safe Endo-Laryngeal Forceps (Grant), 433; The Treatment of Ozæna and Recurrent Nasal Polypi by opening and draining Highmore's Antrum (Robertson), 431.

First Meeting Italian Society—Actinomycosis of the Tongue and Larynx (Maiocchi), 609; Bacteriological Consideration in Ozæna (Strazza), 609; Case of Hysterical Mutism (Ficano), 609; Chronic Nasal Glanders (Poli), 609; Cicatricial Hypoglottic Stenosis (Massei), 609; Clinical Studies on Ozæna (Morra), 609; Clinical Studies on the Symbiosis of Laryngeal Syphilis and Tuberculosis (Fasano), 607; Deviations of the Nasal Septum and their Treatment (Dionisio), 608; Diseases of the Labyrinth and their Diagnosis (Masini), 611; Diphtheritic and Scarlatinal Sore Throat (Fiaccarini), 609; Epithelioma of the Larynx (Egidi), 606; Epithelioma of the Left Tonsil (Marano), 607; Eighty-two Intubations and as many Tracheotomies (Egidi), 609; Empyema of the Antrum of Highmore (Nicolai), 609; Functional Energy of the Acoustic Nerve, &c. (Gradenigo), 610; Nasal Tuberculosis (Dionisio),

608; On Mercurial Treatment in some so-called Nasal Scrophulides (Fasano), 609; On the Diagnostic Importance of the Perception of Sounds by Perosseal Aerial Conduction in Diseases of the Ear (Corradi), 610; On the Functions of the Otologist and Laryngologist in Institutions for the Deaf and Dumb (Gradenigo), 611; Oral and Pharyngeal Pemphigus (Garzia), 607; Pachydermia Laryngis—a Histological Note (Damieno), 606; The Diagnosis and Treatment of the Diseases of Accessory Cavities of the Nose (Strazza), 607; The Importance of Laryngology, Otology, and Rhinology in Medical Practice—Considerations and Propositions (Trifiletti), 605; Therapeutic Contribution upon the Otorrhœas of Scrofulous Subjects, and on Crusting Chronic Rhinitis (Isaia), 609; The Laryngeal and Tracheal Phenomena of Gout (Ajello), 606; The Phases, Nature, and Therapeutics of Papillomata of the Larynx (Massei), 605; Treatment of Large Naso-Pharyngeal Tumours (Massei), 609; Two Cases of Chronic Croup (Egidi), 609.

French Society of Laryngology and Otology—A Case of Crico-arytenoid Arthritis (right side) due to Tertiary Syphilis (Natier), 501; A Case of Infectious Angina (Ferras), 497; Abscess of the Larynx consecutive to Scarlatina (Moure), 498; A Rare Case of Ulceration of one Vocal Cord (Vacher), 321; Adenoid Tumours, Two Successive Recurrences in one Case, and one Recurrence in another (Lavrand), 320; A little known Affection of the Tonsils (Hicquet), 499; A New Case of Indurated Chancre of the Left Nasal Fossa (Moure), 496; Bromide of Ethyl as an Anæsthetic (Lubet-Barbon), 500; Cachexia Strumipriva, with complete Paralysis of the Right Vocal Cord and Paresis of the Left Vocal Cord, consecutive to Ablation of the Thyroid Gland (Natier), 502; Concerning Operation for Adenoid Vegetations of the Nasal Pharynx (Rousseau), 323; Electrolysis of the Nasal Fosse with Electrodes of a New Model (Garrigou-Desarènes), 495; Eversion of the Ventricle of Morgagni (Beausoleil), 497; Inter-Arytenoidean Fusco-Cellular Sarcoma—Operation *per vias naturales*—Cure lasting eight months—Recurrence—Tracheotomy (Delie), 321; New Nasal Speculum (Moure), 503; On a New Mode of Treatment of Syphilis, and especially of severe Syphilis of the Nasal Fosse by administration of the iodides

of potassium, soda, and ammonia—advantages of this process, etc. (Daryus), 496; On a New Symptom of Laryngeal Paralysis (Fauvel), 493; On the Treatment of Rebellious Suppuration of the Maxillary Sinus (Cartaz), 494; On some Inconveniences of the Nasal Douche and on the means of avoiding them (Suarez de Mendoza), 501; Rarity of Cortical Laryngeal Paralysis (Raugé), 318; Sarcoma of the Tonsils—difficulty of Histological Diagnosis (Luc), 320; Stereoscopic Photography in the Normal and Pathological Anatomy of the Larynx and Nose (Garel), 502; Syphilitic Condylomata of the Nasal Fosse (Lacoarret), 497; The Spray in the Treatment of Diphtheria, with presentation of an apparatus (Polo), 321; The Treatment of certain Strictures of the Nasal Fossa (Asteir), 348; The Treatment of Naso-Pharyngeal Fibro-Myxomas (Wagnier), 322; Tonsillar Fever and Purpura (Joal), 349; Two Cases of Lupus of the Larynx (Garel), 317.

Gesellschaft der Aerzte des Canton Zurich—Contribution to Rhino-Pathology (Suchannek) 277.

Medical Society of the State of New York—Diphtheria, with Special Reference to a New Method of Treatment (Martindale), 176; Fibroids of the Naso-Pharynx and their Treatment by means of the Electro-Cautery (Goodwillie), 177.

New York Academy of Medicine—Case of so-called Laryngeal Vertigo or Laryngeal Epilepsy (Phillips), 276; Case of Stenosis of the Larynx following Fracture—Treated by Intubation (Stimson), 277; Intubation *v.* Tracheotomy for Acute Laryngeal Stenosis in Children—To what extent, if at all, has Intubation supplanted Tracheotomy (O'Dwyer), 599; On Hypertrophy of the Tonsils (Asch), 277; Superior Maxillary Neoplasm Removed by Rouge's Operation (Chappel), 276.

Otological Section of the Sixty-fourth Gathering of the Association of German Naturalists and Physicians—A Case of Extensive Nerve-Degeneration in all the Turns of the Cochlea (Scheibe), 46; A Case Operated on by the Author's Modification of Stacke's Method (Kretschmann), 140; A Case of Multiple Exostoses of the Cranium, with Unilateral Atrophy of the Face: Demonstration of the accompanying Aural Exostoses (Krakauer), 141; An Otic Cerebral Abscess cured by Operation (Truckenbrod), 45; Casuistic Communications (Szenes), 143; Cholesteatoma

(Schwartz), 140; Contribution to the Excision of the Malleus and Incus (Reinhard), 89; Demonstration of an Apparatus for procuring Germ-free Water for Syringing (Brieger), 179; Demonstration of Casts and Dried Preparations (Siebenmann), 140; Extra-dural Abscess in the course of Middle Ear Disease (Hecke), 178; Further communications on the Operative Exposure of the Cavities of the Middle Ear after Separation of the Auricle (Stacke), 87; Instances of Recovery from Metastatic Pyæmia arising from Middle Ear Disease (Hecke), 178; On Affections of the Middle Ear in Lupus of the Nose (Brieger), 45; On Disease of the Organs of Hearing following *Tabes Dorsalis* (Habermann), 46; On Extra-dural Abscesses following Otitis (Hessler), 179; On the Accord between the Galvanic Reactions of the Eye and Ear (Kiesselbach), 44; On the Therapeutic Effects of some new Otiatic Remedies (Szenes), 142; On the Treatment of *Blennorrhœa* of the Middle Ear (Loewe), 177; On the Use of Lucae's Spring Pressure Probe in Diseases of the Middle Ear (Walb), 143.

Paris Society of Laryngology, Rhinology, and Otology—A New Process for the Catheterization of the Eustachian Tube (Loewenberg), 444; The Nasal Douche and its indications (Percepied), 440; The "Otic sign" in Cerebral Affections: Value of the Binauricular Accommodative Reflex (Gellé), 437; Statistical Note on Suppuration of the Middle Ear complicated with Mastoid Inflammation (Hamon du Fougeray), 442.

The Society of Laryngology and Rhinology of Paris—A Case of Acute Rheumatic Crico-Arytenoid Arthritis (Luc), 191; A Case of Deafness due to Mumps (Gellé), 35; An Apparatus for giving Insufflations of Antiseptic Air or Medicated Vapours and Injections into the Tympanic Cavity through the Eustachian Tubes (Gilles), 229; A Case of Foreign Body in the Ear (Ménière), 351; A Case of Foreign Body (piece of peach) which remained for three days in the Nasal Pharynx (Saint Hilaire), 193; A Case of Subglottic Polypus (Papadopoulos), 43; A Leech in the Larynx (Aubert), 44; A Note on Contraction of the Transverse Arytenoid Muscle (an endeavour to interpret the Laryngoscopic signs attributed by Gerhardt to "bilateral and complete paralysis of the posterior crico-arytenoid muscles") (Ruault), 350; Bilateral Paralysis of

the Posterior Crico-arytenoid in a Case of Aneurism of the Aorta (Cartaz), 37; Calculus of Wharton's Duct (Chatellier), 349; Carcinoma of the Left Vocal Cord—Laryngo-fissure (Lichtwitz), 39; Case of Adenoid Granulations in an Infant six weeks old (Astier), 554; Critical Study on the Etiology of Deviations of the Septum, with Presentation of a Specimen (Potiquet), 313; Demonstration of the Local Anæsthetic Properties of Antipyrin—its Employment in certain Affections of the Throat and Lungs (St. Hilaire), 35; Eczematous Erythema consequent upon Application of Salol (Cartaz), 33; Extirpation *per vias naturales* of Multiple Papilloma of the Larynx in a Child by a New Method—Intubation with a Fenestrated Tube (Lichtwitz), 315; Extensive Perforation of the Septal Cartilage of the Nose in Typhoid Fever (Gellé), 35; Foreign Body in the Larynx (Gougouenheim), 36; Foreign Bodies and Cornified Productions of the Pharynx in Pharyngo-mycosis—Action of Iodated Chloride of Zinc on *Leptothrix Buccalis* (Nabias and Sabrazes), 558; Glandular Retention Cysts of the Anterior Part of the Nasal Fossæ (Chatellier), 182; Hemi-Anæsthesia of the Face, Head, and Organs of Sense in the course of Otorrhœa (Gellé), 313; Ménière's Vertigo, Pulsations demonstrated by the Endoscope indicating Otitis (Gellé), 180; Naso-Lobar Neuralgia, symptomatic Tertiary Nasal Syphilis (Gellé), 43; Note on the Treatment of Pharyngitis of the Vault or Tornwaldt's Angina (Lubet-Barbon), 186; Note on the Treatment of Catarrh of the Pharyngeal Tonsil and particularly the circumscribed form called Tornwaldt's Angina (Ruault), 184; On a little known Variety of Phlegmonous Angina (Lingual Phlegmonous Peri-Amygdalitis: Superficial Submucous Phlegmon of the Base of the Tongue, (Ruault), 135; Observation to serve for the Study of Laryngeal Neuropathic Stenosis (Ruault), 36; On the Anatomy of the Middle Ear (Chatellier) 233; On the Opening of the Mastoid Process in Cases of Acute Median Otitis following Influenza, 352; On the Therapeutical Use of the Soluble Salts of Bismuth, especially in Otorrhœa (Garnault), 360; On the Frequency of Latent Bilateral Empyema of the Antrum of Highmore, and the Necessity of Methodical Exploratory Irrigation of this Cavity in Cases of Nasal *Blennorrhœa* (Lichtwitz), 187; Researches on the Anatomical

Causes of Deviation of the Nasal Septum, etc. (Potiquet), 596; Suppurative Otitis and Cerebral Symptoms after Posterior Tamponing for Severe Epistaxis (Gellé), 40; The Thickening of the Antero-Inferior Portion of the Nasal Septum—*Rôle* of the Subvomerine Bones and the Cartilages of Jacobson (Potiquet), 597; Two Cases of Cure of Chronic Suppuration of the Tympanum by Excision of the Malleus (Luc), 38; Two Cases of Fœtid Empyema of the Maxillary Sinus without Apparent Dental Alteration (Luc), 42; The Treatment of Tracheitis by Hot Inhalations of Menthol (Martin and Lubet-Barbon), 128; The Canal of Jacobson, and the possibility of recognizing it during life, and its probable *rôle* in the pathogenesis of certain lesions of the Nasal Septum (Potiquet), 129; The Use of Injections of Van Swieten's Liquor into Tissues of Cancerous Appearance (Marage), 192.

Versammlung Deutscher Naturforscher und Aerzte in Halle-a-S.—A Modified Laryngeal Mirror (Harke), 362; A Method of *post-mortem* Examination of the Nose and Appendices without External Malformation of the Cadaver (Harke), 362; Apparatus for Laryngo-Photography (Wagner), 362; Electrolytic Treatment of Hypertrophic Catarrh of the Nose (Flatau), 362; Instrument to prevent the falling in of the Aلة Narium (Schmidthuyzen), 362; Laryngoscopic Apparatus with Auer's Incandescent Light (Wagner), 362; Melano-Sarcoma of the Nose (Heymann), 361; On Cysts on the Vocal Bands (Chiari), 361; On the Application of Aniline Colours in Diseases of Nose, Throat, and Ear (Bresgen), 361; Photographs of Microscopic Specimens: Vertical and Horizontal Sections of the Human Larynx (Fraenkel), 361; Removal of the Canula and Treatment of Laryngeal Stenosis following Tracheotomy in Children (Thost), 362; Treatment of Pachydermia Laryngis (Scheinmann), 362; Treatment of Rhinitis Atrophica Fœtida (Flatau), 362.

Asthenopia—and hypertrophic rhinitis, 117, 396

Asthma—treatment of air passages for relief, 91, 458, 576

Astigmatism and coryza, 395

Attic suppuration, 87, 122

Auditory centre, 173

Aural—complications in head injuries, 468; aristol in affections, 8; disease and rules for trephining, 271; polypi, 268, 309, 467

Auricle—epithelioma of, 463

B.

Basedow's disease—treatment in, 93, 266

Black tongue, 17

Blennorrhœa of lac. sac, 297; middle ear, 177

Brain, disease of—after nasal operation (Wagner,) 74

Breathing, correct, in voice production, 242

Bronchocele, 25

Bursa pharyngea—disease of (Chiari), 15

C.

Calculus—in sub-maxillary gland, 526; in Wharton's duct, 527

Cancroid of larynx, 582

Cantharidin salts—effects of, 82; in diphtheria, 294

Carcinoma—injection of mercury in, 192

Caries, cervical, 118

Catarrh—general *versus* local treatment, 70; acute, 167; chronic pharyngeal, 393

Cautery—electro-thermo, 67

Cerebellar tumour, 33

Chloroform—accidents and treatment of, 69; death under, 69; Junker's inhaler modified, 245

Cholesteatoma of ear, 30; treatment, 31, 140

Chorea, laryngeal, 263, 305

Cocaine—use and abuse of, 512

Congenital—auditory malformation, 148, 536; goitre, 17; macroglossia, 17; occlusion of post nares by septum, 75; palatal defects, 256; replacement of absence of meatus, 171

Consumption—condition of cure, 8; hypodermic administrations, 9

Cough, nervous laryngeal, 120

Creosol iodide in naso-pharynx and larynx, 8

Croup—diphtheritic, 12; practical considerations (Verstracten), 12; spasmodic, 295; tracheotomy in, 12

Cysts, 396; nasal fossæ, 182; retro-tympanic, 233

D.

Deaf-mutism, 272, 409; following scarlatina, 410

Deafness—due to syphilis (hereditary), 308, 337; microphone in, 271; in mumps, 34; surgical treatment of, 586; traumatic, 173

Diphtheria, 249, 295; anatomical research in paralysis, 11; bacteriological

investigation in pneumonia with, 11; bacillus Loeffler, 520; case of, 11; cure of, 71; diagnosis of, 250; drainage and, 251; dysentery in, 71; etiology, 10, 174, 249, 251; experimental researches (Welch-Flexner), 113; gangrene of lungs, 295; high altitudes in, 71, 296; intubation in, 12; irrigations of salicylic acid in, 71; muscular changes in, 295; myocarditis diphtheriica acuta, 115; nervous symptoms, early, 250; organisms in, 522; paralyses in, 11, 295; propagation of, 10; pseudo-diphtheritic bacillus, 114, 522; studies in human (Tangl), 11; treatment of, 12, 71, 113, 158, 176, 250, 251, 455; operative, 252; permanganate of potash in, 250; typhoid fever followed by, 251

E.

Ear—audible noises in, 27; affections after nasal operation, 74; blows on, 27; congenital malformation, 148, 536; cocaine in, 585; diagnosis of internal and middle ear affections, 271; excision of small bones, 89; of membrane and ossicles in chronic suppuration of attic, 464; examination of, 400; foetus in diseases, 407; foreign bodies, 403, 589; complications in head injuries, 468; influenza and ear disease, 269; injury to, 269; malignant tumours of, 124; meningitis in disease of, 407; nasal affections and ear disease, 585; operative exposure of cavities of middle ear, 87; operation in chronic suppuration of middle ear, 405, 586; outstanding, 87; perception of tone in disease, 308; prognosis in affections of, 404; serous transudation in middle ear, 404; traumatic affection of membrane, 402; in typhoid and ear affections, 587; tuning-fork in disease, 272

Eczema erythema after use of salol, 33
Electric light in antral disease, 64, 112, 458

Electrolysis in affections of the nose and throat, 256; in oesophageal stenosis, 573

Empyema—frontal sinus, 16; antrum, 31, 42, 408, 468, 578, 587; bilateral antral, 187

Epiglottis—operation in enlarged, 90, 302, 394

Epithelioma—naso-pharynx, 75; tongue, 570

Ethmoid disease, 91

Exostoses, multiple, of ear, etc., 141

F.

Facial paralysis, 19

Fauces—congenital defect, 256; perforation of, 456

Fibro-myxoma—naso-pharynx, 15

Foreign bodies—in ear, 589; artificial teeth, 80; fish bones, 456; laminaria, 115; leech, 44; hæmorrhage (fatal) from, 457; in larynx, 22, 36, 168; in naso-pharynx, 193; in nostril, 115; oesophagus, 19; in pharynx, 256; in trachea, 534

G.

Galvanic reactions—accord between those of eye and ear, 44

Galvanism and electrolisis, 296

Gastrotomy, 121, 128

Glossitis superficialis (Miller), 526

Glosso-labio pharyngeal paralysis, 165, 211

Goitre (*see also* "Thyroid Gland")—cases (Helferich), 85; fistula-congenita, 267; ligature of thyroid arteries, 267; sub-sternal, 85

Guillotine—new, 67; improved, 118, 391

Gunshot wounds—nose, 176

H.

Hæmatoma of ear without mental disease, 30

Hæmorrhage— from larynx, 261, pharynx, 299

Hay fever, 163

Hearing in railway servants, 121

Herpes of larynx, 167

Hospitals, British and Irish, for nose and throat, 447

Hyoid bone—tumour of, 534

I.

Ichthyosis of tongue, 527

Influenza—changes in air passages after, 92, 255, 256, 301

Intubation—cases of, 13, 169, 264, 304, 583; in diphtheria, 12; and tracheotomy compared, 296

Instruments—catheter, 289; curette, 254, 519, 541, 573; ear instruments, 411; electric light, 64, 109, 196, 458, 529; electrodes, 541; electro-thermo cauterics, 67; electricity, 326, 362, 518; electrolysis, 245, 265, 296, 396, 495, 573, 574; galvanocautery, 295; hot water bag, 67; inhaler, 245, 321,

518; insufflator, 229; Leiter coil, 48; nasal ecraseur, 246; nasal douche, 440; nasal electrode, 394; nasal ointment introducer, 573; nose elevator, 253; probes for trichloroacetic acid, 246; saw, 246; snare, 245, 246, 276, 518; speculum, 246, 503; spray, 245, 481, 519; syringe, 516; tampon, 541; tongue depressor, 391

Iodol—hypodermically in phthisis, 9

J.

Jacobson's canal—its diseases, etc., 129

K.

Keratitis—circumscribed larynx, 81

L.

Labyrinth—in diphtheria, 273; pilocarpin in deafness of, 585; tuberculosis of, 588

Laryngismus stridulus, 305

Laryngitis, acute, 20, 208; and cycling, 157

Larynx—abductor paralysis bilateral, 290, 400; abscess of, 120, 303; anatomy and physiology, 19; chorea of, 263, 305; cockle burr in, 168; epithelioma of, 92; Extirpation of, 19, 22, 83, 120, 121, 170, 266, 306, 401, 531; foreign bodies, 534, 583; hæmorrhage, 261; hysterical abduction, 457; inflamed joints of, 305; keratitis in, 81; laryngo-fissure, 267; leech in, 44; mechanism of closure, 259; paralysis in infants, 532; in traumatic neuroses, 533; sarcoma of, 399; stenosis, 83, 115, 533; swallowing in relation to, 580; syphilis of, 21; traumatism of larynx, 582; tumour of cords, 260, 306, 398, 457, 521, 582; tumour of (larynx) malignant, 298; ulceration (simple) of, 400; ventricle, eversion of, 497; vertigo, 168, 173, 409, 533

Lead in ear—removal of with mercury, 589

Lip—malformation of, 524

Lipoma of neck

Locomotor ataxia—hearing in, 46

Lupus—affecting middle ear, 45; nose, 204; primary, 582

Lymphangioma, neck, 584

Lymphoma, 393

Lympho-sarcoma, neck, 26

M.

Macrocheilia, 570

Macroglossia from angioma, 571

Malleus—dislocation of, 49

Massage—in chronic affections, nose, etc., 70; (Kellgren), 237; mucous membrane, 163; vibrations (Chiari, Laker), 573

Mastoid disease—abscess, 122, 269, 589; Bezold variety, 467; Leiter coil in, 48; opening of antrum (Robertson), 568

Meatus—bony growths in, 28; sarcoma in, 268

Membrana tympani—collapse of, 31; examination of, 122; excision of, 48, 464, 537; old perforation of, 48

Ménière's disease, 271; after influenza, 32; a symptom of Bright's disease, 536; endoscope for pulsations in, 180

Menstruation and throat disease, 263, 574

Middle ear—acute suppuration, 48; followed by meningitis, 122; erysipelas of, 32; pyæmia following, 172; pyæmia and recovery, 178

Model—nasal cavities (Siebenmann), 14

Mouth bacteria, 456, 524; and teeth during pregnancy, 524

Mouth breathing and enuresis nocturna, 17

Mycosis—aspergillus in antrum, 16; pharyngo-mycosis (Hemenway), 53

Myxœdema, 26, 85, 465; extract of thyroid gland, 265, 584

Myxo-sarcoma—nose, 14

N.

Nasal—ælcæ, insuccion of, 115; asthma, 576; catarrh in children, 177; cavities and other microscopic structures, 573; cautery for (Vulpius), 8; cerebral disease after operations, 578; clamp forceps for, 8; disease and speech, 252; discharge retention, 1; fracture, 577; hydrorrhœa, 458; myxomata, 90; ointment introducer, 573; relation of affection to ear, 459, 585; eye, 252, 459; lachrymal disease, 297; spray 245; speculum (new), 518; stenosis, 163; and general health, 575; surgery, 163; tuberculosis, 91

Neck—rare tumour of, 86; necrosing ethmoiditis, 577

Nerves—experiment on superior laryngeal, 20; resection of inferior laryngeal in paralysis of posterior crico-

arytenoids, 36; centripetal conduct of same, 305

Neuralgia, facial, 112

Neuroses—common, 73; traumatic, 176

Noises audible in ear, 27

Nose—apparatus (rubber) for straightening, 163; trichloroacetic acid in nose and naso-pharynx, 8; tumours of, going to orbit, 161

Nystagmus of vocal bands, 168

O.

Occlusion of nose, 14; congenital, 529

Oedema—acute, 260; after iodide of potash, 92, 260; unusual forms, 77; orbital cellulitis, 269; tubage in, 166; carcinoma, 166

Esophagus—cicatricial stricture, 118; diverticulum of, 257; electrolysis, 574; foreign body and asphyxia, 572; oesophagoplasty, 18; stenosis, 394; stricture of, 118; surgery of, 257

Original Articles—A Case of Laryngectomy (J. Solis-Cohen), 285; A Case of Late Hereditary Syphilis of the Nose, Pharynx, and Larynx (Ricardo Botey), 150; A Case of Phthisis of the Larynx and Lungs, terminating in Epithelioma of the Larynx (Norris Wolfenden), 563; A New Intra-Tympanic Syringe (W. Milligan), 516; A Second Case of so-called Angina Ulcerosa Benigna (John Sedziak), 335; Aural Catheter Steam Sterilizer (John Bark), 289; Contribution to the Question of so-called Croup of the Nose (John Sedziak), 387; Massage in Diseases of the Nose and Throat (A. Kellgren), 207; Pharyngomycosis (Henry Bixby Hemenway), 53; Remarks on Congenital Malformations of the Auditory Apparatus (George Heaton), 148; Serious Symptoms arising from Retention of Nasal Discharge (Middlemass Hunt), 1; The Electric Light in Antral Disease, etc. (William Robertson), 64, 109, 154, 195; The Eustachian Bougie (W. Robertson), 3; The Eustachian Self-Inflator (Dundas Grant), 5; The Uses and Abuses of Cocaine (Arthur G. Hobbs), 511; Voice Training (Joal), 241

Otitic epilepsy, 48

Otitis—acute, treatment, 126, 270; excision of membrana tympani for, 48; opening of mastoid for, 124; unusual inflammation after, 466

Ozæna, 14, 254

P.

Pachydermia laryngis, 81

Palate—tubercular ulceration of, 391

Papillomata (Grant), 21; of cords, 21; of ear, 80; laryngeal stenosis, 120, 305; of tongue, 78; multiple, 21

Paralyses—abductor bilateral, 82; (bilateral) in aneurism of aorta, 37; bulbar lesions, 120; cases (123), unilateral, 23; experimental researches in, 120

Parotid gland, air-containing, 256

Pemphigus—mouth, pharynx, and larynx, 17, 293, 526

Perichondritis aurisculæ, 171; of larynx, 261

Phlegmon of pharynx, 299

Pilocarpin in deafness, 28

Pin sensations in throat, 572

Pneumonitis, experimental (Prudden), 114

Poisoning by acid, 18; by antipyrin, 112

Polypi—nasal, 14; radical treatment, 116

R.

Reflexes of nose, ear, etc.—asthenopia, 162; nasal, 14; surgical treatment, 164
Rest in treatment, 581

Reviews—Anesthetics: Their Uses and Administration (D. W. Buxton), 508; Annual of the Universal Medical Sciences (Sajous), 507; Anatomie der Mundhöhle mit besonderer Berücksichtigung der Zähne (Zucker-kandt), 51; A Practical Treatise on the Diseases of the Ear (D. B. St. John Roosa), 329; Atlas der Kehlkopf Krankheiten (Robt. Krieg), 561; Atlas der Krankheiten der Mund und Rachenhöhle (Mikulicz und Michelson), 325; Bacteriological Diagnosis (Eisenberg), 326; Book on the Physician himself and things that concern his reputation and success (D. W. Cathell), 594; Consumption: How to prevent it, and how to live with it (N. S. Davis, Junr.), 236; Cursus der Laryngoskopischen und Rhinoskopischen Technik (Avellis), 51; Die Behandlung der Tuberkulose mit Tuberkulin in Hamburg und Leipzig (Klebs), 281; Die Erkrankungen der Nase, deren Nebenhöhlen des Nasenrachenramus und des Kehlkopfs (Carl Rosenthal), 282; Die Krankheiten der oberen Luftwege (Jurasz), 560; Die Therapeutischen Lieferungen des Jahres 1891 (Pollatschek), 325; Die Unterscheidung der Gesangsregister auf

Physiologischer Grundlage, mit besonderer Berücksichtigung der Voix mixte (C. R. Hennig), 281; Essentials of Medical Electricity (Stewart and Lawrence), 326; Essentials of Bacteriology (M. V. Ball), 326; Experimentelle und Pathologisch-Anatomische Untersuchungen ueber Croup und Diphtherie (Middeldorpf und Goldmann), 283; Guide to the Administration of Anæsthetics (H. Davis), 283; Handbook of Diseases of the Ear, for the use of Students and Practitioners (Pritchard), 234; Handbuch der Inhalationen (Hankel), 49; Krankheits und Behandlungslehre der Nase und des Mundes, etc. (Bresgen), 50; *Maladies de la Bouche et du Pharynx* (A. Ruault), 503; Normale und Pathologische Anatomie der Nasenhöhle und ihrer Pneumatischer Anhang (Zuckerkindl), 599; On Hare-lip and Cleft Palate (Wm. Rose), 281; Pathologie und Therapie des Rachens der Nasenhöhlen und des Kehlkopfs (F. Massei), 49, 284; Sixth Annual Report of the State Board of Health, and Vital Statistics of the Commonwealth of Pennsylvania (Atkinson), 326; Syphilis in Ancient and Pre-Historic Times (F. Buret), 283; The Anatomical and Histological Dissection of the Human Ear in the Normal and Diseased Conditions (Adam Politzer), 144; The Mastoid Operation, including its History, Anatomy, and Pathology (S. E. Allen), 592; The Mediterranean Shores of America (Remondino), 327; The Micro-Organisms of the Oral Cavity, and the Local and General Diseases which are produced by them (W. D. Miller), 492; Transactions of the Nineteenth Annual Meeting of the American Laryngological Association, 507; Ueber die Ätiologie der Strumitis (Favel), 280; Ueber die Anwendung der Anilinfärbestoffe bei Nasen, Halse und Ohrenleiden (Bresgen), 50; Vorlesungen über die Krankheiten des Kehlkopfs, der Luftröhre, der Nase und des Rachens (L. V. Schrötter), 49, 590; Vorlesungen über Ohrenheilkunde (Albert Bing), 278; Wann ist die Anwendung des Elektrischen Brenners in der Nase von Nutzen (Bresgen), 50.

Roaring in horses, 82

Rodent ulcer (Macintyre) and artificial face, 362

Rheumatism—acute in crico-arytenoid joint, 191

Rhinitis—atrophic, 73, 254; etiology, 173; fibrinous, 14, 18, 73, 388, 575; pseudo-membranous, 254

Rhinoliths, 14, 73, 163, 531

Rhinoscleroma, 14, 302, 395; relation between it and chondritis inferior hypertrophica, 81

S.

Sarcoma of right lung, 84; palate, 530

Septum—correction of deviation, 253; fracture of, 116; resection of, 115; perforation in typhoid, 341

Serum of dog in tuberculosis, 9

Sigmatismus, 255

Sinus thrombosis, 469

Sphenoidal—sinus dilatation of, 75

Stammering—after whooping cough, 217; discussion in British Laryngological and Rhinological Association, 219; followed by stuttering, 24; (Wyllie) 24

Stenosis—laryngeal, 83; bilateral, 115; naso-pharynx, 255; tracheal, 264, 399

Stomatitis epidemica, 77, 255

Syalolith in Wharton's duct, 76

Syphilis in children, 399; hereditary, 150; laryngeal, 81; nasal, primary, 205

T.

Teeth—hygiene of artificial, 117

Temporal bone—disease of (Pepper), 270

Thorax—surgery of, 258

Thrush, 299

Thyroid gland—abscess of, 25; accessory, 307, 535; acute, 460; carcinoma of, 168; cysts of, 85; electrolysis in, 265; enucleation, 25; extirpation and its consequences, 26, 308; functions, 265, 466; inflammation of, 265; mamma and female genitals, &c., 25; physiology, 307; in rat, 583; in sheep, 460, 584; regeneration of parenchyma, 25; removal, 265; study of, 25; treatment by implantation (cat), 266; treatment with mercury, 265; treatment of soft by iodoform injection, 26; treatment by injection of thyroid juice, 265

Tongue—excision of, 39, 117; depressor, 391; surgery of, 78; tuberculous ulceration, 39, 117; tumours of, 256; ulcer of, 118; wire ecraseur in excision, 117

Tonsil—accessory, 530; clinical and pathological changes in, 17; in health and disease, 90; pathology of inflamed, 79; pharyngeal, 186; primary malignant (Newman), 299; scirrhus of, 78; lingual—hypertrophy of, 215; instrument for removal, 256; syphilis of, 527; (Wyatt Wingrave) 213

Tonsillitis, acute—salol in, 112
 Tornwaldt's disease, 184, 254
 Tracheitis—hot inhalation, menthol,
 128
 Tracheocele, median, 23
 Tracheotomy—in croup and diph-
 theria, 72; compared with intubation,
 169; in diphtheria, 22; in infants, 121;
 in laryngeal affection, 22; for obstruc-
 tion in pharynx, 165; without tube,
 169; wounds infected with diphtheria,
 113
 Tuberculin—cure with, 21; effect on
 pulse, 9; in laryngeal and pulmonary
 phthisis, 81; in lupus and tuberculosis,
 9
 Tuberculosis—creosote in, 454; re-
 absorption in, 82; tracheotomy in,
 398; treatment of, 457, 530

V.

Varix of ary-epiglottic folds, 21
 Ventricles—erosion of, 176
 Vertigo—aural, following injury, 173;
 of arterio-sclerosis, 409, 533; laryngeal,
 168
 Voice training—discussion British
 Laryngological Association, 215; (Joal)
 241; (Solis-Cohen), 398

W.

Whooping cough (Ullman), 13

Medicated Throat Pastilles,

Manufactured by Allen & Hanburys.

THESE Pastilles are introduced as an improvement on the ordinary hard, rough, and angular Lozenges, fragments of which often irritate the mouth when in an inflamed or ulcerated condition. Having as their basis Pate de Jujube, they are soft and demulcent in themselves, whilst their rounded form and, in most instances, agreeable flavour make them valuable substitutes for the Lozenges now in common use.

1. **MORPHIA.** (1-40th of a grain.)
Adult dose: From 6 to 10 daily.
2. **IPECACUANHA.**
Readily taken by children. These pastilles are of the same strength as the B.P. lozenges.
3. **MORPHIA and IPECACUANHA.** (1-40th grain Morph., and $\frac{1}{4}$ grain Ipecac.)
Adults may take one every two, three, or four hours.
4. **COMPOUND MORPHIA and IPECACUANHA.** A more active remedy than No. 3. (1-40th grain Morph., 1-5th Ipecac., 1-5th Squills, &c.)
For adults: One every two, three, or four hours.
5. **OPIUM and BELLADONNA.** An agreeable substitute for, and containing the same amount of opium as, the lozenges of the British Pharmacopoeia.

Adult dose: From three to six or eight at intervals during the day.
8. **CHLORATE of SODA.** May be taken whenever the throat is uneasy.
10. **BENZOATED VOICE.** Useful to public speakers, &c. Less active than the Compound Camphor.
One or two may be taken shortly before any exertion of the voice.
11. **CHLORATE of POTASH.** A more agreeable form than the lozenge of the Pharmacopoeia.
Dose: From 6 to 12 daily.
13. **RHATANY.** Astringent.
Dose: 6 to 12 daily, at intervals.
14. **TANNIN.** Astringent, and of the same strength as the Tannic Acid Lozenges B.P.
15. **CARBOLIC ACID.** Antiseptic and stimulant.
Dose: One to be taken every two, three, or four hours.
16. **BROMIDE of AMMONIUM.**
Dose: One every two, three, or four hours.
17. **CHLORATE of POTASH and BORAX.**
Containing these two useful remedies in combination.
Dose: One to be taken frequently.
18. **BORAX.**
Dose: One to be taken frequently.
19. **CHLORIDE of AMMONIUM.** Expectorant.
Dose: One to be taken frequently.
20. **GUAIACUM.** (Two grains of guaiacum in each.)
Dose: One every two hours.
21. **IODIFORM.** ($\frac{1}{2}$ a grain of iodoform in each.)
Dose: One every two, three, or four hours.
22. **RED GUM.** Astringent.
Dose: One may be taken frequently.
23. **EUCALYPTUS.**
Antiseptic and stimulant.
Dose: One to be taken frequently.
24. **COCAINE.** (1-10th and 1-20th grain.)
Sedative to the mucous membrane.
Dose: One every three or four hours.
25. **SEDATIVE and ASTRINGENT.** (Morphia 1-40th grain. Red gum 2 grains.)
Dose: One every two or three hours.
26. **CODEINE.** (1-8th grain Codeine.) Sedative.
Dose: Six may be taken during the day.
27. **COMPOUND EUCALYPTUS.** (Red Gum, Chlorate of Potash, and Cubebs.)
28. **COMPOUND GUAIACUM.** (Guaiaicum, Chlorate of Potash, and Red Gum.)
29. **COMPOUND RHATANY.** (2 grains of Extract of Rhatany and 1-10th grain of Hydrochlorate of Cocaine.)
Dose: From four to six a day.
30. **BORACIC ACID.** (1 grain.)
31. **RED GUM and COCAINE.** (Containing Red Gum and 1-20th gr. of Hydrochlorate of Cocaine.)
32. **RED GUM and CHLORATE of POTASH.** Astringent.
33. **RHATANY and CAPSICUM.** (2 gr. of Extract of Rhatany.)
Dose: From four to six a day.
34. **TEREBENE.** (2 minims of Terebene.)
Dose: From four to six a day.
35. **JABORANDI.** ($\frac{1}{4}$ gr. Extract in each.)
36. **PUMILIO PINE.** Stimulant to the throat. (1 minim in each.)
37. **LETTUCE and BORAX.** (Ext. Lactucae gr. $\frac{1}{2}$, Pulv. Boracis gr. ij. in each.)
38. **COCAINE, CHLORATE of POTASH and BORAX.** For tickling and irritation of the Throat.
39. **LACTIC ACID.** (2 minims of lactic acid in each.)
Dose: One to be taken frequently.
40. **COCA.** (Containing 2 $\frac{1}{2}$ gr. of Coca Extract in each.)
Dose: One every three or four hours.
41. **EUCALYPTUS OIL.** Antiseptic and stimulant. Dose: One every two or three hours.
42. **KOLA.** Stimulating and tonic.
Dose: One may be taken frequently.
43. **MENTHOL.** (1-20th grain in each.) Stimulant and antiseptic.
Dose: One when required.
44. **MENTHOL and COCAINE.** (1-20th grain in each in a pastille.) Stimulant, antiseptic, and sedative.
Dose: One may be taken three or four times a day.

PROGRESS OF PHARMACY.—NEW INVENTIONS.—BOOKS OF THE YEAR,—&c., &c.

Bristol: JOHN WRIGHT & CO. London: SIMPKIN, MARSHALL & CO., Limited.

Editorial Note.

OUR NEW DEPARTURE—OTOLOGY.

IT has been determined, after great consideration, to widen the scope of this JOURNAL by including in its matter the subject of Otology. We have been led to do so for several reasons. One of these reasons is certainly not any want of appreciation of our paper in its present condition, as we have every reason to be gratified with the increased demand for it during the present year. On the other hand, it is well known that the specialities of Rhinology and Otology are as closely associated as those of Rhinology and Laryngology, and it has seemed regrettable that a branch of the healing art so closely intertwined with those we have hitherto exclusively cultivated should be kept apart and allowed, as far as we are concerned, to wither. Many of our readers are otologists, and we venture to think that we are about to supply wants which many have expressed and many more have felt. Apart from the American "Archives of Otology," we believe there is no journal in the English language which gives an exhaustive review of the science referred to. What we offer to do is, to present our readers with such original articles, abstracts and reviews, as may enable them to keep abreast of the state of knowledge of the ear and its diseases. Our co-editor, Dr. DUNDAS GRANT, has accepted the responsibility for the fulfilment of this promise, and we have every confidence that the hopes of the editing committee will be realised, and the requirements of a large circle of readers satisfied.

This is the first number which contains the section on Otology.
