

## GENERAL NOTICES

Candidates for Election as Ordinary Members should obtain a nomination form from the Secretary, *Mineralogical Society*, 41 *Queen's Gate, London S.W. 7*. Candidates must be proposed by two members of the Society, one, at least, of whom shall have personal knowledge of the candidate. There is an entrance fee of one pound (£1) and the annual subscription is two pounds (£2); the latter can be compounded for by a single payment of forty-five pounds (£45). New Members, on the payment of their first subscription, receive all the numbers of the Magazine for the year for which the subscription is paid.

There are at least four meetings of the Society each year, on Thursdays, in January, March, June, and November. They are held (by kind permission) in the Apartments of the Geological Society, Burlington House, Piccadilly, London W. 1. Titles of papers to be read at these meetings, with a view to subsequent publication in the Magazine, and of exhibits, should be sent with a short abstract to the Secretary at least *three* weeks before the meeting. Authors alone are responsible for the views set forth in their respective papers. They are allowed, free of charge, fifty separate copies of their papers published in the Magazine, except in the case of Short Communications of less than 650 words. Authors are advised to consult the Notes for the Guidance of Authors (obtainable free of charge from the Society's office) before submitting papers.

## MINERALOGICAL MAGAZINE

### CONTENTS OF No. 242

(September 1958)

T. C. JAMES and DUNCAN MCKIE: The alteration of pyrochlore to columbite in carbonatites in Tanganyika (Plates XX and XXI) . . . . .	889
G. F. CLARINGBULL and M. H. HEY: New data for dumortierite . . . . .	901
J. H. TAYLOR: The formation of supergene galena at Broken Hill, Northern Rhodesia (Plate XXII) . . . . .	908
J. V. SMITH: The effect of composition and structural state on the rhombic section and periclinal twins of plagioclase feldspars. . . . .	914
L. H. ARRENS: Variation of refractive index with ionization potential in some isostructural crystals . . . . .	929
J. LIMA-DE-FARIA: Heat treatment of metamict euxenites, polymignites, ytrotantalites, samarskites, pyrochlores, and allanites. . . . .	937
E. ARUJA: On the unit cell of calcium potassium sulphate hydrate: synthetic and natural syngenite . . . . .	943
BRIAN J. SKINNER and E. MAUD MCBRIAR: Minium from Broken Hill, New South Wales . . . . .	947
L. J. SPENCER: Twenty-first list of new mineral names . . . . .	951
C. J. PAYNE: A crystal of sinhalite from Mogol, Burma . . . . .	978
P. G. EMBREY: Condurrite: a mixture and not domeykite . . . . .	979
