

FORTHCOMING PAPERS

- INDAR S. LUTHAR
 R. F. REYNOLDS and
 A. H. THOMPSON
 B. T. BENNETT and
 R. B. POTTS
 T. J. DICKSON
 I. D. MACDONALD
 N. D. GUPTA
 DAVID LONDON and
 ZVI ZIEGLER
 A. RÉNYI and G. SZEKERES
 SADAYUKI YAMAMURO
 K. W. CHANG
 JOHN D. DIXON
 PAUL CONRAD
 W. A. COPPEL and A. HOWE
 SADAYUKI YAMAMURO
 M. J. C. BAKER
 R. E. EDWARDS
 R. T. WORLEY
 R. T. WORLEY
 J. D. GRAY
 R. G. BURNS
 WARREN J. WONG
 ALBERT D. POLIMENI
 FU CHENG HSIANG
 JOHN D. DIXON
 JOHN COATES
 I. D. MACDONALD and
 B. H. NEUMANN
 N. SMYTHE
 R. P. HUNTER and
 L. W. ANDERSON
 J. M. DAY and A. D. WALLACE
 A. H. KLOTZ
 A. H. KLOTZ
 R. A. ALO and H. L. SHAPIRO
 JOSEPH BARBACK
 D. G. JAMES
 NEIL W. RICKERT
 JOHN POLAND
 EFRAIM P. ARMENDARIZ
 A. J. VAN DER POORTEN
 JOHN M. BLATT
 C. C. HEYDE
 E. SENETA
 J. C. BURNS
- A note on a result of Mahler
 Projective-symmetric spaces
 Arrays and brooks
 The extreme coverings of 4-space by spheres
 Corrigendum, Another law for the 3-metabelian groups
 Commutation near-rings of a group
 Functions over the residue field modulo a prime
 On the height of trees
 A note on \bar{d} -ideals in some near-algebras
 A stability result for the linear differential equation
 $x'' + f(t)x = 0$
 The Fitting subgroups of a linear solvable group
 A characterization of lattice-ordered groups by their convex
 L -subgroups
 Dynamical instability of linear canonical systems
 A note on vector lattices
 A Helly-type theorem on a sphere
 Criteria for Fourier transforms
 Minimum determinant of asymmetric quadratic forms
 Asymmetric minima of indefinite ternary quadratic forms
 The summability of formal solutions of functional equations
 Verbal wreath products and certain product varieties of groups
 Finite groups with a self-centralizing subgroup of order 4
 Finite solvable c -groups
 On the absolute Nörlund summability of a Fourier series
 Normal p -subgroups of solvable linear groups
 Approximation in algebraic function fields of one variable
 A third-Engel 5-group
 Trivial knots with arbitrary projection
 Certain homomorphisms of a compact semigroup onto a thread
 Semigroups acting on continua
 A note on de Sitter type solutions of Einstein's field equations
 Relativity, uncertainty and electrodynamics
 A note on compactifications and seminormal spaces
 An Md -class of sets indexed by a regressive function
 Transitivity in integral symplectic forms
 Some properties of locally compact groups
 Two problems on finite groups with k conjugate classes
 On radical extensions of rings
 Transcendental entire functions mapping every algebraic num-
 ber field into itself
 Statistics of fragments from enzyme-induced breakup of co-
 polymer chains
 Some local limit results in fluctuation theory
 On the transient behaviour of a Poisson branching process
 The iterated equation of generalized axially-symmetric poten-
 tial theory
 I. Particular solutions
 II. General solutions of Weinstein's type
 III. Conjugate general solutions

TWO IMPORTANT PERIODICALS

JOURNAL OF ENGINEERING MATHEMATICS

The "Journal of Engineering Mathematics" publishes original work in engineering science in which the mathematical method of solution is essential.

The aim of the journal is to promote the application of mathematics to engineering problems and to stress the intrinsic unity of the fundamental problems of different branches of engineering, varying from basic principles of physics and mechanics to management and computer science. Articles are only published if their bearing on engineering subjects is apparent and if the mathematical approach to the problem is essential.

It is issued quarterly (January, April, July and October) and contains about 80 pages per issue. Annual subscription rates for libraries, institutes, firms, government organizations: \$ 16.50 per volume (Postage included).

Special rates for individuals are available on application.

Editor-in-Chief: R. Timman. Board of editors: A. J. W. Duijvestein, P. Eijkhoff, J. W. Sieben, J. A. Sparenberg, E. van Spiegel, G. W. Veltkamp, A. I. van de Vooren, J. V. Wehausen, L. van Wijngaarden, P. J. Zandbergen, Editorial secretary: H. W. Hoogstraten, Technical University, Delft, Holland.

First issue January 1967

INTERNATIONAL JOURNAL OF FRACTURE MECHANICS

This journal is intended to be a medium for original theoretical or experimental contributions which provide a better understanding of the mechanics causing micro and macro fracture in various different materials, and their engineering manifestations and significance. Contributions emphasizing empirical correlations and unanalyzed experimental results, while important and necessary aspects of certain fatigue, strength and fracture analyses will normally not be encouraged, although occasional review papers in these as well as other fields are anticipated and welcomed.

The journal is issued quarterly and contains about 80 pp. per issue. Annual subscription rates for libraries, institutes, firms, government organizations: \$ 25.— (postage included). Special rates for individuals are available on application.

Editor-in-Chief: M. L. Williams, University of Utah, Salt Lake City, U.S.A. Regional Editors: G. I. Barenblatt, W. F. Brown Jr., J. Friedel, S. Gratch, A. K. Head, V. Horak, F. Kerkhof, J. R. Low Jr., T. Pelczynski, N. J. Petch, H. Rumpf, C. A. Verbraak, A. A. Wells, T. Yokobori, S. N. Zhurkov.
