

# CONTENTS.

	PAGE
<i>The average value of an exponential function over the lattice points of a circle.</i> By Mr J. R. WILTON, Trinity College . . . . .	171
<i>Limiting forms of the frequency distribution of the largest or smallest member of a sample.</i> By R. A. FISHER, Sc.D., Gonville and Caius College, and L. H. C. TIPPETT, M.Sc. (With Three Text-figures) .	180
<i>On the quintic surface in space of five dimensions (Part II, Curves on the surface).</i> By F. BATH, Ph.D., King's College. (With Three Text-figures) . . . . .	191
<i>An involution in the complex variable.</i> By Mr J. H. GRACE, Peterhouse . . . . .	210
<i>Extension of a lemma of Stroh.</i> By Mr J. H. GRACE, Peterhouse . . . . .	218
<i>The second solution of Mathieu's differential equation.</i> By S. GOLDSTEIN, B.A., St John's College, Isaac Newton Student . . . . .	223
<i>Operational solution of some problems in viscous fluid motion.</i> By A. F. CROSSLEY, B.A., St John's College . . . . .	231
<i>A recording gyroscope.</i> By Dr G. F. C. SEARLE, Peterhouse, University Lecturer in Experimental Physics. (With Six Text-figures) . . . . .	236
<i>On the action of the Geiger <math>\alpha</math>-particle counter.</i> By JAMES TAYLOR, D.Sc., Ph.D. (Communicated by Sir E. RUTHERFORD.) (With One Text-figure) . . . . .	251
<i>The high-frequency electric discharge at low pressures.</i> By JAMES TAYLOR, D.Sc., Ph.D. and WILFRID TAYLOR, Ph.D. (Communicated by Professor Sir J. J. THOMSON.) (With Plate I and Two Text-figures) . . . . .	259
<i>On the formation of a gaseous helide of radium active deposit.</i> By D. M. MORRISON, Ramsay Memorial Fellow for Canada. (Communicated by Sir E. RUTHERFORD.) (With Two Text-figures) . . . . .	268
<i>A dynamical method for the determination of Young's modulus by stretching.</i> By C. F. SHARMAN, M.A., King's College. (With Three Text-figures) . . . . .	276
<i>An asymptotic expansion for</i> $\sum_0^{\infty} (2n+1) e^{-\sigma(n+\frac{1}{2})^2},$ <i>by H. P. MULHOLLAND, B.A., Queens' College, with an introductory note on the theory of rotational specific heats, by Mr R. H. FOWLER. (Communicated by Mr R. H. FOWLER.) (With One Text-figure) . . . . .</i>	280
<i>The specific heat of carbon dioxide—Correction.</i> By W. H. M <sup>c</sup> CREA, B.A., Trinity College . . . . .	290
<i>On the present position of the theory of centres of activity in heterogeneous catalysis.</i> By F. HURN CONSTABLE, Ph.D., Fellow of St John's College . . . . .	291
<i>A method of generalising the law of mass action for heterogeneous surface reactions.</i> By F. HURN CONSTABLE, Ph.D., Fellow of St John's College . . . . .	307
<i>Relation between mean stopping power and mean range of <math>\beta</math>-rays.</i> By E. J. WILLIAMS, 1851 Exhibition Senior Research Student, Gonville and Caius College. (Communicated by Mr R. H. FOWLER) . . . . .	315
<i>The photo-electric threshold and the heat of dissociation of the potassium molecule.</i> By R. W. DITCHBURN, Ph.D., Trinity College, Isaac Newton Student. (With One Text-figure) . . . . .	320
<i>A theory of Hartree's atomic fields.</i> By J. A. GAUNT, B.A., Trinity College. (Communicated by Mr R. H. FOWLER) . . . . .	328
<i>Some applications and implications of Duane's quantum theory of diffraction.</i> By E. J. WILLIAMS, 1851 Exhibition Senior Research Student, Gonville and Caius College. (Communicated by Mr R. H. FOWLER) . . . . .	343

*First printed in Great Britain at the University Press, Cambridge*
