

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

AUGUST 1970

VOL. 12 PART 3

OLIVER & BOYD

A DIVISION OF LONGMAN GROUP LIMITED

INFORMATION FOR CONTRIBUTORS TO
ANIMAL PRODUCTION

Animal Production publishes papers on original research provided that they have not been and, with the exception of authors' summaries, will not be published elsewhere without the Editors' written permission. Authors' summaries can be reproduced if full acknowledgement of the source is made.

Contributions may be in the field of animal production, or in any related scientific field. Reports on techniques will be published only as appendices to scientific papers. Results of research which do not warrant a comprehensive presentation may be submitted for consideration as *Notes*. *Notes* are not intended for the publication of interim results. They should not exceed 2000 words or the equivalent inclusive of tables and illustrations.

Manuscripts should be typewritten in double spacing with wide margins. Each page and the lines on each page should be numbered. *Two* copies of the typescript (one of illustrations) should be sent to

Dr. Gerald Wiener,
Animal Production,
A.R.C. Animal Breeding Research Organisation,
West Mains Road, Edinburgh EH9 3JQ, Scotland

Manuscripts are not returned with proofs; authors should therefore retain copies.

For guidance to the general style which should be adopted in the writing and presentation of papers authors are referred to *General Notes on the Presentation of Scientific Papers* (2nd revised ed., 1965) published by the Royal Society, London (price 5s.). Points of detail applying particularly to *Animal Production* are given below.

Units of Measurement. Metric units should be used whenever possible and exclusively for papers published from 1971 onward. (Exception may be made for papers in series started prior to 1970.)

Illustrations. The same material should not normally be presented in tables and figures. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors.
- (c) Colour plates are unlikely to be accepted unless authors bear the cost.

[Continued on inside back cover

Single number, 25s. or \$4.00 net.

Annual subscription, 90s. or \$14.00

Front cover centrepiece: *Asses. Part of panel of domesticated animals from tomb of Sahure, Egyptian Fifth dynasty c. 2650 B.C. (after Hillzheimer).*

METRICATION

From 1971 (Vol. 13 of Animal Production) it is intended to publish Metric Units ONLY unless exceptional circumstances exist (e.g. papers in a numbered series, started in earlier volumes, where non-metric units were used).

Conversion factors (metric \rightleftharpoons non metric) are not required as a rule, but might be helpful in the case of complicated or unusual combinations or derivatives of units.

If necessary, a table of conversion factors for frequently used units will be published in the Journal.

CAMBRIDGE UNIVERSITY PRESS

THE BRITISH VETERINARY JOURNAL

The Journal is the only monthly periodical published in Great Britain that is devoted exclusively to the study and practice of veterinary medicine and to recording scientific progress in the veterinary field throughout the Commonwealth. It is read by veterinarians all over the world. Fully illustrated and documented articles on animal husbandry and disease prevention by distinguished contributors from all countries are a feature of the Journal. Summaries of each article are provided in French, German and Spanish.

This Journal, which also publishes original articles on veterinary research, is an important aid in the world struggle to raise living standards and increase food production.

Published monthly. Annual subscription 140s. (U.S.A. and Canada \$20.00)

Index Veterinarius

A COMPLETE BIBLIOGRAPHY OF VETERINARY LITERATURE

This subject and author index of current literature on veterinary and related sciences is produced by the Commonwealth Bureau of Animal Health and was first published in 1933. It is issued quarterly and each year about 15,000 references are listed.

For compilation of the *Index* 700 periodicals in 22 languages are searched and coverage embraces the whole world.

Annual subscription is £22 10s. (\$58.50) (reduced rate to residents in British Commonwealth or Republic of Ireland—£11 5s.). Orders may be sent to the Central Sales Branch, Commonwealth Agricultural Bureaux, Farnham Royal, Slough, Bucks.

The Indian Journal of Animal Sciences

The name of The Indian Journal of Veterinary Science and Animal Husbandry has been changed to The Indian Journal of Animal Sciences. With a view to accommodating the increasing flow of articles, the periodicity of this journal has also been changed into a bi-monthly from a quarterly. This journal, now in its 40th year of publication, presents articles reporting the original research work on different aspects of Animal Sciences—Animal Husbandry, Animal Health, Dairy Science, Dairy Technology, Animal Production, etc.—conducted in India and other countries.

ANIMAL BREEDING ABSTRACTS

will keep you aware of the latest literature on livestock breeding and production for the reasonable outlay of 160s. annually, or 315s. if you live outside the British Commonwealth or the Republic of Ireland. If you are investigating a specific subject, why not avail yourself of our Annotated Bibliography Service. Here are some recent titles:

<i>Number</i>	<i>Subject</i>	<i>Period covered</i>	<i>Number of References</i>	<i>Price</i>
132	Heterosis in pigs	1960-68	17	6s.
133	Inbreeding in pigs	1958-68	51	15s.
134	Comparative milk yields of Friesian (Holstein) cattle of different origin	1960-69	17	6s.
135	Meuse-Rhine-Yssel cattle	1952-66	12	6s.
136	The Charolais and its use in crossbreeding	1963-69	101	30s.
137	The performance of German Mutton Merino and Wurttemberg Merino sheep. (With special reference to mutton production in hot climates)	1955-69	31	9s.
138	Milk recording in cattle: methods	1955-68	75	21s.
139	Genetics of coat colour and type in the guinea-pig	1935-70	36	9s.

These are duplicates of bibliographies prepared on request at the Commonwealth Bureau of Animal Breeding and Genetics, Edinburgh. In addition to the full title reference, the abstract published in *Animal Breeding Abstracts* is reproduced. They can be obtained on application to the Director of the Bureau, The King's Buildings, West Mains Road, Edinburgh, 9. The prices quoted include postage by ordinary mail, and the remittance should be sent with the order *unless you want it posted by air mail*. If the material is to be sent by air mail, do not send money with your request. You will receive an invoice which includes air mail postage.

Vitamins in Feeds for Livestock

BY

F. C. AITKEN AND R. G. HANKIN

with a foreword by E. KODICEK

Technical Communication No. 25

of the Commonwealth Bureau of Animal Nutrition

This book brings together in a series of tables the best available published information on the vitamin content of feeds for livestock. There is a separate table for each vitamin and in each table critically selected data for each feed are tabulated according to country of origin, stage of development and type of processing of samples. Where possible median, 10th and 90th percentiles have been calculated for samples of a similar nature. The criteria of acceptability of published results and problems of availability of the vitamins to livestock are discussed in the introduction.
