Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 20, 2017 (18 issues):
Internet/print package: £1367/\$2621 Americas only/€2190 EU only
Internet only: £989/\$1877 Americas only/€1573 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to
Cambridge University Press

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing

interests. The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Assessment and methodology

Assessing the validity of commercial and municipal food environment data sets in Vancouver, Canada
MIG Daepf and J Black 2649

First evaluation steps of a new method for dietary intake estimation regarding a list of key food groups in adults and in different sociodemographic and health-related behaviour strata
LM Béjar 2660

Developing and validating a nutrition knowledge questionnaire: key methods and considerations
GL Trakman, A Forsyth, R Hoye and R Belski 2670

Nutrition communication

Health literacy and fruit and vegetable intake in rural Australia
S Lim, A Beauchamp, S Dodson, J O'Hara, C McPhee, A Fulton, C Wildey and RH Osborne 2680

Behavioural nutrition

What influences diet quality in older people? A qualitative study among community-dwelling older adults from the Hertfordshire Cohort Study, UK
I Bloom, W Lawrence, M Barker, J Baird, E Dennison, AA Sayer, C Cooper and S Robinson 2685

Exploring beliefs about dietary supplement use: focus group discussions with Dutch adults
EM Pajor, A Oenema, SM Eggers and H de Vries 2694

Effects of psychological eating behaviour domains on the association between socio-economic status and BMI
A Löffler, T Luck, FS Then, C Luck-Sikorski, A Pabst, P Kovacs, Y Böttcher, J Breitfeld, A Tönjes, A Horstmann, M Löffler, C Engel, J Thiery, A Villringer, M Stumvoll and SG Riedel-Heller 2706

Nutritional epidemiology

Association of vegetarian diet with inflammatory biomarkers: a systematic review and meta-analysis of observational studies
F Haghghatdoost, N Bellissimo, JOT de Zepetnek and MH Rouhani 2713

Does adherence to the Mediterranean dietary pattern reduce asthma symptoms in children? A systematic review of observational studies
MM Papamichael, C Itsiopoulos, NH Susanto and B Erbas 2722

Associations of Baltic Sea and Mediterranean dietary patterns with bone mineral density in elderly women
AT Erkkilä, H Sadeghi, M Isanejad, J Mursu, M Tuppurainen and H Kröger 2735

Vitamin D intake and risk of CVD and all-cause mortality: evidence from the Caerphilly Prospective Cohort Study
J Guo, JR Cockcroft, PC Elwood, JE Pickering, JA Lovegrove and DI Givens 2744

Correlates and family aggregation of vitamin D concentrations in school-aged children and their parents in nine Mesoamerican countries
SL Robinson, M Ramirez-Zea, AV Roman and E Villamor 2754

Sociodemographic, lifestyle and behavioural factors associated with consumption of sweetened beverages among adults in Cambridgeshire, UK: the Fenland Study
P Barrett, F Imamura, S Brage, SJ Griffin, NJ Wareham and NG Forouhi 2766

The association between food insecurity and academic achievement in Canadian school-aged children
EL Faught, PL Williams, ND Willows, M Asbridge and PJ Veugelers 2778

Community nutrition

Factors associated with continued participation in a matched monetary incentive programme at local farmers' markets in low-income neighbourhoods in San Diego, California
AR Ratigan, S Lindsay, H Lemus, CD Chambers, CAM Anderson, TA Cronan, DK Browner and WJ Wooten 2786

Infant feeding decisions and behaviours among low-income smoke-exposed women: timing and change during pregnancy
PM Risica and K McCausland 2796

High-protein goat's milk diet identified through newborn screening: clinical warning of a potentially dangerous dietetic practice
E Maines, G Gugelmo, E Tadiotto, A Pietrobelli, N Campostrini, A Pasini, F Ion-Popa, M Vincenzi, F Teofoli, M Camilot and A Bordugo 2806

Breast-feeding counselling mitigates the negative association of domestic violence on exclusive breast-feeding duration in rural Bangladesh. The MINIMat randomized trial
AL Frith, S Ziaei, RT Naved, AI Khan, I Kabir and E-C Ekström 2810

Interventions

Evaluation of the efficacy, safety and acceptability of a fish protein isolate in the nutrition of children under 36 months of age
TJ Ochoa, N Baiocchi, G Valdiviezo, V Bullon, M Campos and A Llanos-Cuentas 2819

Changes in dietary intake following a culturally adapted lifestyle intervention among Iraqi immigrants to Sweden at high risk of type 2 diabetes: a randomised trial
F Siddiqui, V Winther, A Kurbasic, E Sonestedt, KB Lundgren, S Lindeberg, PM Nilsson and L Bennet 2827
