

**JOURNAL OF  
PLASMA PHYSICS**

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge,  
Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics,  
Stanford University, Stanford, California 94305, U.S.A.*

PROF. F. D. KAHN

*Department of Astronomy,  
University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics,  
University of California, La Jolla, California 92093, U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

#### *Copying*

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the U.S.A. who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C. of the per copy fee of \$05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/84/2828-0001 \$05.00.

*ISI Tear Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, U.S.A., is authorized to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from the Cambridge or New York offices of the Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, N.Y. 10022.

Three parts form a volume. The subscription price (which includes postage) of Volumes 31 and 32 (1984) is £75.00 net per volume (US \$190.00 in the U.S.A. and Canada) for institutions; £37.50 (US \$95.00 per volume for individuals. Single parts cost £27.00 each (US \$70.00 in the U.S.A. and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, N.Y., and at additional mailing offices. *POSTMASTER*: send address changes in U.S.A. and Canada to Cambridge University Press, 32 East 57th Street, New York, N.Y. 10022.

# CONTENTS TO VOLUME 31

## PART 1 FEBRUARY 1984

Bifurcation of a free boundary equilibrium. A. TURNBULL	1
Coupling to Z mode near critical angle. E. MJØLHUS	7
Resistive convection in a cylindrical plasma. L. GOMBEROFF	29
Ion temperatures inferred from neutron yield measurements in the TRISOPS IIX plasma vortex structure generator. D. R. WELLS, P. ZIAJKA and J. TUNSTALL	39
Dissipation by thermal forces in plasmas. D. E. MCCLELLAND and R. R. BURMAN	47
On the nonlinear development of the Langmuir modulational instability. R. O. DENDY and D. TER HAAR	67
The effect of fast-time-scale turbulence on magnetohydrodynamical behaviour. R. O. DENDY and D. TER HAAR	81
Fluid theory for fluctuations in cold inhomogeneous plasmas. P. UDDHOLM	93
Transport of neutrals in the outermost region of a tokamak plasma. R. S. CHHABRA	105
The relaxation zone behind normal shock waves in a dusty reacting gas. Part 2. Diatomic gases. O. IGRA and G. BEN-DOR	115
Plasma models and rescaling methods. P. LOTTE and M. R. FEIX	141
Propagation of hydromagnetic waves in a cold plasma mixed with hot electrons. H. HAMABATA and T. NAMIKAWA	153
On the influence of the Hall effect on the spectrum of the ideal magnetohydrodynamic cylindrical pinch. A. LIFSHITZ, E. FEDOROV and U. SCHAPER	173

## PART 2 APRIL 1984

Nonlinear dispersion of surface waves in a plasma column. D. GROZEV and A. SHIVAROVA	177
Electrostatic and electromagnetic eigenmodes near the electron and ion gyrofrequencies in a cylindrical plasma. R. W. BOSWELL	193
Effects of boundary conditions on radial mode structure of whistlers. R. W. BOSWELL	197
Axially symmetric self-focusing of whistler waves. V. I. KARPMAN, R. N. KAUFMAN and A. G. SHAGALOV	209

Excitation of whistler mode instability due to slow cyclotron interaction in an inhomogeneous beam-plasma system. H. A. SHAH and V. K. JAIN	225
Pseudo-three-dimensional convective cell motion in a magnetized plasma. P. K. SHUKLA and M. Y. YU	231
Electromagnetic instability supported by a rippled magnetically focused relativistic electron beam. S. CUPERMAN, F. PETRAN and A. GOVER	239
A numerical solution of the kinetic equations for a spectrum of Langmuir turbulence. D. HAYWARD	253
Unified theory of whistler mode instability in presence of a parallel electric field. I. M. L. DAS and R. P. SINGH	263
Magnetohydrodynamic plasma instability driven by Alfvén waves excited by cosmic rays. J. F. MCKENZIE and G. M. WEBB	275
Transformation and amplification of waves in a non-uniform plasma involving monoenergetic electron beam. K. P. SHAMRAI	301
Effects of thermal spread on the space charge limit of an electron beam. E. A. COUTSIAS	313
A note on Lindhard's representation for transverse and longitudinal dielectric constants. D. G. FROOD and B. K. P. SCAIFE	319
Transformation approximation for the plasma dispersion function and application to electrostatic waves. M. SATO	325

## PART 3 JUNE 1984

Magnetohydrodynamic properties near an X-type magnetic neutral line. B. K. SHIVAMOGGI	333
Burgers' equation and cosmic ray shocks. G. M. WEBB and J. F. MCKENZIE	337
Distribution function and diffusion of $\alpha$ -particles in DT fusion plasma. M. A. LIBERMANN and A. L. VELIKOVICH	369
On the ignition of a self-sustained fusion reaction in a dense DT plasma. M. A. LIBERMAN and A. L. VELIKOVICH	381
Temporal Alfvén wave echoes in an inhomogeneous plasma. I. C. RAE	395
A general method for calculating the self-induced magnetic force of an axisymmetric toroidal current. S. BOBBIO and G. RUBINACCI	415
Nonlinear generation of electromagnetic waves in a magnetoplasma. G. MURTAZA and P. K. SHUKLA	423

*Contents*

vii

Some properties of solitary BGK waves in a collisionless plasma. H. A. SHAH and V. A. TURIKOV	437
Linear tearing mode stability for low- $q$ cylindrical tokamaks. M. ROSENBLUM	447
Parametric decay of Langmuir waves in an electron beam-plasma system. J. E. WILLET and Y. AKTAS	465
Turbulent bremsstrahlung instability of whistler mode in the presence of enhanced ion-acoustic fluctuations. S. N. SARMA, M. NAMBU and S. BUJARBARUA	477
On whistler-mode trapping in the magnetospheric ducts. S. S. SAZHIN	487
AUTHOR INDEX TO VOLUME 31	495
