The Gardens of Adonis: Spices in Greek Mythology

MARCEL DETIENNE

Perhaps the most persuasive and engrossing structuralist study of myth yet written. This close examination of the Adonis myth and festival reveals an Adonis who represents impotent seduction, and whose illicit and fruitless sexuality negates the central human institutions of marriage and the family.

"A gripping book, the skilfully organised argument proceeding with such pace . . . written with a grace so uncommon in scholarly works". CLAUDE LEVI-STRAUSS.
£13.50. *Available.*

Cunning Intelligence in Greek Culture and Society

MARCEL DETIENNE and JEAN-PIERRE VERNANT

A major study of the key Greek concept, *metis*—cunning, intelligence, dexterity, the ability to grasp the fleeting opportunity.

"In recent times scholars have become more aware of the seriousness and of the importance of mythical thinking . . . The argument is presented with great clarity and is documented with admirable thoroughness, and the book makes attractive reading. It adds substantially to the already large contribution of M. Vernant and his school to the understanding of Greek religion and its modes of thought". HUGH LLOYD-JONES, *Times Literary Supplement*.
£14.95. *Available.*

Myth and Society in Ancient Greece

JEAN-PIERRE VERNANT

What is myth? How is it related to society? Distinguished scholar, Jean-Pierre Vernant here tackles fundamental questions on the nature of myth, in an essay of major intellectual importance, "The Reason of Myth", and examines slavery and the class structure of the Greek City-State, its religious, military and economic life. Indispensable for all concerned with the role of myth in past—or present—society.

£18.00. *Autumn, 1979.*

Early Greece and its Eastern Neighbours

OSWYN MURRAY

A peasant people without art transformed itself in three centuries into the most sophisticated culture of the ancient Mediterranean. Oswyn Murray considers the importance of contact with the east, the expansion of trade and colonisation and the relationship between military technology and political progress, to give a complete picture of this complex, vibrant world of archaic culture.

Piracy in the Ancient World

AN ESSAY IN MEDITERRANEAN HISTORY

By H. A. ORMEROD, *Late Rathbone Professor of Ancient History and Classical Archaeology in the University of Liverpool*

In this history of piracy, the author is concerned with the Greek period from the sixth to the third century B.C. By a combination of scholarship and skilful synthesis, Professor Ormerod tells a clear and even enthralling story, and presents students of Ancient History with a veritable mine of information on one of the most daring and fascinating of all human enterprises.

'Piracy is an attractive subject and Professor Ormerod's treatment of it is scholarly and interesting. It is based on a careful and independent examination of the sources and on a topographical study of the principal base of practical operations. The book has two maps and a good index and is well worth careful study.' History

Art and Thought in the Hellenistic Age

The Greek World View 350-50 BC

JOHN ONIANS

This book constitutes a radical re-interpretation of the art of the Hellenistic age and its relationship to the key philosophical and scientific ideas current at the time. In this highly original work, John Onians, lecturer in the History of Art at the University of East Anglia, is able to shed much new light on what had hitherto seemed familiar territory. Among the themes that he explores are: the fundamental contrast drawn by Plato between the values of Atlantis (luxurious and artificial) and those of Athens (austere and natural); the growing awareness of the limitations of naturalism, the role of illusion and deception, and the response of the spectator in art; and the self-conscious use of allegory, both on the grand level of propaganda and in the intimate context of the tombstone. Numerous in-text plates and line-drawings, covering an exceptionally wide variety of art forms, illustrate the argument at every stage. With 189 illustrations £10.50

The Homeric Gods

The Spiritual Significance of Greek Religion

WALTER F. OTTO

TRANSLATED BY MOSES HADAS

An indispensable and illuminating auxiliary guide to anyone familiar with the Homeric epics, this first English translation of the late Professor Otto's authoritative *Die Götter Griechenlands* is now available in paperback. Scholarly yet eminently readable, it offers the modern reader a true understanding of the growth and meaning of ancient Greek religion. After a brief glance at the archaic deities that still belong largely to the realm of magic, the author re-creates the Homeric gods—Zeus, Athena, Apollo, Artemis, Aphrodite and Hermes—showing how they represent the result of a spiritual process that overcame earlier earthbound beliefs and culminated in the religion of the Homeric age. Paperback £3.50

Trade and Industry in Classical Greece

R.J. HOPPER

Economic activity in Classical Greece was largely land-based, but the scope of this book takes us far beyond a study of ancient agriculture, to consideration of other trades and crafts which contributed to the Greek economy, such as mining, textiles, etc. and a detailed examination of the relevant aspects of government, law, finance and commerce. R.J. Hopper, Professor Emeritus of Ancient History in the University of Sheffield, has done exhaustive research, and he always bases his remarks on the literary and archaeological evidence available. With 51 illustrations and 4 maps *Aspects of Greek and Roman Life* £12.00

A History of Macedonia

Volume II: 550-336 B.C.

N. G. L. Hammond and G. T. Griffith

This volume traces the history of Macedonia from c. 550 to the death of Philip II in 336 B.C. Particular attention is paid to the institutions of Macedonia and the part which the Macedonian state played in Greek history is viewed from the Macedonian angle in regard to Athens, Sparta, and Thebes, and the nature of the relationship between the peoples of Macedonia and the Greeks of Peninsular Greece is investigated. Illustrated £25

Callimachus: Hymn to Apollo

A Commentary

Frederick Williams

This is the first commentary on Callimachus' *Hymn to Apollo* since the small scale work of E. Cahen (Paris, 1930), and the first of any sort in English. On the whole it follows Pfeiffer's text (Oxford, 1953), and offers a line-by-line commentary, dealing in detail with questions of diction, style, and content. New interpretations are offered in many of the vexed passages of the poem; in particular, a wholly new solution is proposed to the complex of problems raised by the final section of the hymn, the scene in which Apollo trounces Envy. £7.50

Plotinus: Opera II

Edited by Paul Henry and H. R. Schwyzer

This second volume of Plotinus' works (Enneades IV and V) is a revision of the same editors' major critical edition, published by Museum Lessianum. It contains a critical apparatus of manuscript readings and emendations, with occasional notes explaining or justifying the readings preferred against those of previous editions and translations, and a complete apparatus of philosophical sources. £9.25 *Oxford Classic Texts*

CHARLES H. KAHN

In this new arrangement and translation Professor Kahn demonstrates the power of Heraclitus' artistry, and the originality of his thought.
