SHEA Spring 2017 Conference  
**SCIENCE GUIDING PREVENTION**

March 29-31, 2017

HYATT REGENCY ST. LOUIS  
AT THE ARCH

**FEATURING**

Separate tracks of education focused on Innovative topics addressing unanswered issues in  
Healthcare Epidemiology & Antibiotic Stewardship

Opportunity to Submit  
Scientific Abstracts

Re-Launch of the SHEA  
Epi Project Competition

Ability to participate in the  
SHEA Mentorship Program

## CONTENTS

## Original Articles

- 387** Active Surveillance for Influenza Reduces but Does Not Eliminate Hospital Exposure to Patients With Influenza  
*Brenda L. Coleman, Wil Ng, Vinaya Mahesh, Maja McGuire, Kazi Hassan, Karen Green, Shelly McNeil, Allison J. McGeer and Kevin Katz*
- 393** Electronic Syndromic Surveillance for Influenza-Like Illness Across Treatment Settings  
*Jessica P. Ridgway, Diane Lauderdale, Ronald Thisted and Ari Robicsek*
- 399** Paramyxovirus Outbreak in a Long-Term Care Facility: The Challenges of Implementing Infection Control Practices in a Congregate Setting  
*Steven Schaeffer Spires, H. Keipp Talbot, Carolyn A. Pope and Thomas R. Talbot*
- 405** Ebola Preparedness Resources for Acute-Care Hospitals in the United States: A Cross-Sectional Study of Costs, Benefits, and Challenges  
*Michael A. Smit, Kenneth A. Rasinski, Barbara I. Braun, Linda L. Kusek, Aaron M. Milstone, Daniel J. Morgan and Leonard A. Mermel*
- 411** Unit-Specific Rates of Hand Hygiene Opportunities in an Acute-Care Hospital  
*Angela Han, Laurie J. Conway, Christine Moore, Liz McCreight, Kelsey Ragan, Jannice So, Emily Borgundvaag, Mike Larocque, Brenda L. Coleman, Allison McGeer and the MSH Infection Control and Hand Hygiene Observer Teams*
- 417** Antiseptic Effect of Conventional Povidone–Iodine Scrub, Chlorhexidine Scrub, and Waterless Hand Rub in a Surgical Room: A Randomized Controlled Trial  
*Jui-Chen Tsai, Yen-Kuang Lin, Yen-Jung Huang, El-Wui Loh, Hsiao-Yun Wen, Chia-Hui Wang, Yin-Tai Tsai, Wen-Shyang Hsieh and Ka-Wai Tam*
- 423** Interhospital Comparison of Surgical Site Infection Rates in Orthopedic Surgery  
*Jozica Skufca, Jukka Ollgren, Mikko J. Virtanen, Kaisa Huotari and Outi Lyytikäinen*
- 430** The Effect of Universal Decolonization With Screening in Critical Care to Reduce MRSA Across an Entire Hospital  
*Craig W. Bradley, Martyn A. C. Wilkinson, and Mark I. Garvey*
- 436** A Comparison of Administrative Data Versus Surveillance Data for Hospital-Associated Methicillin-Resistant *Staphylococcus aureus* Infections in Canadian Hospitals  
*Jessica Y. Ramirez Mendoza, Nick Daneman, Mary N. Elias, Joseph E. Amuah, Kathryn Bush, Chantal M. Couris and Kira Leeb*
- 444** An Outbreak of *Ralstonia pickettii* Bloodstream Infection Associated with an Intrinsically Contaminated Normal Saline Solution  
*Yin-Yin Chen, Wan-Tsuei Huang, Chia-Ping Chen, Shu-Mei Sun, Fu-Mei Kuo, Yu-Jiun Chan, Shu-Chen Kuo and Fu-Der Wang*
- 449** Which Comorbid Conditions Should We Be Analyzing as Risk Factors for Healthcare-Associated Infections?  
*Anthony D. Harris, Lisa Pineles, Deverick Anderson, Keith F. Woeltje, William E. Trick, Keith S. Kaye, Deborah S. Yokoe, Ann-Christine Nyquist, David P. Calfee and Surbhi Leekha*

- 455** Inpatient Urine Cultures Are Frequently Performed Without Urinalysis or Microscopy: Findings From a Large Academic Medical Center  
*Abigail L. Carlson, Satish Munigala, Anthony J. Russo, Kathleen M. McMullen, Helen Wood, Ronald Jackups and David K. Warren*
- 461** Preferential Use of Nitrofurantoin Over Fluoroquinolones for Acute Uncomplicated Cystitis and Outpatient *Escherichia coli* Resistance in an Integrated Healthcare System  
*Rebecca L. Pedela, Katherine C. Shihadeh, Bryan C. Knepper, Michelle K. Haas, William J. Burman and Timothy C. Jenkins*
- 469** Current State of Antimicrobial Stewardship in Children's Hospital Emergency Departments  
*Rakesh D. Mistry, Jason G. Newland, Jeffrey S. Gerber, Adam L. Hersh, Larissa May, Sarah M. Perman, Nathan Kuppermann and Peter S. Dayan*

#### Review Article

- 476** *Clostridium Difficile* Infection in Acute Care Hospitals: Systematic Review and Best Practices for Prevention  
*Irene K. Louh, William G. Greendyke, Emilia A. Hermann, Karina W. Davidson, Louise Falzon, David K. Vawdrey, Jonathan A. Shaffer, David P. Calfee, E. Yoko Furuya and Henry H. Ting*

#### Concise Communications

- 483** Management of Rabies Prophylaxis for Potential Bat Exposures in a Level III Neonatal Intensive Care Unit  
*Ann L. Bailey, Rachel D. Quick, Joanne Dixon and Sarmistha B. Hauger*
- 486** Optimizing Inpatient Urine Culture Ordering Practices Using the Electronic Medical Record: A Pilot Study  
*Daniel Shirley, Harry Scholtz, Kurt Osterby, Jackson Musuuza, Barry Fox and Nasia Safdar*
- 489** Distribution of Central Line-Associated Bloodstream Infections Determined From Washington State's Annual Reporting Validation Program, 2009–2013  
*Jason M. Lempp, M. Jeanne Cummings and David W. Birnbaum*

#### Research Briefs

- 493** Detection, Reporting, and Treatment of Hepatitis C Infections Among Hemodialysis Patients  
*Melissa G. Collier, Duc B. Nguyen, Priti R. Patel and Anne C. Moorman*
- 494** Cold Plasma Technology and Reducing Surface Bacterial Counts: A Pilot Study  
*Tânia Claro, Roisin Fay, Conor Murphy, Niall O'Connor, Stephen Daniels and Hilary Humphreys*
- 496** Implementation of Infection Prevention and Antimicrobial Stewardship in Cardiac Electrophysiology Laboratories: Results from the SHEA Research Network  
*Preeti Mehrotra, Kalpana Gupta, Judith Strymish, Daniel B. Kramer, Anne Lambert-Kerzner, P. Michael Ho and Westyn Branch-Elliman*

#### An Important Announcement from the World Health Organization

- 499** Clean Your Hands May 5, 2017: Fight Antibiotic Resistance—It's in Your Hands  
*Ermira Tartari, Daniela Pires and Didier Pittet*

#### Letters to the Editor

- 500** Prolonged Rhinovirus Shedding in a Patient with Hodgkin Disease  
*Andrew T. Dysangco, Amy B. Kressel, Stephanie M. Dearth, Reema P. Patel and Shawn M. Richards*
- 501** Challenging Residual Contamination of Instruments for Robotic Surgery in Japan  
*Nicolas von Landenberg, Alexander P. Cole, Philipp Gild and Quoc-Dien Trinh*
- 502** More Doctor–Patient Contact Is Not the Only Explanation For Lower Hand-Hygiene Compliance in Australian Emergency Departments  
*Andrew J. Stewardson, Rhonda L. Stuart, Caroline Marshall, Marilyn Cruickshank and M. Lindsay Grayson*

- 504** Seasonal Variation in Bare-Below-the-Elbow Compliance  
*Nadia Masroor, Michelle Doll, Kakotan Sanogo, Kaila Cooper, Michael P. Stevens, Michael B. Edmond and Gonzalo Bearman*
- 506** Catheter-Associated Urinary Tract Infection: Utility of the ICD-10 Metric as a Surrogate for the National Healthcare Safety Network (NHSN) Surveillance Metric  
*Alexandre R. Marra, Mufareh Alkatheri and Michael B. Edmond*
- 507** Measures to Prevent and Control Vancomycin-Resistant Enterococci: Do They Really Matter?  
*Hilary Humphreys*
- 509** Food Indwelling *Clostridium difficile* in Naturally Contaminated Household Meals: Data for Expanded Risk Mathematical Predictions  
*Alexander Rodriguez-Palacios, Sanja Ilic and Jeffrey T. LeJeune*
- 511** Reply to Weber, von Cube, Sommer, Wolkewitz: Necessity of a Competing Risk Approach in Risk Factor Analysis of Central-Line-Associated Bloodstream Infection

# MICROBIAL SURVEILLANCE TESTING MADE EASY

*Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing*

## SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of  
Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

**< 10 CFU**

 **healthmark**

## AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

*Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with Nelson Laboratories*

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

*Infection Control & Hospital Epidemiology* (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

## Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: [iche.managingeditor@cambridge.org](mailto:iche.managingeditor@cambridge.org)). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

## Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: [mjmrvica@mrvica.com](mailto:mjmrvica@mrvica.com); telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

## Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may

be obtained from the Copyright Clearance Center (<http://www.copyright.com>, email: [info@copyright.com](mailto:info@copyright.com)). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: [www.cambridge.org/about-us/rights-permissions](http://www.cambridge.org/about-us/rights-permissions).

## Subscriptions

The individual subscription rate for 2017 is \$247. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's CJO homepage: [cambridge.org/ICHE](http://cambridge.org/ICHE).

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) (USA, Canada, and Mexico) or [journals@cambridge.org](mailto:journals@cambridge.org) (outside of USA, Canada, and Mexico).

## About the cover:

The cover format of each volume of *Infection Control & Hospital Epidemiology* honors one of the many professionals throughout history who recognized not only how disease might be spread but also how the principles of epidemiology could be applied to reduce healthcare-associated infections.

Joseph Lister (1827–1912) was born to a Quaker family in the outskirts of London. His father, Joseph Jackson Lister, worked as a wine merchant by day and pursued the study of optics as a hobby. His work helped found modern microscopy, for which he was elected to the Royal Academy in 1832.

Young Lister decided to become a surgeon at an early age. Due to his religious affiliation, Lister was barred from attending older universities of greater prestige and settled upon study at the University of London, from which he received his medical degree and Fellowship in the Royal Academy of Surgeons. Lister moved to Edinburgh in 1853 to work under Mr. Syme, one of the preeminent British surgeons of the day. In Edinburgh, Lister made important observations on the pathogenesis of inflammation. He also gained a wife, Syme's daughter, Agnes, but in doing so had to become a member of the Church of England. Agnes worked closely beside Lister for many years, recording his experiments in great detail.

By 1856, Lister assumed professorship in surgery at the University of Glasgow, where he began to develop his principles of antiseptic surgery. At the time, surgical mortality rates from sepsis ranged from 23% to 60%, and it was assumed that putrefaction and purulent infection of wounds originated from tainted air. Based on the work of his colleague, Louis Pasteur, Lister performed a series of meticulous experiments in which he used antiseptics and developed optimal wound dressing techniques that focused on keeping wounds clean rather than excluding air. Lister traveled widely in the United Kingdom, Europe, and the United States promoting his wound-care techniques. He returned briefly to Edinburgh before assuming the Chair of Clinical Surgery at King's College in London. In 1891, Lister became a Founder of the British Institute for Preventive Medicine, the first academic medical research institute in the United Kingdom. He served as the Institute's President, and the organization was ultimately renamed in his honor. Lister served as President of the Royal Society of London and was appointed to the House of Lords. After his death, Lord Lister chose not to be buried in Westminster Abbey but rather was laid to rest next to his wife.
