

# Complete Culture Media

**IN TWO ENTIRELY NEW FORMS\***

**\* TABLETS**

— for preparation of single tubes and small quantities of media. Each tablet when dissolved in water produces a convenient quantity.

**\* GRANULES**

— for larger scale preparations. Hard and of even size, the granules are less hygroscopic and easier to handle than spray-dried powder.

Both tablets and granules retain all the properties of the original medium, from which they are indistinguishable when reconstituted.

*ADVANTAGES ARE APPARENT—*

Big time-saving in preparation • No specialised equipment needed  
Variability reduced to minimum • Easily portable for field work  
Results reproducible from one laboratory to another when using media from central source • Economical, as only sufficient for immediate requirements need be used.

**THE FOLLOWING ARE AMONG THE MEDIA AVAILABLE  
AS TABLETS AND GRANULES**

Nutrient Broth • Nutrient Agar • McConkey Broth  
McConkey Agar • Peptone Water • Glucose Peptone Broth  
Glucose Peptone Agar • Agar-Agar
