

CLAY MINERALS

VOLUME 34, NUMBER 3, SEPTEMBER 1999

CONTENTS

Tzen-Fu Yui and Shyun-Sheng Chang. Formation conditions of vesicle/fissure-filling smectites in Penghu basalts: a stable-isotope assessment	381
M. Pozo and J. Casas. Origin of kerolite and associated Mg clays in palustrine-lacustrine environments. The Esquivias deposit (Neogene Madrid Basin, Spain)	395
A. Chahi, N. Clauer, T. Toulkeridis and M. Bouabdelli. Rare-earth elements as tracers of the genetic relationship between smectite and palygorskite in marine phosphorites	419
M. A. Karakassides, D. Gournis and D. Petridis. An infrared reflectance study of Si–O vibrations in thermally treated alkali-saturated montmorillonites	429
M. Pelletier, L. J. Michot, O. Barrès, B. Humbert, S. Petit and J.-L. Robert. Influence of KBr conditioning on the IR hydroxyl-stretching region of saponites	439
C. U. Schmidt and G. Lagaly. Surface modification of bentonites: I. Betaine montmorillonites and their rheological and colloidal properties	447
D. Garfinkel-Shweky and S. Yariv. Metachromasy in clay dye systems: the adsorption of acridine orange by Na-beidellite	459
A. García Sánchez, E. Alvarez Ayuso and O. Jiménez de Blas. Sorption of heavy metals from industrial waste water by low-cost mineral silicates	469
E. Murad and H. M. Köster. Determination of the Ti speciation in commercial kaolins by Raman spectroscopy	479
P. Arfaioli, O. L. Pantani, M. Bosetto and G. G. Ristori. Influence of clay minerals and exchangeable cations on the formation of humic-like substances (melanoidins) from D-glucose and L-tyrosine	487
Ph. Refait, C. Bon, L. Simon, G. Bourrié, F. Trolard, J. Bessière and J.-M. R. Génin. Chemical composition and Gibbs standard free energy of formation of Fe(II)-Fe(III) hydroxysulphate green rust and Fe(II) hydroxide	499
<i>Notes</i>	
S. R. Wilson, P. J. Ridler and B. R. Jennings. A method of extending magnetic birefringence particle sizing into the sub-micron range	511
C. Ruby, Ph. Refait, J.-M. R. Génin, T. Delineau and J. Yvon. Evidence of structural Fe(II) ions in Font-Bouillant kaolinites: a Mössbauer study	515
<i>Book Review</i>	519
<i>Forthcoming Papers</i>	523
<i>Announcement</i>	524
