Rashidah Ismaili AbuBakr

## Editorial Board

### *Atypical Neurodevelopment*

Simon Baron-Cohen/Cambridge U.

### *Behavioral Neurogenetics*

Wim E. Crusio/CNRS UMR

### *Cognition and Artificial Intelligence*

Zenon Pylyshyn/Rutgers U.

### *Cognitive and Decision Sciences*

Nick Chater/University College London

### *Cognitive Development*

Annette Karmiloff-Smith/Birbeck College

### *Cognitive Neuroscience*

Moshe Bar/Harvard Medical School

### *Computational Neuroscience*

Nestor A. Schmajuk/Duke U.

### *Evolution of Brain and Cognition*

Dean Falk/Florida State U.

### *Evolution of Cognition*

Celia Heyes/Oxford U.

### *Experimental Analysis of Behavior*

A. Charles Catania/U. Maryland, Baltimore County

### *Language and Language Disorders*

Max Coltheart/Macquarie U.

### *Linguistics*

Robert A. Freidin/Princeton U.

### *Perception*

Bruce Bridgeman/U. of California, Santa Cruz

### *Philosophy of Science*

Massimo Piattelli-Palmarini/U. of Arizona

### *Primate Cognition*

Laurie R. Santos/Yale U.

### *Social Cognition*

Mahzarin R. Banaji/Harvard U.

### *Social Cognitive Neuroscience*

Rebecca Saxe/MIT

### *Vision, Language and Computation*

Shimon Edelman/Cornell U.

**Editorial Policy** *Behavioral and Brain Sciences* (BBS) is an international journal providing a special service called Open Peer Commentary\* to researchers in any area of psychology, neuroscience, behavioral biology, or cognitive science who wish to solicit, from fellow specialists within and across these BBS disciplines, multiple responses to a particularly significant and controversial piece of work. (See Instructions for Authors and Commentators, inside back cover and also at [http://www.editorialmanager.com/bbs/account/BBS\\_ifc.pdf](http://www.editorialmanager.com/bbs/account/BBS_ifc.pdf)) The purpose of this service is to contribute to the communication, criticism, stimulation, and particularly the unification of research in the behavioral and brain sciences, from molecular neurobiology to artificial intelligence and the philosophy of mind.

Papers judged by the editors and referees to be appropriate for Commentary are circulated to a large number of commentators selected by the editors, referees, and author to provide substantive criticism, interpretation, elaboration, and pertinent complementary and supplementary material from a full cross-disciplinary perspective. The article, accepted commentaries, and the author's response then appear simultaneously in BBS.

Commentary on BBS articles may be provided by any qualified professional in the behavioral and brain sciences, but much of it is drawn from a large body of BBS Associates who have become formally affiliated with the project (see <http://www.bbsonline.org/assoclist.html>).

Qualified professionals are eligible to become BBS Associates if they have (1) been nominated by a current BBS Associate, (2) refereed for BBS, or (3) had a commentary or article accepted for publication. A special subscription rate is available to Associates. Individuals interested in serving as BBS Associates are asked to view the full instructions for joining at [http://www.editorialmanager.com/bbs/account/BBS\\_ifc.pdf](http://www.editorialmanager.com/bbs/account/BBS_ifc.pdf). and then email [bbs@bbsonline.org](mailto:bbs@bbsonline.org).

Permission to copy (for users in the U.S.A.) is available from Copyright Clearance Center, <http://www.copyright.com>, email: [info@copyright.com](mailto:info@copyright.com). Specific written permission must be obtained for republication; contact the nearest Cambridge University Press office.

**Subscriptions** *Behavioral and Brain Sciences* (ISSN 0140-525X) is published bimonthly in February, April, June, August, October, and December. The subscription price of Volume 32 (2009) for institutions is US \$1020.00 for print and online, US \$860.00 for online only, and US \$920.00 for print only in the U.S.A., Canada, and Mexico; and UK £580.00 for print and online, UK £490.00 for online only, and UK £530.00 for print only elsewhere. The subscription price for individuals is US \$290.00 for print and online and US \$265.00 for print only in the U.S.A., Canada, and Mexico; and UK £170.00 for print and online and UK £155.00 for print only elsewhere. For BBS Associates, with proof of eligibility with order, US \$109.00 in the U.S.A., Canada, and Mexico; and UK £68.00 elsewhere. For students, with proof of eligibility with order, \$89.00 in the U.S.A., Canada, and Mexico; and UK £54.00 elsewhere. Subscription price includes surface postage. Single parts cost US \$210.00 (UK £90.00) plus postage. Institutional orders may be sent to a bookseller, or, in the U.S.A., Canada, and Mexico direct to: Cambridge University Press, 32 Avenue of The Americas, New York, NY 10013-2473 email: [journals\\_subscriptions@cambridge.org](mailto:journals_subscriptions@cambridge.org); in the U.K. and rest of the world to: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England, e-mail: [journals\\_subscriptions@cambridge.cam.ac.uk](mailto:journals_subscriptions@cambridge.cam.ac.uk). Individuals must order direct from the Press. You may also subscribe through the Cambridge Journals website, <http://journals.cambridge.org/bbs>.

**Postmaster:** Send address changes in the U.S.A., Canada, and Mexico to *Behavioral and Brain Sciences*, Cambridge University Press, Journals Dept., 100 Brook Hill Drive, West Nyack, NY 10994-2133, U.S.A. Send address change elsewhere to *Behavioral and Brain Sciences*, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, England.

**Online availability** *Behavioral and Brain Sciences* is part of the Cambridge Journals Online (CJO) service at <http://journals.cambridge.org>.

**Institutional subscribers:** Access to full-text articles online is currently included with the cost of the print subscription. Subscription must be activated; see <http://cambridge.journals.org>.

**Advertising** Inquiries about advertising should be sent to the Journals Advertising Department of the Cambridge or New York Office of Cambridge University Press.

## FOUNDING EDITOR (1978–2001)

Stevan Harnad

\*Modelled on the "CA Comment" service of the journal *Current Anthropology*.

# Contents Volume 32:(3/4) June/August 2009

|  |     |
|--|-----|
| <b>Archer, J.</b> Does sexual selection explain human sex differences in aggression?   | 249 |
| <b>Open Peer Commentary</b>  |     |
| <b>Bailey, D. H., Oxford, J. K. &amp; Geary, D. C.</b> Ultimate and proximate influences on human sex differences  | 266 |
| <b>Behme, C.</b> Does sexual selection explain why human aggression peaks in early childhood?  | 267 |
| <b>Benenson, J. F.</b> Dominating versus eliminating the competition: Sex differences in human intrasexual aggression  | 268 |
| <b>Boden, J. M.</b> Sex differences in the developmental antecedents of aggression   | 269 |
| <b>Browne, K. R.</b> Sex differences in aggression: Origins and implications for sexual integration of combat forces   | 270 |
| <b>Buss, D. M.</b> The multiple adaptive problems solved by human aggression   | 271 |
| <b>Campbell, A.</b> What kind of selection?  | 272 |
| <b>Cashdan, E.</b> Sex differences in aggression: What does evolutionary theory predict?   | 273 |
| <b>Corr, P. J. &amp; Perkins, A. M.</b> Differentiating defensive and predatory aggression: Neuropsychological systems and personality in sex differences                            | 274 |
| <b>Dickins, T. E. &amp; Sergeant, M. J. T.</b> Two more things for consideration: Sexual orientation and conduct disorder  | 275 |
| <b>Eagly, A. H. &amp; Wood, W.</b> Sexual selection does not provide an adequate theory of sex differences in aggression   | 276 |
| <b>Figueredo, A. J., Gladden, P. R. &amp; Brumbach, B. H.</b> Sex, aggression, and life history strategy   | 278 |
| <b>Finkel, E. J. &amp; Slotter, E. B.</b> An I <sup>3</sup> Theory analysis of human sex differences in aggression   | 279 |
| <b>Gaulin, S. J. C.</b> Biophobia breeds unparsimonious exceptionalism   | 279 |
| <b>Johnson, D. D. P. &amp; van Vugt, M.</b> A history of war: The role of inter-group conflict in sex differences in aggression  | 280 |
| <b>Kaighobadi, F. &amp; Shackelford, T. K.</b> Suspicions of female infidelity predict men's partner-directed violence   | 281 |
| <b>Kempenaers, B. &amp; Forstmeier, W.</b> A quantitative genetic approach to understanding aggressive behavior  | 282 |
| <b>Kenrick, D. T. &amp; Griskevicius, V.</b> More holes in social roles  | 283 |
| <b>Pellegrini, A. D.</b> Moderators of sex differences in sexual selection theory  | 285 |
| <b>Pound, N., Daly, M. &amp; Wilson, M.</b> There's no contest: Human sex differences are sexually selected  | 286 |
| <b>Schredl, M.</b> Sex differences in dream aggression   | 287 |
| <b>Sefcek, J. A. &amp; Sacco, D. F.</b> Human sexual dimorphism, fitness display, and ovulatory cycle effects  | 288 |
| <b>Sell, A.</b> Standards of evidence for designed sex differences   | 289 |
| <b>Terburg, D., Peper, J. S., Morgan, B. &amp; van Honk, J.</b> Sex differences in human aggression: The interaction between early developmental and later activational testosterone | 290 |
| <b>Tremblay, R. E. &amp; Côté, S. M.</b> Development of sex differences in physical aggression: The maternal link to epigenetic mechanisms   | 290 |
| <b>van den Berghe, P. L.</b> Sexual selection and social roles: Two models or one?   | 291 |
| <b>Author's Response</b>   |     |
| <b>Archer, J.</b> Refining the sexual selection explanation within an ethological framework  | 292 |

**Open Peer Commentary**

|   |     |  |     |
|---|-----|--|-----|
| <b>Algom, D.</b> Slippery platform: The role of automatic and intentional processes in testing the effect of notation                 | 328 | <b>Núñez, R. E.</b> Numbers and numerosities: Absence of abstract neural realization doesn't mean non-abstraction  | 344 |
| <b>Ansari, D.</b> Are non-abstract brain representations of number developmentally plausible?   | 329 | <b>Orban, G. A.</b> The discussion of methodological limitations in number representation studies is incomplete  | 345 |
| <b>Campbell, J. I. D. &amp; Metcalfe, A. W. S.</b> Numerical abstractness and elementary arithmetic                                   | 330 | <b>Pease, A., Smail, A. &amp; Guhe, M.</b> Abstract or not abstract? Well, it depends . . .  | 345 |
| <b>Cantlon, J. F., Cordes, S., Libertus, M. E. &amp; Brannon, E. M.</b> Numerical abstraction: It ain't broke                         | 331 | <b>Pesenti, M. &amp; Andres, M.</b> Common mistakes about numerical representations  | 346 |
| <b>Cohen, D. J.</b> Numerical representations are neither abstract nor automatic  | 332 | <b>Peters, E. &amp; Castel, A.</b> Numerical representation, math skills, memory, and decision-making  | 347 |
| <b>Dehaene, S.</b> The case for a notation-independent representation of number   | 333 | <b>Piazza, M. &amp; Izard, V.</b> What is an (abstract) neural representation of quantity?   | 348 |
| <b>Falter, C. M., Noreika, V., Kiverstein, J. &amp; Mölder, B.</b> Concrete magnitudes: From numbers to time                          | 335 | <b>Reynvoet, B. &amp; Notebaert, K.</b> Abstract or not? Insights from priming   | 349 |
| <b>Freeman, W. J. &amp; Kozma, R.</b> Brain neural activity patterns yielding numbers are operators, not representations              | 336 | <b>Rosenberg-Lee, M., Tsang, J. M. &amp; Menon, V.</b> Symbolic, numeric, and magnitude representations in the parietal cortex   | 350 |
| <b>Ganor-Stern, D.</b> Automatic numerical processing is based on an abstract representation  | 337 | <b>Santens, S., Fias, W. &amp; Verguts, T.</b> Abstract representations of number: What interactions with number form do not prove and priming effects do                | 351 |
| <b>Grabner, R. H.</b> Expertise in symbol-referent mapping  | 338 | <b>Szűcs, D., Soltész, F. &amp; Goswami, U.</b> Beyond format-specificity: Is analogue magnitude really the core abstract feature of the cultural number representation? | 352 |
| <b>Houdé, O.</b> Abstract after all? Abstraction through inhibition in children and adults  | 339 | <b>Tzelgov, J. &amp; Pinhas, M.</b> In search of non-abstract representation of numbers: Maybe on the right track, but still not there                                   | 353 |
| <b>Kucian, K. &amp; Kaufmann, L.</b> A developmental model of number representation   | 340 | <b>Vallar, G. &amp; Girelli, L.</b> Numerical representations: Abstract or supramodal? Some may be spatial   | 354 |
| <b>Lindemann, O., Rueschemeyer, S.-A. &amp; Bekkering, H.</b> Symbols in numbers: From numerals to magnitude information              | 341 | <b>Wiefel, A., Pauen, S. &amp; Dueck, M.</b> Do infants count like scientists?   | 355 |
| <b>Mayo, J. P.</b> Inactivation and adaptation of number neurons  | 342 |  |     |
| <b>Myachykov, A., Platenburg, W. P. A. &amp; Fischer, M. H.</b> Non-abstractness as mental simulation in the representation of number | 343 | <b>Authors' Response:</b><br><b>Cohen Kadosh, R. &amp; Walsh, V.</b> Non-abstract numerical representations in the IPS: Further support, challenges, and clarifications  | 356 |
