

CONTENTS OF VOLUME 48

VYACHESLAV M. ABRAMOV: Multiserver queueing systems with retrials and losses	297
M. A. ACEVEDO: See I. OREA-FLORES	
SERGIO AMAT, SONIA BUSQUIER and SERGIO PLAZA: On the dynamics of a family of third-order iterative functions	343
MICHAEL BAAKE, UWE GRIMM and HARALD JOCKUSCH: Freely forming groups: Trying to be rare	1
A. BERGER and T. P. HILL: A characterisation of Newton maps	211
A. H. BHRAWY: See E. H. DOHA	
M. BOLAND: See G. STERLING	
SONIA BUSQUIER: See SERGIO AMAT	
A. CABADA, J. ÁNGEL CID and S. HEIKKILÄ: Solvability of discontinuous functional differential systems in $l_\infty(M)$	237
QIONG CHEN: See ZHAOYIN XIANG	
SUI SUN CHENG: See WEN-CHYUAN YUEH	
J. ÁNGEL CID: See A. CABADA	
SOU MEN DE: See B. N. MANDAL	
E. H. DOHA and A. H. BHRAWY: Efficient spectral-Galerkin algorithms for direct solution of the integrated forms of second-order equations using ultraspherical polynomials	361
SEVER S. DRAGOMIR: See KUEI-LIN TSENG	
SIMON DUNSTALL and GRAHAM MILLS: Robustness of cyclic schedules for the charging of batteries	475
ELŻBIETA GALEWSKA and MAREK GALEWSKI: On the stability of solutions for the $p(x)$ -Laplacian equation and some applications to optimisation problems with state constraints	245
MAREK GALEWSKI: See ELŻBIETA GALEWSKA	
J. GANI and L. STALS: A note on three stochastic processes with immigration	409
JOCHEN GARCKE, MARKUS HEGLAND and OLE NIELSEN: Parallelisation of sparse grids for large scale data analysis	11
UWE GRIMM: See MICHAEL BAAKE	
R. E. GRUNDY: Hermite interpolation visits ordinary two-point boundary value problems	533
J. A. HARRIS: See G. STERLING	
P. D. HAYNES and S. K. LUCAS: Extension of a short-time solution of the diffusion equation with application to micropore diffusion in a finite system	503
J. W. HEARNE: See J. LAWRIE	
MARKUS HEGLAND: See JOCHEN GARCKE	
S. HEIKKILÄ: See A. CABADA	
T. P. HILL: See A. BERGER	
G. C. HOCKING: Steady Prandtl-Batchelor flows past a circular cylinder	165
DAVIES IYAI: Euclidean null controllability of infinite neutral differential systems	285

HARALD JOCKUSCH: See MICHAEL BAAKE	
M. SADIQ KHAN: See M. I. QURESHI	
N. U. KHAN: See M. I. QURESHI	
M. KLARIČIĆ BAKULA and J. PEČARIĆ: Generalized Hadamard's inequalities based on general Euler 4-point formulae	387
SAMUEL KOTZ: See SARALEES NADARAJAH	
S. KOUHBOR: See J. UGON	
MARIO KRNIĆ and JOSIP PEČARIĆ: A Hilbert inequality and an Euler-Maclaurin summation formula	419
A. KRUGER: See J. UGON	
J. LAWRIE and J. W. HEARNE: Using Modified Proper Orthogonal Decomposition (MPOD) for reducing ecosystem models	461
R. B. LEIPNIK and C. E. M. PEARCE: Thermodynamics, Mnemonic Matrices and Generalized Inverses	493
ROY B. LEIPNIK and CHARLES E. M. PEARCE: The multivariate Faà di Bruno formula and multivariate Taylor expansions with explicit integral remainder term	327
GUOJIAN LIN and RONG YUAN: Travelling waves for the population genetics model with delay	57
SHENGQIANG LIU: See PING YAN	
XINZHI LIU and HONGTAO ZHANG: Robust stability of impulsive switched systems with disturbance	259
J. LÓPEZ-BONILLA: See I. OREA-FLORES	
S. K. LUCAS: See P. D. HAYNES	
G. D. MCBAIN: See G. STERLING	
M. MAMMADOV: See J. UGON	
B. N. MANDAL and SOUMEN DE: Water wave scattering by two submerged nearly vertical barriers	107
GRAHAM MILLS: See SIMON DUNSTALL	
GRADIMIR V. MILOVANOVIĆ and MIODRAG M. SPALEVIĆ: Monotonicity of the error term in Gauss–Turán quadratures for analytic functions	567
CHUNLAI MU: See ZHAOYIN XIANG	
SARALEES NADARAJAH and SAMUEL KOTZ: On a distribution of Leipnik and Pearce	405
OLE NIELSEN: See JOCHEN GARCKE	
I. OREA-FLORES, M. A. ACEVEDO and J. LÓPEZ-BONILLA: Wavelet and discrete cosine transforms for inserting information into BMP images	23
E. ÖZUĞURLU and J.-M. VANDEN-BROECK: A note on solitary waves with variable surface tension in water of infinite depth	225
M. A. PATHAN: See M. I. QURESHI	
C. E. M. PEARCE: See R. B. LEIPNIK	
CHARLES E. M. PEARCE: See ROY B. LEIPNIK	
J. PEČARIĆ: See M. KLARIČIĆ BAKULA	
JOSIP PEČARIĆ: See MARIO KRNIĆ	
LINDSAY PETERS: See GEORGE SZEKERES	
SERGIO PLAZA: See SERGIO AMAT	

FENG QI: A completely monotonic function involving the divided difference of the psi function and an equivalent inequality involving sums	523
M. I. QURESHI, M. SADIQ KHAN, M. A. PATHAN and N. U. KHAN: Some multivariable Gaussian hypergeometric extensions of the Preece theorem	143
A. RUBINOV: See J. UGON	
BALJEET SINGH: Reflection coefficients and energy ratios in a micropolar thermoelastic medium without energy dissipation	433
MIODRAG M. SPALEVIĆ: See GRADIMIR V. MILOVANOVIĆ	
L. STALS: See J. GANI	
G. STERLING, G. D. MCBAIN, J. A. HARRIS and M. BOLAND: Drainage after total knee replacement	199
GEORGE SZEKERES and LINDSAY PETERS: Computer solution to the 17-point Erdős-Szekeres problem	151
JEAN M. TCHUENCHE: Patient-dependent effects in disease control: a mathematical model	583
KUEI-LIN TSENG, GOU-SHENG YANG and SEVER S. DRAGOMIR: Generalizations of weighted trapezoidal inequality for monotonic functions and applications	553
J. UGON, S. KOUHBOR, M. MAMMADOV, A. RUBINOV and A. KRUGER: Facility location via continuous optimization with discontinuous objective functions	315
KEMAL USLU: On the discrete asymptotic stability conditions of perturbed linear discrete systems with periodic coefficients	135
J.-M. VANDEN-BROECK: See E. ÖZUĞURLU	
VY KHOI LE: Sub-supersolutions in a variational inequality related to a sandpile problem	179
GRAHAM WEIR: Initial deformation about convex surfaces formed from identical, rough elastic-plastic bodies which approach along their normal at first contact	449
ZHAOYIN XIANG, QIONG CHEN and CHUNLAI MU: Blowup properties for several diffusion systems with localised sources	37
HOUBAO XU: Stability analysis of a k -out-of- N : G repairable system	271
PING YAN and SHENGQIANG LIU: SEIR epidemic model with delay	119
GOU-SHENG YANG: See KUEI-LIN TSENG	
RONG YUAN: See GUOJIAN LIN	
WEN-CHYUAN YUEH and SUI SUN CHENG: Explicit eigenvalues and inverses of several Toeplitz matrices	73
A. ZAFER: The exponential of a constant matrix on time scales	99
HONGTAO ZHANG: See XINZHI LIU
