
THE ROYAL INSTITUTE OF NAVIGATION

Aims and Objects

The objects of the Institute are to unite in one body those who are concerned with or who are interested in navigation and to further its development. Navigation is conceived as applying to locomotion of all kinds and is perceived as encompassing aspects of: command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law as well as electronics, astronomy, mathematics, cartography and other subjects traditionally associated with navigation.

The aims of the Institute are to encourage the creation and dissemination of knowledge through research and development, to co-ordinate information from all the disciplines involved, to provide a forum in which new ideas and new products can have the benefit of informed and professional scrutiny and to further education and communication. The Institute initiates conferences and symposia on specific subjects and has a programme of meetings at which lectures are given and discussed. There are standing Special Interest Groups (SIGs), which keep under constant review pertinent aspects of navigation. The success of these Special Interest Groups is crucially dependent on the active involvement of members.

The SIGs include: Land Navigation and Location Group (LN&L), General Aviation Navigation Group (GANG), History of Air Navigation Group (HANG), Civil and Military Air Group (CMAG), Marine Traffic & Navigation Group (MT&NG), Small Craft Group (SCG), Space Group (Space), Animal Navigation Group (ANG) and Research & Development Group (R&D).

The Institute publishes *The Journal of Navigation* six times a year. It contains papers which have been presented at meetings, other original papers and selected papers and reports from Special Interest Groups. The Institute also publishes *Navigation News* six times a year which contains a full account of the Institute's proceedings and activities. This includes Branch News, a record of current navigational work, a diary of events, topical articles, news about Membership and advertising. A great deal of the Institute's work is international in character and is coordinated with that of similar organisations in other countries.

Membership

There are nine classes of membership under which individuals or organisations may apply to join the Institute. Details of the various membership criteria and current subscriptions are available on the RIN website (Home / Join the RIN / Membership Types <http://www.rin.org.uk/general.aspx?ID=59>) and from the Membership Secretary (membership@rin.org.uk Tel: +44(0)20 7591 3130 Fax: 44(0)20 7591 3131).

- (1) Ordinary Membership
- (2) Associate Membership
- (3) Associate Fellow Membership
- (4) Student Membership
- (5) Junior Associate Membership
- (6) Corporate Membership
- (7) Small Business Membership
- (8) Affiliate College University Membership
- (9) Affiliate Club Membership

Additional membership classes of Fellowship, Honorary Fellowship, Retired Membership and Affiliate Membership also exist and details are available from the Membership Secretary.

The subscription price (excluding VAT) to *The Journal* (ISSN 0373-4633) for Volume 70, 2017, which includes print and electronic access, is £604 (USA, Canada and Mexico US \$1092) and includes delivery by air; single parts are available at £110 (USA, Canada and Mexico US \$197) plus postage. The electronic-only price available to institutional subscribers is £468 (USA, Canada and Mexico US \$854). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. *The Journal* is issued free to all Members of the Institute. Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent or direct to the publishers: Cambridge University Press, UPH, Shaftesbury Road, Cambridge CB2 8BS, or in the USA, Canada and Mexico to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan.

THE JOURNAL OF NAVIGATION

VOLUME 70 NUMBER 3 MAY 2017

CONTENTS

- Decision Support in Collision Situations at Sea** 447
Zbigniew Pietrzykowski, Piotr Wolejsza and Piotr Borkowski
- Performance Evaluation of Single-frequency Precise Point Positioning with GPS, GLONASS, BeiDou and Galileo** 465
Lin Pan, Xiaohong Zhang, Jingnan Liu, Xingxing Li and Xin Li
- Dynamic GNSS Mission Planning Using DTM for Precise Navigation of Autonomous Vehicles** 483
Aleksander Nowak
- Analysis of Ephemeris Errors in Autonomous Celestial Navigation during Mars Approach Phase** 505
Xiaolin Ning, Zhuo Li, Yuqing Yang, Jiancheng Fang and Gang Liu
- Robust Huber-Based Cubature Kalman Filter for GPS Navigation Processing** 527
Chien-Hao Tseng, Sheng-Fuu Lin and Dah-Jing Jwo
- Joint Activity in the Maritime Traffic System: Perceptions of Ship Masters, Maritime Pilots, Tug Masters, and Vessel Traffic Service Operators** 547
Joakim Trygg Mansson, Margareta Lutzhoft and Ben Brooks
- Approach for Detecting Soft Faults in GPS/INS Integrated Navigation based on LS-SVM and AIME** 561
Lina Zhong, Jianye Liu, Rongbing Li and Rong Wang
- Performance Analysis of Velocity Estimation with BDS** 580
Shirong Ye, Yongwei Yan and Dezhong Chen
- Optimisation-based Transfer Alignment and Calibration Method for Inertial Measurement Vector Integration Matching** 595
Lili Xie and Jiazhen Lu
- The Standing Calibration Method of MEMS Gyro Bias for Autonomous Pedestrian Navigation System** 607
Yanshun Zhang, Xu Yang, Xiangming Xing, Zhanqing Wang and Yunqiang Xiong
- Great Circles and Rhumb Lines on the Complex Plane** 618
Robin G. Stuart
- Multirate Adaptive Kalman Filter for Marine Integrated Navigation System** 628
Narjes Davari, Asghar Gholami and Mohammad Shabani
- Maritime Anomaly Detection within Coastal Waters Based on Vessel Trajectory Clustering and Naïve Bayes Classifier** 648
Rong Zhen, Yongxing Jin, Qinyou Hu, Zheping Shao and Nikitas Nikitakos
