

Communism and Nationalism in India

M. N. Roy and Comintern Policy, 1920-1939

JOHN PATRICK HAITHCOX

Focusing on Roy, the founder of the Communist Party of India, the author traces the development of communism and nationalism there from the Second Comintern Congress in 1920 to the defeat of the left wing of the Indian National Congress in 1939. *Sponsored by the Research Institute on Communist Affairs, Columbia University.* \$12.50

The City in Communist China

Edited by John Wilson Lewis. This is the first of three volumes that will examine the Chinese city in traditional, Republican, and Communist China from the point of view of historians and social scientists. Both historical and contemporary materials are used to trace the evolution of Chinese Communist policies and their consequences for China's hundred million city dwellers. The papers, grouped around four themes, include the following topics: policing, the evolution of the Chinese Communist legal system, manpower policies, the education system, and the impact of the Great Proletarian Cultural Revolution on the city. Contributors are Jerome Alan Cohen, John Philip Emerson, John Gardner, Paul F. Harper, Christopher Howe, Ying-mao Kau, John Wilson Lewis, Victor Li, Janet Salaff, Ezra F. Vogel, and Lynn White III.

The Sōkagakkai and Mass Society

James W. White. A Japanese lay religious organization attached to a militant Buddhist sect, the Sōkagakkai has grown since World War II from a handful of members to the third strongest political party in Japan. This study analyzes both its membership and ideology in terms of William Kornhauser's theory of mass society. It attempts to discern the points of similarity and divergence between the Gakkai and Kornhauser's description, in the process offering suggestive observations on the relevance of mass movements to democracy, and the social bases of political movements and political parties. The study begins with a descriptive overview of the Sōkagakkai: its context, history, organization, social composition, beliefs, and political platform. It then examines the social origins, psychological attributes, and political beliefs and behavior of the Gakkai leadership and membership.

Change in Communist Systems

Edited by Chalmers Johnson. Twelve specialists on Communism use contemporary models of social science theory to analyze the problems of social, political, and economic change in the fourteen existent Communist systems. Their papers suggest new conceptual approaches to the goals, typical structures, ideological orientations, and processes of Communist regimes in the early "mobilization" phase. \$8.95

Political Terror in Communist Systems

Alexander Dallin and George W. Breslauer. This important and original study has five main aims: to assess the place of political terror in Communist systems, to identify the range of functions assigned to terror by Communist regimes, to explore variations in the use of terror, to find functional equivalents of terror, and to relate terror to some hypotheses regarding the dynamics of developing political systems. \$5.95

An Analysis of Malay Magic

By KIRK MICHAEL ENDICOTT. A great deal of information from scattered and sometimes inaccessible sources is brought together to reveal the basic order of the traditional "folk" religion of the Malays. The order revealed is described in terms of the interrelationship of its basic beliefs and the logic behind the materials and actions employed in various magical practices. (*Oxford Monographs on Social Anthropology.*) \$7.25

Big Men and Cargo Cults

By GLYNN COCHRANE, *Syracuse University*. Existing theories are unable to account for both the "Vailala madness" which broke out in 1919 in New Guinea, and contemporary Melanesian movements which seem to be related to "cargo cults." Dr. Cochrane examines cult movements in Papua and the Solomons between 1916-1967, and makes a radical departure from existing theoretical approaches by stressing that functionalism can succeed in unravelling many of the previously unexplained features of the cargo cults. Larins Sahib

A PLAY IN THREE ACTS

By GURCHARAN DAS. The major characters in this play are historical figures. Its action is based on events in the Punjab in 1846-47, and was reconstructed from documents and letters exchanged by the principal characters. The protagonists are Henry Lawrence, a legend on the Northwest Frontier, and Dalip Singh, the son of Maharajah Ranjit Singh. (*Three Crowns.*) Paper, \$1.80

Mandarin Pronunciation

EXPLAINED WITH DIAGRAMS

By RAYMOND HUANG, *University of Hong Kong*. The main difficulty in the learning and teaching of spoken Chinese is the absence of generally accepted standard romanization for the sound system of the language. Through the use of diagrams, this book shows how Mandarin Chinese is pronounced. Each Mandarin vowel or consonant is represented by the International Phonetic Association's symbol, the commonly used Chinese characters, the Chinese phonetic sign, and by eight different romanizations. Personality in Japanese History

Edited by Albert M. Craig and Donald H. Shively

There is considerable material extant on Japanese history, even in English, but until recently there have been few attempts to study Japanese personality in a historical setting. This book is an attempt to bridge that gap. Among the figures treated are feudal lords, samurai revolutionaries, a peasant technologist, statesmen, a novelist, and others. The contexts in which these men acted is equally diverse: a period of famine, an era of cultural brilliance, a rural village, the founding of the Meiji state, and literary circles in Tokyo.

Japanese Society

Chie Nakane

"Professor Nakane's book is a brilliant wedding of 'national character' studies and analyses of small societies through the structural approach of British social anthropology. One is of course reminded of Ruth Benedict's *Chrysanthemum and the Sword* which deals also with Japanese national culture. Professor Nakane comes to explanation of the behavior of Japanese through analysis rather of the historic social structure of Japanese society, beginning with the way any two Japanese perceive each other, and following through to the nature of the Japanese corporation and the whole society. Nakane's remarkable achievement, which has already given new insight about themselves to the Japanese, promises to open up a new field of large-society comparative social anthropology which is long overdue."—*Sol Tax*

Society in India

Volume One: Continuity and Change

Volume Two: Change and Continuity

David G. Mandelbaum

This analysis of Indian society is the most comprehensive study done in recent times. In bringing together results of modern research, it reveals the regular patterns that underlie social relations throughout the country. It also outlines some of the principal social and regional variations. Mr. Mandelbaum views social relations in India as systems and shows that the society is not static but continually changing.

A Tagalog Reference Grammar

Paul Schachter and Fe T. Otanes

The *Tagalog Reference Grammar* represents by far the fullest study of the structure of Tagalog—the most widely spoken language of the Philippines—attempted to date. It is also perhaps the fullest study, written within the transformational-generative framework, of the structure of any language. As such, it will be of interest not only to students of Tagalog but also to linguists in general.

Language Conflict and National Development

Group Politics and National Language Policy in India

Jyotirindra Das Gupta

This is the first systematic study of language conflict in a developing society and of its consequences for nation-building. The author maintains that language rivalry does not necessarily impede national integration, but can actually contribute to the development of a national community. In the specific case of India, Mr. Das Gupta analyzes the impact of Indian language associations on national politics and on the political community in general.

The Novel in India

Its Birth and Development

Edited by T. W. Clark

Some Indian and Pakistani literature (entirely verse) dates back to the 11th century, but literary prose did not appear until the 19th century. Progress was rapid, however, and within a hundred years novelists of such stature as Tagore, Apte, and Premchand had emerged. This volume traces the birth and development of fiction in six of the major languages of pre-independence India—Bengali, Hindi, Malayalam, Marathi, Tamil, and Urdu.

Rural Credit in Western India

Rural Credit and the Cooperative Movement in the Bombay Presidency, 1875-1930

I. J. Catanach

India was not only the first non-Western country to experiment with co-operatives, she also initiated many of the approaches to co-operation now taken for granted in developing countries. Making this study primarily historical, Mr. Catanach focuses on unofficial co-operative leadership in western India during the time that leadership was closely affected by nationalist politics and policies of caste rivalries. He also compares development in three distinct linguistic and cultural areas—Gujarat, Maharashtra, and the Karnatak.

South Asian Government Bibliographies

The volumes in this series individually and together provide what is probably the most complete listing of central government publications of Ceylon, India and Pakistan so far compiled. Prepared under the aegis of the Centre of South Asian Studies, Cambridge, the series was made possible by the extensive South Asian holdings of libraries in London, Oxford and Cambridge. The material included, much of which is of an essentially fugitive nature, has not been systematically catalogued and recorded elsewhere. The *South Asian Government Bibliographies*, therefore, provide a vital record of primary sources for the study of South Asian affairs, particularly in relation to the social sciences.

THE AYUB KHAN ERA

Politics in Pakistan, 1958-1969

Lawrence Ziring, Western Michigan University

This is the study of a decade that completes a cycle, from late 1958 when the Army under General Mohammed Ayub Khan took control of Pakistan amid turmoil and apprehension to early 1969 when Ayub was finally pressured into passing his authority to General Yahya Khan.

It is an examination of the character of Ayub Khan's rule, of his dreams of a new Pakistan and of the reasons for his failure to bring it about—reasons that range from his own errors and inconsistencies in policy and performance to the weight of Pakistan's historic legacies and their resistance to change.

The book is divided into two parts. Part I provides a political survey of the events, personalities, and relationships of the Ayub Khan era. Part II links the political events with aspects of the traditional political environment in Pakistan—the bureaucratic legacy, the rural power structure, the urban intelligentsia—that actually shape politics and that thus far have been largely unaltered by periodic changes in Pakistan's political elites.

Like Ayub, Yahya Khan came in with "intentions to write a new constitution, reconstitute the political system, purge the corrupt bureaucrats and resolve the socioeconomic inequities," as the author says in his Foreword. The Ayub Khan era demonstrates that intentions are not enough. Ziring believes that radical innovations must be initiated, that Ayub's errors must not be repeated, if Pakistan is to survive.

The author, a political scientist, lived and taught for a number of years in Pakistan, where the research for this study was done. His book provides an essential perspective from which to observe the present period in Pakistan's political development.

China's World

THE FOREIGN POLICY OF A DEVELOPING STATE

This is the first book to approach the Communist regime in China and its foreign policy from the basis of domestic affairs. The author shows the effect that that nation's basically agrarian nature has had on its over-all development policy, and hence, on external affairs. \$8.00

Japan's Postwar Defense Policy, 1947-1968

A survey of how Japan's leaders and policy-makers have gone about achieving security at a minimal cost while most of Asia has been in the throes of instability and violence. The author concludes that Japan's foreign policy from Yoshida to Sato has been unusually consistent, and successful.

Slums Are for People

The Barrio Magsaysay Pilot Project in Philippine Urban Community Development

by Aprodicio A. Laquian

Foreword by Lucian W. Pye

In this perceptive study, Aprodicio A. Laquian puts forward the unique observation that the prevailing Western concept of "slum" may well be culture-bound, that the negative connotation of the word as a blight on the face of the city beautiful is simply an outgrowth of purely Western historical factors. His theory should, indeed, stimulate the growth of new insights on the part of sociologists and public administrators concerned with current problems in the urban ghettos. If it is true, as the author here confirms, that slums possess frequently overlooked positive characteristics, the implications for public policy are just as forceful in the United States and elsewhere as in the Philippines.

Slums Are for People fills a significant gap in the growing literature on development—political, social, economic, and administrative—which abounds in general models and macroanalyses but possesses all too few specific case studies based on carefully gathered data that has universal import. As its title implies, it is a look at the slum problem in depth. It seeks to understand the problem far beyond previous studies on housing, health, crime, and delinquency. As a community development study, it focuses on the primary ingredient that makes for success or failure—the people themselves.

In his Foreword, Lucien W. Pye calls this work "a rare account of how research can fit into a larger program of action and maintain its independence while providing self-conscious guidance to both scholar and official."
