CAMBRIDGE
UNIVERSITY PRESS

Director, Division of Pediatric Cardiology

The Department of Pediatrics, Stollery Children's Hospital, University of Alberta, in conjunction with Alberta Health Services, is inviting applications for the position of Divisional Director within the Division of Pediatric Cardiology.

Recognized as one of Canada's top pediatric cardiology programs, members of the team provide a full spectrum of cardiology services and care for children across western Canada. The program's 14 pediatric cardiologists work together with a highly skilled interdisciplinary team to offer some of the most innovative and cutting edge services. Annually, the Stollery Children's Hospital sees approximately 7,000 children and adults with congenital or acquired heart disease and performs 15 to 20 heart transplants, as well as approximately 600 cardiac surgical procedures. This program is home to one of the largest pediatric mechanical cardiac assist device programs in North America. The Division maintains close relationships with all the referring pediatric cardiology teams located within western Canada, and has a close professional and geographical relationship with the Mazankowski Alberta Heart Institute (also at the University of Alberta).

The successful candidate will have an established track record of scholarship and will be appointed to a tenure track position at the Department of Pediatrics in the Faculty of Medicine & Dentistry at the University of Alberta. The Director is expected to be a leader who will further develop the division and advance the clinical, research and educational mandate within the Department of Pediatrics.

The Department of Pediatrics is supported by a generous and internationally competitive Academic Alternate Relationship Plan (AARP).

Interested applicants must hold an MD or equivalent, be eligible for licensure in Alberta, have a fellowship in the Royal College of Physicians and Surgeons of Canada, or equivalent, in Pediatric Cardiology and have demonstrated clinical leadership and scholarly accomplishment in research and/or teaching.

Interested candidates are asked to submit an up-to-date curriculum vitae outlining their current clinical and research interests and leadership experience. The names of three referees who can attest to the individual's qualifications should also be forwarded. The Committee welcomes applications at any time and expects to begin considering applications on May 15, 2011. Consideration will continue until the position is filled.

The University of Alberta is one of the top 100 teaching and research universities in the world serving 37,000 students with more than 14,000 faculty and staff. Founded a century ago, the University has an annual budget in excess of \$1.4 billion and attracts more than \$500 million in external funding.

Located in Edmonton, Alberta, Canada, the Faculty of Medicine & Dentistry, within the University of Alberta, is one of Canada's premier research intensive and health education institutions, and has been internationally recognized as one of the world's top 50 medical schools and as one of Canada's premier health-education institutions. With unified health care across the province, Alberta Health Services provides a patient focused quality health system that is accessible and sustainable to all Albertans. Details about the University of Alberta and the Faculty of Medicine & Dentistry can be found on the Faculty's Home Page at www.med.ualberta.ca. Details about Alberta Health Services and the City of Edmonton can be found at www.albertahealthservices.ca and www.edmonton.ca.

Edmonton, with a growing population of over one million, is the cosmopolitan capital of Alberta. With an abundance of services, beautiful river valley, community activities and attractive and financially reasonable living accommodations, this energetic city has something for everyone. Edmonton boasts a superior public education system for school-aged children through Edmonton Public Schools. For more information, visit <http://www.ejspb.ca/>

Interested applicants may apply online at:

CARDIOLOGY IN THE YOUNG

Submission to *Cardiology in the Young* is exclusively via the web-based peer-review system, CTY Manuscript Central.

Online submission enables rapid review and allows online manuscript tracking.

We invite all authors to submit online any NEW MANUSCRIPTS that are to be considered for publication in *Cardiology in the Young*.

Please use the following URL: <http://mc.manuscriptcentral.com/cty>

Editorial policies

Cardiology in the Young is devoted to cardiovascular issues affecting the young and the older patient with the sequels of cardiac disease acquired in childhood. Submission of both basic research and clinical papers is encouraged. Articles on fundamental principles will also be considered for publication. Reviews on recent developments are welcome. The Journal serves the interest of all professionals concerned with these topics. By design, the Journal is international and multidisciplinary in its approach, and the members of the Editorial Board take an active role in the Journal's mission. Prospective authors are encouraged to consult with the editors and members of the Editorial Board with any inquiries. The editors encourage the submission of articles from developing countries.

Articles should be concerned with original research not published previously and not being considered for publication elsewhere. Submission of a manuscript to the Journal gives the publisher the right to publish that paper if it is accepted, and the copyright of the manuscript becomes property of the publisher. Manuscripts may be edited to improve clarity and expression.

Authors must ensure that their studies comply with appropriate institutional and national guidelines for ethical matters. Specifically, by submission of a manuscript, the authors are responsible for compliance with guidelines and regulations of the authors' institution and all appropriate governmental agencies.

Articles including human subjects must include a statement that informed consent was obtained and that the study was reviewed and approved by the institution's committee on human experimentation. Articles including animal experimentation must conform to the principles of the American Physiological Society, and a statement acknowledging conformation to these standards must be included in the *Materials and methods* section of the manuscript. Authors are also requested to identify possible conflicts of interest, especially as it relates to commercial sponsorship or equity holdings.

Language

The language of the Journal is English, but acceptance of a manuscript will reflect scientific rather than grammatical content. The editors undertake to facilitate the publication of papers from those authors whose native language is not English.

Manuscripts

Manuscripts should be submitted via the web-based peer-review system, CTY Manuscript Central and must include a complete set of Figures. Further information regarding Figure formats is outlined below. Type all pages with double-spacing and wide margins on all pages, with left justified margins. Divide the manuscript into the following sections: Title Page, Abstract, Keywords (3–6), Introduction, Materials and methods, Results, Discussion, Acknowledgements, References, Tables, Figure legends and Figures.

Cover letter

A submission letter is required for all papers. A submission letter template will be attached to the confirmation email that the author will receive after completing online submission.

Authorship

Authorship should be assumed only by those workers who have contributed materially to the work and its report, and who accept the responsibility for the accuracy of the concepts expressed. Colleagues who have otherwise assisted or collaborated should be recognized in the section for acknowledgements. An excellent guide to authorship is given by the Style Manual Committee of the Council of Biology Editors, and the editors encourage consultation with this source.

Style

The Journal uses the English language, it does not use Latin terms such as 'superior vena cava'. Anatomic terms should be given in the English language. Do not use abbreviations or symbols. *Submissions including Latin terms, abbreviations or symbols will be returned to the corresponding author for correction before they can be accepted for peer review.* Headlines and subheadings should be liberally employed in the methods, results, and discussion sections. Use short paragraphs whenever possible. The authors should strive for clarity of expression, avoiding, in particular, the use of jargon. Authors should also avoid conventions such as

Group 1, Group 2, and so on, using descriptive titles rather than alphanumeric codes.

Title page

Follow the on-screen instruction on CTY Manuscript Central to enter each piece. The title page should include a descriptive title, a running head title not to exceed 50 characters (and with no abbreviations), authors' complete names (first names and initials followed by family name), academic addresses, corresponding author (with full address, telephone and fax numbers, and email address), keywords (3–6 for indexing purposes and words not used in main title of article), and all sources of financial support, including grants from non-profit organizations and/or any commercial support. Please note that author qualifications should not be included on the authors list on the title page.

Abstract

The Abstract should be no more than 250 words and should include statements identifying relevant methods and results justifying publication. Do not use abbreviations or symbols.

Introduction

The Introduction should be brief and set out the purposes for which the study has been performed. It should not include an extensive review of the literature.

Materials and methods

The Materials and methods should be sufficiently detailed so that readers and reviewers can understand precisely what has been done without studying the references directly. The description may be abbreviated when well-accepted techniques are used with appropriate reference to previously published methods. Statements confirming conformation to institutional and governmental review of the experimental protocol (see above in the Editorial policies section) should be included here.

Results

The results should be presented precisely. Reference to Tables and Figures, to the extent that they contribute substantively to help the reader understand clearly the relevant positive and negative findings, is encouraged.

Keep discussion of their importance to a minimum in this section of the manuscript.

Discussion

The Discussion should relate directly to the study being reported. The Discussion should interpret the

results, should describe the relevance of the results, and should include a discussion of the limitations of the study. Do not include a general review of the topic.

Acknowledgements

Acknowledgements should follow the discussion.

References

References should be numbered consecutively (in superscript) as they appear in the text. Type the reference list with double-spacing on a separate sheet. References (using Index Medicus abbreviations) should appear in the style as demonstrated below. Please note that if more than six authors, the **first three** authors should be listed and then 'et al.'. Examples:

1. Redington AN, Rigby ML, Oldershaw P, Gibson DG, Shinebourne EA. Right ventricular function 10 years after the Mustard operation for transposition of the great arteries: analysis of size, shape, and wall motion. *Br Heart J* 1989; 62: 455–461.
2. Smith VR, Jones AL, Miller W et al. Left ventricular myocardial velocities in children. *Eur Heart J* 2000; 21: 104–112.
3. Zuberbuhler JR. *Clinical Diagnosis in Pediatric Cardiology*. Churchill Livingstone, New York, 1981.
4. Frantz EG. Adult respiratory distress syndrome in children. In: Harried HS, Jr (ed.) *Pediatric Pulmonary Heart Disease*. Little, Brown, Boston, 1990, pp 315–324.

Tables

Tables should follow the style as demonstrated in issues to date, and be essential to the understanding of the text. Tables should have short descriptive titles and should be numbered (1, 2, 3 etc.) as they appear sequentially in the text. If only one Table is included, it should be referred to as Table. Submit each Table on a separate sheet of paper. All abbreviations and symbols should be defined in a footnote below the Table.

Figures

Authors are not charged for colour printing costs.

Please ensure that all graphs are exclusively submitted as 2-dimensional images.

To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures.

Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal.

Line artwork

Format: tif or eps

Colour mode: black and white (also known as 1-bit)

Resolution: 1200 dpi

Combination artwork (line/tone)

Format: tif or eps

Colour mode: grayscale (also known as 8-bit)

Resolution: 800 dpi

Black and white halftone artwork

Format: tif

Colour mode: grayscale (also known as 8-bit)

Resolution: 300 dpi

Colour halftone artwork

Format: tif

Colour mode: CMYK colour

Resolution: 300 dpi

If you require any further guidance on creating suitable electronic figures, please visit http://dx.sheridan.com/guidelines/digital_art.html. Here you will find extensive guidelines on preparing electronic figures and also have access to an online pre-flighting tool (<http://dx.sheridan.com/index.html>) where you can check if your figures are suitable for reproduction.

Supplementary On-line Material

The online platform gives authors the opportunity to include data that would be impossible or impractical to include in the printed version. These data might substantially enhance the importance of the research and might also be of benefit to readers. Authors may include tables and figures as well as data such as videos, 3-D structures/images, extensive datasets and any other supplementary material not suitable for print duplication. All supplementary material must be submitted with the original manuscript. Supplementary data should be referred to in the text with the prefix "S" (e.g. Supplementary Table S1, Supplementary Figure S1). Supplementary files will not be copy-edited, and will be published as supplied.

Case Reports/Brief Reports

Case Reports which add important new information will be published as Brief Reports. Articles published in this section should have no more than three authors, 1,000 words, an abstract (of about 60 words), 3–6 key words, two Figures or Tables, and 10 references.

Editorials and Letters to the Editor

Readers are encouraged to write about any topic that relates to cardiology in the young. Such letters will appear in *Letters to the Editor*. They should be no longer than 500 words. Editorials are written on invitation but unsolicited articles of approximately

1,500 words which may have particular topical interest will be welcomed for consideration.

Reviews

Reviews of recent developments are welcome. Authors are encouraged to contact the editor to determine the appropriateness for inclusion.

Images in Congenital Cardiac Disease

Definitive, unique, or extraordinary pictures of any aspect of congenital cardiac disease will be presented with an accompanying legend of not more than 250 words (one double-spaced page). A maximum of three authors and one reference may be included. Instructional value and artistic merit will be considered in addition to scientific import and clinical relevance. Authors will not be charged colour printing costs.

Offprints

Article offprint order forms will be sent to the corresponding author with the proofs. If you do not receive the relevant form please email the Production Editor at: nmarshall@cambridge.org

Reprints

Article reprints (following publication) are available from special_sales@cambridge.org. A minimum reprint order of 500 copies is required.

Permission

Requests for permission to reproduce any material originally published in *Cardiology in the Young* should be sent to the Permissions Manager at lnicol@cambridge.org

Announcements

Meetings and courses will be announced in each Issue. Refer to the Announcements Section for appropriate guidelines. Please email details to: ctyedoffice@cambridge.org The Journals homepage, www.journals.cambridge.org/cty, offers paying advertisers the opportunity to promote conferences/courses and recruitment vacancies (subject to editorial approval). For rate details please email: ad-sales@cambridge.org

Page changes

Page changes will not be made once proofs are prepared for publication.

Articles not conforming to these instructions will be returned to the corresponding author for correction, and will delay review and publication.

(Revised January 2011)
