

JOURNAL OF K-THEORY

Instructions for Contributors

Submission of Manuscripts

Authors planning to submit papers are asked to prepare, if possible, their manuscript using LaTeX or AMS-LaTeX. Manuscripts should be submitted as a PDF attachment to an e-mail sent to any editor, or to the Managing Editor, Professor A. Bak (bak@math.uni-bielefeld.de). If your article is accepted, you will be asked to supply the LaTeX source code including the graphics, any author defined macros and all style files.

Layout of Manuscripts

Manuscripts should have a short abstract, followed by an introduction which includes references to important related work found elsewhere. The remainder of the paper should be divided into sections, each having a title. Accepted papers should have key words and Mathematics Subject Classification (2010) codes placed immediately after the abstract.

Manuscripts may be prepared in English, French, or German. English is the preferred language.

Proofs

The corresponding author receives one set of proofs for correction. If excessive alterations to the original manuscript are requested after the paper has been typeset, the authors will be charged for the cost of resetting.

Online Posting Rights

Authors will receive a definitive PDF file of their contribution as published at Cambridge Journals Online. They may post it on their personal or departmental web page, provided that the posting includes a prominent statement of the full biographical details, a copyright notice in the name of the copyright holder, Independent Scholarly Online & Print Publishing (ISOPP), and a link to the online edition of the journal at Cambridge Journals Online.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information

Journal of K -Theory

Volume 8 Issue 2

Contents

- A Quillen model structure for Gray-categories** 183
Stephen Lack
- Finitely summable Fredholm modules over higher rank groups and lattices** 223
Michael Puschnigg
- p -adic cocycles and their regulator maps** 241
Zacky Choo and Victor Snaith
- Determinant functors on triangulated categories** 251
Manuel Breuning
- Homology stability for unitary groups over S -arithmetic rings** 293
G. Collinet
- Algebraic structures associated to orbifold wreath products** 323
Carla Farsi and Christopher Seaton
- The full orbifold K -theory of abelian symplectic quotients** 339
Rebecca Goldin, Megumi Harada, Tara S. Holm and Takashi Kimura

Cover design and colour scheme by A. Bak
