Oryx

The International Journal of Conservation
Published for Fauna & Flora International

Editor

Martin Fisher, Fauna & Flora International, UK

Oryx -- The International Journal of Conservation is a quarterly peer-reviewed journal of biodiversity conservation, conservation policy and sustainable use, and the interaction of these subjects with social, economic and political issues. The journal has a particular interest in material that has the potential to improve conservation management and practice, supports the publishing and communication aspirations of conservation researchers and practitioners worldwide and helps build capacity for conservation. Besides articles and short communications, *Oryx* regularly publishes reviews, forum sections and letters, and every issue includes comprehensive reporting of international conservation news.

Parasitology

Editor-in-Chief

R. S. Phillips, University of Glasgow, UK

Parasitology is an important specialist journal covering the latest advances in the subject. It publishes original research and review papers on all aspects of parasitology and host-parasite relationships, including the latest discoveries in parasite biochemistry, molecular biology and genetics, ecology and epidemiology in the context of the biological, medical and veterinary sciences. Included in the subscription price are two special issues which contain reviews of current hot topics in parasitology, one of which is the proceedings of the annual Symposium of the British Society for Parasitology, while the second, covering areas of significant topical interest, is commissioned by the editors and the editorial board.

The Canadian Entomologist

Published on behalf of the Entomological Society of Canada

Editor-in-Chief

Christopher M. Buddle, *McGill University, Quebec, Canada*

Published since 1868, this peer-reviewed bimonthly publication is the official journal of the Entomological Society of Canada. Available via the internet and with hardcopy distribution to 55 countries, its research papers and notes are relevant to entomologists and other biologists around the world. In addition to being a venue for topical reviews and forum discussion, The Canadian Entomologist publishes current research in all facets of entomology, including systematics and morphology, molecular and developmental biology, ecology and behaviour, biodiversity and evolution, insect management, entomological techniques, and other relevant subject areas. Contributions are published in English or French and include abstracts in both languages.

The Canadian Entomologist

NOTES FOR AUTHORS

Please see the complete version ("Instructions for Contributors") at journals.cambridge.org/ber

Styles of Paper

Bulletin of Entomological Research publishes two types of paper:

- Full research papers
- Reviews

If the referees and editors judge a paper to be particularly significant then it will be fast-tracked for publication.

We also welcome 'Letters to the Editor' with comments on recently published papers.

Manuscript Preparation

Language

Manuscripts should be in English.

Manuscript content

Manuscripts should be prepared in Microsoft Word or similar according to the following structure:

- The text, divided under appropriate headings. Clearly differentiate between primary (bold, large font size), secondary (bold, text font size) and tertiary (italics) headings
- Acknowledgements (if any)
- References (for further information about presenting references please see below)
- Tables, either at the end of the manuscript or as separate files. Tables should be numbered consecutively with Arabic numerals and every table should be mentioned at least once in the text.
- Illustrations should be submitted as separate files in TIF or EPS format but captions should be listed at the end of the manuscript text.

Abstract

Each paper must commence with an accurate, informative abstract. It should not exceed 250 words. A short title should also be provided for use as a running head.

References

References must be based on the name and year system, give full journal titles and conform to the following styles:

Journal paper:

Thiery, D., Monceau, K. & Moreau, J. (2014) Larval intraspecific competition for food in the European grapevine moth *Lobesia botrana*. *Bulletin of Entomological Research* 104, 517–524.

Whole book:

Krantz, G.W. & Walter, D.E. (2009) *A Manual of Acarology*. Texas, Texas Tech University Press.

Chapter in book:

Jervis, M.A. & Heimpel, G.E. (2005) Phytophagy. pp 525–550 in Jervis, M.A. (Ed.) *Insect Natural Enemies: A Practical Perspective*. Dordrecht, The Netherlands, Springer.

Proceedings:

Virgilio, M., Bäckeljau, T. & DeMeyer, M. (2007) Incongruence of phylogenetic signals and shared polymorphisms prevent the molecular characterization of the *Ceratitis fasciventris*, *C. anonae*, *C. rosa* complex (Diptera: Tephritidae). p. 520 in *Proceedings of the 11th Congress of the European Society for Evolutionary Biology*, Upsalla, Sweden.

Please list papers by more than two authors, but with the same first author, by year sequence and alphabetically within each year. Citation of authors in the text should appear in the form: Thiery (2014) or (Thiery, 2014). Authors should be cited in chronological order as: (Jervis *et al.*, 2005; Krantz & Walter, 2009).

Tables

Tables should be in a simple form and should not be used if text or illustrations give the same information. They can either be submitted as separate files (Microsoft Word or Excel) or embedded within the main manuscript file. Each table must have a clear and concise caption.

Illustrations

Illustrations should be submitted in TIF or EPS format at approximate final publication size. Resolution of artwork should

be at the following minimum resolutions: Line artwork (black & white), 1200dpi; Combination, i.e. line/tone (greyscale), 800dpi; Black & White halftone (greyscale), 300dpi; and Colour halftone, 300dpi. Comprehensive guidance on creating suitable electronic figures is available at http://dx.sheridan.com/guidelines/digital_art.html where you will find extensive guidelines on preparing electronic figures. An online preflighting tool (<http://dx.sheridan.com/index.html>) is also available where you can check if your figures are suitable for reproduction. Captions should be listed at the end of the manuscript text.

Supplementary Material

Additional information which due to its nature does not lend itself to print media (examples- full data sets, movie or sounds files etc...) may be submitted for online-only publication. Please see full details ("Instructions for Contributors") at journals.cambridge.org/ber.

Technical and Nomenclature Standards

All work should use SI units as standard. Anatomical terms can be a mixture of the English vernacular and Latin, depending on current usage.

Manuscript Preparation

We kindly ask that you follow the instructions below when preparing your manuscript for submission. This will minimize the risk of errors being introduced during the publishing process.

- Use double-line spacing and ample margins (at least 2.5cm) on each side.
- Do not underline anything
- Number each line consecutively across the pages of the manuscript, rather than within pages
- Number every page (preferably the top right corner)
- Do not indent the start of each paragraph
- Use italics for taxonomic nomenclature and bold for headings
- Use standard abbreviations (e.g. Fig. and Figs) and SI units
- Use British rather than American Spellings and 'z' rather than 's' spellings in words with 'ize'.

Voucher specimens

The deposition of voucher specimens should be considered where appropriate.

Manuscript Submission

All manuscripts should be submitted via our on-line system, Editorial Manager, at <http://www.editorialmanager.com/ber>. New users will need to register first.

Peer review

Communications for peer review will be by email as far as possible. Authors are invited to suggest the names and contact details of at least two potential referees and are asked to provide keywords indicating the content of the manuscript. Please also give a brief description (no more than 50 words) of why the manuscript is an important contribution to entomology research.

Publication

Copyright

Authors will be supplied with an agreement to publish form, which must be completed and returned to the Publisher. Papers are accepted on the understanding that the work has been submitted exclusively to the *Bulletin* and has not been previously published elsewhere.

Proofs

Authors will receive a PDF file of page proofs by email, and will be asked to return corrected proofs within 72 hours.

Offprints

The author (or main author) of an accepted paper will receive a free PDF of their paper. Paper offprints are available for a fee and should be ordered at proof stage.

Research Papers

- A.M. Dinis, J.A. Pereira, J. Benhadi-Marín and S.A.P. Santos**
Feeding preferences and functional responses of *Calathus granatensis* and *Pterostichus globosus* (Coleoptera: Carabidae) on pupae of *Bactrocera oleae* (Diptera: Tephritidae) 701
- T.T.A. Luong, S.J. Downes, B. Cribb, L.E. Perkins and M.P. Zalucki**
Oviposition site selection and survival of susceptible and resistant larvae of *Helicoverpa armigera* (Lepidoptera: Noctuidae) on Bt and non-Bt cotton 710
- L.J. Liu, I. Martínez-Sañudo, L. Mazzon, C.S. Prabhakar, V. Girolami, Y.L. Deng, Y. Dai and Z.H. Li**
Bacterial communities associated with invasive populations of *Bactrocera dorsalis* (Diptera: Tephritidae) in China 718
- O.S. Kostromytska and A.M. Koppenhöfer**
Responses of *Poa annua* and three bentgrass species (*Agrostis* spp.) to adult and larval feeding of annual bluegrass weevil, *Listronotus maculicollis* (Coleoptera: Curculionidae) 729
- X.-Y. Zhao, X.-W. Fu, A. Ali, K. Wilson and K.-M. Wu**
Is *Heliothis virescens* (Lepidoptera: Noctuidae) a long-distance migrant? 740
- I. Mze Hassani, L.H. Raveloson-Ravaomanarivo, H. Delatte, F. Chiroleu, A. Allibert, S. Nouhou, S. Quilici and P.F. Duyck**
Invasion by *Bactrocera dorsalis* and niche partitioning among tephritid species in Comoros 749
- G. Burgio, E. Marchesini, N. Reggiani, G. Montepaone, P. Schiatti and D. Sommaggio**
Habitat management of organic vineyard in Northern Italy: the role of cover plants management on arthropod functional biodiversity 759
- Z.H. Liao, T.C. Kuo, C.H. Kao, T.M. Chou, Y.H. Kao and R.N. Huang**
Identification of the chitinase genes from the diamondback moth, *Plutella xylostella* 769
- X. Sun, Z.-F. Zhao, F.-F. Zeng, A. Zhang, Z.-X. Lu and M.-Q. Wang**
Functional characterization of a pheromone-binding protein from rice leaffolder *Cnaphalocrocis medinalis* in detecting pheromones and host plant volatiles 781
- X.-X. Xu, Y.-Q. Zhang, S. Freed, J. Yu, Y.-F. Gao, S. Wang, L.-N. Ouyang, W.-Y. Ju and F.-L. Jin**
An anionic defensin from *Plutella xylostella* with potential activity against *Bacillus thuringiensis* 790
- J. Barrios-SanMartín, C.C. Figueroa and C.C. Ramírez**
Evidence of plastic probing behavior in a 'superclone' of the grain aphid *Sitobion avenae* 801
- M.A. Bodlah, A.-X. Zhu and X.-D. Liu**
Host choice, settling and folding leaf behaviors of the larval rice leaf folder under heat stress 809
- J. Rull, E. Tadeo, R. Lasa and M. Aluja**
The effect of winter length on survival and duration of dormancy of four sympatric species of *Rhagoletis* exploiting plants with different fruiting phenology 818
- J. Skłodowski**
Ground beetle assemblages across a habitat gradient in a stream watershed during 16 years of observation 827
