## Health Disaster Management Guidelines for Evaluation and Research in the Utstein Style

Editors: Knut Ole Sundnes, MD  
Professor Marvin L. Birnbaum, MD, PhD

---

Available for \$49.95, or free with a subscription to *Prehospital and Disaster Medicine*, this important work provides a conceptual framework for reporting disaster responses and evaluation, and includes a comprehensive glossary of terms.

For ordering or subscription information, call 01 608-263-2069, email a request to [pdm@medicine.wisc.edu](mailto:pdm@medicine.wisc.edu), or fax a subscription insert found in each issue of the journal to 01 608-265-3037.

All royalties go to the support of the development of evaluation and research for  
Disaster Medicine

# 15<sup>TH</sup> WORLD CONGRESS ON DISASTER AND EMERGENCY MEDICINE

Amsterdam, the Netherlands

13–16 May 2007

Attend a Congress you will always remember  
in a city you will never forget

# Bringing Simulation to Life

## SimMan®

There is a growing awareness that health care is behind other high risk operations in its attention to ensuring basic safety and that there is a need to grasp the scale of the problem <sup>(1,2)</sup>.

Use of patient simulation is considered an important part of the solution as many scenarios can be presented including uncommon but critical situations where a rapid response is needed. Errors can be allowed to occur and reach their conclusion without any risk to a patient. Team member interactions and leadership can also be explored and developed.

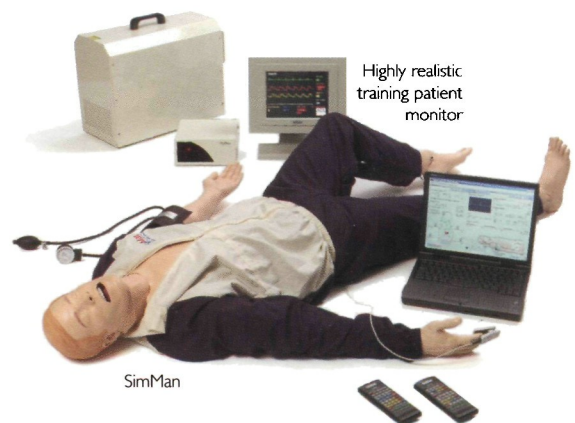

Two manikin-based simulators from Laerdal, SimMan® and AirMan®, represent a new generation of affordable and portable solutions to meet these needs.
