## INSTRUCTIONS TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance, but only in exceptional circumstances will systematic or taxonomic studies be acceptable.

Manuscripts, which must be in English or French (with an English summary) should be accompanied by a letter signed by *all* the authors and should be addressed to:

The Editor, *Journal of Helminthology*,  
London School of Hygiene and Tropical Medicine,  
Winches Farm Field Station,  
395 Hatfield Road,  
St Albans, Herts AL4 0XQ.  
England.

Three copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief Introduction; Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Research Notes should also be preceded by a brief abstract. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the *Journal*. The maximum size an illustration will be printed is 12.0×20.0 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale (preferably a scale bar) should normally be given on the figure. Photocopies of illustrations should be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the *Journal* (maximum size 12.0×20.0 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In: *Ecology and Physiology of parasites* (editor, A. M. Fallis) pp. 213–222. Adam Hilger Ltd.: London.

JAMES, C. & WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49–59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

# Contents

	Pages
Dynamics of the intramolluscan larval development of <i>Schistosoma haematobium</i> : replication of daughter sporocysts and cercarial production. N. KECHEMIR and A. THERON	1-5
Leukocyte accumulation in sparganosis: further characterization of an eosinophil chemotactic factor of the plerocercoid of <i>Spirometra erinacei</i> . Y. HORII, M. OWHASHI, A. ISHII and K. FUJITA	6-12
Comparative evaluation of various immunodiagnostic tests for the diagnosis of <i>Taenia solium</i> cysticercosis in pigs, using fractionated antigens. D. KUMAR and S. N. S. GAUR	13-17
Synergistic effect of migrating <i>Ascaris</i> larvae and <i>Escherichia coli</i> in piglets. S. O. ADEDEJI, E. O. OGUNBA and O. O. DIPEOLU	19-24
<i>Hymenolepis murissylvatici</i> : humoral response in intestinal lavages of the mouse. E. VAN DER VORST, H. DHONT, C. VAN HAEREN, R. DECEUNYNCK and P. H. DE RYCKE	25-31
A survey of intestinal helminths of well-cared-for dogs in Jamaica, and their potential public health significance. R. D. ROBINSON, D. L. THOMPSON and J. F. LINDO	32-38
Observations on the suitability and importance of the domestic intermediate hosts of <i>Echinococcus granulosus</i> in Uttar Pradesh, India. M. IRSHADULLAH, W. A. NIZAMI and C. N. L. MACPHERSON	39-45
<i>Mammomonogamus laryngeus</i> (Railliet, 1899) infections in cattle from Sri Lanka. D. VAN AKEN, J. DE BONT, J. FRANSEN and J. VERCRUYSSSE	47-52
<i>Oswaldocruzia filiformis</i> (Nematoda: Trichostrongyloidea) in frogs ( <i>Rana temporaria</i> ) from three locations in Ireland. C. T. GRIFFIN	53-62
An <i>in vitro</i> study of the forcible ejection of the metacercaria of the strigeid digenean <i>Apatemon (Australapatemon) minor</i> Yamaguti, 1933 by rapid inward expansion of the cyst wall. G. C. KEARN, G. CLEVELAND and S. WILKINS	63-71
<i>In vitro</i> effect of ivermectin on <i>Pseudoterranova decipiens</i> survival. K. M. MANLEY and J. A. EMBIL (Research Note)	72-74
Inorganic elements in the adults of <i>Ascaridia galli</i> (Schrank, 1788). K. C. PANDEY and S. CHOUDHRY (Research Note)	75-76
A simple method for the collection of <i>Necator americanus</i> larvae. J. MUELLER, B. ELLENBERGER, A. C. FUSCO, B. SALAFSKY and A. A. SIDDIQUI (Research Note)	77-78
Announcements	18, 46
