

Primary Health Care Research & Development

VOLUME 10 | ISSUE 3 | JULY 2009

CONTENTS

Editorial

- 165 Masterclasses in Primary Health Care Research
Rosamund Bryar and Sally Kendall

Masterclass Paper

- 167 Advancing the Expert Patient?
Anne Rogers

Development

- 177 Facilitating partnership working in public health: evaluation of a clinical service development approach
Cath Jackson, Susan Blundell, Rosemary R.C. McEachan and Ian Cameron
- 189 Using the opinions of coronary heart disease patients in designing a health education booklet for use in general practice consultations
Claire S. Leatham, Margaret E. Cupples, Mary C. Byrne, Molly Byrne, Mairead Corrigan, Susan M. Smith and Andrew W. Murphy

Research

- 200 Integrating genetic risk assessment for multi-factorial conditions into primary care
Alison Metcalfe, Sue Wilson, Deborah McCahon, Helen V. Sleightholme, Paramjit Gill and Trevor Cole
- 210 Personalized care planning for diabetes: policy lessons from systematic reviews of consultation and self-management interventions
Jonathan Graffy, Simon Eaton, Jackie Sturt and Paul Chadwick
- 223 Under one roof? A population-based survey of patient use and preference for sexual health services
Debra Gray, Catherine H. Mercer, Anna Graham, Rebecca S. French, Chris Salisbury and The One-Stop Shop Project Team
- 236 Childrens' and parents' views and experiences of attending a childhood obesity clinic: a qualitative study
Sarah E. Owen, Deborah J. Sharp, Julian P. Shield and Katrina M. Turner
- 245 The actuarial basis for financial risk in practice-based commissioning and implications to managing budgets
Rod Jones
- 254 Complexity in simple tasks: a qualitative analysis of GPs' completion of long-term incapacity forms
Julia Hiscock, Paula Byrne, Sarah Peters, Debra Westlake and Mark Gabbay

Short Report

- 270 Community, equity, access: core geographic concepts in primary health care
Valorie A. Crooks and Gavin J. Andrews

Networking

- 274 What is the role of local enhanced services in building clinical research facilities in primary care?
Sara E. Shaw, Tracey Johns, Oksana Hoile and Caroline Gunnell

- 279 **Book review**

PRIMARY HEALTH CARE RESEARCH & DEVELOPMENT

As primary health care continues to grow in importance in relation to the rest of health care provision, this journal provides a source of information on the growing body of knowledge concerning research and development issues in primary health care. This is the first journal aimed specifically at both researchers and practitioners in primary health care, thereby bridging the gap between the two areas. It provides a forum for the publication of international, interdisciplinary research and development in primary health care (PHC).

Aims and Scope

- to disseminate evidence, information and practice examples of PHC research and developmental activities
- to analyse and debate the meaning of evidence and ways in which practice in PHC may be developed to reflect best practice, including clinical audit, quality issues and cost-effectiveness
- to draw on and promote the use of the full range of research methods in PHC research
- to provide a forum for communication between practitioners, researchers, educators and policy-makers concerned with achieving PHC-led services worldwide
- to involve user-groups as well as PHC professionals, thus reflecting accepted views on involvement of consumers in research and policy development
- to reflect and explore the political context of health care development
- to include work concerned with all aspects of PHC including prevention, health promotion, public health, education, clinical effectiveness, organizational and management issues, quality issues and policy development

Networking

This section covers the work of research networks and other initiatives to promote collaboration or build capacity in primary care research. Articles can raise issues, inform or challenge, comment on current events, or seek collaborative partners. Articles of up to 1000 words will be subject to editorial review and published as quickly as space allows. Longer contributions will be subject to peer review, as are other papers submitted to the journal.

Research

Research papers (normally up to 5000 words) will be considered as those which do one or more of the following:

- Report on primary data, either quantitative or qualitative
- Offer a critical analysis of research method(s)
- Provide a critical and systematic overview of previous studies
- Provide new theoretical/conceptual insights into phenomena
- Critically inform the evidence base for practice

Development

Development papers (normally up to 5000 words) will be considered as those which do any one or more of the following:

- Report on a change in practice
- Demonstrate how evidence supports change
- Report on audit data or pilot study data
- Report on evaluation process
- Analyse policy which underpins change in practice
