Winner of the 1999 Merle Curti Award in American Intellectual History from the Organization of American Historians

\$19.95 paperback

## A New Birth of Freedom

Charles L. Black, Jr.

"Many . . . unwritten rights are somehow inherent in the American scheme of democracy. So where do these freedoms come from? . . . One of the nation's most venerated thinkers about such matters offers a provocative and refreshing way to answer that question."—Neil A. Lewis, *New York Times Book Review*

\$14.00 paperback

## The Unknown Lenin

*From the Secret Archive*

Edited by Richard Pipes

## AFRICAN AMERICAN LEADERSHIP

**Ronald W. Walters and Robert C. Smith**

This book provides a panoramic view of the theory, research, and praxis of African American leadership.

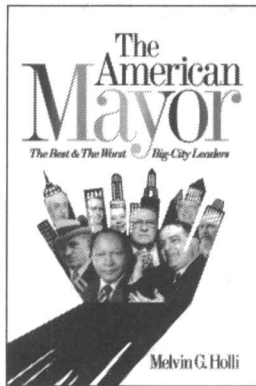

It begins with an analysis of the roles of black leadership and historical analysis of strategies. The authors then provide illustrative case studies of the styles of black leadership. They examine the continued utilization of mass mobilization in the form of boycotts, direct action, and mass demonstrations and marches. The issue of collective black leadership is also explored, and serious attention is given to issues, recruitment, and deployment.

## Engels After Marx

EDITED BY MANFRED B. STEGER AND TERRELL CARVER

"*Engels After Marx* is an impressive work of scholarship. It brings Engels out from under the shadow of Marx and treats him as a thinker and activist in his own right. The host of perspectives offered in this volume examines the range of Engels's influence, his achievements, his mistakes, and his legacy for progressive theory and practice. The editors have indeed made a genuine contribution to our understanding of a crucial figure in the history of modernity."

JESSICA STERN

"[Stern's ] research is breathtakingly thorough, and the prose, so often describing complex technological detail, surprisingly lucid. The era of 'the ultimate terrorists', implying nuclear, biological or chemical weapons may not yet have dawned in any real sense, but the potential and the danger, as this book illustrates, are all too obvious. . . [Stern] has written a valuable book that should serve as a timely warning about a potentially dreadful future."

—Sean O'Callaghan, THE TIMES [UK]

"*The Ultimate Terrorists* is a timely book on a vitally important subject. Jessica Stern has done a thorough job of research and presents her arguments with clarity and force. This book should be a wake up call for Americans."

## ONE CASE AT A TIME

*Judicial Minimalism on the Supreme Court*

CASS R. SUNSTEIN

"Cass Sunstein's book is just what the country needs—an understandable analysis of how this Supreme Court goes about its decision making. If it seems to make the 'conservatives' the 'activists' and the 'liberals' the 'strict constructionists,' that only proves that those labels are not very useful and more often than not reflect the eye of the beholder. Nor can Professor Sunstein's use of the word minimalism be dismissed as just another pretty label. The term aptly describes what has been the very touchstone of both the common law and constitutional theory in America for a long, long time. The book represents Sunstein at his best."

U.S. Court of Appeals for the D.C. Circuit

## CONSTITUTIONAL CONSTRUCTION

*Divided Powers and Constitutional Meaning*

KEITH E. WHITTINGTON

This book argues that the American Constitution has a dual nature. The first aspect, on which legal scholars have focused, is the degree to which the Constitution acts as a binding set of rules that can be neutrally interpreted and externally enforced by the courts against government actors. This is the process of constitutional interpretation. But according to Keith Whittington, the Constitution also permeates politics itself, to guide and constrain political actors in the very process of making public policy.

Whittington develops his argument through intensive analysis of four important cases: the impeachments of Justice Samuel Chase and President Andrew Johnson, the nullification crisis, and reforms of presidential-congressional relations during the Nixon presidency.

## THE PROBLEMATICS OF MORAL AND LEGAL THEORY

RICHARD A. POSNER

Posner characterizes the current preoccupation with moral and constitutional theory as the latest form of legal mystification—an evasion of the real need of American law, which is for a greater understanding of the social, economic, and political facts out of which great legal controversies arise. In pursuit of that understanding, Posner advocates a rebuilding of the law on the pragmatic basis of open-minded and systematic empirical inquiry and the rejection of cant and nostalgia—the true professionalism foreseen by Holmes a century ago.

## SEPARATE AND UNEQUAL

*The Inside Story of Israeli Rule in East Jerusalem*

AMIR S. CHESHIN, BILL HUTMAN,  
AND AVI MELAMED

This vivid behind-the-scenes account of Israeli rule in Jerusalem details for the first time the Jewish state's attempt to lay claim to all of Jerusalem, even when that meant implementing harsh policies toward the city's Arab population.

The authors, Jerusalemites from the spheres of politics, journalism, and the military, have themselves been players in the drama that has unfolded in east Jerusalem in recent years. They have also had access to a wide range of official documents that reveal the making and implementation of Israeli policy toward Jerusalem. Their book discloses the details of Israel's discriminatory policies toward Jerusalem Arabs and shows how Israeli leaders mishandled everything from security and housing to schools and sanitation services.

## THE AMERICAN PARTY BATTLE

*Election Campaign Pamphlets, 1828–1876*

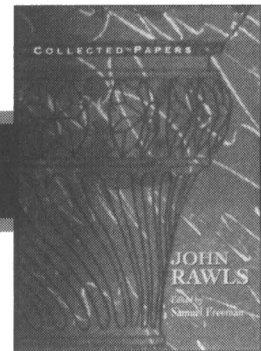

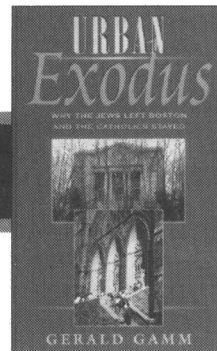

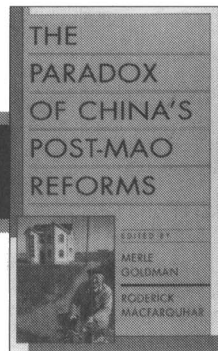

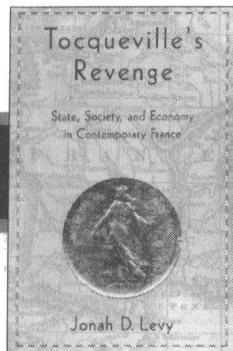

EDITED AND WITH AN INTRODUCTION BY  
JOEL H. SILBEY

The nineteenth century was the heyday of furious contention between American political parties, and Joel Silbey has recaptured the drama and substance of those battles in a representative sampling of party pamphlets. The nature of political controversy, as well as the substance of politics, is embedded in these party documents which both united and divided Americans. Unlike today's party platforms, these pamphlets explicated real issues and gave insight into the society at large. In a brilliant introduction, Silbey elucidates the themes each party formed in its fight for the soul of the nation.

## TOCQUEVILLE'S REVENGE

*State, Society, and Economy in Contemporary France*

JONAH D. LEVY

This book offers a new interpretation of the transformation of French economic policymaking and state-society relations over the past twenty-five years. France has long been characterized as a statist or *dirigiste* political economy, with state "strength" predicated on autonomy from a weak and divided civil society. Jonah Levy shows that this disdain for societal and local institutions has come back to haunt French officials. The absence of societal partners undermined the operation of *dirigiste* policymaking in the 1970s and early 1980s and has made it difficult to forge alternative forms of economic coordination in the post-*dirigiste* period. Levy argues that just as the French state has been weakened by an absence of societal and local partners, French civil society has been weakened by the absence of a supportive state.

## SCIENCE UNDER SOCIALISM

*East Germany in Comparative Perspective*

EDITED BY KRISTIE MACRAKIS  
AND DIETER HOFFMANN

Taking advantage of documents never before available from the archives of the East German Communist Party and the Ministry for State Security, and drawing on interviews with, among others, the legendary spy chief Markus Wolf and members of the East German Politburo, *Science under Socialism* is the first book to examine the role of science and technology in the former German Democratic Republic. The result is a multi-layered analysis of the scientific enterprise that provides a fascinating glimpse into what it took to construct a new socialist state and the role science and technology played in it.

## THE PARADOX OF CHINA'S POST-MAO REFORMS

EDITED BY MERLE GOLDMAN  
AND RODERICK MACFARQUHAR

China's bold program of reforms launched in the late 1970s—the move to a market economy and the opening to the outside world—ended the political chaos and economic stagnation of the Cultural Revolution and sparked China's unprecedented economic boom. Yet, while the reforms made possible a rising standard of living for the majority of China's population, they came at the cost of a weakening central government, increasing inequalities, and fragmenting society. These essays analyze the contradictory impact of China's economic reforms on its political system and social structure.

## ORGANIZATIONAL REPORT CARDS

WILLIAM T. GORMLEY, JR.  
AND DAVID L. WEIMER

In recent years, American consumers, professional organizations, government officials, and third-party payers have become increasingly concerned about how to assess the quality of the services provided by organizations in both the private and the public sectors. One new approach is the organizational report card. This book offers the first comprehensive study of such instruments. It discusses the circumstances under which they are desirable alternatives to other policy instruments, such as regulation; how they should be designed; who is likely to use them and for what purpose; and what role, if any, government should have in their creation.

## URBAN EXODUS

*Why the Jews Left Boston and the Catholics Stayed*

GERALD GAMM

In telling the story of why the Jews left Boston and the Catholics stayed, Gerald Gamm places neighborhood institutions at its center. He challenges the long-held assumption that bankers and real estate agents were responsible for the rapid Jewish exodus. Rather, according to Gamm, basic institutional rules explain the strength of Catholic attachments to neighborhood and the weakness of Jewish attachments. Because they are rooted, territorially defined, and hierarchical, parishes have frustrated the urban exodus of Catholic families. And because their survival was predicated on their portability and autonomy, Jewish institutions exacerbated the Jewish exodus.

"*Urban Exodus* takes a fresh look at two long running themes in Boston history: tribalism and turf [and] examines the glue that holds a neighborhood together."

## COLLECTED PAPERS

JOHN RAWLS

EDITED BY SAMUEL FREEMAN

Before and after writing his great treatises—*A Theory of Justice* (1971) and *Political Liberalism* (1993)—Rawls produced a steady stream of essays. Some of these essays articulate views of justice and liberalism distinct from those found in the two books. They are important in and of themselves because of the deep issues about the nature of justice, moral reasoning, and liberalism they raise as well as for the light they shed on the evolution of Rawls's views. Some of the articles tackle issues not addressed in either book. They help identify some of the paths open to liberal theorists of justice and some of the knotty problems which liberal theorists must seek to resolve.

## RONALD REAGAN

*The Politics of Symbolism*

ROBERT DALLEK

WITH A NEW PREFACE BY THE AUTHOR

Robert Dallek presents a sharply drawn, richly detailed portrait of Ronald Reagan and his politics—from his childhood years through the California governorship to the first years of the presidency. It is an essential guide for all observers of the presidential election of 2000, and a starting point for anyone wanting to discover what the Reagan experience really meant.

"We are in desperate need of a better 'fix' on Reagan...and this is the kind of reasoned, factual, non-polemical book that will attract attention."

## IDENTIFICATION PROBLEMS IN THE SOCIAL SCIENCES

CHARLES F. MANSKI

This book provides a language and a set of tools for finding bounds on the predictions that social and behavioral scientists can logically make from nonexperimental and experimental data. Charles Manski draws on examples from criminology, demography, epidemiology, social psychology, and sociology as well as economics to illustrate this language and to demonstrate the broad usefulness of the tools.

## FROM THE OTHER SHORE

*Russian Social Democracy after 1921*

ANDRÉ LIEBICH

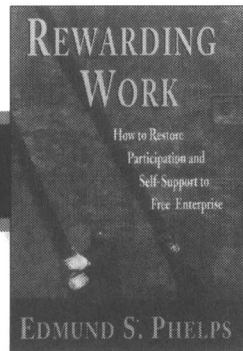

WINNER OF THE FRAENKEL PRIZE IN CONTEMPORARY HISTORY OF THE WIENER LIBRARY, LONDON

"[An] important new book...*From the Other Shore* raises the question of what would have happened if the Mensheviks had prevailed in 1917. Would they have gone the route of the Bolsheviks, laying the groundwork for the repressive totalitarianism to follow? Or would they have found another path committing themselves to a radical transformation of Russian society while at the same time...respecting the political liberties of their opponents?...Liebich asks us to see the Mensheviks as something more than political losers...Our judgment of them as political actors and thinkers...can help determine whether Marxism has any legitimate claim as a serious and honorable political tradition or deserves nothing better than its current consignment to the dustbin of history."

## IMPEACHMENT

*The Constitutional Problems, Enlarged Edition*

RAOUL BERGER

The little understood yet volcanic power of impeachment lodged in the Congress is dissected through history by the nation's leading legal scholar on the subject. Berger offers authoritative insight into "high crimes and misdemeanors." He sheds new light on whether impeachment is limited to indictable crimes, on whether there is jurisdiction to impeach for misconduct outside of office, and on whether impeachment must precede indictment. In an addition to the book, Berger finds firm footing in contesting the views of one-time Judge Robert Bork and President Nixon's lawyer, James St. Clair.

"Originally published in 1974 at the time of the Nixon crisis, this erudite book by a legal scholar offers authoritative insight into all aspects of impeachment."

## REWARDING WORK

*How to Restore Participation and Self-Support to Free Enterprise*

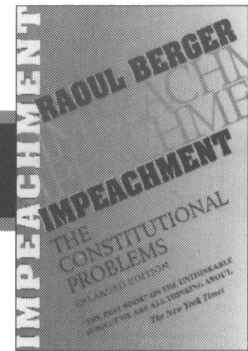

EDMUND S. PHELPS

Since the 1970s, a gulf has opened between the pay of low-paid workers and the pay of the middle class. No longer able to earn a decent wage in respectable work, many have left the labor force, and the job attachment of those remaining has weakened, also reducing employment. For Edmund Phelps, this is a failure of political economy whose ill effects have spread widely and are undermining the free-enterprise system itself. His solution is a graduated schedule of tax subsidies to enterprises for every low-wage worker they hire. As firms hire more of these workers, the labor market would tighten, driving up their pay levels as well as their employment.

"[Phelps] takes the view that many Americans have been driven out of working life, and deprived of all the physical and psychological succor that work provides, simply because their wages are too low, especially when the amount they are able to earn is compared with the amount they can 'earn' in payments and kind via the welfare system by doing no work at all...Phelps makes his economic case with forensic clarity."

# Scholarly Perspectives on Global Concerns

## Culture, Development and Democracy: The Role of the Intellectual

A United Nations University Press publication

Leading intellectuals from different regions of the world share their views on the role of the intellectual in culture, development, democracy, freedom and human rights, particularly in developing countries. The themes presented range from specific issues of political theory to case studies of individual countries and regions. Within this framework, the essays presented in this publication, discuss problems related to, among others, the environment, growing populations, the economy, health, education, social justice and ethnicity.

## Modelling Global Change

A United Nations University Press publication

This book focuses on global modelling and simulation studies examining world megatrends of change and response alternatives. Leading scholars from around the world, discuss a variety of model applications, including the LINK project, the EPA World Model, the Global Input-Output System and the FUGI Global Model.

Implications of global change are analysed for key world issues: the global economy and economic development, the environment, production technologies, greenhouse gas emissions and arms reductions. This book makes a contribution in supporting the development of new methods of forecasting global change and formulating policy

alternatives for environmentally, socially and politically sustainable development.

### ELECTIONS IN WESTERN EUROPE 1815-1995

Daniele Caramani  
September 1999, 1-56159-243-9  
List Price: \$325

This book records the results of all legislative elections held in 18 European countries collected at the level of single constituencies for the first time.

The collection of results has been made completely machine-readable according to standard rules across countries, historical periods and electoral systems. Both the electoral history of each country and the complete documentation to the data – enfranchisement, the fairness of voting conditions, the electoral systems – is presented in the handbook.

In each country chapter systematic tables provide the complete documentation on the official and secondary sources, the dates of the elections, the lists of constituencies and their changes over time and the names, splits and merges of political parties for each country.

A series of introductory chapters describe the evolution of electoral laws in comparative perspective, the mechanics of the different electoral systems and the development of official electoral statistics.

### TRADE UNIONS IN WESTERN EUROPE SINCE 1945

Daniele Caramani  
September 1999, 1-56159-243-9  
List Price: \$325

An original, comprehensive and up-to-date data collection on postwar union movements; an indispensable tool for anyone comparing labor relations across Europe.

This comparative data handbook offers an empirical base to a long-term and comparative understanding of changes and variations in European union movements. It provides information on the context and history of union development, the changes in the structure of post-war unionism until today, the long-term trends in union membership and union density, and the shifts in the cross-sectional composition of union membership. Introduction and references are included, as well as standardised tables for each country and comparative indicators.

The handbook is the result of many years of research by the authors in collaboration with an international research team, and provides an original source for comparative and national studies or individual enquiries. It offers cross-checked and often newly-calculated statistics from the project's unique comprehensive database on national union organizations and their membership series.

## Subversive Institutions

The Design and the Destruction of Socialism and the State  
**Valerie Bunce**

Based on a series of controlled comparisons among regimes and states, Valerie Bunce's book argues that two factors account for the remarkable collapse of the socialist dictatorships in Europe from 1989–1992: the institutional design of socialism as a regime, a state and a bloc, and the rapid expansion during the 1980s of opportunities for domestic and international change. Together, these two factors explain not just why socialist regimes and states ended, but also why the process was peaceful in some cases and violent in others.

## Trust within Reason

**Martin Hollis**

Does trust grow fragile when people are too rational or when they are not rational enough? Both thoughts are plausible. Which is right depends on how we define "reason." Martin Hollis' elegant and distinctive study argues for an interpretation of "reason" as putting the common good before one's own. This offers a universal reciprocity to people who then choose what reason shall mean for them.

## Human Rights in Global Politics

**Tim Dunne and Nicholas J. Wheeler, Editors**

There is a stark contradiction between the theory of universal human rights and the everyday practice of human wrongs. This timely volume brings together leading scholars to evaluate this paradox. The contributors ask whether human rights abuses are a result of the failure of governments to live up to a universal human rights standard, or whether the search for moral universals is a fundamentally flawed enterprise. The book evaluates the philosophical basis of human rights, and reflects on the structures that affect the development of a global human rights culture.

## Taxing America

Wilbur D. Mills, Congress, and the State, 1945–1975  
**Julian E. Zelizer**

*Taxing America* provides the first historical study of Wilbur Daigh Mills, chairman of the House Ways and Means Committee from 1958 to 1974. The work of Mills, an extremely influential politician between 1945 and 1975, offers considerable insights into the evolution of income taxation, Social Security and Medicare—three policies at the center of today's political debates. Unlike the existing historical scholarship, Zelizer's book focuses on the role of Congress, rather than the executive branch, in the evolution of the welfare state during this seminal period.

*"This volume should become the leading work in this important field. It should be required reading for all those with a serious interest in human rights and in East Asian Studies. It will also be of interest to those interested in 'globalization' and the politics of cultural diversity."*

— **Michael Freeman, University of Essex**

This book moves beyond the politicized rhetoric that has dogged the international debate on human rights to identify the more persuasive contributions by East Asian intellectuals.

## Impersonal Influence

How Perceptions of Mass Collectives Affect Political Attitudes

**Diana C. Mutz**

*Impersonal Influence* is about how people are affected by their perceptions of the collective opinions or experiences of others—things such as the well-publicized results of opinion polls (in the case of others' opinions), or media's coverage of the collective experiences of others (such as the extent to which others are experiencing financial problems or are being victimized by crimes). Media content is particularly well suited to serving as a credible channel of information about large-scale collective phenomena. Coverage of the collective opinions (in the case of perceptions of social problems such as crime or unemployment) alters people's political attitudes in surprising, yet subtle ways. These kinds of effects have important implications for the quality of public opinion and the accountability of political leaders in a mass mediated democracy.

## Majority Rule or Minority Will

Adherence to Precedence on the U.S. Supreme Court

**Harold J. Spaeth and Jeffrey A. Segal**

This book examines the influence of precedent on the behavior of U.S. Supreme Court justices throughout the Court's history. Under the assumption that for precedent to be an influence on the behavior of justices it must lead to a result they would not otherwise have reached, the results show that when justices disagree with the establishment of a precedent, they rarely shift from their previously stated views in subsequent cases. In other words, they are hardly ever influenced by precedent. Nevertheless, the doctrine of *stare decisis* does exhibit some low level influence on the justices in the least salient of the Court's decisions. The book examines these findings in light of several leading theories of judicial decision making.

## The Logic of Regional Integration

Europe and Beyond

**Walter Mattli**

*"The historical and geographical sweep of The Logic of Regional Integration is very impressive—ranging from the nineteenth-century German Zollverein to the contemporary European Union to Mercosur and beyond. But Mattli's finest achievement is coupling this empirical depth with a rigorous, parsimonious and persuasive thesis. His central argument that economic disparities between insiders and outsiders drive regional integration is a major contribution to the debate about this important phenomenon."*

## Unions in a Contrary World

The Future of the Australian Trade Union Movement

**David Peetz**

Australia once had extremely high levels of trade union participation yet since the 1970s the number of union members has been falling dramatically. This book gives the clearest picture yet of why people do or do not belong to unions and, in a sophisticated way, examines the reasons for union decline. Uniquely, it considers both macro and micro levels, looking at the structure of the economy and the labor market, the ideological dispositions people have toward unionism, the role of the state and the political and industrial strategies of unions.

## Legal Positivism in American Jurisprudence

**Anthony Sebok**

This book is both a work of intellectual history and a contribution to legal philosophy. It represents a serious and philosophically sophisticated guide to modern American legal theory, demonstrating that legal positivism has been a misunderstood and underappreciated perspective through most of twentieth-century American legal thought. The broad scope of this book ensures that it will be read by philosophers of law, historians of law, historians of American intellectual life, and those in political science concerned with public law and administration.

**Yossi Shain**

*"Today concerns are growing about the greater diversity brought by recent immigrants and their ongoing close ties to their homelands. Yossi Shain provides an important argument that, from the standpoint of foreign policy, America still chooses best when it chooses to be inclusive."*

— Rogers M. Smith, Yale University

Shain evaluates ethnic groups in the U.S. from a broad theoretical and comparative perspective, and his case studies include, among others, Arab-Americans, Mexican-Americans, and African-Americans.

## August Sartorius von Waltershausen

The Workers' Movement in the United States, 1879–1885

**David Montgomery and**

**Marcel van der Linden, Editors**

*In collaboration with Jan Gielkens and Gregory Zieren*

August Sartorius von Waltershausen (1852–1938) was an eminent German economist who visited the United States at the beginning of the 1880s and wrote a series of articles on the U.S. labor movement. His training in the historical school of economics provided him with a different perspective from that of laissez-faire economists or socialists of his time. The articles, presented in this book with two essays, provide rich insights into the character of American workers' organizations as they recovered from the 1870s depression, before the establishment of strong national institutions.

## Funding Social Security

A Strategic Alternative

**Laurence S. Seidman**

This book offers serious consideration of the debate on social security reform that is taking place in many countries around the world. The work advocates the concept of "funded social security" as a middle position between pay-as-you-go (PAYGO) social security and privatized social security, and constitutes a politically strategic alternative. Professor Seidman's analysis covers two distinct components, fund accumulation and portfolio diversification.

## America and Political Islam

Clash of Cultures or Clash of Interests?

**Fawaz A. Gerges**

*"Gerges' level-headed analysis superbly reveals the discrepancies between American words and American deeds. Though one might despair of our country ever having a coherent Middle East policy, dispassionate and thorough insight like this could be the beginning of wisdom."*

— Richard Bulliet, Columbia University

This book provides a comprehensive account of the origins of American policy on political Islam, chronicling the policy debates on Islamism in the United States over the course of time. The author then delves deeper into the US political scene to analyze the historical, political, cultural, and security issues that might help explain America's preoccupation with Islam and Muslims. The book also addresses the clash of civilizations debate and assesses the relative importance of culture and values in the words and deeds of US officials on political Islam.

## The Power of Power Politics

From Classical Realism to Neotraditionalism

**John A. Vasquez**

This book provides an intellectual history of international relations theory from 1919 to the present, examining the dominance of realist theories, and their limited ability to explain world politics accurately. The volume presents the original text of John Vasquez's classic 1983 volume, *The Power of Power Politics*, analyzing classical realism and quantitative international politics, plus six new chapters covering the most important intellectual currents relevant to the debate on realism. This book is a major contribution to debates over realism in international relations, of interest to students as well as scholars.

## States, Markets, Families

Gender, Liberalism and Social Policy in Australia, Canada, Great Britain and the United States

**Julia S. O'Connor, Ann Shola Orloff and Sheila Shaver**

Three leading figures in the field make this important contribution to debates about social policy and gender relations in an era of economic restructuring and market liberalism. Structured thematically and systematically comparative, the book analyzes three key policy areas: labor markets, income maintenance and reproductive rights. It explores the question of whether liberal states should intervene in workplaces or families to guarantee the rights and welfare of all individuals within them. The experiences of Canada, the UK, United States and Australia are the focus of the book.

## Contemporary Capitalism

The Embeddedness of Institutions

**J. Rogers Hollingsworth and Robert Boyer, Editors**

*"This is a stimulating set of essays produced by a distinguished set of contributors."*

— Michael Smith, Canadian Journal of Political Sciences

The editors argue, the economic institutions of capitalism exhibit a large variety of objectives and tools that complement each other and can not work in isolation. The various chapters of the book ask what logics and functions institutions follow and why they emerge, mature and persist in the forms they do.

## Fences and Neighbors

*The Political Geography of Immigration Control*

JEANNETTE MONEY

*Fences and Neighbors* considers several of the world's wealthiest democracies, nations that remain magnets for economic migrants and refugees. Focusing on the tendency of immigrants to concentrate in specific locations, this book is the first to analyze the implications of this political geography for democracies.

"[C]ompelling. . . . No other scholar has developed this argument as thoroughly or as carefully."—Martin A. Schain, New York University. 30 tables, 13 charts/graphs, 1 map. \$39.95

## The Unions and the Democrats

*An Enduring Alliance*

TAYLOR E. DARK

"It is widely said that the New Deal order has collapsed. Taylor Dark questions that wisdom with a judicious and well-informed portrait of the continuing collaboration of the unions with the Democratic party. . . . An illuminating and chastening book, especially for those who think that labor's resurgence depends on an aggressive new labor politics."

—Frances Fox Piven. AN ILR PRESS BOOK. \$37.50

## State/Culture

*State Formation after the Cultural Turn*

EDITED BY  
GEORGE STEINMETZ

What impact does culture have on state formation and public policy? How do states affect cultures? How is the cultural turn in theory reshaping our understanding of the Western and modernizing states? This volume examines the sociology of the state and historical processes of state formation.

THE WILDER HOUSE SERIES IN POLITICS, HISTORY AND CULTURE. 12 photos, 1 chart/graph. \$59.95 cloth, \$22.95 paper

## Cornell '69

*Liberalism and the Crisis of the American University*

DONALD  
ALEXANDER DOWNS

"The scenes recalled here of armed black students leaving a Cornell University building in 1969 . . . clearly detail . . . the contested notions . . . which made the Cornell uprising more significant than most American student revolts of the 1960s."—*Library Journal*

"This scrupulously honest and painfully fair book is the best thing to come out of the awful events described."—Alan Wolfe, author of *One Nation, After All*. 25 photos \$35.00

## State Building and Late Development

DAVID WALDNER

Why does state building sometimes promote economic growth and in other cases impede it? Through an analysis of political and economic development in four countries—Turkey, Syria, Korea, and Taiwan—this book explores the origins of political-economic institutions and the mechanisms connecting them to economic outcomes. 1 chart/graph. \$49.95 cloth, \$18.95 paper

## NIMBY Politics in Japan

*Energy Siting and the Management of Environmental Conflict*

S. HAYDEN LESBIREL

This book is the first detailed account in English of energy siting disputes in postwar Japan. Based on an investigation of a hundred conventional and nuclear plants, the book draws on local and corporate sources, as well as interviews with participants, to reveal the bargaining processes involved in social choices and their public policy outcomes. "[V]ery well written and well organized."

—Margaret McKean, Duke University. 11 tables, 5 maps. \$39.95

## Drugs and the Limits of Liberalism

*Moral and Legal Issues*

EDITED BY  
PABLO DE GREIFF

This book examines the legal, moral, and philosophical underpinnings of society's drug problems. The authors explore the possibilities and limitations of philosophical reflection on this pressing, practical social issue. \$32.50

## Korean Politics

*The Quest for Democratization and Economic Development*

JOHN KIE-CHIANG OH

John Oh, a Korean-born political scientist, offers a clear and insightful account of government and politics in the Republic of Korea over the past fifty years. His chronological and thematic study analyzes both the conflicts between authoritarian forces and populist/democratic elements and the nation's determined efforts to achieve economic growth. 9 tables, 14 photos, 1 map \$45.00 cloth, \$16.95 paper

## Guerrilla Diplomacy

*The NLF's Foreign Relations and the Viet Nam War*

ROBERT K. BRIGHAM

"This illuminating book is based on impressive scholarship. . . . Brigham has gone further than any previous author toward explaining the evolution of the other side's negotiating position, and he has demonstrated the importance and complexity of the relationship between the northern-based Communist Party and the southern National Liberation Front."

—Andrew Rotter, author of *The Path to Vietnam: Origins of the American Commitment to Southeast Asia*. 2 maps. \$35.00

*Monetary Politics in the European Union*

With a New Preface

KATHLEEN  
R. McNAMARA

**NEW IN PAPER!** "The Economic and Monetary Union, [Kathleen R. McNamara] argues, must be primarily explained as an act of political choice, and probably an unwise one, rather than a submission to world economic trends. . . . ## The Choice for Europe

*Social Purpose and State Power from Messina to Maastricht*

ANDREW MORAVCSIK

Andrew Moravcsik analyses the history of Europe's movement toward economic and political union. He argues that economic interdependence is the primary force driving nations in this surprising direction. "[T]he most compelling and significant analysis yet of the European Community."—Robert O. Keohane, Duke University. 6 cartoons, 8 tables \$59.95 cloth, \$22.50 paper

## The Government of Money

*Monetarism in Germany and the United States*

PETER A. JOHNSON

In recent years, governments have increasingly given central banks the freedom to pursue policies of price stability. In particular, the German Bundesbank and the U.S. Federal Reserve have been widely considered models of autonomous policymaking. This book traces the origins of their success to the political struggle to adopt monetarism in Germany and the United States. \$39.95

## Ballots and Bullets

The Elusive Democratic Peace

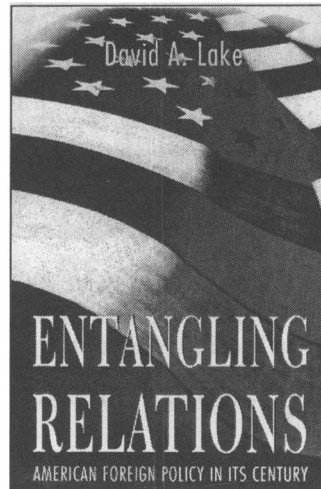

Joanne Gowa

There is a widespread belief that “democracies don’t fight each other.” Here Joanne Gowa challenges that belief. In a thorough, systematic critique, she shows that, while democracies were less likely than other states to engage each other in armed conflicts between 1945 and 1980, they were just as likely to do so as were other states before 1914.

“An important contribution to both theory and policy. It offers a cogent critique of the democratic-peace proposition.”

—Steven Chan, University of Colorado

Cloth \$27.50 ISBN 0-691-00256-8

## Entangling Relations

American Foreign Policy in Its Century

David A. Lake

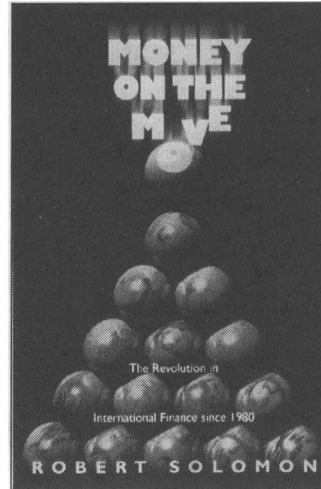

“This is the most ambitious, most successful attempt yet to bring under a single, conceptual framework the strategic choices available to a state seeking to enhance its security: empire, alliance, and unilateralism. This is a major contribution to the field of international politics.”

—Jack Snyder, Columbia University

## Money on the Move

The Revolution in International Finance since 1980

Robert Solomon

The international monetary system has changed radically in the last twenty years. In this book, Robert Solomon—author of the definitive history of the monetary order between 1945 and 1981—presents the first comprehensive history of this revolution in international finance. Authoritative, accessible, and elegantly written, the book will be indispensable for anyone who wishes to understand how today’s international monetary system works.

Cloth \$29.95 ISBN 0-691-00444-7

## Uneasy Alliances

Race and Party Competition in America

Paul Frymer

Paul Frymer argues that two-party competition in the United States leads to the marginalization of African Americans and the subversion of democracy. Frymer shows that party competition is centered around racially conservative white voters and that this has dire consequences for African Americans.

“This is a bold, provocative book. . . . Scholars and activists will soon be talking about Frymer’s argument and figuring out whether they agree or disagree. It’s that kind of a book—hard to ignore.”

## Ethics for Adversaries

The Morality of Roles in Public and Professional Life

Arthur Isak Applbaum

The adversary professions—law, business, and government, among others—typically claim a moral permission to violate persons in ways that, if not for the professional role, would be morally wrong. *Ethics for Adversaries* is a philosophical inquiry into arguments that are offered to defend seemingly wrongful actions performed by those who occupy what Montaigne called “necessary offices.”

## Democratic Education

Amy Gutmann

Who should have the authority to shape the education of citizens in a democracy? This is the central question posed by Amy Gutmann in the first book-length study of the democratic theory of education.

## The Hidden Welfare State

Tax Expenditures and Social Policy in the United States

Christopher Howard

Christopher Howard analyzes the “hidden” welfare state created by such programs as tax deductions for home mortgage interest and employer-provided retirement pensions, the Earned Income Tax Credit, and other tax expenditures.

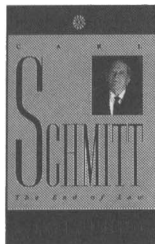

“It is essential reading for students of American social policy.”—Margaret Weir, Brookings Institution

# GOOD RELATIONS?

## Developing Democracy

Toward Consolidation

**Larry Diamond**

"Larry Diamond has built a cumulative record of outstanding scholarship on democracy. *Developing Democracy* illuminates brilliantly the problems and opportunities of emerging democracies, especially the critical phase of democratic consolidation. In a world struggling to find ways of establishing durable democracies, this book is at once a timely and fundamental contribution."

—David A. Hamburg, M.D., President Emeritus, Carnegie Corporation of New York

\$17.95 paperback

## Civilian Control of the Military

The Changing Security Environment

**Michael C. Desch**

"Desch's view that a declining focus on external threats will make civil-military relations worse is an important one—especially in a world where domestic conflicts vastly outnumber international wars. This is an important book that is likely to make a significant contribution to the field."

—Steven R. David, The Johns Hopkins University

\$34.95 hardcover

## Multilateral Negotiations

Lessons from Arms Control, Trade, and the Environment

**Fen Osler Hampson with Michael Hart**

"Although there are more instances and many case studies of multilateral negotiations, there are almost no conceptual—let alone theoretical—studies of the subject. . . . Fen Hampson has rendered a great service in helping to fill this gap by testing and deriving insights about multilateral decision making from a number of empirical exercises."—I. William Zartman, *American Political Science Review*

\$17.95 paperback

## The President's Agenda

Domestic Policy Choice from Kennedy to Clinton  
*third edition*

**Paul Light**

In this third edition of *The President's Agenda*, Paul Light brings his acclaimed study up to date by weighing the successes and failures of the Bush and Clinton presidencies in setting a legislative agenda of domestic issues for Congress. The most noticeable development, according to Light, is the shrinking of the agenda and the absence of fresh new ideas.

"An important and well-thought-out analysis of presidential domestic politics, examining many variables in a president's term."—*Perspectives on Political Science*, reviewing a previous edition

\$16.95 paperback

## (Un)Manly Citizens

Jean-Jacques Rousseau's and Germaine de Staël's Subversive Women

**Lori Marso**

"Lori Marso takes feminist political theory to a new level. In contrast to earlier feminist critics who emphasized the figure of woman as outsider to politics, Marso discerns in woman 'subversive gestures,' which harbor the possibility of an 'alternative democratic principle.' She brilliantly traces these gestures in the work of Rousseau and de Staël, reading them with and against each other to tease out the complexities of the feminine, and to offer a view of political community with a difference."

—Linda Zerilli, Northwestern University

\$38.00 hardcover

## Uncertain Guardians

The News Media as a Political Institution

**Bartholomew H. Sparrow**

"A comprehensive treatment of the news media as a political institution that approaches the subject both empirically and normatively. Sparrow's book is solidly grounded in the academic literature on the subject and, more broadly, in theoretical approaches to American politics."—Michael Nelson, Rhodes College

Blending original interview material with his own institutional analysis, Sparrow shows how the major U.S. news organizations can act contrary to the interests of the American public and democratic government.

*Interpreting American Politics* Michael Nelson, Series Editor

\$17.95 paperback

## Koreans in the Hood

Conflict with African Americans

edited by **Kwang Chung Kim**

Korean Americans find themselves economically powerful, but weak politically. African Americans, however, wield considerable political clout even though they may have little economic power in the inner city. *Koreans in the Hood* offers the Korean American perspective on coexisting with African Americans in some of the poorest areas of Los Angeles, Chicago, and New York. The contributors explore three overt forms of Korean American and African American confrontation: interpersonal dispute, boycott, and mass violence.

\$16.95 paperback

## From Motherhood to Citizenship

Women's Rights and International Organizations

**Nitza Berkovitch**

"This book fills a gap in the existing literature and provides compelling evidence of the important effect that international organizations have had on nation-states' passage of legislation addressing women's unique circumstances."—Patricia Fernandez-Kelly, Princeton University

\$34.95 hardcover

## The Politics of Verification

**Nancy W. Gallagher**

How to evaluate compliance is among the most difficult questions that arise during treaty negotiations and ratification debates. Nancy W. Gallagher explores the causes of verification controversies and the processes through which they are perpetuated or provisionally resolved.

By examining nuclear test ban negotiations from the Eisenhower through the Clinton administrations, Gallagher finds that the assumptions about verification that have dominated U.S. policy shape domestic debates in ways that hinder stable agreement on significant test restrictions.

\$45.00 hardcover

## Rabin and Israel's National Security

**Efraim Inbar**

"Specialists would undoubtedly regard this book's publication as providing the definitive work of scholarship and interpretation of Yitzhak Rabin's historic role in the evolution of Israel's national security doctrines and practices. Its best features include meticulous, exhaustively thorough research, clear organization, and a straightforward prose style blessedly free from military or political science jargon."

## The Dominion of Voice

Riot, Reason, and Romance  
in Antebellum Politics

Kimberly K. Smith

"A brilliant book and significant contribution to both American intellectual and political theory."  
~ JEAN BAKER, author of *Affairs of Party*. "A marvelous achievement. Smith's scholarly range is remarkable. She is equally conversant in nineteenth-century U.S. politics, the history of modern thinking about rhetoric, and contemporary political theory." ~ KENNETH CMIEL, author of *Democratic Eloquence*.  
328 pages. \$40.00

## Leaving the Bench

Supreme Court Justices  
at the End

David N. Atkinson

"Beautifully organized and written, this is the first systematic effort to pull together and analyze Supreme Court deaths, resignations, and retirements. As such, it makes a significant contribution to the field."  
~ TINSLEY E. YARBROUGH, author of *Judicial Enigma*.

James Madison and the  
Problem of Founding

Gary Rosen

"An illuminating and richly thought-provoking new interpretation of Madison's entire career as a thinker and writer. A pathbreaking contribution to the study of the political theory underlying the American Constitution." ~ THOMAS L. PANGLE, author of *The Spirit of Modern Republicanism*. "Enables us to appreciate more fully James Madison's accomplishments both as a theorist of republican government and as a statesman."

## Reconstructing Times Square

Politics and Culture in Urban  
Development

Alexander J. Reichl

"This is a brilliant case study of how cultural politics and economic greed combined in both word and deeds to transform the physical and social environment of New York City's Times Square. Reichl vividly recounts how the city's business and arts communities formed a novel progrowth coalition under the banner of historical preservation to promote the massive redevelopment of the Times Square/42nd Street district." ~ RICHARD DeLEON, author of *Left Coast City*.

# Public Ignorance and Mass Democracy

For more than 35 years, it has been well known among public-opinion specialists that the modern mass public is abysmally ignorant about political matters. Consistent findings of public ignorance raise serious questions about democratic theory as well as about our understanding of day-to-day politics. In this special issue of *Critical Review* the implications of public ignorance are explored in both empirical and normative detail, and in more depth than in any previous forum. Future issues of the journal will continue to pursue these themes, with special emphasis on the manipulation of public opinion.
