

**THE
MENTAL
HEALTH**

FOUNDATION

**The Mental Health Foundation
CAREER DEVELOPMENT
FELLOWSHIP for
RESEARCH into
MENTAL DISORDERS**

(Maximum £100,000)

Applications are invited from medical and scientific graduates for a Fellowship for research training in the field of mental disorder.

This award, which is tenable for up to 3 years, is intended for clinicians with a training in psychiatry or intending to train in psychiatry, or postdoctoral scientists who wish to conduct clinical research relevant to psychiatry. The research proposal should be relevant to mental health, mental illness or disorders of mental development and the candidate should intend to continue research in this field. The Fellowship may be held in appropriate departments or clinical centres in Great Britain. The Foundation is prepared to consider a request that part of the Fellowship be spent in a suitable centre, or centres, abroad in cases where the necessary research training cannot all be obtained in Great Britain. Prior to making a formal application candidates are welcome to discuss their plans with the Honorary Secretary of the Research Committee.

Candidates should not normally be over 32 years of age for science graduates and 34 years for medical graduates. However, consideration will be given to those over this age where their career has been affected either by a late start or by interruption for personal/family reasons. Applications must be made jointly with the Head of Department in which the candidate proposes to work. Salaries will be in the range of University Lecturer or NHS Registrar/Senior registrar scales (whichever is appropriate) according to age and experience.

**Application forms can be obtained by writing to:-
The Research Administrator
The Mental Health Foundation
37 Mortimer Street
London, W1N 7RJ**

Completed applications must be submitted by 1 September 1994. Shortlisted candidates will be interviewed by the Research Committee in November.

(Late applications will not be considered)

Announcing a major new Journal...

Clinical Psychology & Psychotherapy

An International Journal of Theory & Practice

EDITORS:

PAUL EMMELKAMP, *University of Groningen, The Netherlands* and
MICK POWER, *University of London, UK*

Publishes theoretical, empirical, and review papers that address issues of relevance to practising clinicians and researchers in any area of clinical psychology and psychotherapy, and related disciplines such as psychiatry, social work and counselling.

It is intended that each issue will include:

- *Review Papers* with special emphasis on the implications for clinical practice.
- *Theoretical Papers* that present innovations within existing approaches or that explore areas of integration between different approaches.
- *Research Reports* that are of particular relevance to the practitioner and in which the clinical implications of the research are clearly spelled out.
- *Practitioner Reports* such as case studies that may span different approaches, clinical research that is innovative even though it may not meet strict methodological standards, service planning and organization issues.
- *Special Issues* - one issue per year will be devoted to a topic of current interest and debate.
- *Book Reviews*
- *Calendar of Events*

SUBSCRIPTION DETAILS

Volume 1 (1994) 5 Issues

Institutional Rate: UK £90.00

Personal Rate: UK £40.00

Elsewhere: US\$70.00

(Personal subscriptions are welcomed if paid by personal cheque or credit card)

International Review of Health Psychology

Volume 2

Edited by **STAN MAES**, *Leiden University, The Netherlands*,
HOWARD LEVENTHAL, *Rutgers University, USA* and **MARIE JOHNSTON**,
University of St Andrews, Scotland

- ▶ This annual series provides practitioners, lecturers, graduate students and researchers working in the field of health psychology and related disciplines with a stimulating and useful overview of the field.
 - ▶ Review type chapters covering the following areas of health psychology will be published: general concepts and methodology; health behaviour and health promotion; illness behaviour and health care; practical and professional issues.
- 1-93826 2 246pp Apr 1993 £49.95/\$79.95**

The Psychology of Dementia

EDGAR MILLER, *University of Leicester, UK* and **ROBIN MORRIS**, *University of London, UK*

- ▶ Reviews the present knowledge and discusses the intellectual and cognitive changes that occur as the condition progresses. Practical aspects of assessment and management associated with dementing illnesses are examined. The authors also make clear the impact on the sufferer's family and provide a view of the psychosocial issues surrounding the care of a dementia patient.

EDITION
III

A guide to scientific writing
for students and researchers

ROBERT J. STERNBERG

**The Psychologist's
Companion**

A Guide to Scientific Writing for
Students and Researchers
Third Edition

Robert J. Sternberg

"...[students] will find this book helpful because it contains good advice...[it] can be read with profit by those in fields other than psychology where research is reported in the same format or in a similar one ...lively, informative, and concise."

— Contemporary Psychology

Includes practically everything the reader needs to know to communicate effectively in articles, books, grant proposals, prospectuses, talks, and lectures.

1993 233 pp. 4512-3 X Hardcover \$49.95
45756-4 Paper \$14.95

Measuring Behaviour

An Introductory Guide
Second Edition

Paul Martin and Patrick Bateson

"...clear, concise and always eminently sensible."

— Times Higher Education
Supplement

"...an excellent little book."

— British Psychological Bulletin

This new edition emphasizes techniques of direct observation, recording, and analysis for those about to embark upon behavioral research projects.

1993 238 pp. 44614-7 Paper \$16.95

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Eugene Paykel, Department of Psychiatry, University of Cambridge, Addenbrooke's Hospital, Cambridge CB2 2QQ, UK. Contributors should send three copies of the text, tables and figures. Copies other than the first may be xeroxed. In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references and notes, and consecutively numbered. The following information must be given on the first page (title sheet): (1) title and short title for running head (not more than 60 characters); (2) authors' names, and (3) department in which work was done. A short synopsis of about half an A4 page double-spaced must be provided at the beginning of each article. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the Reference section).

Contributors should note the following:

1. Italic type should be indicated by underlining and bold type by wavy underlining (italic and bold typefaces should not be used even if they are available).
2. S.I. units should be used throughout in text, figures and tables.
3. Authors should spell out in full any abbreviations used in their manuscripts.
4. Foreign quotations and phrases should be followed by a translation.
5. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by *et al.* (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be typed in alphabetical order on a separate sheet. Examples follow:

Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136.

Journal titles should always be given in full.

FIGURES AND TABLES Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These should not be included in the text and should be submitted in a form suitable for direct reproduction (the printed version will normally be reduced to 70 mm wide). Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in arabic numerals. Ensure that the figure number is marked on the back of the photograph or artwork together with the name of the author and paper title. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author indicated on the title page. Corrections other than to printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
