

## S08-02

### THE INTEREST OF AN INTERNATIONAL RESEARCH NETWORK FOCUSING ON EMERGENCY PSYCHIATRY FOR IMPROVING THE QUALITY OF CARE

C. Damsa<sup>1</sup>, C. Lazignac<sup>2</sup>, G. Brousse<sup>3</sup>, E. Adam<sup>4</sup>, P.-M. Llorca<sup>3</sup>

<sup>1</sup>Colorado, Denver, USA, <sup>2</sup>University Hospital of Geneva, Geneva, Switzerland, <sup>3</sup>Clermont Ferrand, Clermont Ferrand, France,

<sup>4</sup>Citadelle Hospital, Liege, Belgium

This communication focus on the critical points about the quality of care in emergency psychiatry: rapid diagnose, management of the psychotherapeutic and pharmacologic treatments effective in emergency. The interest of an international research network in emergency psychiatry is emphasized starting from several clinical experiences (United States, Switzerland, Belgium, France, Luxembourg, Romania).
