

Electron Microscopy Sciences

Since our beginning close to 30 years ago, Electron Microscopy Sciences has been specializing in the manufacturing, preparation, and distribution of only the highest quality chemicals, supplies, and equipment, for microscopy and histology as well as all of its related fields.

Our steady and consistent growth has been based not only on our quality products and prompt friendly service, but also on the trust that our valued customers, have placed in us to give the best value in the market place.

To allow each of our current customers as well as new potential customers the ability to see all we have to offer not only do we continue to publish a printed catalog of over 800 pages but as well we have a complete interactive website that allows for ordering of all of our items. This year we added an Electronic catalog on CD which allows you to search our complete line without the bulkiness of the complete book.

The EMS catalog is the most complete collection of products for light microscopy, histology, and electron microscopy and general biological and materials research. With over 12,000 products in total, this catalog is truly an encyclopedia every lab should have on the shelf.

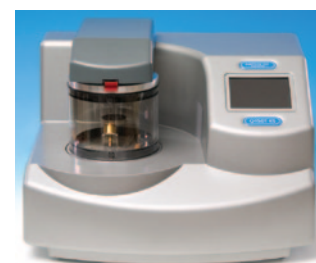

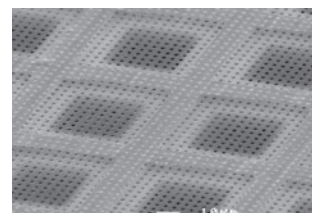

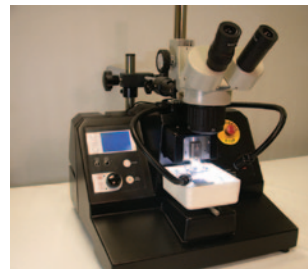

In our newest hardcopy Catalog XV-A, we have added over 500 new products for 2009 that were selected to address your laboratory needs. The product additions include Tough Tag Labels and Cryo-Tags, Cooling Chambers, Dry Ice makers, the all new **Lynx II** tissue processor, Conductive Tabs, ProScopeHR™ handheld digital microscope, MicroMounts™ and MicroMesh™ mounts for crystallography, and MicroTools™ for manipulating tiny samples just to name a few.

In our web site and our electronic catalog you can obtain the most up to date information on the microscopy and histology market, including products for biological sciences, materials science and histology. It should be noted that our main concern has never been just selling. So with this in mind we dedicate a good portion of our web site and electronic CD to helping you, our valued customer. Many helpful items can be accessed such as MSDS's for the majority of our chemicals, technical tips, the newest recently published technical articles, as well as technical data sheets which will assist you in performing your job efficiently.

Because of our commitment to and close contact with the research community at large we feel that our catalog, Electronic CD, and web site should not only be a vehicle for sales but an instrument of reference and assistance. With this in mind all of us here at Electron Microscopy Sciences encourage your suggestions and input into our line. If you have special requests and ideas of what else you would like to access from us, please let us know.

All of the Electron Microscopy Sciences employees are dedicated to providing you with friendly service, quality products, and competitive pricing that you so rightly deserve. This combination of concerned people, quality products, competitive pricing, and the capacity for hard work has earned us our outstanding name as a reputable manufacturer and distributor in the microscopy and histology community.

To place an order by phone or fax, simply have your billing and shipping address available, as well as your purchase order number. If you will be paying by American Express, Visa, MasterCard, or Discover no purchase order number is necessary. You will only need to supply us with your credit card number and corresponding expiration date. Once your order is placed we will ship it to you within 24 hours. That is all that is necessary.
