

You've been asked to see an elderly woman.

Her caregiver says she used to be gentle and kind.

But now she lashes out at everyone.

Her caregiver is stressed.

Her family is distressed.

Now you have a proven

option to help them all.

**Risperdal**  
RISPERIDONE 1 mg/day  
(Range 0.5 to 2 mg/day)

330

Proven management of aggression

RISPERDAL may be useful in severe dementia for the short-term symptomatic management of inappropriate behaviour due to aggression and/or psychosis.

Other behavioural disturbances seen in this patient population as well as disease stage remain unaffected by RISPERDAL treatment.

The most frequent adverse events at RISPERDAL 1 mg/day in patients with severe dementia were somnolence: placebo 8%, RISPERDAL 17%; peripheral edema: placebo 6%, RISPERDAL 13%; EPS: placebo 8%, RISPERDAL 13%.

Caution should be exercised when administering RISPERDAL to patients prone to hypotension and to patients with impaired liver or kidney function.
