

Acta Genetica et Statistica Medica

Editor: M. Hauge, København. **Editorial Board:** L. van Bogaert, Anvers - J. A. Böök, Uppsala - R. Ceppellini, Torino - A. Franceschetti, Genève - J. A. Fraser Roberts, London - J. Mohr, København - H. Nachtshiem, Berlin - J. V. Neel, Ann Arbor, Mich. - R. Turpin, Paris.

Acta Genetica et Statistica Medica appears bimonthly; 1 volume of 6 numbers is issued annually. Subscription price per volume sFr./DM 95.- or US \$ 22.80, including postage.

Contents Vol. 17, No. 4 (1967)

Brandt, N. J. (Copenhagen), Frequency of Heterozygotes for Hereditary Galactosaemia in a Normal Population. - **Kattamis, Ch.** (Athens); **Davies, D.** and **Lehmann, H.** (Cambridge), The Silent Serum Cholinesterase Gene. - **Beckman, L.** (Uppsala); **Bergman, S.** and **Lundgren, E.** (Umeå), Isozyme Variations in Human Cells Grown *in Vitro*. I. Amino Acid Naphthyl Amidase. - **Beckman, L.** and **Wetterberg, L.** (Uppsala), Genetic and Drug - Induced Variations in Serum Naphthylamidase Isozymes. - **Kamal, I.**; **Gabr, M.**; **Mohyeldin, O.** and **Talaat, M.** (Cairo), Frequency of Glucose-6-Phosphate Dehydrogenase Deficiency in Egyptian Infants. - **Heiken, A.** (Stockholm); **Ikin, Elizabeth W.** (London) and **Martensson, L.** (Umea): On the M^k Allele of the MNSs System. - **Vetter, O.** and **Wegner, H.** (Leipzig): A Further Case of Anti-Fy^b and the Frequency of Duffy-Antigens in the Population of the City of Leipzig. - **Beckman, L.** (Uppsala) and **Jóhannsson, E. O.** (Reykjavik), Haptoglobins and Transferrins in the Icelandic Population. - **Leon, N.** (São Paulo) and **Sommers, S. C.** (New York, N. Y.), Cells of the Masculinizing Type in Ovary of a Patient with Feminine Phenotype. - **Singh, S.** (Sydney), Dermatoglyphics in Schizophrenia. - **Wrighton, R. F.** (Birmingham), The Problem of Statistical Inference. II. The Status of the Error-correcting Code Approach Relative to the Shannon Theory. - **Wolansky, N.** and **Charzewska, Jadwiga** (Warsaw), Similarity of Some Anthropological Characteristic of Parents and their Offspring in Different Phases of Ontogenetic Development.

CONTENTS

R. A. NILAN. Nature of induced mutations in higher plants	3
V. S. FEDOROV <i>et al.</i> : Genetics of rye (<i>Secale cereale</i> L.). V. On the inheritance of self-fertility in diploid rye	23
R. G. BUTENKO <i>et al.</i> : The induced organogenesis in a culture of tobacco stem pith callus and the characterization of the plants obtained from the tissue cultures of tobacco varieties	29
M. I. PETRIK. Interspecific hybridization in pea	40
A. PREEATCHENKOO <i>et al.</i> : Valuable mutants in irradiated barley	49
D. S. MARKARIAN. The effect of dieldrin on the mitosis in <i>Crepis capillaris</i> sprouts	55
A. M. MALASHENKO <i>et al.</i> : The induction of dominant lethals in inbred mice by ethylene imine	59
J. L. GLEMBOTZKY <i>et al.</i> : Causes of variegated inheritance for recessive sex-linked lethal mutations in <i>Drosophila melanogaster</i>	68
N. B. KHRISTOLIUBOVA <i>et al.</i> : Unique inheritance of functional chromosome changes in salivary gland cells of <i>Drosophila melanogaster</i>	76
B. P. ZAVERTIAYEV. The variability and heritability of productivity characteristics and their significance for the elaboration of rapid methods of genotypic evaluation of sires	80
YU. E. YEGOROV. The effect of <i>bedlund</i> mutation on the craniological characters in mink (<i>Mustela vison</i> Brisson)	85
A. F. ZAKHAROV <i>et al.</i> : Caryotype shifts in the mixed cultures of aneuploid cells of Chinese hamster	92
V. V. TUGARINOV. Streptomycin-induced pigment mutants of <i>Chlorella vulgaris</i>	101
V. A. MAXIMOVA <i>et al.</i> : The investigation of the mutagenic effects of nitrosomethylurea on <i>Trichothecium roseum</i> Link., a producer of the antibiotic trichothecin	107
E. R. SIGNER <i>et al.</i> : Recombinations between prophages of <i>Escherichia coli</i>	114
N. I. ZHDANOVA <i>et al.</i> : Selection of <i>Micrococcus glutamicus</i> , a glutamic acid producing microorganism and the study of physiological characters of its mutants	122
S. YU. GOLDAT <i>et al.</i> : The effect of different mutagens on the frequency of <i>Actinomyces aureofaciens</i> mutants synthesizing tetracycline derivatives	130
N. S. SAZONOVA <i>et al.</i> : On the problem of testicular dysgenesis (male Turner syndrome)	136
E. K. PYATKIN <i>et al.</i> : A cytogenetic study of the chronic myeloid leukemia	144
L. J. LEVINA <i>et al.</i> : The autoradiographic study of nuclear protein synthesis. II. The evidence supporting the occurrence of nuclear protein synthesis at the different stages of the mitotic cycle in a culture of human lymphocytes	154
M. A. GUBERNIYEV <i>et al.</i> : On the mechanism of induction of intracellular development of bacteriophage Lambda by mutagens of various nature	161
SURVEY OF LITERATURE	171
REPORTS	183
CHRONICLE	187
BIBLIOGRAPHY	196

CONTENTS

V. E. PISAREV, M. D. ZHILKINA. × <i>Triticale</i> (2n=42)	3
A. J. TROFIMOVSKAYA, P. M. ZHUKOVSKY. EMS-induced mutagenesis in winter barley	43
A. F. SHULYNDIN, L. N. NAUMOVA, L. K. KONSTANTINOVA. A study on the protein content and gluten quality of the grain of wheat-rye amphidiploids	30
K. K. SIDOROVA, N. P. KALININA, L. P. UZHINTZEVA. Comparative studies in the radiosensitivity and mutability of different pea varieties treated by γ -rays	37
K. T. SUKHORUKOV, E. J. YEROSHINA. The effect of colchicine on RNA and DNA content in seedlings	46
A. P. DYBAN, L. D. UDALOVA. A study of chromosome aberrations at the early stages of mammalian embryogenesis. I. The experiments with the effect of 2,4-diamino-5-p-chlorophenyl-6-ethyl-pyrimidine (pyrimethamine) on rats	52
D. S. BILEVA. A study of the genetic processes in irradiated populations of <i>Drosophila melanogaster</i> . III. The fecundity and the concentration of lethal mutations	66
G. G. TINIAKOV, E. K. BULOCHNIKOVA. The effect of the introduction of alien serum into the organism on the genotypic response of lymphatic nodes	74
V. M. SENIN, H. E. POGOSIANTZ. On the normal karyotype of golden hamster (<i>Mesocricetus auratus</i>)	81
Z. VAGONIS, C. MESKAUSKAS, A. RAULINAITIS, L. TIMUKAS. The antigenic factors of erythrocytes (blood groups) of cattle and their heritability	89
V. N. SOLOVYOV, R. J. GALANOVA. The two-step development of the resistance to monomycin in the «persistent» cells of <i>Staphylococcus aureus</i>	97
G. D. ZASUKHINA, T. M. BRAGHINA, T. I. JIVANIAN, W. W. CHECKOVA, M. A. FROLOVA. The genetic characterization of the virus complex of the tick-borne encephalitis (TE) with an attenuated pathogenicity for mice	106
V. K. RAVIN, E. I. GOLUB. A study of phage conversion in <i>Escherichia coli</i> . I. The acquisition of resistance to bacteriophage T1 as a result of lysogenization	113
E. N. VORONINA, A. S. POSLOVINA, R. J. SALGANIK. The influence of nitrogen bases on the mutagenic effect of hydroxylamine in <i>E. coli</i> K-12 W	122
V. N. KRYLOV, A. I. STEPANOV, A. A. IVANOV. An efficient method of selection of <i>amber</i> -mutants of the phage T4	126
D. M. GOLDFARB, L. A. ZAMCHUK, A. V. AVDEYEVA, S. V. BLINOVA, N. F. KORENEVSKAYA. The transforming, infective and template activities of the isolated DNA's of phages treated with antibodies and with normal sera	129
J. J. KERKIS, S. I. RAJABLI, T. V. POSPELOVA, L. M. VYSOTZKAYA. On the causes of progressing with age aneuploidy in human leucocytes	137
A. V. N. MIKELSAAR. The mosaicity with respect to the deletion of a part of the long arm of one of the chromosomes of group D (in man)	142
A. V. N. MIKELSAAR, T. A. TALVIK, M. E. SITSKA. A presumable familial B/C translocation in man (a preliminary report)	146
V. I. YOLKIN. On the penetrance of the convulsive readiness in rats	153

CONTENTS

V. E. PISAREV. On the eastward extension of winter wheat	3
V. I. IVANOV, A. V. SANINA, H. A. TIMOFEEVA-RESSOVSKAYA. Studies in the radiation genetics of <i>Arabidopsis thaliana</i> (L.) Heynh. II. Survival and fertility of G. plants after γ -irradiation of dormant seeds	16
T. S. FADEYEVA. Problems of Comparative Plant Genetics. V. The variability of the cell size in different species and experimentally induced polyploids of strawberry	24
P. M. ZHUKOVSKY. Heterosis in plants and phylogenetic male sterility as evolutionary phenomena in nature	33
E. M. AKOPYAN. Effect of different types of ionizing radiations on the initiation of chromosome aberrations in pea. I. Postradiation recovery in pea	45
G. N. WINKLER, G. I. SMYSLOVA. The discovery of a natural auto-antimutagenic system	52
N. P. BOCHKOV, A. G. BULANOV, YU. M. BLOSHANSKY, T. I. LAZAREVA, L. S. MYASNIKOVA, A. A. TALCHUK, G. G. TSERTSVADZE. Population-geographical study of chromosome diseases in man. I. Spontaneous level of sex-chromosome anomalies	57
A. V. N. MIKELSAAR, T. A. TALVIK, M. E. SITSKA. A ring-shaped chromosome (presumably n. 18) and its bearing on the multiple congenital anomalies in man	63
Z. A. JEMILEV. Radiosensitivity of the chromosomes of human peripheral-blood leucocytes at the different stages of the mitotic cycle	67
U. I. FILIPPOV, E. G. RIGMANT. A combination of the triplo-X syndrome and schizophrenia	79
U. J. KERKIS, O. V. SABLINA, S. I. RAJABLI, E. F. BOCHAROV. An investigation of chromosomal abnormalities in the peripheral-blood leucocytes of the patients affected by acute viral hepatitis	85
M. M. TIKHOMIROVA, A. A. JIMELLI, O. J. BELIATZKAYA. Genetical after-effects of X-rays depending on the temperature regime	95
K. V. VATTI, M. M. TIKHOMIROVA. Comparative analysis of spontaneous aneuploidy in males and females of <i>Drosophila</i>	105
M. A. ARSENIJEVA, E. D. BAKULINA, A. V. GOLOVKINA, E. S. LANDER. The effect of tioTEF on the nuclei of bone-marrow cells and on the gonads of mice	111
V. V. DANILEYCHENKO. The infection of lysozyme spheroplasts with the isolated DNA of the phage T7	122
V. N. KRYLOV, S. I. ALIKHANIAN, A. S. MOROZOVA. The circular genetic map of the phage T4B	128
S. E. BRESLER, V. L. KALININ, D. A. PERUMOV. Inactivation and mutagenesis on the isolated DNA. I. Theory of inactivation of transforming DNA	133
U. Z. GHENDON, A. T. MARCHENKO. The effect of conditions of cultivation of the polyomyelitis virus on the frequency of mutations affecting the « guanidine » character	143

CONTENTS

I. A. ZAKHAROV, G. A. Nadson and the modern genetics of micro-organisms (for the centenary of G. A. Nadson's birthday)	3
Y. S. DEMIN, B. N. SIDOROV, N. N. SOKOLOV. The specificity of the action of ionizing radiation on the chromosomes of animals and plants	10
E. M. PROTOPOPOVA, V. V. SHEVCHENKO, M. V. GENERALOVA. The time of the beginning of DNA synthesis in the germinating seeds of <i>Grepis capillaris</i>	19
M. M. TIKHOMIROVA. A comparative study of the radiosensitivity at different stages of oogenesis	24
A. M. MALASHENKO. Methods of estimation of mutation rates in laboratory mice	32
A. G. KASYANENKO, U. E. GHILLER. Some characteristic features of the photosynthetic apparatus of chlorophyll mutants of <i>Arabidopsis thaliana</i> (L.) Heynh	42
V. E. ALTSCHULER, L. L. NIKITINA. The evaluation of the breeding qualities of dairy cows at different levels of the stock productivity	50
S. E. DUBROVA. Studies in the karyotype of peripheral blood, bone marrow and tumour cells in two cases of multiple myeloma following therapeutic irradiation	54
N. V. PANKOVA. On the mechanism of mutagenic action of tio-tep on human chromosomes	62
N. S. STONOVA, T. G. NIKITUSCHKINA. An extra aberrant chromosome as the cause of a spontaneous abortion	70
K. V. ARAGATZUNI. Association of acrocentric chromosomes in 80-86 years-old persons	79
E. S. KALIAYEVA, L. A. MINEYEVA, V. Z. POGOSOV, S. I. ALIKHANIAN. The influence of temperature on the suppression effect of <i>thy</i> -mutants of <i>Escherichia coli</i> K-12	86
A. N. MAISOURIAN, N. D. LOMOVSKAYA. Thymine-dependent mutants of phage T4B	98
