THE BACTERIOLOGY OF DIPHTHERIA

including Sections on the History, Epidemiology and Pathology of the Disease, the Mortality caused by it, the Toxins and Antitoxins and the Serum Disease. By F. LOEFFLER, M.D., LL.D., ARTHUR NEWSHOLME, M.D., F.R.C.P., F. B. MALLORY, M.A., M.D., G. S. GRAHAM-SMITH, M.A., M.D., D.P.H., GEORGE DEAN, M.D., WILLIAM H. PARK, M.D. and CHARLES F. BOLDUAN, M.D.

Edited by

G. H. F. NUTTALL, M.D., PH.D., Sc.D., F.R.S.,

Quick Professor of Biology in the University of Cambridge,

AND G. S. GRAHAM-SMITH, M.A., M.D.,

University Lecturer in Hygiene, Cambridge.

"A complete monograph upon diphtheria, written by those who are able to speak with the greatest authority upon the subjects with which they have been entrusted by the editors....The mere enumeration of the writers is a sufficient guarantee of the excellence of the work, and of the authority which it carries; whilst the articles are written in clear and good English, free, for the most part, from the technical terms which make many treatises on bacteriology difficult and unprofitable to read. The articles are well harmonized, and the teaching in regard to difficult and debatable points is marked by moderation and common sense."

Athenaeum, April 8, 1908.

Royal 8vo. Buckram. pp. xvi+592. Price 18s. net.

IMMUNITY IN INFECTIVE DISEASES

By ÉLIE METCHNIKOFF

Foreign Member of the Royal Society of London, Professor at the Pasteur Institute, Paris

TRANSLATED FROM THE FRENCH

By FRANCIS G. BINNIE

of the Pathological Department, University of Cambridge

With 45 figures in the text.

CONTENTS.

Chap. I. Immunity in unicellular organisms.—II. Immunity in multicellular plants.—III. Preliminary remarks on immunity in the animal kingdom.—IV. Resorption of the formed elements.—V. Resorption of albuminoid fluids.—VI. Natural immunity against pathogenic micro-organisms.—VII. The mechanism of natural immunity against micro-organisms.—VIII. Survey of the facts bearing on acquired immunity against micro-organisms.—IX. The mechanism of acquired immunity against micro-organisms.—X. Rapid and temporary immunity against micro-organisms, conferred by specific and normal serums, or by other substances, or by micro-organisms other than those against which it is desired to protect an animal.—XI. Natural immunity against toxins.—XII. Artificial immunity against toxins.—XIII. Immunity of the skin and mucous membranes.—XIV. Immunity acquired by natural means.—XV. Protective vaccinations.—XVI. Historical sketch of our knowledge of immunity.—XVII. Summary.

LANCET.—"That a translation of Professor Metchnikoff's valuable and fascinating book on Immunity should be made was most desirable, we might almost say indispensable, and those who may have been deterred from studying the original owing to its being in a foreign tongue will be grateful to Mr Binnie for the work which he has done....The book is most interesting reading. ...Study of it is indispensable to all who are specially interested in the subject of Immunity."

Reports on Plague Investigations in India,

issued by the Advisory Committee.

(Charts I—VII.)

(Continued from Volume VII, p. 986.)

	PAGE
XXVI. The part played by insects in the epidemiology of plague. By D. T. Verjbitski, M.D., St Petersburg	162
XXVII. Report on experiments undertaken to discover whether the common domestic animals of India are affected by plague. By W. B. Bannerman and R. J. Kápadia	209
XXVIII. Additional experiments on the septicaemia in human plague, with an account of experiments on the infectivity of the excreta	221
XXIX. Observations on the bionomics of fleas with special reference to <i>Pulex cheopis</i>	236
XXX. The mechanism by means of which the flea clears itself of plague bacilli	260
XXXI. On the seasonal prevalence of plague in India	266
XXXII. On the differential diagnosis of the plague bacillus from certain allied organisms	302

The Journal of Hygiene is issued quarterly. A volume containing about 500 pages, with plates and figures, is issued annually.

Volumes I, II, and III (1901–3) complete. In Four Parts, paper covers, 15s. net per volume. Bound in buckram, 18s. 6d. net per volume.

Volumes IV, V, VI, and VII (1904–7) complete. In Four Parts, paper covers, 21s. net per volume. Bound in buckram, 25s. net per volume.

Papers for publication may be sent to Prof. GEO. H. F. NUTTALL, F.R.S., 3 Cranmer Road, Cambridge, or to the associate Editors. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive fifty copies of their papers free. Additional copies may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £1. 1s. per volume (post-free), payable in advance; single numbers 7s. net. (Plague Numbers, Vol. VI, no. 4, Vol. VII, nos. 3 and 6, Price 6s. net each.) Subscriptions may be sent to any Bookseller, or to MR C. F. CLAY, MANAGER, Cambridge University
