

A History of Corporate Finance

Jonathan Baskin and Paul J. Miranti, Jr.

"Business corporations, once rare, have become the dominant organization of the modern economy. The corporation as we know it owes its existence to a long history of financial innovations—in institutions, markets, and instruments (securities). This is the first in-depth history to tell us how it all happened, from the merchants and bankers of medieval and Renaissance Italy to today's corporate managers and wizards of Wall Street. Students of business, economics, finance, law, and history will learn much from it."

NEW TITLES IN ECONOMICS

THE DEFINING MOMENT

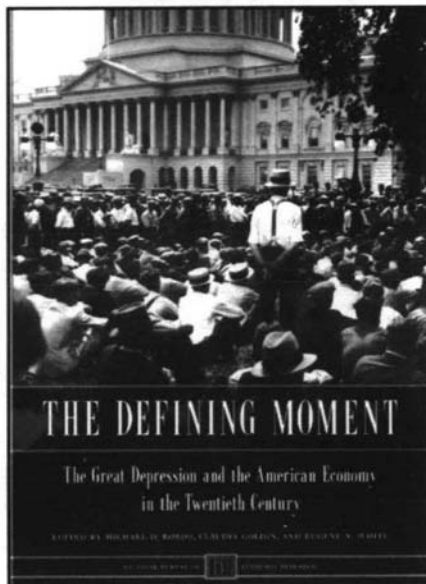

The Great Depression and the American Economy in the Twentieth Century

Edited by Michael D. Bordo, Claudia Goldin, and Eugene N. White

The essays in *The Defining Moment* offer testimony to the Depression's legacy as a "defining moment" in American economics. The large role of today's government and its methods of intervention—from the pursuit of a more active monetary policy to the maintenance and extension of a wide range of insurance for labor and business—derive from the crisis years of the 1930s.

National Bureau of Economic Research Project Report

THE EVOLUTION OF RETIREMENT

An American Economic History, 1880-1990

Dora L. Costa

The Evolution of Retirement is the first comprehensive economic history of retirement in America. With life expectancies steadily increasing, the retirement rate of men over age 64 has risen drastically. Dora L. Costa looks at factors underlying this increase and shows the dramatic implications of her findings for both the general public and the U.S. government.

National Bureau of Economic Research Series on Long-Term Factors in Economic Development

POLITICS AND PROPERTY RIGHTS

The Closing of the Open Range in the Postbellum South

Shawn Everett Kantor

"Kantor uses sophisticated economic and statistical methods to examine an important historical problem that has previously been dealt with in only the most traditional of manners. Kantor's scholarship is sound and original, and his argument is clear and persuasive. The book will be very useful to economic historians, economists, and American historians more generally."—Stanley L. Engerman, coauthor of *Time on the Cross: The Economics of American Negro Slavery*

MACROECONOMIC DYNAMICS

Editor,

WILLIAM A. BARNETT, *Washington University, St. Louis*

Now in its second year, *Macroeconomic Dynamics* publishes theoretical, empirical or quantitative research of the highest standard. Papers are welcomed from all areas of macroeconomics and from all parts of the world. Major advances in macroeconomics without immediate policy applications will also be accepted, if they show potential for application in the future. Occasional book reviews, announcements, conference proceedings and interviews are also published. An electronic version, of the journal will be published simultaneously with the paper version enabling immediate access to the best current research in macroeconomics.

REPRESENTATIVE ARTICLES INCLUDE:

- NEW PROOF OF THE EXISTENCE OF EQUILIBRIUM IN A SINGLE-SECTOR GROWTH MODEL, *Charalambos D. Aliprantis, Kim C. Border, and Owen Burkinshaw*
- MONEY AS A MEDIUM OF EXCHANGE WHEN GOODS VARY BY SUPPLY AND DEMAND, *Xavier Cuadras-Morató and Randall Wright*
- VALUING THE FUTURES-MARKET PERFORMANCE GUARANTEE, *Roger Craine*
- RESOLVING THE LIQUIDITY PUZZLE, *Apostolos Serletis and Victor Chwee*
- TESTING THE CONSUMPTION CAPM WITH HEAVY-TAILED PRICING ERRORS, *Narayana R. Kocherlakota*

Hitler's Economy

Nazi Work Creation Programs, 1933–1936

DAN P. SILVERMAN

How did the Nazis put Germany back to work? Was the recovery genuine? If so, how and why was it so much more successful than that of other industrialized nations? *Hitler's Economy* addresses these questions and contributes to our understanding of the internal dynamics and power structure of the Nazi regime in the early years of the Third Reich. Dan Silverman focuses on Nazi direct work creation programs, utilizing rich archival sources to trace the development and implementation of these programs at the regional and local level. He argues that it was ultimately the workers themselves, toiling under inhumane conditions in labor camps, who paid the price for Germany's economic recovery.

SECURING THE FRUITS OF LABOR

The American Concept of Wealth Distribution, 1765–1900

JAMES L. HUSTON

“A learned and original study that obliges us to reconsider the connections between Revolutionary and nineteenth-century America. Few books force us to think in such broad, basic terms.”—Robert Wiebe, author of *Self Rule: A Cultural History of American Democracy*

\$65.00

This grand excursion into waters of economic history only glimpsed by previous works yields the startling conclusion that attitudes formed during the Revolutionary period remained virtually unchanged until the close of the nineteenth-century.

THE BEST IN ECONOMIC HISTORY

Understanding Decline

Perceptions and Realities of British Economic Performance

Peter Clarke and Clive Trebilcock, Editors

The theme of British economic decline is inescapable in contemporary debates about Britain's economic performance and sense of national identity. This volume includes case studies through which the reality of decline can be explored, while differing perceptions of decline are examined in a number of essays dealing with ideas and policy issues.

English Merchants in Seventeenth-Century Italy

Gigliola Pagano de Divitiis

This book shows how England's conquest of Mediterranean trade proved to be the first step in building her future economic and commercial hegemony, and how Italy lay at the heart of that process. The author demonstrates some of the causes of Italy's decline and its subsequent relegation as a dominant force in world trade.

Commerce and Economic Change in West Africa

The Palm Oil Trade in the Nineteenth Century

Martin Lynn

A key theme in the West African trading system of the nineteenth century is the transition from the slave trade to "legitimate" commerce, and its significance for the African societies of the region. In this period of transition, trade in palm oil was at the core of relations between Britain and West Africa in the nineteenth century, and of immense importance to the economies of large parts of West Africa.

The Brandy Trade under the Ancien Régime

Regional Specialisation in the Charente

L.M. Cullen

This study of the brandy trade explores the origins, production and marketing of brandy from the Cognac region in the seventeenth and eighteenth centuries. Professor Cullen shows that the brandy trade was based on a sophisticated regional economy, which, by 1720, had become a key component of French involvement in the modern international trading system.

The Rise and Fall of the Plantation Complex

Essays in Atlantic History

Second Edition

Philip D. Curtin

Over a period of several centuries, Europeans developed an intricate system of plantation agriculture overseas that was quite different from the agricultural system used at home. Though the plantation complex centered on the American tropics, its influence was much wider. Much more than an economic order for the Americas, the plantation complex had an important place in world history.
