Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, One Liberty Plaza, Floor 20, New York, NY 10006, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK (for U.K. and elsewhere).

2018 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623) is

published bimonthly in February, April, June, August, October, and December by Cambridge University Press, One Liberty Plaza, Floor 20, New York, NY 10006; Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK. Annual institutional subscription rates for Volume 34 (2018): Institutions online only US \$593.00, and online only UK and elsewhere £341.00. Individuals online only US \$343.00, and online only UK and elsewhere £193.00. Single part: US \$114.00 in the U.S.A., Canada and Mexico; UK £65.00 and elsewhere. Online only for all institutions. Print editions ceased in 2014. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

CONTENTS

Policies

- 224** Defining innovation with respect to new medicines: A systematic review from a payer perspective
Oriol de Solà-Morales, David Cunningham, Mathias Flume, Paul M. Overton, Natalie Shalet and Stefano Capri
- 241** Health technology assessment for decision making in Latin America: Good practice principles
Andrés Pichon-Riviere, Natalie C. Soto, Federico Ariel Augustovski, Sebastián García Martí and Laura Sampietro-Colom
- 248** Stakeholder involvement in the health technology assessment process in Latin America
Andres Pichon-Riviere, Natalie Soto, Federico Augustovski and Laura Sampietro-Colom
- 254** How can health systems prepare for new and emerging health technologies? The role of horizon scanning revisited
Wija Oortwijn, Laura Sampietro-Colom, Fay Habens and Rebecca Trowman
- 260** Historical development of the HTAsiaLink Network and its key determinants of success
Yot Teerawattananon, Karlena Luz, Chalarntorn Yothasmutra, Raoh-Fang Pwu, Jeonghoon Ahn, Asrul Akmal Shafie, Kalipso Chalkidou, Sripen Tantivess, Benjarin Santatiwongchai, Waranya Rattanavipapong and Saudamini Dabak

Methods

- 267** Patient priorities for treatment attributes in adjunctive drug therapy of severe hypercholesterolemia in Germany: An analytic hierarchy process
Axel C. Mühlbacher, Anika Kaczynski, Franz-Werner Dippel and Susanne Bethge
- 276** Health technology assessment methods guidelines for medical devices: How can we address the gaps? The International Federation of Medical and Biological Engineering perspective
Julie Polisena, Rossana Castaldo, Oriana Ciani, Carlo Federici, Simone Borsci, Matteo Ritrovato, Daniel Clark and Leandro Pecchia
- 290** Development of the Ontario decision framework: A values based framework for health technology assessment
Murray Krahn, Fiona Miller, Ahmed Bayoumi, Ann-Sylvia Brooker, Frank Wagner, Shawn Winsor, Mita Giacomini, Ron Goeree, Holger Schünemann, Gabrielle van der Velde, Stephen Petersen, Nancy Sikich and Irfan Dhalla
- 300** Challenges and methodologies in using progression free survival as a surrogate for overall survival in Oncology
Karla Hernandez-Villafuerte, Alastair Fischer and Nicholas Latimer
- 317** Environmental impact assessment of a health technology: A scoping review
Julie Polisena, Gino De Angelis, David Kaunelis and Iñaki Gutierrez-Ibarluzea

Assessments

- 327** The gap between economic evaluations and clinical practice: A systematic review of economic evaluations on dabigatran for atrial fibrillation
Herbert J.A. Rolden, Gert Jan van der Wilt, Angela H.E.M. Maas and Janneke P.C. Grutters
- 337** Performance of smartphone-based digital images for cervical cancer screening in a low-resource context
Phuong Lien Tran, Caroline Benski, Manuela Viviano, Patrick Petignat, Christophe Combescure, Jerome Jinoro, Josea Lea Herinianasolo and Pierre Vassilakos
- 343** Comparative effectiveness and safety between amphotericin B lipid-formulations: A systematic review
Luiza Raquel Grazziotin, Leila Beltrami Moreira and Maria Angelica Pires Ferreira
