

THE QUARTERLY JOURNAL OF
MATHEMATICS

OXFORD SECOND SERIES

Edited by T. W. CHAUDY, U. S. HASLAM-JONES, E. C. THOMPSON

VOLUME 12

No. 46

JUNE 1961

CONTENTS

- A. J. White:** On quasi-Cesàro summability
A. J. White: On Cesàro and quasi-Cesàro summability of Fourier series
I. J. Good: Analysis of cumulative sums by multiple contour integration
R. A. Smith: Asymptotic stability of $x'' + a(t)x' + x = 0$
E. M. Patterson: On regular automorphisms of certain classes of rings
R. Bhatia and T. W. Chaundy: Kummer's principle
R. Wilson: The behaviour of a function near an isolated essential point and that of its coefficient function near infinity
J. B. McLeod: The determination of the transmission coefficient
W. D. Barcus: A note on free modules over the Steenrod algebra

Quarterly Journal of Mathematics (Oxford Second Series) is published in March, June, September and December at 16s. net for a single number with an annual subscription (for four numbers) of 55s. post free. Orders may be placed with any bookseller or sent direct to the Publisher. One specimen copy will be sent free on request.

OXFORD UNIVERSITY PRESS
 AMEN HOUSE, WARWICK SQUARE, LONDON, E. C. 4.

PROCEEDINGS

OF THE

EDINBURGH MATHEMATICAL SOCIETY

VOLUME 12 (Series 2)

June 1961

PART 3

- C. C. BARTLETT AND B. NOBLE:** A Derivation of Certain Variational Principles for Mixed Boundary Value Problems in Potential Theory.
B. NOBLE AND S. PETERS: A Multiplying Factor Method for the Solution of Wiener-Hopf Equations.
C. ST. J. A. NASH-WILLIAMS: Decomposition of the n -Dimensional Lattice-Graph into Hamiltonian Lines.
L. CARLITZ: Some Finite Analogues of the Poisson Summation Formula.
R. A. RANKIN: A Cyclic Inequality.
D. J. SIMMS: The Spectral Sequence of a Covering.
 BOOK REVIEWS

Series I of the PROCEEDINGS consists of forty-four volumes published from 1886 to 1926.
 Series II consists of eleven complete volumes to date.

The PROCEEDINGS are published in parts and issued twice yearly. Four parts complete a volume of approximately 200 pages and the Title Pages and Index are published in part 4 of each volume.

The prepaid subscription per volume is 60s. (U.S.A. and CANADA \$10.00) post free. Single parts 15s. (U.S.A. and CANADA \$2.50) net. Orders, and requests for prices of in-print back numbers, should be addressed to Oliver and Boyd Ltd., Tweeddale Court, 14, High Street, Edinburgh, 1.

Mathematical Tables

John B. Clark, C.B.E., M.A., LL.D.

Revised by A. C. Aitken, M.A., D.Sc., F.R.S.

CONTENTS: Logarithms . . . Antilogarithms . . . Natural sines, cosines and tangents . . . Logarithmic sines, cosines and tangents . . . Natural secants, cosecants and cotangents . . . Circular or radian measure . . . Squares, cubes, square roots, cube roots and reciprocals . . . Reciprocals of four figure numbers . . . Natural logarithms . . . Exponential and hyperbolic functions. . . . **Price 9d.**

Physical and Mathematical Tables

John B. Clark, C.B.E., M.A., LL.D.

Revised by A. C. Aitken, M.A., D.Sc., F.R.S.

and R. D. Connor, B.Sc., Ph.D.

CONTENTS: For *Mathematical Section* see entry under *Mathematical Tables*.

Physical Section: Mechanical, magnetic and electrical units and definitions (a) metric, (b) British, (c) MKS . . . Heat units and definitions . . . Photometric and optical units and definitions . . . Acoustical units and definitions . . . Properties of elements, solids, liquids, gases . . . Mechanical data . . . Astronomical data . . . Terrestrial and geodetic data . . . The periodic table . . . Atomic weights, physical and chemical scales . . . Atomic and molecular constants . . . Energy equivalents . . . Radioactivity . . . Table of isotopes and relative abundance of elements . . . The particles of modern physics. **Price 1s. 3d.**

OLIVER & BOYD

Infinitistic Methods

PROCEEDINGS OF THE SYMPOSIUM ON FOUNDATIONS OF MATHEMATICS

This volume is concerned generally with infinitistic methods in the foundations of mathematics. At the symposium were discussed works which use mathematical tools, commonly thought of as non-constructive, for example— inaccessible cardinals, infinitistic rules of proof, higher classes of number-theoretic and function-theoretic hierarchies of predicates, &c. £5 net (\$15.00)

Tables of Weber Functions. Volume I

I. Ye KIREYEVA and K. A. KARPOV
Computing Centre of the U.S.S.R. Academy of Sciences

Contains tables of Weber functions of a parabolic cylinder which are the solutions of two equations occurring in quantum mechanics, radiophysics, aerodynamics, hydrodynamics and other fields. £7 net (\$20.00)

PERGAMON BOOKS

Tables for the Distribution and Density Functions of t-Distribution ("Students" Distribution)

N. V. SMIRNOV, Academy of Sciences, U.S.S.R.

These tables may be used for the solution of various statistical problems in which it becomes necessary to use tests similar to the *t*-test. 80s. net (\$12.50)

Equations of the Mixed Type

A. BITSADZE
Edited by I. N. SNEDDON Simson Professor of Mathematics, University of Glasgow

This is a good introduction to the study of partial differential equations of the mixed type. It covers the classical theory of these equations and brings the subject completely up to date. Approx. 63s.

The Theory of Measure and Lebesgue Integration

S. HARTMAN and J. MIKUSIŃSKI, University of Warsaw
Edited by I. N. SNEDDON, Simson Professor of Mathematics, University of Glasgow

This is a brief text on the theory of measure and Lebesgue integration containing material which constitutes a good introduction to the theory of real functions. Approx. 35s.

*Pergamon Press has in preparation over 50 new mathematics titles.
Please send for descriptive literature on these and many other published books.*

PERGAMON PRESS *Oxford London New York Paris*

HEADINGTON HILL HALL, OXFORD

4 & 5 Fitzroy Square, London, W.1

122 East 55th Street, New York 22, N.Y.

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give **complete coverage of published papers in the field of statistical theory** (including associated aspects of probability and other mathematical methods) and **new published contributions to statistical method**.

There are approximately two hundred and fifty journals published in various parts of the world which are wholly or partly devoted to the field of statistical theory and method and which are brought within the scope of this journal of abstracts.

In addition to the vast array of journal literature, abstracts of the special collections of papers as published in reports of conferences symposia and seminars, together with the published reports of experiment and other research stations, are also included.

The abstracts are about **400** words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. **The journal is published quarterly and contains approximately 1000 abstracts per year.**

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. **A unique aspect of this journal** is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. and Canada \$16.00)

Single Number 30s. (U.S.A. and Canada \$4.50)

Tweeddale Court, 14 High Street, Edinburgh, 1

Fourier Transforms

R. R. GOLDBERG

A clear exposition of the elementary theory of Fourier transforms on a locally compact group. A knowledge of Lebesgue and Riemann-Stieltjes integration is assumed; the results needed are all stated in the introductory chapter. *Cambridge Tracts in Mathematics*, 52. 21s. net

Homology Theory

P. J. HILTON & S. WYLIE

An introduction to algebraic topology as it is practised to-day, for final year honours students, postgraduate courses and mathematicians working in other fields who want some knowledge of the subject. The authors' treatment leads from elementary to sophisticated ideas and no previous knowledge of homology theory is assumed. 75s. net

Numerical Methods of Curve Fitting

P. G. GUEST

A comprehensive account bringing together many treatments hitherto published only in original papers. Each method is illustrated by a numerical example and full derivations are given of the formulae used. 80s. net

Cambridge Students' Editions

Recent additions to this series of paperback textbooks, available at much reduced prices:

- M. J. LIGHTHILL: *Introduction to Fourier Analysis and Generalized Functions.* 10s. 6d. net
- H. S. M. COXETER: *The Real Projective Plane.* 18s. 6d. net
- M. S. BARTLETT: *Stochastic Processes.* 22s. 6d. net
- SIR ARTHUR EDDINGTON: *Mathematical Theory of Relativity* 16s. net
- R. A. FRAZER, W. J. DUNCAN & A. R. COLLAR: *Elementary Matrices.* 17s. 6d. net
- SIR JAMES JEANS: *Mathematical Theory of Electricity and Magnetism.* 25s. net
- S. CHAPMAN & T. G. COWLING: *Mathematical Theory of Non-Uniform Gases.* 17s. 6d. net

CAMBRIDGE UNIVERSITY PRESS

UNIVERSITY MATHEMATICAL TEXTS

General Editors

ALEXANDER C. AITKEN, D.SC., F.R.S., DANIEL E. RUTHERFORD, D.SC., DR. MATH.

The series provides compact and inexpensive text-books on standard topics of mathematics, the aim being to carry the reader from an elementary or intermediate grade up to an honours grade in each subject.

<i>Determinants and Matrices</i>	PROF. A. C. AITKEN, D.SC., F.R.S.	7/6
<i>Statistical Mathematics</i>	PROF. A. C. AITKEN, D.SC., F.R.S.	7/6
<i>Theory of Ordinary Differential Equations</i>	J. C. BURKILL, SC.D., F.R.S.	8/6
<i>Waves</i>	PROF. C. A. COULSON, D.SC., F.R.S.	7/6
<i>Electricity</i>	PROF. C. A. COULSON, D.SC., F.R.S.	10/6
<i>Projective Geometry</i>	T. E. FAULKNER, PH.D.	7/6
<i>Integration</i>	R. P. GILLESPIE, PH.D.	7/6
<i>Partial Differentiation</i>	R. P. GILLESPIE, PH.D.	7/6
<i>Infinite Series</i>	PROF. J. M. HYSLOP, D.SC.	7/6
<i>Real Variable</i>	PROF. J. M. HYSLOP, D.SC.	8/6
<i>Integration of Ordinary Differential Equations</i>	E. L. INCE, D.SC.	7/6
<i>Introduction to the Theory of Finite Groups</i>	W. LEDERMANN, PH.D., D.SC.	8/6
<i>Analytical Geometry of Three Dimensions</i>	PROF. W. H. MCCREA, PH.D., B.SC.	7/6
<i>A German-English Mathematical Vocabulary</i>	S. MACINTYRE, M.A., PH.D. AND E. WITTE	8/6
<i>Topology</i>	E. M. PATTERSON, PH.D.	8/6
<i>Functions of a Complex Variable</i>	E. G. PHILLIPS, M.A., M.SC.	7/6
<i>Special Relativity</i>	W. RINDLER, PH.D.	10/6
<i>Volume and Integral</i>	PROF. W. W. ROGOSINSKI, DR. PHIL., F.R.S.	10/6
<i>Vector Methods</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	7/6
<i>Classical Mechanics</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	10/6
<i>Fluid Dynamics</i>	D. E. RUTHERFORD, D.SC., DR. MATH.	10/6
<i>Special Functions of Mathematical Physics and Chemistry</i>	PROF. I. N. SNEDDON, M.A., D.SC.	10/6
<i>Tensor Calculus</i>	BARRY SPAIN, B.A., M.SC., PH.D.	8/6
<i>Theory of Equations</i>	PROF. H. W. TURNBULL, F.R.S.	7/6
