

ARE YOU STILL READING SOMEONE ELSE'S COPY OF ISIS?

IF SO, now is the time to enter your own subscription. *Isis*, the official journal of the History of Science Society, is the leading journal in the field.

Isis keeps over 3300 subscribers in nearly fifty countries up to date on all developments in the history of science with articles, critiques, documents and translations. Along with these, its notes and correspondence and news of the profession provide useful information to professionals, educators, scholars and graduate students.

Lively essay reviews and over 200 book reviews a year cover every specialty in the history of science, technology and medicine.

In addition to your four quarterly issues of *Isis* you will also receive:

- Membership in the History of Science Society.
- The annual *Critical Bibliography* listing over 3500 publications in the history of science, technology and medicine from the preceding year.
- The *Triennial Guide* containing directories of members and scholarly programs and information on 90 journals in the field.
- The quarterly *Newsletter* providing current news of the profession, including employment opportunities and approaching meetings.

NAME

ADDRESS

The British Society for the History of Science

LIKE the discipline which it represents, the British Society for the History of Science has grown considerably since its foundation in 1947. The object of the Society is to further the discipline in all possible ways, particularly by holding meetings for the reading and discussion of papers, and by publication of relevant material. The Society offers a forum for all who have an interest in the history of science; although it is based in Britain, its membership is international. It welcomes applications for membership from students as well as established scholars, and from non-specialists as well as professional historians of Science.

Membership of the Society, which includes a subscription to *The British journal for the history of science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting (formalities required by the UK Companies Act). The annual subscription is £11.00 (US \$28.00 in the Americas, Canada, and Japan) or, for students, £4.00 (\$11.00).

Applications for membership should be made on a form which is available from the Society's Administrator at the address below.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, the only fixture being the three-day summer meeting, held at a different British University or polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly-defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The *British journal for the history of science* is the official organ of the Society. It is published three times a year, in March, July, and November, and the three parts constitute a volume. Articles and reviews range over all aspects of the history of science, and many are interdisciplinary in character, encompassing social and economic history, the philosophy and sociology of science, the history of technology, and the relations between science and theology. Contributions from members and non-members are welcomed alike.

Editorial matters: papers for inclusion in the *Journal* should be submitted to the Editor-elect, Dr David M. Knight, Department of Philosophy, University of Durham, 50 Old Elvet, Durham DH1 3HN, England, from whom instructions may be obtained concerning the presentation and documentation of papers. All correspondence on the contents of the *Journal* should be addressed to the Editor.

Books for review should be sent to the Reviews Editor, Dr John R. Durant, Department of Extra-Mural Studies, University College of Swansea, 6 Uplands Terrace, Swansea SA2 0GU, West Glamorgan, South Wales.

Advertising: Particulars about advertising in the *Journal* may be obtained from the Society's Administrator.

Orders and back issues: orders for the *Journal* and inquiries about back issues should be addressed to the Administrator. Claims for missing copies should be made within six months of publication. The annual subscription for non-members is £18.00 (\$50.00).

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr Roger Smith, Department of History, University of Lancaster, Bailrigg, Lancaster LA1 4YG, England. Monographs are available to members at a discount of 25%, post-free from the Society's Administrator. Non-members may obtain them through bookshops, or post-free from the Administrator. Now available:

1. *Images of the earth: essays in the history of the environmental sciences.* Ed. by L. J. Jordanova and R. Porter. 1979. £5.95 (£4.40 to members).
2. *The letters of Georges Cuvier: a summary calendar.* Ed. by Dorinda Outram. 1980. £3.90 (£2.90 to members).

List of theses: Every December, the Society publishes a full list of current theses in history of science in British universities. This is available free to members, and at a small charge to non-members on request to the Administrator. Standing orders are accepted from members or non-members who wish to receive the list regularly.

All the administrative business of the Society is handled by The Administrator, The British Society for the History of Science, Halfpenny Furze, Mill Lane, Chalfont St Giles, Bucks HP8 4NR, England.
