CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1963–1964

President: E. N. WILLMER
Vice-Presidents: E. J. H. CORNER, F. P. WHITE, M. RYLE
Treasurer: R. C. EVANS
Secretaries: (Mathematical) T. G. MURPHY
(Physical) A. D. YOFFE
(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W. 1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 510 North Avenue, New Rochelle, N.Y., U.S.A.

For the purchase of early parts of the *Transactions*, *Proceedings* and *Biological Reviews* application should be made to the Secretaries. All parts of the *Proceedings* (including the cumulative index to Vols. 1 to 50) and *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address, and to send their subscriptions to the Treasurer, CAMBRIDGE PHILOSOPHICAL SOCIETY, FREE SCHOOL LANE, CAMBRIDGE.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Secretaries at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

T. G. MURPHY

in consultation with

J. W. S. CASSELS	J. F. C. KINGMAN	F. SMITHIES
P. C. CLEMMOW	D. W. S. SCIAMA	C. T. C. WALL

1. Four parts of the *Proceedings* are issued each year.

2. Communications for the *Proceedings* should be sent to *The Librarian, Cambridge Philosophical Society, Free School Lane, Cambridge.* Papers by Fellows and Associates of the Society should be communicated directly by the author. **Other papers must be communicated by a Fellow,** who in doing so should give his opinion on the suitability of the paper for publication.

3. Papers occupying more than twenty pages of print can only rarely be accepted.

4. It is recommended that each paper be prefaced by a short abstract. Copies of a *Guide for the Preparation of Synopses*, prepared by the Abstracting Services Consultative Committee and issued by the Royal Society, may be obtained from the Librarian.

5. Drawings for illustration and diagrams should be on a large scale and on smooth white Bristol board in Indian ink. Lettering should be written clear of the diagram, and the desired position of the lettering indicated by pencilled lines.

6. References should be listed at the end of each paper. Titles of journals listed in *Mathematical Reviews* should be abbreviated as in *Mathematical Reviews*, except that proper names should be given in full. First and last page numbers should be given where relevant.

7. **Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. A pamphlet on the preparation of papers may be obtained from the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.**

8. Authors may receive, on request, free offprints of *Proceedings* papers (fifty for a sole author, and a smaller number for each joint author).

ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in two series: SERIES A (GENERAL), four issues a year, annual subscription post free £5. 4*s*. (U.S. $15.00), price each part 30*s*.; SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free £4. 2*s*. (U.S. $12.00), price each part 35*s*.

Contents of Series B (Methodological), Vol. 26, Part 2, 1964

Bayesian tolerance regions. By J. AITCHISON.

Relationships between Bayesian and confidence limits for predictions. By A. R. THATCHER

Discussion on the two papers.

An analysis of transformations. (With Discussion.) By G. E. P. BOX and D. R. COX.

On local inference and information. By D. A. S. FRASER.

The linear hypothesis and indempotent matrices. By G. A. F. SEBER.

Note on interval estimation in non-linear regression when responses are correlated. By MAX HALPERIN.

A note on the Bartlett decomposition of a Wishart matrix. By D. G. KABE.

Comments on a posterior distribution of Geisser and Cornfield. By M. STONE.

On the Bayesian estimation of multivariate regression. By GEORGE C. TIAO and ARNOLD ZELLNER.

Characterization theorems for some univariate probability distributions. By G. P. PATIL and V. SESHADRI.

On the power of two-sample rank tests on the equality of two distribution functions. By JEAN D. GIBBONS.

A proposed two-sample rank test: the Psi test and its properties. By JEAN D. GIBBONS.

The detection of partial association. I. The 2×2 case. By M. W. BIRCH.

Some properties of counts of events for certain types of point process. By T. LEWIS and L. J. GOVIER.

A note on the solution of dam equations. By E. H. LLOYD and S. ODOOM.

A model for rainfall occurrence. By J. R. GREEN.

Spectral analysis in the presence of variance fluctuations. By L. J. HERBST.

Stationary amplitude fluctuations in a random series. By L. J. HERBST.

Corrigenda: Congestion systems with incomplete service. By F. DOWNTON.

Obtainable through any bookseller or direct from:

PROCEEDINGS
OF THE INSTITUTION OF ELECTRICAL ENGINEERS

The Proceedings of the Institution present, in the form of papers and discussions, a comprehensive record of advances in electrical science and technology, covering the whole field from electrical power engineering to electronics, together with allied developments.

The *Proceedings* is published monthly. Individual copies cost £1. The annual subscription is £10.

Copies can be obtained on application to the Secretary (Publications Department).

THE INSTITUTION OF ELECTRICAL ENGINEERS
SAVOY PLACE, LONDON W.C.2

THE JOURNAL OF THE SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

VOLUME 12, NUMBER 1, MARCH 1964

A Solution of Laplace's Equation for a Round Hole in a Square Peg. R. W. HOCKNEY.
An Integral Equation Involving Legendre Functions. A. ERDELYI.
On Linear Programs Equivalent to the Transportation Program. I. HELLER.
Fundamental Inequalities for Discrete and Discontinuous Functional Equations. G. STEPHEN JONES.
On the Stability of Certain Second Order Differential Equations. HARRY HOCHSTADT.
On Certain Systems of Nonlinear Differential Equations. EUGENE J. PUTZER.
Some Algorithms for Minimizing a Function of Several Variables. B. V. SHAH, R. J. BUEHLER and O. KEMPTHORNE.
A Rational Fraction Approximation Formula for exp $[-(sD)^{\frac{1}{2}}]$ with Applications. DONALD A. PIERRE.
Some Mean Value Theorems in Elastostatics. J. H. BRAMBLE and L. E. PAYNE.
The Linear Generation of the Legendre Sequence. RICHARD J. TURYN.
A Comparison of the Sampling Theorems of Kramer and Whittaker. L. L. CAMPBELL.
Optimal Assignments of Numbers to Vertices. L. H. HARPER.
Temperature Distribution on Conducting Cylindrical Shells Including the Effects of Thermal Radiation. MAX A. HEASLET and FRANKLYN B. FULLER.
Minimum and Basic Solutions to Singular Linear Systems. J. B. ROSEN.
Bounds for the Solution of the Sturm–Liouville Problem with Application to Finite Difference Methods. A. K. AZIZ and B. E. HUBBARD.
An Inventory Model with an Optional Time Lag. MARCEL F. NEUTS.
Optimization and Recursion. I. FLEISCHER and A. KOOHARIAN.
Difference Approximations for Inhomogeneous and Quasi-Linear Equations. ROBERT J. THOMPSON.
Error Bounds for Asymptotic Expansions in Turning-Point Problems. F. W. J. OLVER.
A Combinatorial Algorithm for Linear Programs in the General Mixed Form. R. T. ROCKAFELLAR.
On the Optimization of Multistage Feedback Processes. LIANG-TSENG FAN and CHIU-SEN WANG.
The Numerical Solution of the Dirichlet Program for Laplace's Equation by Linear Programming. J. R. CANNON.
A Method for Determining Eigenvalues. HENRY F. KAISER.

The Journal is published quarterly. Subscriptions are $14.00 per volume
Orders should be placed with the
SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS
Box 7541, Philadelphia 1, Pennsylvania, U.S.A.
