Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at Cambridge University Press for further details (email: kchristomanou@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 12 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 16, 2013 (12 issues):
Internet/print package: £886/\$1700 Americas only/€1420 EU only
Internet only: £675/\$1280 Americas only/€1420 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, including references.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system (eJournalPress). All manuscripts must be submitted online at <http://phn.msubmit.net/>. If any difficulties are encountered, please contact the Publications Office at phn@nutsoc.org.uk

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

Are dietary guidelines sensible to consumers?
C Pérez-Rodrigo and M Tseng 761

Invited commentary

The use of protein:energy ratios for defining protein requirements, allowances and dietary protein contents
DJ Millward 763

HOT TOPIC – Dietary guidelines

Consumer involvement in dietary guideline development: opinions from European stakeholders
KA Brown, M Hermoso, L Timotijević, J Barnett, ITL Lillegaard, I Rehůřková, A Larrañaga, A Lončarević-Srmić, LF Andersen, J Ruprich, L Fernández-Celemín and MM Raats 769

Dietary composition and nutrient content of the New Nordic Diet
C Mithril, LO Dragsted, C Meyer, I Tetens, A Biltoft-Jensen and A Astrup 777

A diet following Finnish nutrition recommendations does not contribute to the current epidemic of obesity
N Kanerva, NE Kaartinen, M-L Ovaskainen, H Konttinen, J Kontto and S Männistö 786

Designing the *eatwell week*: the application of eatwell plate advice to weekly food intake
WS Leslie, F Comrie, MEJ Lean and CR Hankey 795

Meeting recommended dietary intakes in meal plans with ≥4 servings of grain-based foods daily
Y Probst and L Tapsell 803

Adopting and implementing nutrition guidelines in recreational facilities: tensions between public health and corporate profitability
DL Olstad, KD Raine and LJ McCargar 815

Monitoring and surveillance

Micronutrient intake and status in Central and Eastern Europe compared with other European countries, results from the EURRECA network
R Novaković, AEJM Cavelaars, GE Bekkering, B Roman-Viñas, J Ngo, M Gurinović, M Glibetić, M Nikolić, M Golesorkhi, MW Medina, Z Šatalić, A Geelen, LS Majem, P van't Veer and LCPGM de Groot 824

Is dieting behaviour decreasing in young adolescents?
CR Whittle, JWG Yarnell, M Stevenson, N McCay, BP Gaffney, MD Shields and JV Woodside 841

Assessment and methodology

Dietary patterns in Irish adolescents: a comparison of cluster and principal component analyses
ÁP Hearty and MJ Gibney 848

Assessment of the PROBIT approach for estimating the prevalence of global, moderate and severe acute malnutrition from population surveys
NM Dale, M Myatt, C Prudhon and A Briend 858

Epidemiology

Socio-economic differences in adolescents' breakfast eating, fruit and vegetable consumption and physical activity in Ghana
D Doku, L Koivusilta, S Raisamo and A Rimpelä 864

Socio-economic disparities in the consumption of vegetables, fruit and energy-dense foods: the role of motive priorities
H Konttinen, S Sarlio-Lähteenkorva, K Silventoinen, S Männistö and A Haukkala 873

Shared meals among young adults are associated with better diet quality and predicted by family meal patterns during adolescence
N Larson, J Fulkerson, M Story and D Neumark-Sztainer 883

A comparison of the cost of generic and branded food products in Australian supermarkets
K Chapman, C Innes-Hughes, D Goldsbury, B Kelly, A Bauman and M Allman-Farinelli 894

Nutrition and health

Impact of folic acid fortification of flour on neural tube defects: a systematic review
C Castillo-Lancellotti, JA Tur and R Uauy 901

Modelling fortification of corn masa flour with folic acid and the potential impact on Mexican-American women with lower acculturation
HC Hamner, SC Tinker, AL Flores, J Mulinare, AP Weakland and NF Dowling 912

Monosodium glutamate is not associated with overweight in Vietnamese adults
VT Thu Hien, N Thi Lam, N Cong Khan, A Wakita and S Yamamoto 922

The role of number of meals, coffee intake, salt and type of cookware on colorectal cancer development in the context of the Mediterranean diet
N Kontou, T Psaltopoulou, N Soupos, E Polychronopoulos, A Linos, D Xinopoulos and DB Panagiotakos 928

Interventions

Using rewards-based incentives to increase purchase of fruit and vegetables in lower-income households: design and start-up of a randomized trial
EJ Phipps, SL Wallace, SD Stites, N Uplinger, S Brook Singletary, L Hunt, S Axelrod, K Glanz and LE Braitman 936

Rewards can be used effectively with repeated exposure to increase liking of vegetables in 4–6-year-old children
N Corsini, A Slater, A Harrison, L Cooke and DN Cox 942
