

Journal of Time Series Analysis

A journal sponsored by the Bernoulli Society for Mathematical Statistics and Probability

Edited by M. B. Priestley

During the last 25 years Time Series Analysis has become one of the most important and widely used branches of Mathematical Statistics. Its fields of application range from neurophysiology to astrophysics and it covers such well-known areas as economic forecasting, study of biological data, control systems, signal processing and communications and vibrations engineering. The *Journal of Time Series Analysis* was started in 1980 and has since become the leading journal in its field, publishing papers on both fundamental theory and applications.

Recent and forthcoming highlights:

Bayesian inference for time series with stable innovations, *Z Qiou and N Ravishanker*
 Dickey-Fuller, lagrange multiplier and combined tests for a unit root in autoregressive time series, *K Oya and H Y Toda*

An improvement of Akaike's FPE criterion to reduce its variability, *X de Luna*

A k-factor GARMA long-memory model, *W A Woodward, Q C Cheng and H L Gray*

Tests for deterministic versus indeterministic cycles, *A Harvey and M Streibel*

Unit root tests based on unconditional maximum likelihood estimation for the autoregressive moving average, *D W Shin and W A Fuller*

Journal of Time Series Analysis ISSN 0143-9782 Published in January, March, May, July, September and November

Subscription Rates, Vol. 20/1999:

Institutions: Europe £316, N. America \$578, Rest of World £349.

Personal: Europe £62, N. America \$134, Rest of World £81.

Students: Europe £32, N. America \$73, Rest of World £44.

To subscribe to *Journal of Time Series Analysis* please use the order form on the Blackwell website: <http://www.blackwellpublishers.co.uk>, send an email to jnlinfo@blackwellpublishers.co.uk, or contact either of the following:

- Blackwell Publishers Journals, PO Box 805, 108 Cowley Road, Oxford OX4 1FH, UK. Tel: +44 (0)1865 244083, fax +44 (0)1865 381381
- Journals Marketing (JTSA), Blackwell Publishers, 350 Main Street, Malden, MA 02148, USA. Tel. +1 (781) 388 8200, fax +1 (781) 388 8210

SPECIAL OFFER for 1999

Electronic access included in the institutional subscription price to the print edition

Scandinavian Journal of Statistics

Theory and Applications

Edited by Steffen Lauritzen

The *Scandinavian Journal of Statistics* is a vital source of information for all those interested in the latest advances in the development of statistical methods, and their novel application in problems arising from substantive research problems. It is an essential journal for both professionals and students, and for college and university libraries.

Recent and forthcoming highlights:

- Non-parametric Bayesian Estimation of a Spatial Poisson Intensity, *J. Heikkinen & E. Arjas*
- Markov Random Fields with Higher-order Interactions, *H. Tjelmeland & J. Besag*
- Exact Sampling from a Continuous State Space, *D.J. Murdoch & P.J. Green*
- A Full Bayesian Non-parametric Analysis Involving a Neutral to the Right Process, *S. Walker & P. Damien*
- Estimating the Population Survival Function Using Additional Information Recorded Over Time: a Filter Based Approach, *T. Martinussen & T. H. Scheike*

Scandinavian Journal of Statistics ISSN 0303-6898

Published in March, June, September and December
Subscription Rates, Vol. 26/1999:

Institutions: Europe £96, N. America \$168, Rest of World £102

Individuals: Europe £38, N. America \$63, Rest of World £38

Reduced rates for members of the Bernoulli Society, The Institute of Mathematical Statistics, and the Netherlands Society for Statistics and Operations Research:

Europe £34, N. America \$63, Rest of World £34

Reduced rates for members of the Nordic Statistical Society:

Europe £16, N. America \$27, Rest of World £16

To subscribe to *Scandinavian Journal of Statistics* please use the order form on the Blackwell website: <http://www.blackwellpublishers.co.uk>, send an email to jnlinfo@blackwellpublishers.co.uk, or contact either of the following:

SUBSCRIPTION RATES

Subscription rates (post free) for volume 36 (1999) of the *Journal of Applied Probability* are as follows:

US\$232.50; \$A366.60; £141.00 for libraries and institutions;

US\$77.50; \$A122.20; £47.00 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
The University, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/99 \$00.70 + .20.

Research Papers

- 621 RICHARD DURRETT AND SEMYON KRUGYLAK. A new stochastic model of microsatellite evolution
- 632 IBRAHIM RAHIMOV AND GEORGE P. YANEV. On maximum family size in branching processes
- 644 PHILIPPE CARETTE. Modelling hierarchical systems by a continuous-time homogeneous Markov chain using two-wave panel data
- 654 TOLGA TÜFEKÇI AND REFIK GÜLLÜ. An iterative approximation scheme for repetitive Markov processes
- 668 K. BOROVKOV. On records and related processes for sequences with trends
- 682 J. P. IMHOF. On some equalities of laws for Brownian motion with drift
- 688 SHIQING LING. On the probabilistic properties of a double threshold ARMA conditional heteroskedastic model
- 706 ANTONIO DI CRESCENZO. A probabilistic analogue of the mean value theorem and its applications to reliability theory
- 720 NADER EBRAHIMI. Stochastic properties of a cumulative damage threshold crossing model
- 733 HARRI NYRHINEN. Large deviations for the time of ruin
- 747 STEPHEN WALKER AND PAUL DAMIEN. Characterizations, stochastic equations, and the Gibbs sampler
- 752 FABRICE GUILLEMIN AND DIDIER PINCHON. Excursions of birth and death processes, orthogonal polynomials and continued fractions
- 771 C. P. FARRINGTON AND A. D. GRANT. The distribution of time to extinction in subcritical branching processes: applications to outbreaks of infectious disease
- 780 JERZY JAWORSKI. Epidemic processes on digraphs of random mappings
- 799 DAMIAN CLANCY. Outcomes of epidemic models with general infection and removal rate functions at certain stopping times
- 814 J. GÅSEMYR AND TERJE AVEN. Asymptotic distributions for downtimes of monotone systems
- 825 CHANG C. Y. DOREA AND CÁTIA R. GONÇALVES. Search schemes for random optimization algorithms that preserve the asymptotic distribution
- 837 KEVIN RUTH. Favorable red and black on the integers with a minimum bet
- 852 JOHAN JONASSON. The random triangle model
- 868 ALEXANDER DUDIN AND SHOICHI NISHIMURA. A $BMAP/SM/1$ queueing system with Markovian arrival input of disasters
- 882 CHIA-LI WANG. On the transient delays of $M/G/1$ queues
- 894 LAURENT MASSOULIE AND ALAIN SIMONIAN. Large buffer asymptotics for the queue with fractional Brownian input
- 907 J. R. ARTALEJO AND A. GOMEZ-CORRAL. On a single server queue with negative arrivals and request repeated

Short Communications

- 919 JACEK WESOŁOWSKI. Poisson process via martingale and related characteristics
- 927 JIE MI. Optimal active redundancy allocation in k -out-of- n system
- 934 SHELDON M. ROSS AND SRIDHAR SESHADRI. Hitting time in an $M/G/1$ queue
- 941 ANTON BOVIER. Sharp upper bounds on perfect retrieval in the Hopfield model
