Medieval and Renaissance Studies

By THEODOR E. MOMMSEN

Edited by EUGENE F. RICE, JR., *Cornell University*

THESE essays deal with three major topics: the diplomatic and military history of Italy and Germany in the late medieval and early modern periods; Petrarch; and early Christian historiography, especially the historical thought of Augustine and Orosius. They touch on matters as various as the meaning of the Epiphany, early Renaissance miniatures, Italian *condottieri*, and the destruction of the Parthenon.

Most of the book's varied material, however, is brought to bear on the analysis of a single great problem—that of the complex transitions from classical to Christian conceptions of history in late antiquity and from medieval to modern ones during the Renaissance.

Petrarch's Testament

Edited and translated, with an Introduction, by THEODOR E. MOMMSEN

"THE original manuscript, written in Petrarch's own hand, seems to have disappeared shortly after the poet's death, and there is considerable variation in the text of the surviving manuscript copies and in the printed versions. The most important of these are here collated and the variant readings noted. Mommsen has also furnished a translation, the first into English, and a fully documented introduction that analyzes and explains the provisions of the Will and places the whole in its historical setting. Anyone familiar with the editor's erudition will need no assurance that the scholarly apparatus is impeccable."—*American Historical Review*
